The AI cycle remains intact. The key theme this reporting season remains centered on the hyperscaler capex guide, but with a greater focus on more tangible evidence of monetization. This includes incremental use cases such as Meta's move to sell excess AI compute capacity. Additionally, the potential implications of the Anthropic Mythos development suggest that security concerns could accelerate the timeline for moving workloads onto cloud-based platforms across both the private and increasingly the public sector, creating another long-term tailwind for cloud providers, data centers, semiconductors, and enterprise software (see Frontier AI Escalates Security Costs). If these signals begin to surface in forward commentary, they could provide significant incremental support to hyperscaler earnings and FCF curves. Given this fundamental backdrop, improving valuation and current investor positioning, **over the medium-term we see better risk-reward in the hyperscaler complex (i.e., AI Midstream) relative to other areas of Tech,** along with select opportunities in Software such as cybersecurity, which has emerged as a major secular investment theme and one we re-emphasized during peak AI disruption fears earlier this year (see Report).

- **Another reason the hyperscaler capex guide continues to draw significant attention is its broad implications for the Momentum trade (i.e., Memory and the rest of AI Upstream).** The momentum factor has been unwinding recently from extreme crowding levels. While positioning is still far from flushed, the setup appears tactically healthier heading into the reporting period. However, further out, volatility in the Momentum factor could persist as concerns remain around incoming and competing AI equity supply both domestically and internationally, the slope of the forward capex curve and the ability of debt markets to absorb this funding, as well as potential breakthrough efficiencies and broader questions around terminal profit margins tied to the balance between demand and supply across the AI infrastructure market.

The broader earnings setup during this reporting season remains constructive but concentrated, with 2Q26 earnings expected to rise +23% y/y led by Tech (Nvidia and Micron contributing ~37% of total), or +19% excl. Energy, while top line is expected to increase +12% y/y. All sectors are expected to deliver positive revenue growth, and all sectors except Healthcare are expected to post positive earnings growth. The core of the season will come over the next two weeks when ~52% of market cap reports, including the four major hyperscalers, while Nvidia and several other key semiconductor names will follow later with reports expected in mid-to-late August.

- **2Q26 Hyperscaler capex numbers will once again serve as a pivotal validation point for the AI infrastructure build-out**, as investors increasingly seek evidence that incremental ROIC can justify sustained, elevated spending levels. Consensus estimates now project AI-related capex to approach ~$870B by year-end 2026 (~+77% y/y), with hyperscalers to account for ~$750 billion of that total. Our Internet analysts remain positive on the capex outlook for 2026 and have meaningfully revised up their 2027 projections. For next year, they forecast capex growth of +54% for GOOGL (~$300B), +42% for AMZN ($300B), and +42% for META (~$200B). For more information, please see our analysts' notes here. This implies upside to

dubravko.lakos-bujas@jpmorgan.com

consensus capex estimates for the next 4-6 quarters. If these companies can justify the spend with higher earnings guidance as datacenters come online, there is a risk that the momentum factor could more rapidly rotate out of "AI Hardware" and back into Quality Growth / Hyperscalers (a similar Mag-7 / Mega-cap narrow leadership seen prior to the Momentum Crash in 1Q2025).

