June 2026: Regional banks outperformed amid broad-based market weakness

HK banks on average corrected by 5% in June, but outperformed the HSI by 4% as broad market sentiment was dragged by lingering concerns on new ODI rules and adverse implications on cross-border investment flows, while improving operating trends and a more hawkish tone from the FED interest rate meeting has lent support to bank share prices, and explained the relative outperformance of regional banks over local HK banks. More favorable earnings momentum in 1H26 and a more direct beneficiary of potential FED rate hikes might allow HSBC to sustain the relative outperformance in the near future.

- **News summary for June 2026:** June headlines continued to focus on tighter cross-border investment activity for mainland clients, with some banks reportedly postponing mainland-related initiatives, although the HKMA commented that the relevant account-opening process remains smooth. On asset quality, KPMG expects HK banks' NPL ratios to improve in FY27 and Fitch has upgraded the sector's outlook, citing that the worst of HK CRE stress has passed, while Deloitte observed that HK banks have sped up the collateral divestments in individual delinquent CRE cases. At the company level, HSBC has reportedly become involved in the IFFCO Group's debt crisis with exposure of up to US$400mn, while it is also conducting a strategic review for the potential sale of its SG insurance business. Meanwhile, STAN is assessing the feasibility to set up a gold vault in HK for business expansion after it delivered a high double-digit growth in gold-related revenue in 1Q26. For BOCHK, the CRO noted that NPL pressure is likely to persist in 2H26, but the bank has adequate LLR and expects its asset quality to outperform peers.
- **Loan growth momentum continues to trend up:** (1) Industry loan growth rose to 6.0% YoY in May from 5.4% in April, continuing the sequential uptrend since November 2025, driven by decent momentum in trade finance-related flows. (2) Mortgage lending growth also edged up to 3.3% YoY in May from 3.1% in April, while newly approved mortgage loans rose 10.1% MoM. BOCHK remained the market leader in completed mortgages in 1H26, capturing a 31% market share, followed by HSBC at 24%; however, HSBC led the off-plan mortgage segment with a 24% market share, higher than the 22% at BOCHK. (3) LDR fell 47 bps MoM to 52.3% in May on stronger deposit growth, with HKD LDR declining more materially (-65 bps MoM) than FCY LDR (-7 bps MoM). The overall CASA ratio was up slightly to 44.6% in May from 44.1% in April.
- **Narrowing SOFR-HIBOR gap on stronger HIBOR:** (1)1M/3M SOFR was largely stable MoM in June on a daily average basis, while 1M/3M HIBOR increased by 23bps/10bps MoM, leading to a narrowing 1M/3M SOFR-HIBOR gap of 82bps/79bps (down 21bps/6bps MoM) likely reflecting the typical quarter-end liquidity conditions and changing expectations for US rate policy. (2) Aggregate balances and EFBN (Exchange Fund Bills and Notes) stabilized at c.HK$1.4tn in June, while the HKD/USD also remained broadly unchanged at 7.84 by the end of June. (3) Composite interest rates rose to 1.26% in May from 1.21% in April, marking an uptick in banks' funding costs after a steady decline since Dec 2025, but the implied deposit spreads increased 26 bps MoM on the back of a stronger HIBOR. (4) Overall deposit competition in HK remained rational during the past month, with slightly intensified

competition among small and virtual banks mainly on HKD deposits in response to the quarter-end liquidity management (Table 3).

- **Underlying asset quality trends were largely stable:** (1) 3M mortgage delinquency ratio was further down to 0.11% in May from 0.12% in April, representing a gradual declining trend since Nov 2025 amid stabilizing property market, while the 6M ratio was unchanged at 0.09% in May. (2) The unemployment rate was 3.7% in May, as the labor market in HK remained stable after seeing a downward trend YTD. (3) In May, there were 728 bankruptcy petitions (-7% MoM), with the cumulative 5M26 figure showing a 12% YoY decline; meanwhile, bankruptcies reached 753 cases, up 25% MoM, but the 5M26 figure was still down 5% YoY. (4) According to HKMA, HK banks' NPL ratio fell to 1.87% in 1Q26 from 2.01% in 4Q25, marking an eight-quarter low under an improving asset quality trend.
- **HSBC>BOCHK & STAN into 1H26 results.** Both BOCHK and STAN would be facing higher base effects on non-NII in 1H26 due to stronger trading gains and episodic income in 2Q25 respectively, thus HSBC may deliver better momentum on operating profits into 1H26 results to sustain its relative outperformance YTD. Meanwhile, market focus should also be on management guidance on WM business implications/impacts due to the new ODI rules as well as on shareholder return measures, in particular the relaunch of SBB at HSBC and details of the three-year shareholder return enhancement program at BOCHK.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

Coverage Universe: Huang, Jemmy S: Bank of China (BOCHK) (2388) (2388.HK), Bank of East Asia (0023) (0023.HK), CTBC Financial Holding Co.
