CHINA SURGICAL ROBOTS

#3: Accelerating Overseas Commercialization Supports Guidance Delivery; Domestic Softness Largely Expected

Goldman Sachs (Asia) L.L.C.

Chinese surgical robotics companies have continued to attract significant investor attention given their long-term globalization potential, a theme we highlighted when we initiated coverage in April (thematic report, initiations here and investor feedback). However, we believe **recent overseas commercialization progress is yet to be fully reflected in the share price**, as investors remain focused on order verification, the sustainability of overseas demand, and the sentiment impact from Intuitive Surgical's recent share price weakness (-30% in the past three months). We remain constructive on the theme and believe continued evidence of overseas commercial traction, procedure growth, and order execution will be key to strengthen investor confidence and support further re-rating; reiterate our **Buy rating** on **Medbot and EdgeMed.**

Global commercialization remains on track, with strengthening overseas execution translating into accelerating financial performance.

- **MicroPort MedBot's** July 22 profit alert marked a key inflection point, with 1H26 profitability achieved alongside c.200–230% yoy revenue growth, driven by strong Toumai adoption and >450% yoy overseas revenue growth. Gross margin expanded by more than 15ppt, supported by scale benefits and product mix improvement. Investor focus is likely to remain on revenue sustainability and accounts receivable collection. Operationally, Toumai has reached c.300 cumulative commercial orders globally, including 240+ overseas orders and 80+ systems installed as of Jun 2026, while Edge Med expects cumulative installed/shipped systems to reach c.160 by 1H26 (c.100 overseas, c.60 domestic), with 60 systems installed/shipped YTD. Utilization continues to ramp, with Edge Med's cumulative procedures exceeding 20,000 as of May 2026 and annual procedures per installed system reaching c.210 in China versus c.100 overseas.
- **India and South America remain key growth markets**, with Toumai reaching 30+ cumulative orders in India and c.20 each in Brazil and Argentina as of Jun 2026, while Edge Med has accumulated c.10 orders in both India and Brazil as of Jun 2026. **Europe is also showing encouraging early traction**, with Toumai securing orders across Italy, Spain, Belgium, the UK and France, including c.10 commercial installations in Spain during 1H26, while Edge Med has achieved 10+

cumulative orders in Poland and 5+ in Italy. Looking ahead, **expansion into developed markets remains on track**, with Edge Med targeting Japan/Korea approvals by end-2026 to early-2027 and building direct sales capabilities in the UK, Germany and France to support further order growth.

Product differentiation, rather than pricing, remains the key competitive lever.

- While investors remain concerned that intensifying domestic competition could evolve into an EV-style price war and eventually spill over into overseas markets, management teams emphasized that purchasing decisions are driven more by product capabilities, clinical value, and ecosystem development than by upfront pricing alone. MedBot is targeting distinct customer segments through its dual-product strategy, with the premium Toumai Pro priced at c.70% of da Vinci and the cost-effective Toumai SE at a further c.30% discount to Pro. Beyond pricing, remote surgery continues to serve as a differentiated capability, supporting brand building, surgeon training, and overseas network expansion. Edge Medical's MP+SP (multi-port plus single-port) platform also provides a differentiated value proposition versus peers. Both companies continue to invest in product innovation to sustain their competitive positioning, with Edge targeting the launch of its next-generation system next year, benchmarked against da Vinci 5, while MedBot plans to introduce its next-generation Toumai platform by end-2026 or in 2027. We therefore view technology differentiation, product breadth, and continued innovation as more important determinants of long-term market share than price competition alone.

Domestic bidding remained soft but largely in line with expectations, reflecting a weaker hospital capex environment with upcoming VBP a key thing to watch

- Industry bidding volume slowed to c.30 systems in 1H26 (vs. 34 in 1H25, based on various channel checks indicating a range of 26-31 systems, see Exhibit 1), while procurement ASP declined to RMB13.3mn as domestic players continued to gain share (see Exhibit 2). Notably, da Vinci secured only c.10 bid wins in 1H26, implying <40% volume share, and installed just six systems in China (see Exhibit 3), underscoring increasing competition from local players and ongoing pricing pressure. Looking ahead, the rollout of provincial pricing catalogs continues to expand across regions and should help standardize reimbursement and charging practices, supporting broader adoption and higher utilization of robotic surgery over the longer term.
- Meanwhile, the **recent inclusion of laparoscopic surgical robots in the Category B provincial VBP framework could create near-term headline and pricing overhangs** as implementation details evolve (see our previous note). That said, we continue to believe installation quota allocation, rather than equipment pricing, remains the primary determinant of domestic demand. Lower equipment prices alone are unlikely to drive meaningful volume acceleration while hospital purchases remain constrained by quota availability. As a result, we view overseas markets as the key earnings and growth driver for both MedBot and Edge Medical, with the domestic market providing additional upside optionality should quota expansion

accelerate in the next allocation cycle.

