The global pushback to Chinese trade has intensified in recent years, with economies such as the US and EU increasingly concerned with large bilateral trade imbalances. But it's not just Western economies that are taking aim at Chinese trade, with partners such as India, Mexico, and Korea having opened a number of anti-dumping investigations into imports from China in recent years (e.g. on metals, chemicals, plastics, and more). In fact, the number of harmful trade measures implemented on China increased 75% between 2019 and 2025. Dependence on China for critical goods such as graphite and rare earths also remains a sticking point. Meanwhile, China has been strengthening its retaliatory toolkit in recent months to counter foreign extraterritorial laws.

Despite rising trade tensions, however, China's trade footprint remains strong. It continues to be the world's largest goods exporter – a spot it has held since 2009. In 2025, more than 80 economies considered China their top goods import source and 36 regarded China as their top export destination. China also continues to engage in trade liberalisation, with c40% of its trade taking place with existing FTA partners.

Meanwhile, China's trade corridors are shuffling eastward. The share of China's exports destined to ASEAN (especially Vietnam) increased by 5ppt over 2016-25 as its share to the US fell by 7ppt. A greater share of China's exports now go to ASEAN (18%) and the EU (c15%) than to the US (10%). It is also importing more agricultural goods from Brazil and Australia amid ongoing trade tensions with the US and investing more in ASEAN economies as the world's third largest source of FDI.

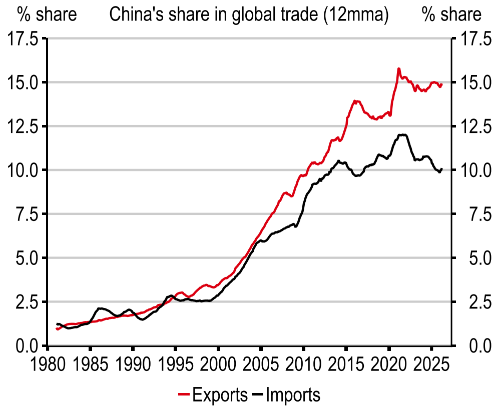
But ongoing US-China trade tensions have also raised concerns around the risk of tariff-induced diversion of Chinese products from the US to other markets, like the EU (see *EU-China trade tensions: Three months to avoid a trade war?*, 7 July 2026). However, evidence suggests that although the share of Chinese value-added embedded in Vietnamese exports to the US has risen, a negligible share of the boom in Mexico's exports to the US can be attributed to Chinese transshipment.

Against this backdrop, we take a closer at how China's role in global trade has evolved in recent years.

This is our latest report on the Trade & Capital Flows theme. If you want to subscribe to any of our nine big themes, *click here*.

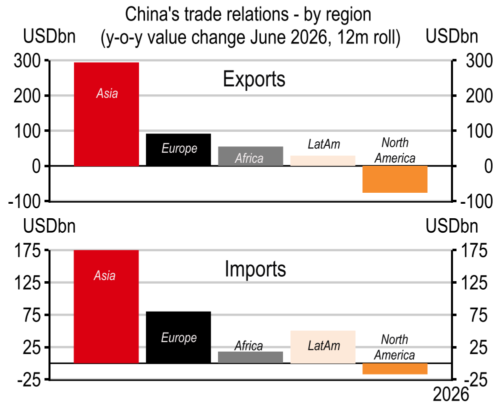
How are China's trade relations with the world shaping up?

1. China's share in global exports has strengthened but its import share is down



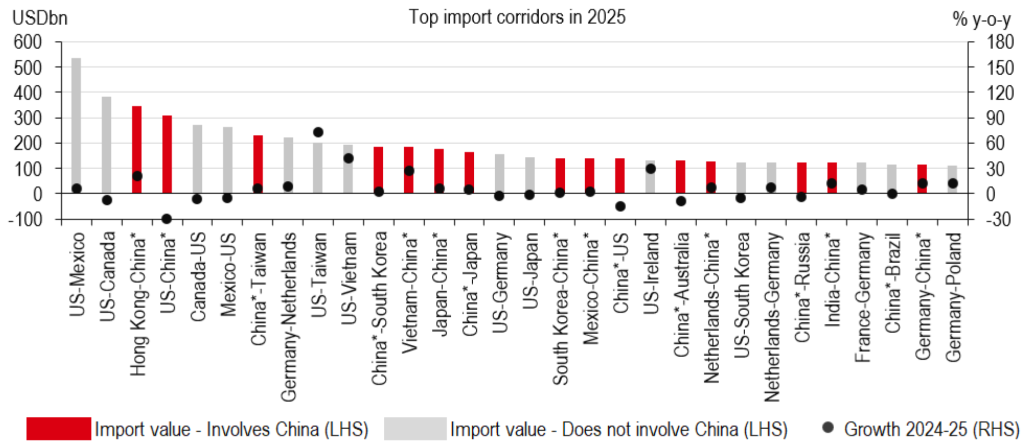
Source: Macrobond. Note: Latest data for March 2026

2. Its trade with Asia continues to strengthen as it diversifies away from North America



Source: Macrobond. Note: Mexico is included as part of LatAm.

