Following an initial offer from Regis Resources (RRL.AX; Not Rated) to acquire Vault Minerals (VAU.AX; Not Rated) under a merger-of-equals, Genesis Minerals (GMD.AX; Not Rated) has submitted a binding proposal to merge with VAU via a Scheme of Arrangement, exceeding the original bid, and according to the company, would create a new Australian gold major focused on the prolific Leonora-Laverton District. Per the announcement, **VAU shareholders would receive 0.7629 new fully paid ordinary shares in GMD plus A$0.475 in cash for each VAU share held** (a cash/scrip mix with a mix-and-match facility, subject to the aggregate ~A$500mn cash and ~803.4mn GMD shares on offer). Based on GMD's closing share price of A$6.29/sh on the 3rd of July 2026, **the offer values VAU at ~A$5.274/sh (~A$5.6bn fully diluted equity value)**, representing a ~14.5% premium to the implied RRL scheme value of A$4.61/sh, a ~15.7% premium to VAU's last close, and a ~17.2% premium to VAU's undisturbed price prior to the RRL announcement, where upon Scheme Implementation **GMD/VAU shareholders would own ~59.8%/~40.2% of the combined entity respectively (fully diluted).**

On strategic rationale, the merger is intended to create a new Australian gold major anchored in the Tier 1 Leonora-Laverton district, with **pro forma production of 600-700kozpa** (all 100%-owned in Western Australia; focused on the 400-500kozpa from the Leonora-Laverton district). The transaction would bring together a combined mineral endowment of **~9.4Moz in Ore Reserves and ~33.6Moz in Mineral Resources**, making it the dominant producer in the district, including 100% ownership and control of all operating assets. Per the announcement, the combined group would be underpinned by a strong balance sheet with **~A$611mn in pro forma net cash and ~A$1.3bn in pro forma liquidity**, positioning the enlarged group as well-funded for growth and expedited shareholder returns, with a pro forma market capitalisation of ~A$12.6bn providing "enhanced scale, liquidity and global market relevance".

On synergies, GMD estimates potential **post-tax, undiscounted synergies of ~A$2.0bn** (net of transaction costs, stamp duty and the RRL break fee), **including ~A$1.5bn in pre-tax, undiscounted synergies over ten years that are unique to a GMD/VAU** combination and only available given the proximity of the two companies' operations at Leonora (within 35km) and Bardoc-Mt Monger (see our WA gold map). The largest identified benefits arise from:

- Processing Tower Hill ore through VAU's King of the Hills (KOTH) mill, **avoiding ~A$715mn of growth capex** associated with building the Tower Hill mill and expanding the Laverton mill with lower-cost processing of GMD ore through KOTH;

