We're bullish on Shopify shares & expect upside to guidance into 2Q26 earnings on Wednesday, 8/5. SHOP shares are +29% off May lows (vs. SPX +1%) & investor sentiment is improving across GMV/Revenue growth trajectory, Gross Margin & token implications, & SHOP's broader AI strategy. We project solid GMV growth supported by strength across SMB cohorts, enterprise, geographies, & emerging channels (POS, B2B). While int'l growth & Enterprise volume ramp may prove more volatile, we believe SHOP's 2Q Revenue growth guide should prove conservative. **Chase Card data** suggests 2Q U.S. CNP growth of +11% Y/Y, acceleration vs. +10% Y/Y in 1Q, though there remains concern around macro uncertainty tied to recent geopolitical activity. We believe macro exposure is limited, w/~16% of GMV cross-border, of which ~50% involves US inbound/outbound. We project 2026 Y/Y GMV growth of +29% (+28% FXN) & Revenue growth of +30% (+29% FXN). Gross Margins continue to face headwinds from Merchant Solutions mix shift, AI/LLM costs, & growth initiatives. We estimate that AI/LLM costs could drive ~160bps & ~40bps Y/Y headwind to 2026 Subscription & Total Gross Margins, though SHOP could mitigate incremental headwinds through model mix & deeper merchant monetization. SHOP is realizing leverage across each expense line item while managing annual FCF margins in the high-teens %'s. We project 2026 Gross Profit Dollar growth of +28% Y/Y, along with FCF margin of 18.0% (+60bps Y/Y). 3P data suggests upside to 2Q GMV, though FX tailwinds (~50bps expected tailwind in 2Q vs. ~200bps in 1Q) & Y/Y comps become less favorable through the year. **We believe investors generally expect GMV growth of +31%-32% in 2Q & +28%-30% in 3Q, Revenue growth of +31%-32% in 2Q & +28-30% in 3Q (i.e. High 20%'s guide), & Gross Profit Dollar growth of +28%-30% in 2Q & +27%-29% in 3Q (i.e. High 20%'s guide).**

Beyond fundamentals, there is debate whether META's Business Agent & the Meta Business Agent Platform could drive meaningful competitive risk. However, our checks suggest merchants are likely hesitant to enable large platforms, such as Meta, Google, and Amazon, to fully manage storefronts given less favorable cost structures (vs. SHOP), current reliance on advertising & e-commerce tools, & broader complexity managing storefronts. There are also investor concerns around potential industry consolidation & the competitive implications across Shop Pay's scale & growth outlook, though we believe SHOP's merchant & consumer adoption, data moat, & network advantages could prove challenging to replicate over time. Regarding agentic commerce, Editions provided 150+ product updates across the commerce stack, w/focus across agentic which should support merchant acquisition volume. **We continue to believe SHOP is well positioned as an AI beneficiary, w/ offerings across each layer of the agentic opportunity for e-commerce platforms — Traffic Channels, On-Platform, & Infrastructure** — supported by SHOP's data stack built on 20+ years of commerce data, demand conversion flywheel, AI merchant solutions, UCP leadership, and ability to reduce complexity across the merchant ecosystem. **We reiterate our Overweight rating & are establishing a December 2027 PT of $155 based on ~19x 2028E Gross Profit of $10.3B, further supported**

Summary Investment Thesis and Valuation

Investment Thesis

Shopify is a leading commerce enablement & infrastructure platform providing 2M+ merchants across 175+ countries tools to establish, scale, & manage their businesses. Shopify serves as a unified operating system for commerce across channels, verticals, and geographies while providing support across each step of the merchant journey. We believe SHOP is well positioned to deliver 25%+ GMV & Revenue growth supported by: 1) e-commerce secular shift & product optimizations; 2) core SMB merchant adoption, along with the shift upmarket toward enterprises; 3) growth channels including Shop Pay, offline & B2B; 4) international expansion; 5) deeper Payments penetration; & 6) continued strong MRR growth, led by ramping Plus adoption. We project solid Operating Margin & FCF margin expansion supported by GMV & Revenue growth along with continued cost discipline/efficiencies.

Valuation

We're establishing a December 2027 PT of $155 (vs. prior $150 Dec-26 PT) based on ~19x 2028E Gross Profit of $10.3B. Our DCF model further supports an implied $155 estimated value and employs a ~15% WACC and a +15% terminal growth rate.

by our DCF model. We project 2025-2028 3-year CAGRs of +24% for GMV, +25% for Revenue, +23% for Gross Profit, +35% for Operating Income, & +27% for FCF. SHOP maintains a Rule of 40 financial profile (Revenue growth + FCF margin), which we view as best in class at a time when mega-cap tech peers face margin, capex, & FCF headwinds. Given SHOP's premium growth profile, secular leadership, & differentiated AI leadership, we are adding SHOP to the JPM Analyst Focus List as a Growth Idea. Please see our detailed preview table below and Figure 1 for our view of what we see as general buy-side expectations vs. JPMe/ consensus and management guidance.