3. Half of the top 30 goods trade corridors in 2025 involved China

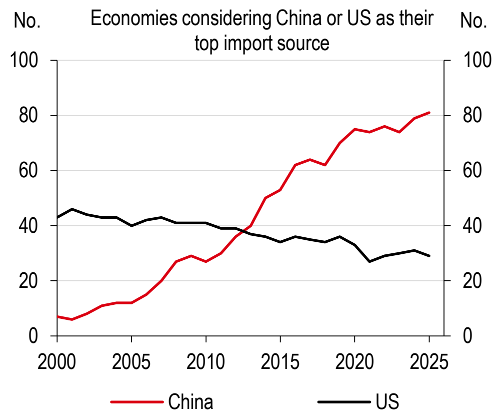


Source: IMF, HSBC

4. Nearly 40 economies now consider China their top export destination…

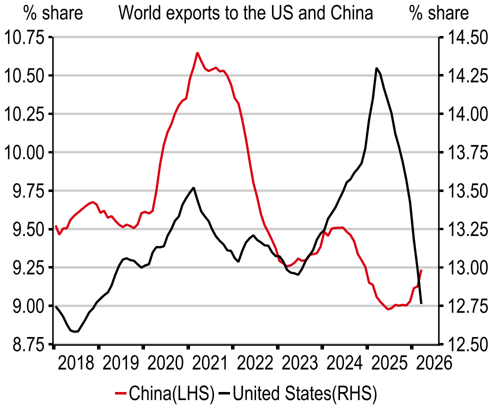
Source: HSBC, IMF

5. …and around double that regard China as their top import source



Source: HSBC, IMF

6. Other economies are relying less on China and the US as export destinations…

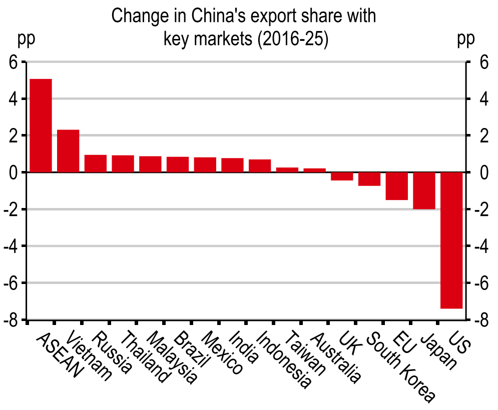


Source: Macrobond

7. …while import dependence on China has grown but flat-lined since 2025

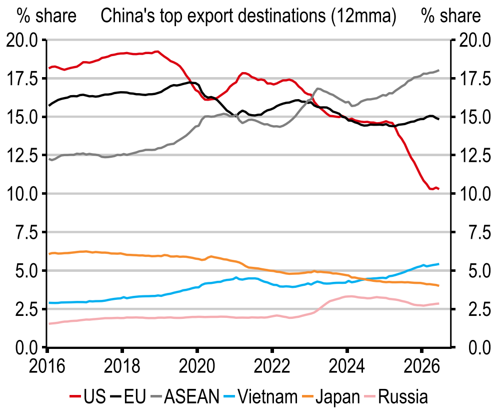
Source: Macrobond

8. ASEAN's share in Chinese exports has grown at the expense of the US's…



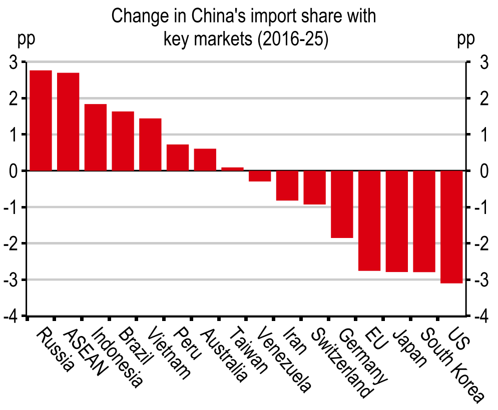
Source: HSBC, Macrobond

9. …a trend that started after the first US-China tariff war



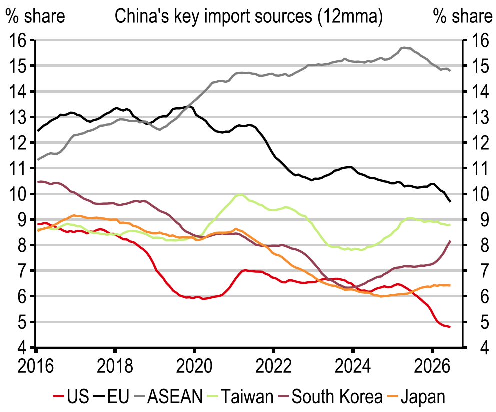
Source: Macrobond

10. Russia, ASEAN, and Brazil have gained import market share in China…



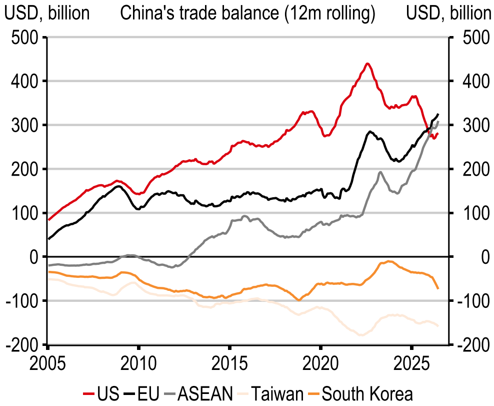
Source: HSBC, Macrobond

11. …with c15% of Chinese imports now sourced from Southeast Asian partners



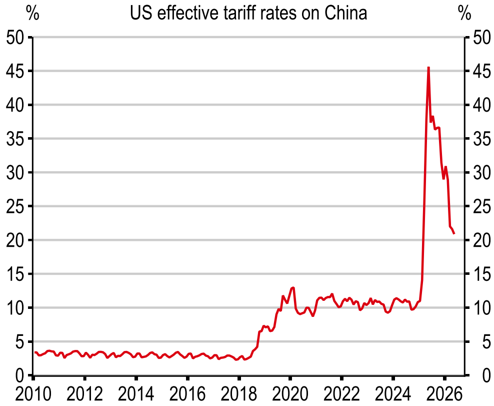
Source: Macrobond