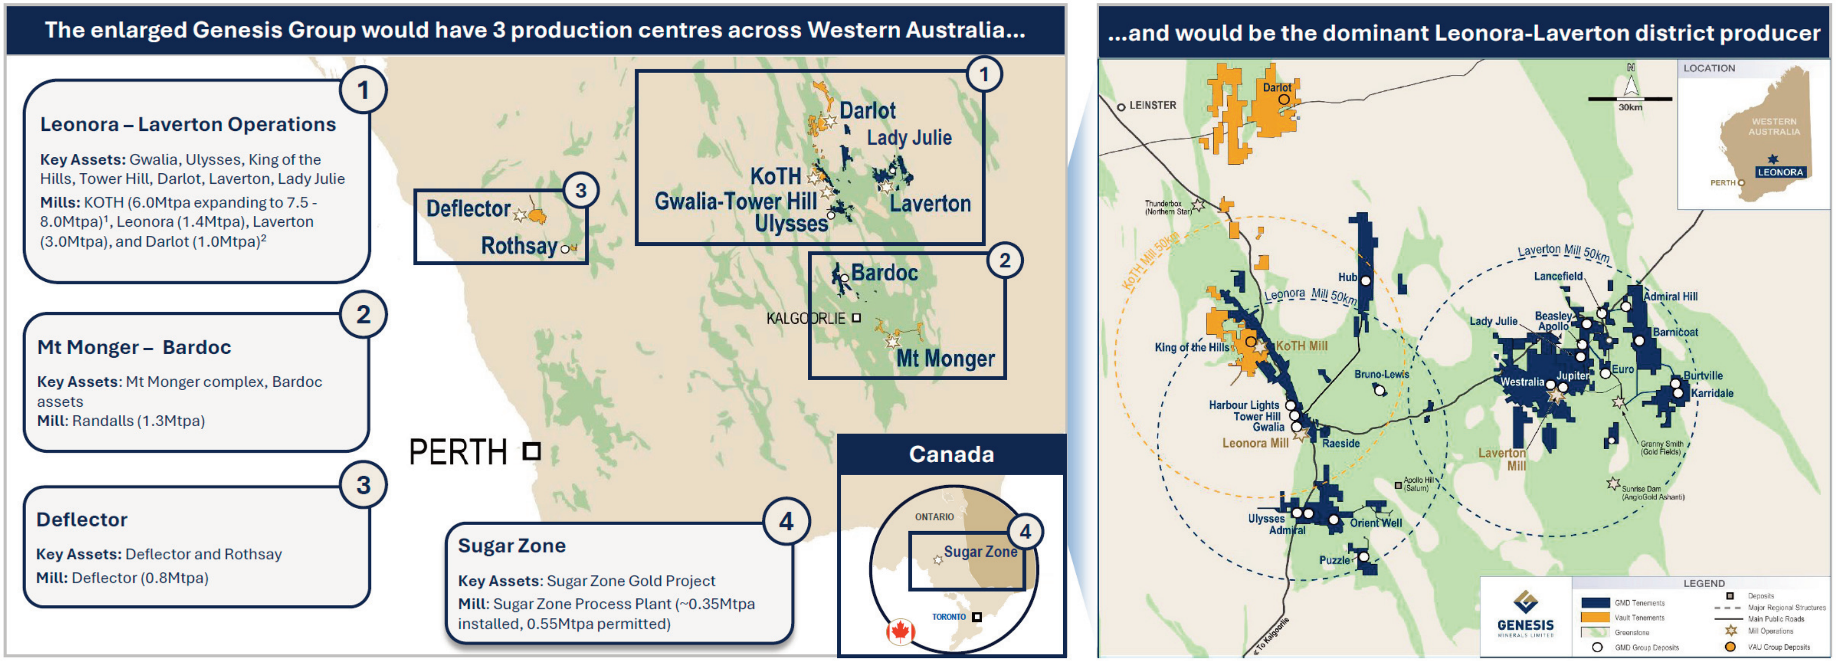
- G&A rationalisation in the Leonora region;
- Unlocking GMD's free-milling Bardoc ore via the Mt Monger mill;
- Open pit mining cost reductions via Genesis Mining Services, and mine plan optimisations;
- ~A$120mn of corporate cost savings; and
- >A$420mn of tax benefits (net of stamp duty and the RRL break fee).

Additional, yet-to-be-quantified synergies and operational flexibilities have also been flagged, including displacing low-grade KOTH open pit feed, re-optimising KOTH pit stages, potentially deferring the high-strip Westralia open pit (~23:1 LOM strip), and avoiding Darlot processing refurbishment costs.

GMD has been informed that the VAU Board has unanimously determined the proposal constitutes a "Vault Superior Proposal" under the RRL Scheme Implementation Deed. **RRL's five business day matching period has commenced and expires at 11:59pm (AWST) on Friday the 10th of July 2026**, until which time VAU cannot enter into a binding agreement with GMD in relation to the Proposed Scheme. RRL notes they are considering their position.

We are **Not Rated** on VAU, GMD, and RRL, and make no changes to our earnings estimates.

Exhibit 1: GMD & VAU combined portfolio



1. KOTH mill expansion from 5.3Mtpa to 7.5 - 8.0Mtpa currently anticipated to be completed in Q2 FY27; 2. Darlot mill is currently on care and maintenance.