- **Hyperscaler fundamentals remain resilient despite growing capex-related pressure on free cash flow, which has increased reliance on debt and equity financing.** Initially, these companies funded capex primarily through internally generated cash flow, but debt issuance has risen materially in recent years as AI datacenter investment has accelerated. Across the five largest hyperscalers, aggregate debt issuance has increased from ~$40–50B in 2022 (largely to fund buybacks) to ~$190B in 2026 (primarily to support datacenter buildout). This has contributed to growing investor concern around hyperscalers' ability to continue accessing debt markets at scale. However, our credit research team views these concerns as overstated, arguing that insurer concentration limits are not yet binding and that the high-grade market still has substantial capacity to absorb future issuance, although spreads may continue to adjust as supply expectations evolve (see AI Capex & Growing Pains). Funding sources are also beginning to broaden towards equity, with GOOGL raising $85B in equity in June and recent reports indicating that META is evaluating similar alternatives. Importantly, the increase in external financing does not appear to reflect weakening operating fundamentals. Operating cash flow is still expected to exceed $900B by 2027, while FactSet estimates imply average year-over-year sales growth of 17% through 2030 (vs. 15% avg last 5y) and net income margins remaining above trend at ~26% (vs. 20% avg last 5y) over the same period. In effect, **the Street appears to be underwriting the AI datacenter monetization case: elevated capex today should ultimately translate into higher revenue, stronger margins, and expanding cash flow.** Our base case is that hyperscalers will increasingly guide toward AI monetization, with FCF beginning to inflect higher as early as 2027. A broader and more durable recovery, however, may not emerge until 2028 or later, particularly if AI infrastructure investments require more time to translate into attractive ROIC.
- **Mark-to-market accounting of private investments could be an even larger swing factor in 2Q.** The tailwind to 1Q26 earnings reflected non-cash revaluations of private-company stakes (i.e., Anthropic at Alphabet and Amazon) recorded under "Other Income" on company income statements. For Mag7 companies, this line increased from ~$10B in 1Q25 to ~$36B in 1Q26, and we estimated that roughly ~$4 of the ~$75 reported EPS figure in 1Q reflects these marks. However, considering most of the valuation re-rating in private AI companies occurred after the end of March, we expect the contribution from one-time gains to be larger in 2Q, reflecting the rise in private valuations during April and May. That said, the precise contribution is difficult to quantify given rapidly evolving private-market valuations and uncertainty around ownership stakes, which ultimately depend on several other factors. While these non-recurring gains (and losses) are typically excluded from both consensus and our estimates, major data providers seem to be including them, making the quality of upward EPS revisions harder to assess in coming quarters.
- **Strong earnings expected, but growth remains narrowly concentrated.** 2Q26 earnings are expected to rise +23% y/y , or +19% excluding the Energy sector. This represents an improvement from +15% at the start of the year and +18% as of April 1st, implying upward revisions of +8% and +5%, respectively. Revenue is expected to increase +12% y/y. All sectors are expected to deliver positive revenue growth, while all sectors except Healthcare (-19% y/y) are expected to post positive earnings growth. Notably, the expected earnings contraction in Healthcare is largely driven by a handful of companies. Excluding Energy (+122% y/y), Tech (+64% y/y) is once again expected to lead earnings growth, with Nvidia and Micron alone expected to contribute ~37% of

the total. Other companies that stand out in terms of earnings growth attribution include XOM (~7%), CVX (~6%), AVGO (~6%), and GOOGL (~6%).

Select Sector Previews:

- **AI capex supercycle remains the dominant theme heading into hyperscaler earnings, with a clear bias towards the upside.** Across the group, the key swing factors are AI monetization and returns, where investors are looking for improved monetization across cloud, ads, and enterprise, in addition to token pricing dynamics, frontier model competition (Claude, GPT-5.5/5.6, Grok 4.5, Muse Spark 1.1, Gemini 3.5), and a more volatile macro backdrop where resilient spending could drive guidance upside even as softer consumer sentiment and renewed military activity could temper some 3Q outlooks. Key earnings dates: Alphabet Inc (7/22), Microsoft Corp (7/29), Meta Platforms Inc (7/29) & Amazon.com Inc (7/31).
- **The setup for semiconductors remains constructive, supported by strengthening AI demand and continued upward earnings revisions.** The group is expected to deliver another solid quarter, with better 2Q26 results, constructive 3Q commentary, and higher CY27 expectations extending the recent positive earnings revision cadence. Strong results could help drive a rebound after the recent ~15% pullback, particularly as demand signals continue to strengthen, with hyperscalers and AI labs capacity-constrained, agentic-AI inference accelerating, and hyperscaler data center capex expectations moving higher. NVDA's Blackwell/Rubin framework and AVGO's path toward $100B+ of AI revenue in FY27 have extended demand visibility into CY27+, shifting the debate from whether AI demand is real to whether supply chains and power availability can keep pace. Beyond accelerators, AI strength continues to broaden across custom silicon, memory, networking, semicaps, and EDA. Offsetting this, consumer/client markets are more mixed, with memory-driven (bill of materials) inflation pressuring smartphone and PC demand, though the broader industrial-led cyclical recovery remains on track. Overall, semis industry revenue is expected to grow 30%+ ex-memory this year, with preferred exposures concentrated in high-quality AI and cyclical recovery names. Key earnings dates: Nvidia Corp (8/26), Broadcom Inc (9/4) & Micron Technology Inc (9/23).
- **Energy is driving an outsized share of 2Q earnings growth expectations, led by Chevron and Exxon.** Despite representing only ~4% of the S&P 500's market cap, consensus implies Energy contributes ~23% of the quarter's y/y earnings growth expectations, with 2Q sector earnings expected to increase roughly +122% y/y. That strength is largely attributed to higher oil prices following the Iran conflict, with growth expectations for the quarter beginning the year at +12%. Consistent with that setup, both Chevron and Exxon are positioned for a materially stronger quarter versus 1Q, reflecting higher upstream earnings leverage to commodity realizations and better operating performance, plus a downstream and refining rebound as margins normalize and prior headwinds ease. For Chevron, the focus is on improved production and operating rates and downstream returning to profitability. For Exxon, the key themes include the company's updated adjusted EPS framework to reduce derivative timing noise in addition to a broad-based sequential improvement across Upstream, Energy Products, and Chemicals. Key earnings dates: ExxonMobil Holdings (7/31) & Chevron Corp (7/31).
- **Healthcare stands out as the only sector expected to post negative earnings growth in 2Q, although the decline is attributable to a few companies.** Earlier this year, we became more constructive on the higher-growth areas of the sector (see Report), where interest from generalist investors has been building. In particular, it is one of the key beneficiaries of AI adoption from both higher revenues (speeding the drug discovery process) and reducing overhead costs. Given that it is defensive and relatively under owned, the sector remains our favorite Low Vol sector. The group has rallied meaningfully over the past several weeks, particularly Biotech and Life Sciences, due to