12. China's trade surplus with the US has narrowed but widened with the EU…



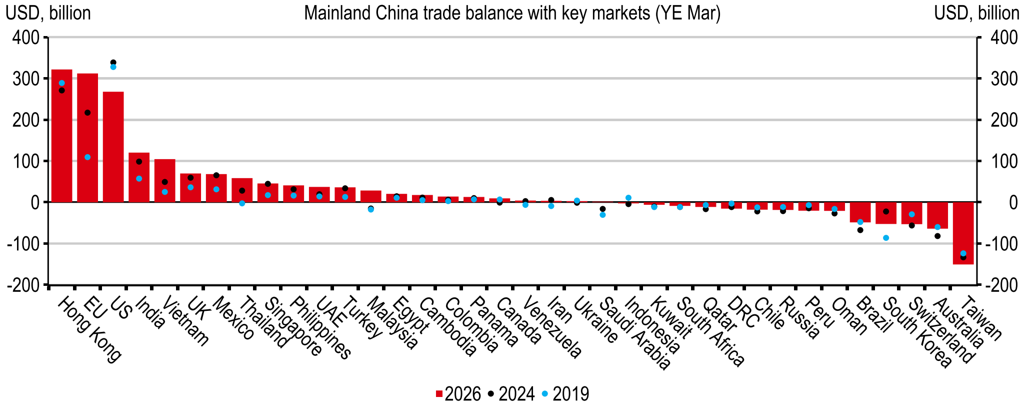
Source: Macrobond

13. …and the US raised tariffs significantly on Chinese imports last year



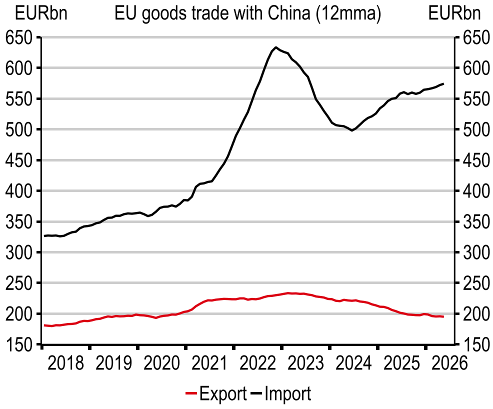
Source: Macrobond, HSBC. Note: Based on custom duties collected and imports.

14. Trade surpluses have increased with manufacturing importers (EU, India, Vietnam, Mexico)



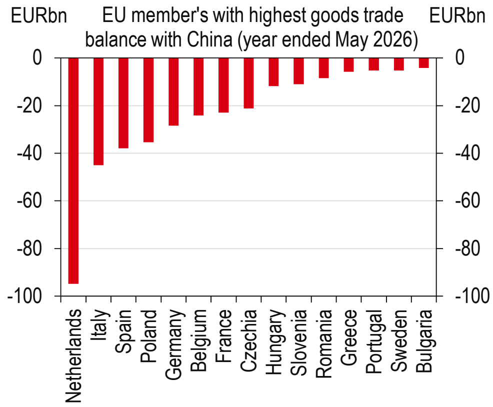
Source: Macrobond, IMF

15. The EU's trade deficit with China has risen to the equivalent of EUR1bn per day…



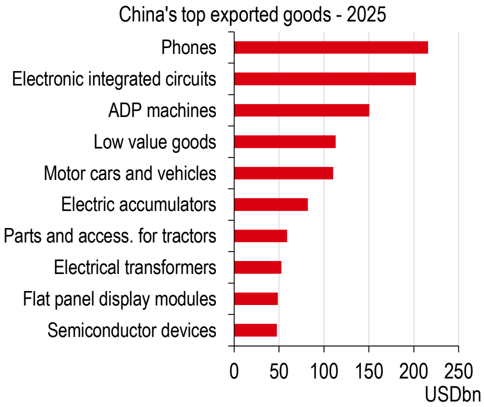
Source: Macrobond

16. ...with all EU members now running a goods deficit with the economy



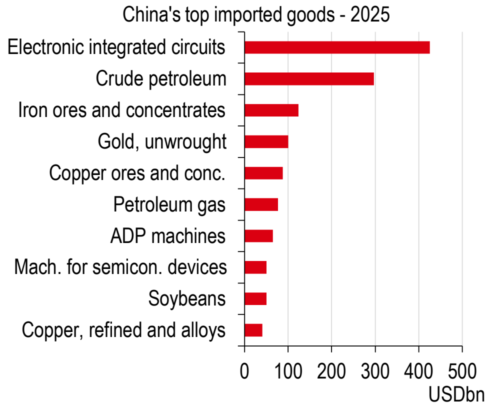
Source: Macrobond. Note: Data for select EU members shown.

17. China's top exports are electronics and autos…



Source: GACC. Note: Low value goods benefit from simplified customs procedures.

18. …and its top imports are electronic integrated circuits, crude oil, and iron ore

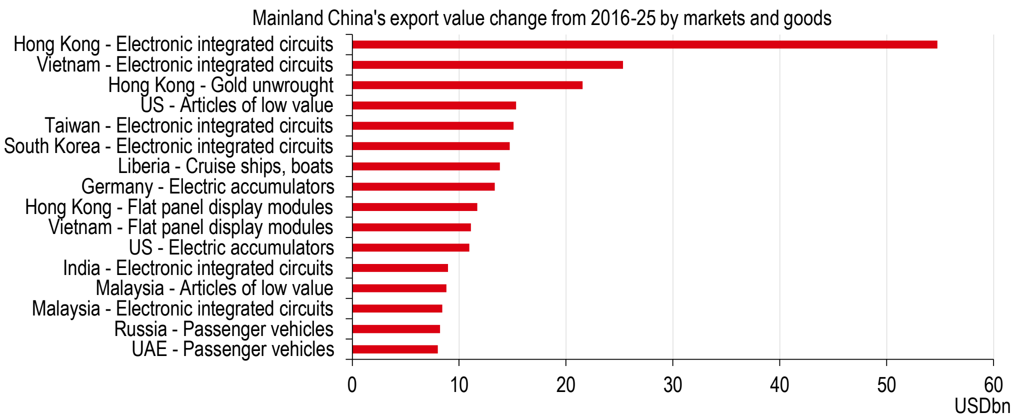


Source: GACC

19. Exports and imports of key goods have risen across the board in nominal terms driven, in part, by higher prices of electronics components and oil…