Exhibit 2: Genesis estimates “substantial & unique synergy potential”

Total Undiscounted Synergies[1]

A$2.0bn

(Post-tax, including tax effect of unique synergies)

Including

Cost savings and synergies unique to this deal

A$1.5bn

(Pre-tax, undiscounted)[2]

Capital Savings

- Enabling Tower Hill ore to be processed through KOTH mill[3], avoiding construction of Tower Hill mill and expansion of Laverton mill capacity
- Includes growth, non-process infrastructure, tailings storage facility and sustaining capital, for a total capital saving of A$715m

Corporate & Tax Savings

- Corporate cost savings estimated by Genesis at ~A$120 million, plus;
- At least A$420 million of tax benefit, including the step-up in depreciable tax base (net of stamp duty, Regis break fee, and the tax effect of the quantified unique synergies and corporate cost savings)[5]

Operating Benefits and Cost Savings

Conservative estimate of savings and benefits associated with optimising the right ore to the right mills, including:

Lower processing costs
Cost savings by processing Genesis ore through the lower cost KOTH mill (net of additional haulage costs to KOTH vs. Tower Hill mill)[4]

Regional G&A efficiencies
G&A savings associated with rationalising overheads and administration in the Leonora region

Unlock Bardoc free-milling ore
Unlocking Genesis’ free-milling ore at its Bardoc assets via processing at Mt Monger mill

Reduction in group open pit mining costs
Embedding KOTH’s owner-operator fleet into GMS and utilising GMS across the enlarged Group, enabling optimisation of talent and equipment between sites, including KOTH and Tower Hill given their similar size and location

Cautionary statement
Investors are cautioned that there is currently no binding agreement between Genesis and Vault in relation to the Proposed Scheme.
Accordingly, investors should not place undue reliance on the description / quantification of synergies and other benefits of the Proposed Scheme at this time

1. Total synergies are shown on a post-tax, undiscounted basis across ten-years and are net of stamp duty and break fee; 2. Unique synergies are shown on a pre-tax undiscounted basis across a ten-year period; 3. Genesis estimates this would result in an indicative capital expenditure saving of A$715m; 4. Lower cost with regards to Genesis’ proposed Tower Hill mill; 5. Corporate cost savings estimated by Genesis, assumes removal of duplicate corporate costs after a period of integration of the businesses. Tax benefit is expected undiscounted estimate of tax savings under a ten-year depreciable life from an uplift in the tax value of depreciable assets and inventory arising from the tax purchase price allocation, net of expected stamp duty for the transaction, break fee payable to Regis, and increased taxes attributable to the unique synergies.

Exhibit 3: GMD's other potential synergies and operational flexibilities

Infrastructure	▸ Subject to economic conditions, the enlarged Genesis Group would have the **flexibility to utilise or expand the operational 1.4Mtpa Gwalia mill to avoid the capital costs associated with refurbishment of the Darlot processing facility,** as contemplated in the Regis proposal ▸ Potential to liberate Laverton mill capacity to **accelerate development of Genesis' Laverton and Lady Julie assets**
Mine optimization	▸ Introduction of Genesis ore to the KOTH mill may enable the KOTH open pit stages 2-5 to be re-optimised based on delivery of highest value for the combined portfolio ▸ Potential to **defer or avoid costs associated with development and operation of Genesis' high strip ratio Westralia open pit** (23:1 LOM strip ratio) ▸ Optimisation of underground mining (fleet, personnel, technical expertise, infrastructure, etc) and shared technical expertise
Operational flexibility	▸ Potential to use ore from the Tower Hill project to displace low grade open pit feed ore at KOTH which could: • **Materially increase production from KOTH**[1], and; • Enable the building of sizeable stockpiles for operational optionality / "future proofing"[1]
Other	▸ Water supply flexibility at Leonora ▸ Centralised supply chain hubs (spares, purchasing power, inventory optimisation, store and freight consolidation) ▸ Potential to **unlock further resources in the region** by re-prioritising or accelerating exploration.

1. Potential for material increase in KOTH production subject to the outcome of further technical and operational studies, and stockpile operational optionality subject to prevailing economic conditions.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.