Table 1: SHOP 2Q26 Earnings Preview

SHOP (Overweight, $155 PT)	
Call Details	• Wednesday, 8/5. 8:30AM ET Conference Call: shopify.com/investors
Investor Sentiment	• **Improving, But Still Debated.** 3P data suggests upside to 2Q GMV, & we believe investors continue to debate the timing & contribution of Enterprise volume ramp & durability of Int'l growth, especially as FX tailwinds (~50bps expected tailwind in 2Q vs. ~200bps in 1Q) & Y/Y comps become less favorable through the year. Our conversations suggest improving investor sentiment, especially as US spending trends & macro have proven resilient. However, there is concern around magnitude of Gross Profit Dollar growth, especially as Sidekick adoption drives higher token costs. We believe investors generally expect GMV growth of +31%-32% in 2Q & +28%-30% in 3Q, Revenue growth of +31%-32% in 2Q & +28-30% in 3Q (i.e. High 20%'s guide), & Gross Profit Dollar growth of +28%-30% in 2Q & +27%-29% in 3Q (i.e. High 20%'s guide).
Our View	• **Remains Our Top Idea.**We project solid GMV growth supported by strength across SMB cohorts, enterprise, geographies, & emerging channels (POS, B2B). While int'l growth & Enterprise volume ramp may prove more volatile, we believe SHOP's 2Q Revenue growth guide should prove conservative. **Chase Card data** suggests 2Q U.S. CNP growth of +11% Y/Y, acceleration vs. +10% Y/Y in 1Q, though there remains concern around macro uncertainty tied to recent geopolitical activity. We believe macro exposure is limited, w/~16% of GMV cross-border, of which ~50% involves US inbound/outbound. We project 2026 Y/Y GMV growth of +29% (+28% FXN) & Revenue growth of +30% (+29% FXN). 2Q Gross Profit Dollar growth is expected to decelerate to mid-20%'s (+32% in 1Q) and Gross Margins continue to face headwinds from Merchant Solutions mix shift, AI/LLM costs, & growth initiatives. We estimate that AI/LLM costs could drive ~160bps & ~40bps Y/Y headwind to 2026 Subscription & Total Gross Margins, though SHOP could mitigate incremental headwinds through model mix & deeper merchant monetization. SHOP is realizing leverage across each expense line item while managing annual FCF margins in the high-teens %'s. We project 2026 Gross Profit Dollar growth of +28% Y/Y, along with FCF margin of 18.0% (+60bps Y/Y). We expect capital returns under SHOP's ~$1.5B authorized share repurchases.
Key Topics	• **Agentic Commerce.** SHOP's data stack built on 20+ years of commerce data, demand conversion flywheel, AI merchant solutions, UCP leadership, and ability to reduce complexity across the merchant ecosystem should position Shopify as a leader across agentic commerce. • **Macro.** SHOP's exposure to a less favorable macro environment is generally more limited, w/cross-border trade only accounting for ~16% of GMV in 1Q & we believe growth was mostly volume driven during last year's elevated tariff environment. • **Enterprise.** Demand remains strong, & the number of merchants generating $100M+ GMV has grown ~2x over the past two years while revenue contribution has accordingly grown ~200bps+ over the past two years. While SHOP is driving Enterprise client wins, we believe the timeline to fully scale & integrate Enterprise merchants has remained broadly consistent around ~18 months. • **Int'l.** Europe 2Q GMV growth accelerated to +48% Y/Y (+35% FXN), up from +45% in 1Q, but Y/Y comps become meaningfully more challenging throughout 2026. After Shopify Payments launched in 15 new European markets & Mexico in 2025, we expect continued product expansion. • **Channels.** Offline GMV growth accelerated to +33% in 1Q (vs. +29% in 4Q), B2B GMV grew +80% Y/Y & Shop App GMV increased +70% Y/Y. Shopify Payments processed $67B of GMV in 1Q (+41% Y/Y) & Shop Pay GMV grew +59% Y/Y to $35B. SHOP's new partner earning model should incentivize agencies to onboard & scale merchants. • **MRR.** We project MRR Y/Y growth of +18% in 2Q (vs. +16% in 1Q) & +15% in 2026, & we note 1Q was final quarter where SHOP faced Y/Y MRR growth headwinds from rollout of 3-month trials. We estimate Plus price increases could drive ~$90M+ incremental annualized Sub Solutions Revenue in '27, or ~50bps to annualized growth. • **Gross Profit.** Subscription Margins are benefitting from scale & efficiencies, partially offset by increased AI costs. Gross Margin pressured by mix shift toward lower-margin Merchant Solutions. • **Sidekick.** Adoption remains strong, w/Weekly Active Shops growing +4x Y/Y in 1Q. Our checks suggest positive feedback across Sidekick, with opportunity to improve front-end capabilities.

Investment Thesis, Valuation and Risks

Shopify *(Overweight; Price Target: $155.00)*

Investment Thesis

Shopify is a leading commerce enablement & infrastructure platform providing 2M+ merchants across 175+ countries tools to establish, scale, & manage their businesses. Shopify serves as a unified operating system for commerce across channels, verticals, and geographies while providing support across each step of the merchant journey. We believe SHOP is well positioned to deliver 25%+ GMV & Revenue growth supported by: 1) e-commerce secular shift & product optimizations; 2) core SMB merchant adoption, along with the shift upmarket toward enterprises; 3) growth channels including Shop Pay, offline & B2B; 4) international expansion; 5) deeper Payments penetration; & 6) continued strong MRR growth, led by ramping Plus adoption. We project solid Operating Margin & FCF margin expansion supported by GMV & Revenue growth along with continued cost discipline/efficiencies.

Valuation

We're establishing a December 2027 PT of $155 (vs. prior $150 Dec-26 PT) based on ~19x 2028E Gross Profit of $10.3B. Our DCF model further supports an implied $155 estimated value and employs a ~15% WACC and a +15% terminal growth rate.

Risks to Rating and Price Target

Risks to downside include: **1)** Secular shift toward e-commerce slows, limiting GMV, GPV, and Revenue growth; **2)** GMV & Revenue growth decelerate faster than expected; **3)** Agentic commerce & AI/LLM platforms disrupt the e-commerce industry; **4)** Product velocity slows & SHOP cannot drive greater merchant acquisition & adoption of solutions; **5)** Softer consumer spending & sentiment weigh on e-commerce demand and merchant budgets; & **6)** SHOP is balancing margin expansion with growth investments, limiting Operating & FCF margins.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