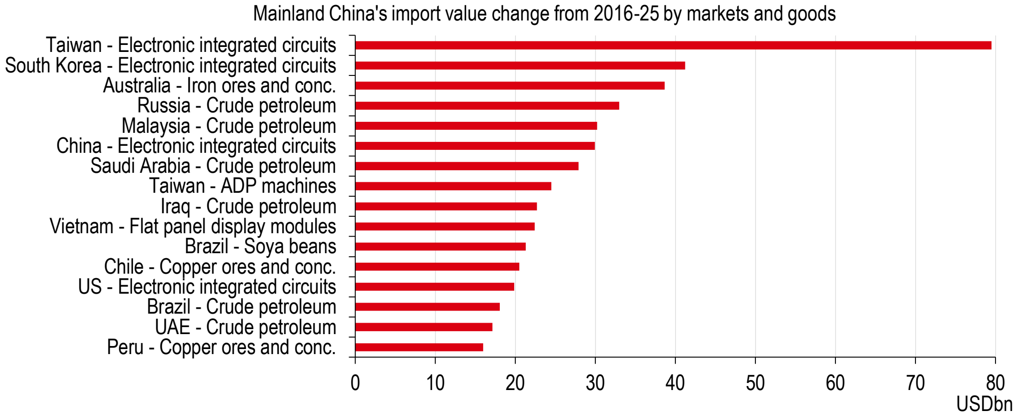
Source: GACC

20. …with exports of electronic integrated circuits to Hong Kong and Vietnam rising notably over the past nine years…



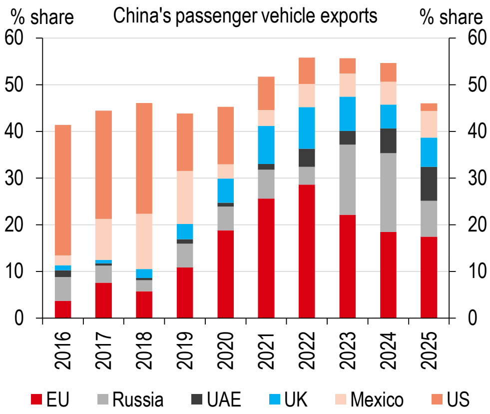
Source: GACC, HSBC. Note: 99% of Hong Kong's exports are re-exports, with 42% from mainland China. This is equivalent to 7% of mainland Chinese goods being re-exported via Hong Kong in 2025, with the US and Vietnam ranking as Hong Kong's top re-export destinations in 2025 (behind mainland China itself). Nearly all Hong Kong's exports of electronic integrated circuits are re-exports.

21. …while electronic integrated circuits from Taiwan and Korea, iron ore from Australia, and crude oil from Russia and Malaysia increased the most on the import side



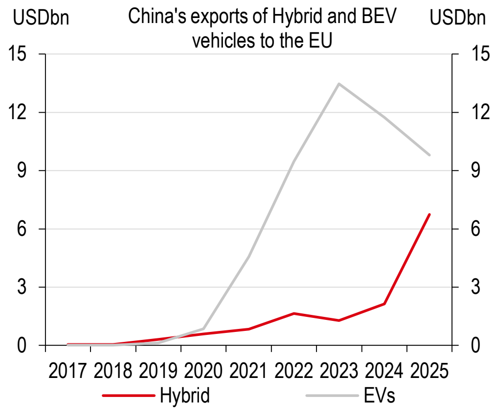
Source: GACC, HSBC

22. The share of China's car exports that go to the EU has declined...



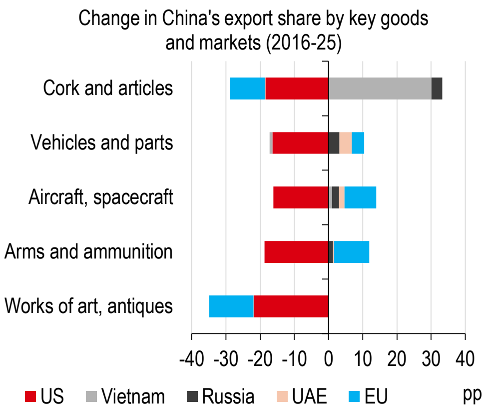
Source: GACC

23. ...even as its exports of hybrid cars to the bloc has surged, in value terms



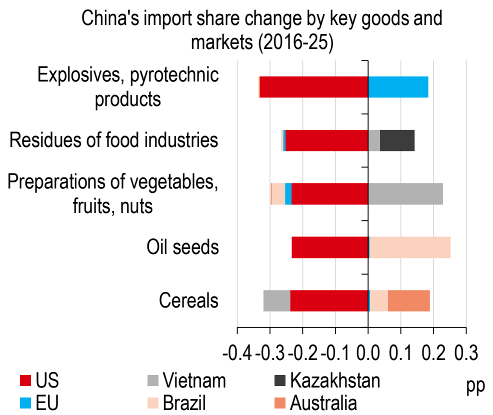
Source: GACC

24. EU has been a key destination for China's export diversion from the US…



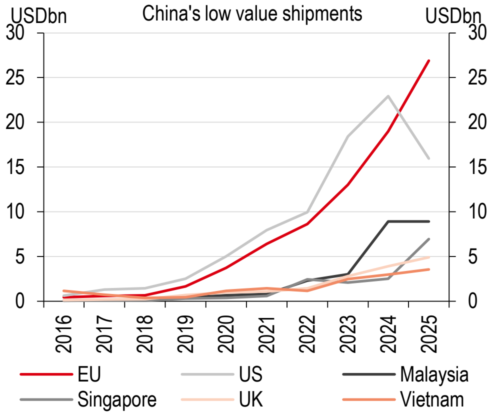
Source: GACC. Note: Products with highest decline in share with the US selected.

