Delivering a Cross Platform 'Hero'

We analyze UBER's potential acquisition of DHER, the cross sell opportunity to reach 60% of UBER's global footprint, which markets are most important to monitor (Middle East, Korea and Argentina), key execution risks and read-throughs to DASH.

What Happened? Uber announced an acquisition offer for DHER (covered by Luke Holbrook) of €41.50/share in cash; equivalent to $14.8bn for 100% of the company, or $13.7bn adjusted for Uber's prior stake purchases (source of funds include existing cash and new debt financing). UBER is acquiring 50 of DHER's 64 markets, which represents ~$42bn of '25 gross bookings (see Exhibit 1). Per UBER, the $14.8bn deal size implies ~8X UBER's '27 Pro-forma Adj. EBITDA estimates (~ $1.9bn), which is inclusive of $1.2bn of run-rate synergies and adjusted for UBER's US GAAP reporting standards (vs IFRS). UBER estimates the transaction will be accretive to non-GAAP EPS immediately upon close and ~HSD% accretive to non-GAAP EPS in 3 years (which implies ~$0.75 to our current $9 of '30 non-GAAP EPS). The transaction is expected to close in the second half of 2027.

$1.2bn(+) of Synergies (~65% of Pro-Forma '27e DHER EBITDA)…with Headcount the Largest Driver: Uber expects $1.2bn total synergies associated with the potential deal, with headcount the largest driver of savings (DHER has more total headcount than Uber excluding Freight). **DHER is currently run on a localized basis (with local teams) and Uber expects to migrate the 7 acquired brands over to the Uber platform on a rolling basis starting late '27 and into '28.** We believe the migration to Uber's platform will lead to headcount and tech stack savings that build over time. Notably, Revenue synergies driven by cross platform users represent a very small portion of the underwritten $1.2bn run-rate synergies. These scaling marketplace efficiencies would represent upside.

Cross-Platform Offering Strengthens...With ~60% of Uber's Markets Potentially Offering Leading Rides and Delivery Post Deal: We believe Uber's opportunity to leverage DHER's leading food delivery position in certain markets with its own leading rideshare business to drive cross platform users and increase volume and loyalty/repeat behavior is material. Uber has both mobility and delivery offerings in 34 of its markets today (~40%)...and following this potential transaction will grow to 58, or ~60%. Uber has executed this cross sell effectively across many markets in the past...and for perspective, on average 20% of Uber users globally are cross platform (28% in their top market)…with cross platform users spending an average of 3X more than single platform.

Of the 50 Markets Acquired, Middle East, South Korea and Argentina Among Largest Potential Areas for Improved Performance: We believe talabat (based in the Middle East) and Baemin (based in South Korea) are two of the most significant assets Uber is attempting to acquire. These two assets make up an estimated ~

$900mn in EBITDA, nearly 100% of consolidated '25 DHER Adj. EBITDA and ~80% of DHER '25 Adj. EBITDA attributable to the markets UBER is acquiring. **The cross sell opportunity is substantial in these markets** (with Uber previously not having a significant rides business in Korea or delivery business in the Middle East), but we believe execution will be key. In our view Korea could be more challenging given current private company market leadership in the ride share industry. Latin America is another market where the cross-sell opportunity could be substantial in our view, particularly in Argentina. We estimate Argentina is ~LSD% of UBER Mobility bookings, but note DHER's Argentina business is larger (DHER's Latin America business, of which Argentina is its biggest market, contributed ~8% of GMV in '25). The size of Argentina (~47mn people) combined with a leading cross platform make this a significant business opportunity.

Next Key Factors and Execution Points:

- **Multi-staged, Brand-by-Brand Tech Migration:** As mentioned, a material portion of the underwritten synergies are expected to come from UBER migrating the DHER brands onto the Uber tech platform. While not a multi-year re-platforming (which we have seen carry material execution risk because of rebuilding needs), the plan is to migrate the 7 acquired DHER brands one by one. There is still risk associated with this (data loss, downtime) and migration will be the gating factor for fixed cost efficiencies at each of the brands.
- **Local Competition:** Food delivery is competitive globally, but we see local competition in the UAE + Korea as most notable given talabat/Baemin strategic and financial importance to the remain co. In UAE, while talabat is the #1 player, Meituan (covered by Gary Yu), via its Keeta brand, is a challenger (entered in 2024) investing aggressively to take share in the region and Deliveroo operates in the UAE, and is improving its operations after being acquired by DASH (food delivery leader). In Korea, while Baemin is the #1 player, Coupang (covered by Seyon Park, with its core business in e-comm) is a formidable competitor via its Coupang Eats food-delivery arm (see Exhibit 2 and Exhibit 3).
- **Capital Allocation:** While UBER said that its capital allocation philosophy remains unchanged in the medium to long-term, the company said that in the very near term it prioritized the DHER transaction over share buybacks in 2Q. As such, it may take ~1-2 quarters to revert to its ~$1.5bn quarterly buyback cadence.

2 DASH Readthroughs: 1) We see overlap between UBER and DASH in the UAE (talabat vs. Deliveroo). While talabat is the #1 player in the region (see here), we believe the transition/integration creates a window of opportunity for DASH/ROO to take share. That said a more comprehensive multi-product offering from Uber will lead to higher competition for DASH. **2)** Note too, DASH (via Wolt) has overlap with some DHER markets (Nordics, mix of Southern, Central and Eastern European countries) being acquired by private equity in a separate agreement announced today. UBER also noted that these markets (in aggregate) are loss making. These subscale assets being acquired by a financial sponsor could create an opportunity for DASH to take share or look to gain scale through further acquisition.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.