Key highlights by players

Medbot's Toumai reached 300 cumulative orders, 200 cumulative installations

- Toumai's **overseas commercialization continued to broaden**, with cumulative commercial orders reaching c.300 globally, including 240+ from overseas. With 80+ systems installed YTD, management reiterated confidence in delivering its 2026 full-year guidance of 200 installations, Rmb1.1bn revenue and full-year breakeven. **Toumai's global roll out continued to broaden**, with commercial installations now spanning more than 60 countries and regions. Since the beginning of 2026, Toumai has newly entered over ten countries or markets, including Saudi Arabia and South Korea, and has obtained market access in over 40 additional countries. Overseas markets continued to track well, especially in populous emerging markets across Southeast Asia and Latin America; for example, India has grown from its first order last year to 30+ cumulative orders currently, while Brazil and Argentina have each reached nearly 20 cumulative orders. In Europe, Toumai has secured orders across Italy, Spain, Belgium, the UK and France. To support the overseas expansion, the group plans to add approximately 100 employees to its overseas team, bringing total headcount to around 200-300.
- On **differentiation,** remote surgery remains a key feature, supporting brand building and surgeon training network expansion in overseas markets. Toumai also obtained CE Mark in Europe for remote surgery in Jun 2026, further enhancing its global remote surgery network capabilities. **Next-generation** Toumai model may be launched by end-2026 or in 2027, with a new design concept and AI functions, though detailed upgrades have not yet been disclosed.

Edge Medical cumulative installed/shipped systems to reach c.160 by 1H26, with 60 added YTD

- **Management expects global cumulative installed/shipped systems to reach c.160 by 1H26** (overseas c.100, domestic c.60), with strong momentum in Europe, Latin America and South/Southeast Asia, with cumulative orders reaching 10+ systems in Poland, c.10 systems each in India/Brazil, and 5+ systems in Italy. Management attributed the overseas traction to Edge Medical's **differentiated MP+SP (multi-port + single-port) platform,** competitive product performance, and rapid iterations closely aligned with surgeons' clinical needs.
- **Continued overseas registration progress:** In July, Edge Medical received Australian approval for its MP1000 (multi-port), SP1000 (single-port), and MSP2000 (multi-port + single-port) systems across urological, gynecologic, general, and thoracic surgeries. As of Jul 22, Edge Med has entered **68 countries and regions globally**. Looking ahead, the company: 1) expects Japan/Korea approvals by end-2026 to early-2027; 2) is building direct sales teams in the UK/Germany/France, with new orders expected next year; and 3) may use its next-generation system, benchmarking against da Vinci 5, for future US/Canada registration.
- **Procedure volume ramping; utilization upside remains meaningful:** Cumulative

procedures exceeded 20k as of May 2026, including 17k multi-port and 3k single-port procedures, with monthly procedure volume ramping to c.1,500. Overseas cumulative procedures reached c.5k within less than a year since July 2025 installment, supported by c.100 overseas installed/shipped systems, of which c.50-60 are mature installed systems. Current annual procedures per installed system reached c.100 overseas and c.210 in China.

- **Continued technology exploration:** On July 24, Edge Medical announced the completion of its investment in PrimalVerse (see the announcement here), strengthening its AI capabilities and supporting its expansion from standalone surgical robotic systems toward an embodied-AI surgical robotics platform.