25. …while China is now sourcing key agri goods more from Brazil and Australia



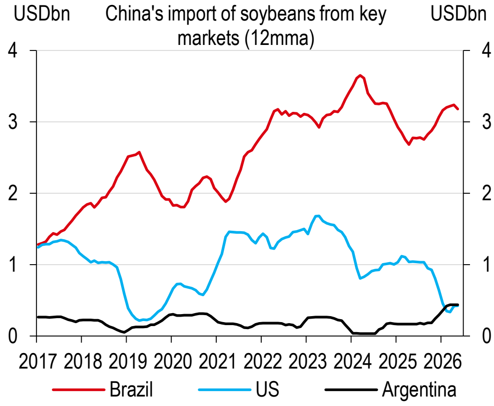
Source: GACC Note: Products with highest decline in share with the US selected.

26. Low value exports to the US are down after the de minimis rule was scrapped



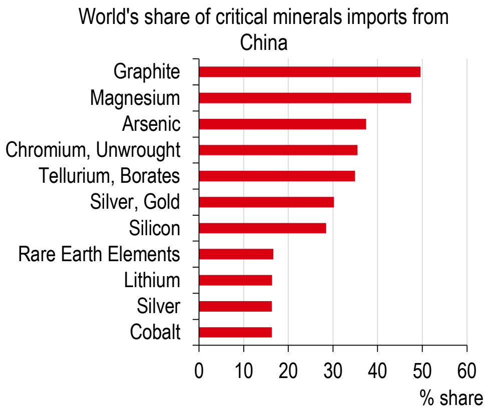
Source: GACC. Note: The US removed the de minimis exemption, which allowed low value goods (<USD800) to be imported without paying tariffs and other duties in 2025.

27. Soybean imports from the US are down, though this picked up again recently



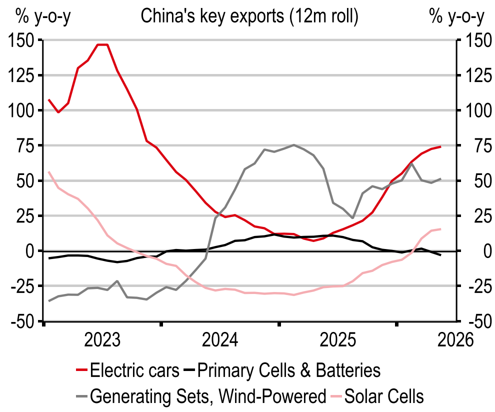
Source: GACC

28. The world relies heavily on China for critical minerals like graphite and rare earths…



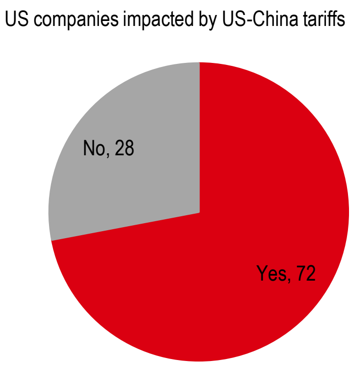
Source: ADB, WTO database. Note: Data for 2024

29. …and key energy transition products like wind turbines and solar cells



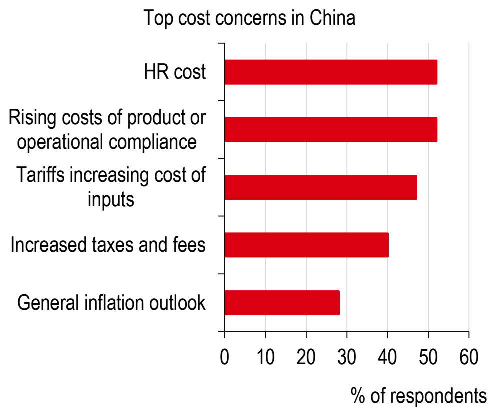
Source: Macrobond

30. The bulk of US companies operating in China have been impacted by tariffs…



Source: US-China Business Council. Note: 2026 survey. % share.

31. …with this being one of their top three cost concerns there

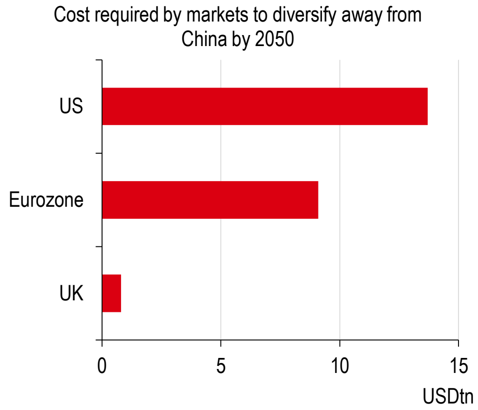


Source: US-China Business Council. Note: 2026 survey.

32. Some are reassessing their China supply chains by diversifying...

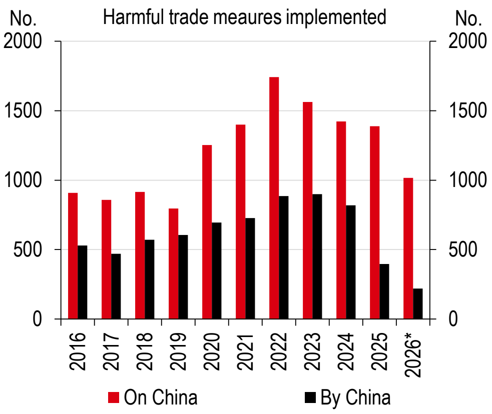
Source: US-China Business Council. Note: 2026 survey.