ongoing rotation out of Spec-Growth areas of the market. That said, going into the earnings season, the sector will become more name specific and dependent on whether 2Q earnings, guidance updates, or pipeline catalysts can sustain the recent momentum. Within Pharma, the 2Q setup looks constructive. Trends across the group remain positive, most companies are expected to beat and raise guidance, and our analysts do not expect management commentary to raise concerns that would prompt investors to rotate out of the sector. Life Science Tools have also seen sentiment improve despite guidance ranges that generally do not assume a material end market recovery, with recent outperformance potentially holding into 2Q earnings given less likelihood of policy disruption and positivity around demand trends showing signs of improvement that could support some upside this year and a more constructive fundamental view into 2027. Key earnings dates: LLY (8/5), ABBV (7/31) & MRK (8/4).

- **Aerospace & Defense enters earnings with stronger fundamental momentum in commercial aerospace, but a more favorable tactical setup in defense after recent underperformance.** Commercial aerospace regained some momentum as Middle East risk concerns started to fade and investor focus returned to production recovery, aftermarket strength, and improving supply chain execution, while defense has lagged as capital rotated into higher growth stocks, budget and midterm uncertainty increased, contract activity remained uneven, and investors weighed potential limits on capital returns. This leaves a higher earnings bar for commercial aerospace and a lower one for defense. In the near term, that setup could allow Defense to outperform on solid earnings or positive contract news, though any squeeze would likely reflect lighter positioning and lower valuations rather than a fundamental change in the outlook. Commercial aerospace still has the stronger underlying story, supported by visible demand, production normalization, and aftermarket growth, but upside may be more selective after the recent rebound. Keep in mind Defense sentiment is unlikely to turn decisively without more clarity on appropriations, the FY27 budget path, and cash deployment flexibility, yet the longer-term backdrop remains constructive given persistent geopolitical tensions and global demand for weapons and defense capabilities.

Earnings Scorecard:

- **Beats/Misses.** With only 6% of S&P 500 companies having reported, it is still too early to paint a clear picture of how the season is shaping up. So far, 100% of companies are beating earnings (vs. 78% avg. last 4Qs, see Figure 1) and 87% are beating revenue estimates (vs. 75% avg. last 4Qs).
- **Surprise/Growth.** S&P 500 companies so far have surprised on earnings by 5.2% (vs. 2.4% avg last 4Qs, and 2.3% ex-Financials). For companies that have reported, 2Q revenue growth has been coming in well-above trend at 17% y/y and net income growth is 136% (vs. ~137% ex-Financials).
- **EPS Revisions.** Since the beginning of the earnings season, EPS revisions have ticked higher. 2Q26 EPS is currently at $81.75 (+23% y/y) with 2026E EPS at $341.86 (+26% y/y) and 2027 EPS at $404 (+18% y/y).
- **Banks reported robust earnings,** with Goldman Sachs, Bank of America, Wells Fargo and Citigroup all beating market expectations. Results were broadly supported by strong trading and investment banking revenues, while management teams also pointed to solid loan and deposit growth, continued share repurchase activity, stable capital ratios, recovering wealth management fees, and resilient credit metrics. Stock performance and retail activity were mixed following the announcements.

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http:// where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