Other Chinese players' go global update

- **AK Medical's Orthopedic surgical robots ramp-up on track:** As of June 2026, AK Medical had secured 11 robotic system bidding, including 6 domestic and 5 overseas systems. Management remains confident in achieving its 2026 full-year target of 20 systems and Rmb40mn revenue from robotics business. Management views 2026 as an inflection point for orthopedic robotics commercialization, supported by AK Medical's established orthopedic implant commercial infrastructure and leading market position. AK Medical has already deployed 80+ robotic systems this year, largely under free-use trials of 3-6 months, and targets c.100 deployments for the full year. Management expects continued system installation/deployment to drive procedure growth, with procedure volumes targeted to increase from 4k in 2025 to 10k-14k in 2026, after reaching c.6k in 1H26.
- On May 25th, **Cornerstone**'s Sentire Endoscopic Surgical System received EU CE mark and Singapore Health Sciences Authority (HSA) certification, both covering minimally invasive surgical procedures in General Surgery, Gynecology, Thoracic and Urology. In April 2026, Cornerstone completed the first installation in Singapore at Woodlands Hospital under NHG.
- **Surgerii Robotics (Shurui),** its single-port surgical robot completed its first commercial deployment in Munich, Germany, in May 2026. As the only single-port surgical robot approved in the EU for pediatric procedures, Shurui also completed the first pediatric laparoscopic robot-assisted procedure in Barcelona in June.
- On July 16, **Tinavi Medical** announced the plan to acquire Shanghai MicroPort Orthopedics, with the consideration to be paid through the issuance of new shares by Tinavi (see the announcement here). According to the company, the acquisition could support Tinavi by combining its surgical robotics capabilities with MicroPort Orthopedics' implant portfolio and overseas commercial network, potentially creating product synergies and expanding its global reach, scale.

Global peers' update

- Read across from **ISRG** (Not Covered) **2Q26 earnings:** ISRG's 2Q26 performance in China came under pressure, with only two new system installations (including one da Vinci 5 in Hong Kong, vs. 13 systems in 2Q25). On the earnings call, management noted that China remains challenging, with lower tender activity, intensifying competition from domestic Chinese brands, and policy-driven pricing pressure, while the impact of charging code changes and the 15th Five-Year Plan quota process remains uncertain. For the capital equipment VBP kicked off recently (see our previous note), ISRG mgmt noted that it appears to aim at reducing duplication in tendering workflow. Management expects more structured tenders to emphasize comprehensive robotic programs rather than bespoke system-level features and will continue to monitor how the policy is phased in over the coming quarters. Intuitive Surgical share price is down -37% YTD vs the S&P500 +8%.

- **Other update: 1) SSI's** surgical volume exceeding 10,500, and cumulative installations reaching 200+ as of Apr 30th 2026, and the company expects to receive CE mark / FDA approval by 4Q26 / 4Q26-1Q27; 2) **Medicaroid**'s Hinotori surgical robot received CE mark on Jul 2026.

Domestic bidding volume and pricing catalog rollout

Exhibit 1: 1H26 bidding volume slightly below 1H25, due to slower hospital capex spending

Valuation and risks

MicroPort MedBot (2252.HK): Our 12-m TP of HK$40.0 is based on DCF valuation, with 9% WACC and 3% terminal growth (consistent with our medtech & service coverage). Key downside risks: 1) slower-than-expected commercialization and growth in China; 2) potential patent litigation overseas; 3) potential margin pressure from profit-sharing with the MicroPort group and multi-business expansion.

Edge Medical (2675.HK): Our 12-m TP of HK$74.0 is based on DCF valuation, with 9% WACC and 3% terminal growth (consistent with our medtech & service coverage). Key downside risks: 1) Slower-than-expected commercialization in China, and potential patent litigation overseas; 2) weaker-than-expected capabilities of overseas collaborated distributors; 3) capacity constraints.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Edge Medical and MicroPort MedBot is/are relative to the other companies in its/their coverage universe: AK Medical, Angelalign Technology, Asymchem (A), Asymchem (H), China Resources Pharmaceuticals, Edge Medical, Frontage Holdings, Genscript Biotech Corp., Gushengtang Holdings, Hygeia Healthcare, Jinxin Fertility, MicroPort MedBot, MicroTech Medical, Pharmaron (A), Pharmaron (H), Samsung Biologics Co., Shandong Weigao Group, Shanghai Pharma, Sinopharm Group, Tigermed (A), Tigermed (H), Tinavi Medical, Topchoice Medical, Venus Medtech Inc., WuXi AppTec Co. Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link:

https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