33. …but for the West, USD24trn may be required to move away from China by 2050



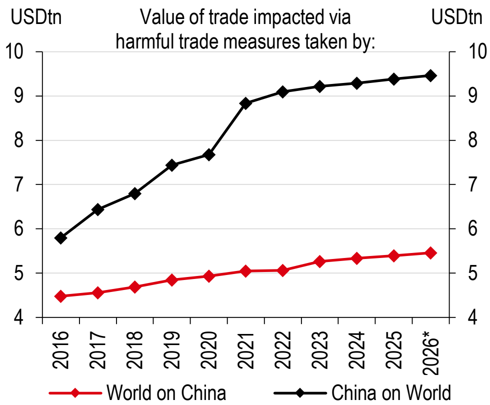
Source: EY-Parthenon study, FT. Note: Values based on replicating the infrastructure, research, software, manufacturing and supply chains reliant on China in critical industries.

34. Harmful trade measures on China were up 75% between 2019 and 2025…



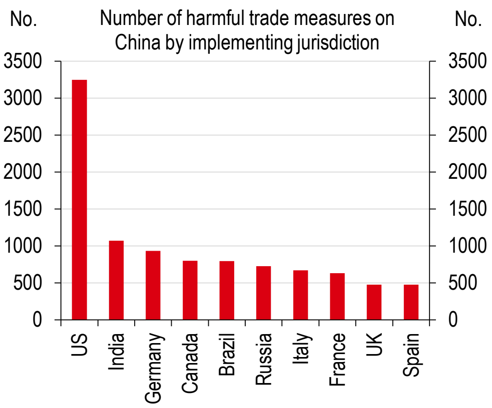
Source: Global Trade Alert. Note: * refers to YTD 17 July 2026.

35. …but the measures taken by China impacted a larger amount of trade



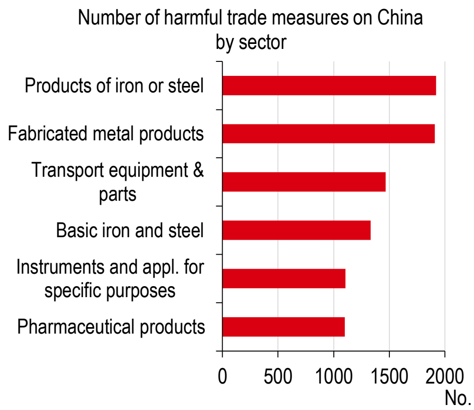
Source: Global Trade Alert. Note: * refers to YTD 17 July 2026.

36. The US has imposed the highest number of harmful measures on China…



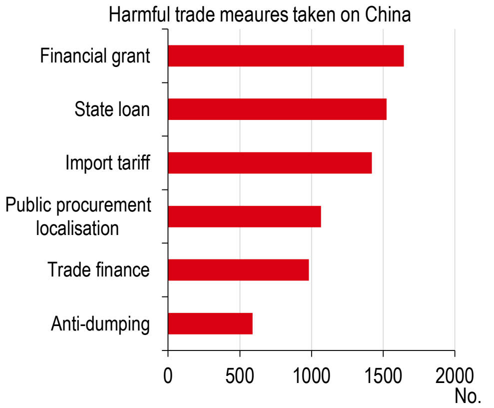
Source: Global Trade Alert. Note: Data taken from 2016 to YTD 17 July 2026.

37. …and partners have targeted metals and vehicles the most



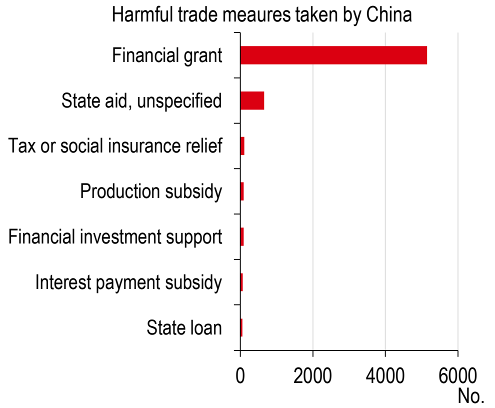
Source: Global Trade Alert. Note: Data taken from 2016 to YTD 17 July 2026.

38. Financial grants, state loans and tariffs were the top measures against China…



Source: Global Trade Alert. Note: Data taken from 2016 to YTD 17 July 2026. Not all measures implemented shown.

39. …while financial grants were the most harmful trade measure applied by China

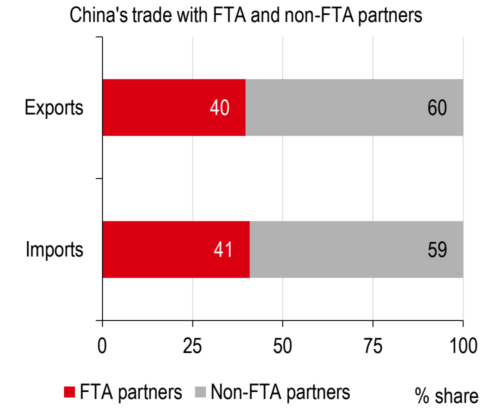


Source: Global Trade Alert. Note: Data taken from 2016 to YTD 17 July 2026. Not all measures implemented shown.

40. China has more than 20 FTAs in effect and 10 under negotiation…

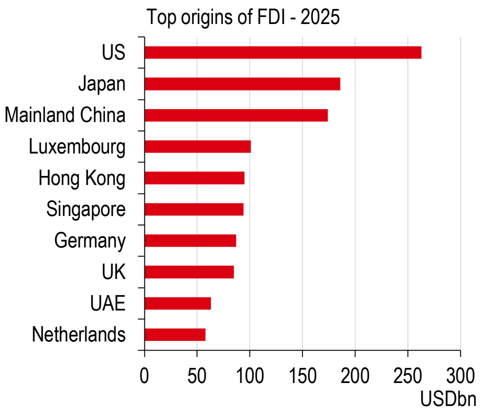
Source: MOFCOM

41. …with around 40% of its goods trade taking place with FTA partners



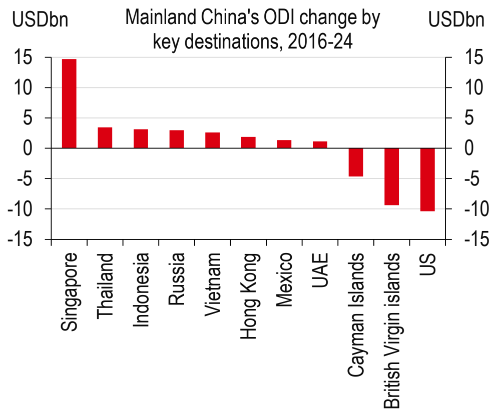
Source: GACC. Note: Data for 2025

42. China is one of the top foreign investors globally…



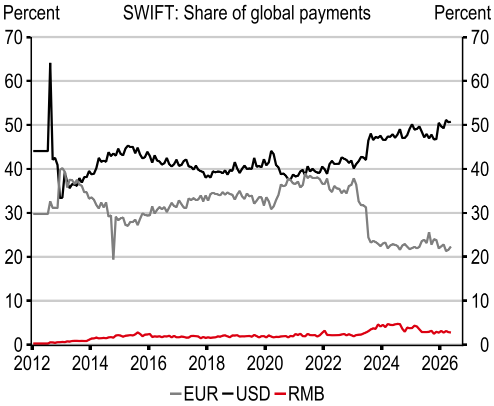
Source: World Investment Report, UNCTAD

43. …and is increasingly investing in ASEAN economies



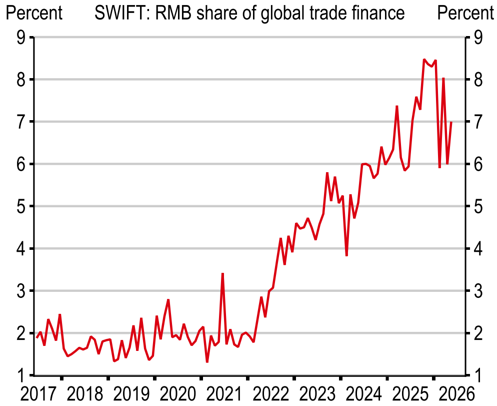
Source: CEIC

44. Today, the RMB accounts for less than 3% of global payments…



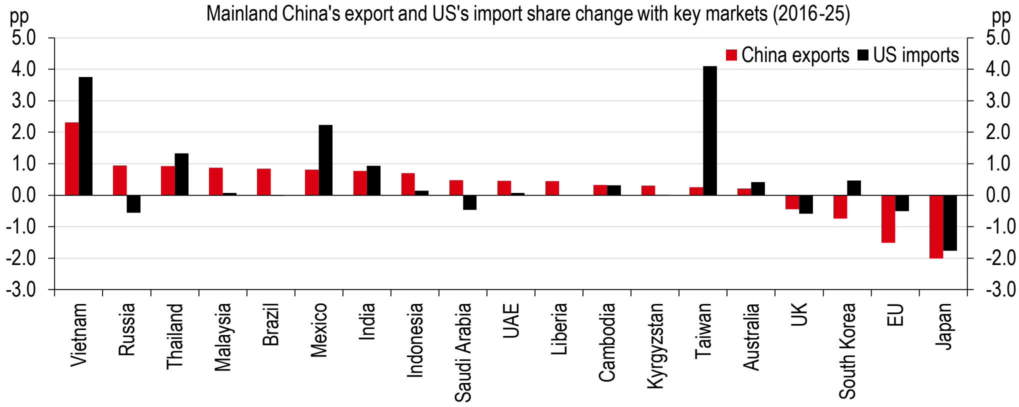
Source: Macrobond. Note: Latest data for May 2026.

45. …but has risen in importance for use in trade finance



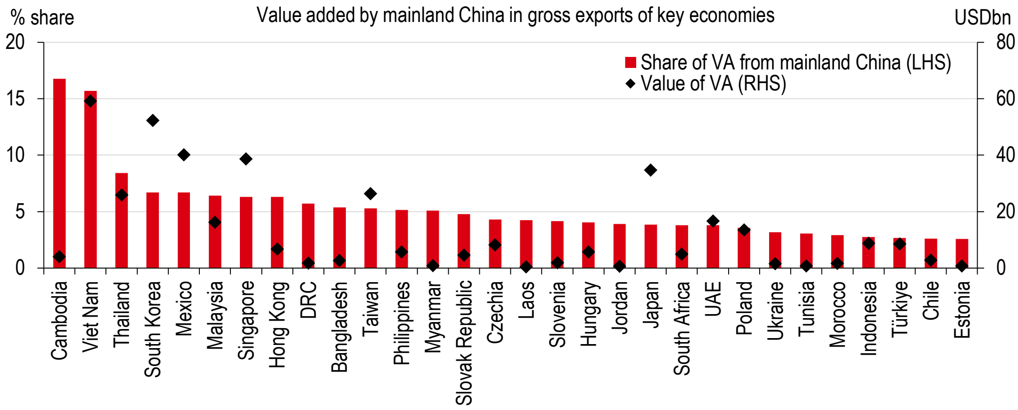
Source: Macrobond. Note: Latest data for May 2026.

46. Mainland China's export shares to Vietnam, Thailand, and Mexico have risen as the shares of US imports from these markets have also increased



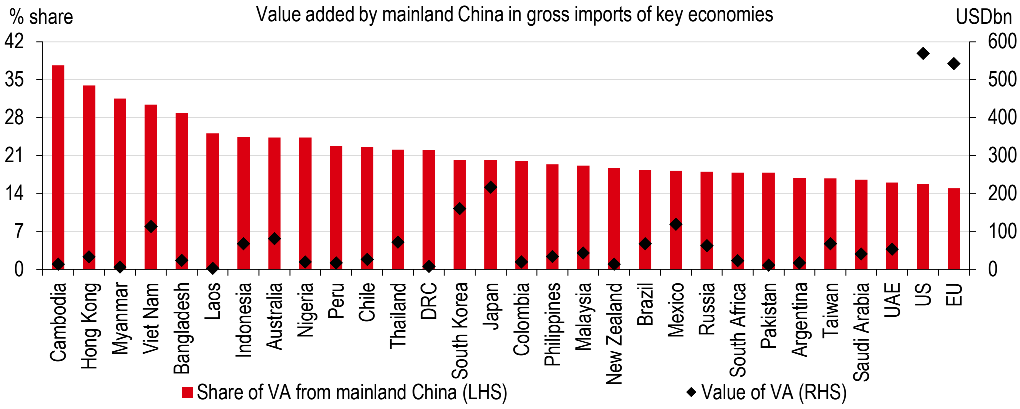
Source: Macrobond, GACC, HSBC. Note: Top movers from both highest growth and declines are chosen for the chart (excluding Hong Kong).

47. Mainland China is a significant contributor of value added in exports from Cambodia, Vietnam, Thailand, Korea, and Mexico…



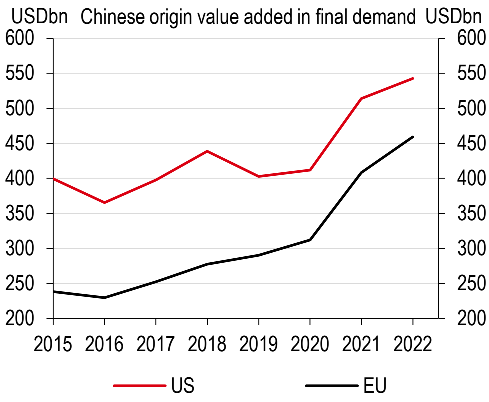
Source: OECD TiVA. Note: Data for 2022.

48. …while Asian economies also have a large share of mainland Chinese value added in their imports



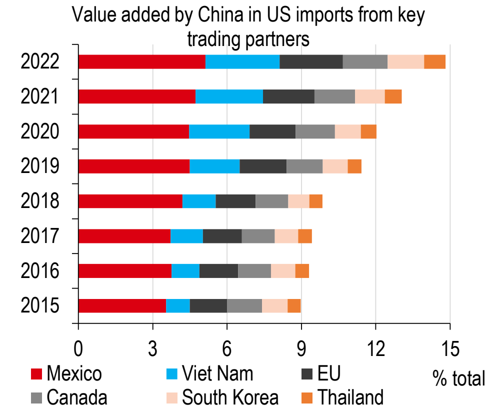
Source: OECD TiVA. Note: Data for 2022

49. Chinese value-added in the US and EU's final demand is on the rise…



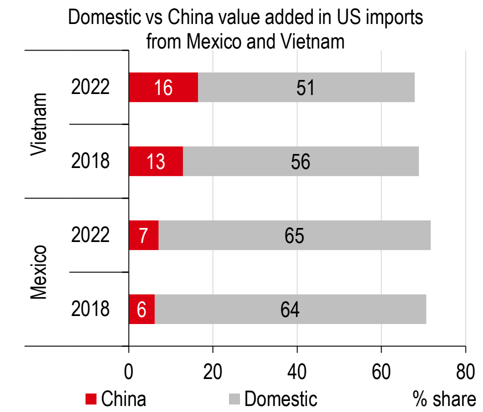
Source: OECD TiVA

50. …but this has been increasingly included in Vietnamese exports to the US



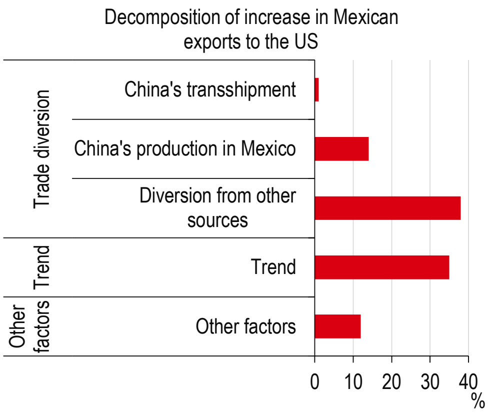
Source: OECD TiVA. Note: The chart shows the share of value added by China in US imports from key markets, for example, the red bar shows the share of value added by China in US imports that are being sourced from Mexico.

51. Chinese value-added has also risen slightly in US imports from Mexico…



Source: OECD TiVa. Note: The domestic refers to value-added by the home country, for example, grey bars for Mexico indicate % share of value added by Mexico in US imports from Mexico and for Vietnam suggest value added by Vietnam in US imports from Vietnam.

52. …but Chinese transshipment has not driven the rise in Mexican exports to the US



Source: Federal Reserve notes, 5 June 2026. Note: The various headers constitute an annualised decomposition share of rise in Mexican exports to the US, so the sum of all bars is equal to 100%. The data compares the increase in Mexican exports to the US from 2014-17 to 2021-24.
