CHINA INDUSTRIAL TECH: DATA CENTER ELECTRICALS

What to expect in 2H26 on overseas expansion and domestic capex trend; 2Q26 preview; maintain Buy on Kstar, Neutral on Kehua/Megmeet

Goldman Sachs (China) Securities Company Limited

We outline the key things to look out for in 2H26 for the China data center electricals subsector and key debates for the stocks, given recent share price volatility with Kstar/Kehua/Megmeet -29% on average since July (vs. CSI 300 Index -9% and China Industrial Tech coverage avg. -16%). **We note it will be key to watch (1) overseas expansion & new product rollouts:** Progress in securing new international clients and commercializing next-gen architectures is critical. Key potential catalysts include Kstar's new UPS orders and 800VDC module onsite testing, Megmeet's Vera Rubin PSU ramp-ups, and Kehua's global certification efforts for power and cooling products. **(2) domestic data center capex trend:** Investors are actively looking for signs of accelerating domestic hyperscaler and colocation demand to offset the intense localized pricing pressures.

For 2Q26, while we expect headline numbers will demonstrate growth (Kstar earnings +20% yoy; Megmeet +110% yoy from a very low base), the underlying business momentum is likely to be affected by a few headwinds. Specifically, we believe Kstar will factor in ~Rmb20mn in FX losses; Kehua's pre-announced recurring net income (+9% yoy) missed expectations amid intense domestic competition, despite a one-off asset disposal gains; and Megmeet is navigating raw material cost inflation and continued investment for future growth, alongside domestic EV weakness. We **maintain Buy on Kstar, Neutral on Kehua/Megmeet.**

Kstar (002518.SZ, Buy)

2Q26 preview: We forecast 2Q26 sales/GP/EBIT/NP at Rmb1,561mn/468mn/203mn/170mn (+28%/+34%/+45%/+20% yoy). Topline growth will likely be led by the **energy storage products segment** (>100% yoy sales growth in 2Q26 per GSe) given strong residential and C&I (commercial & industrial) ESS demand from Europe, Australia, and emerging markets with a low base in 1H25. We expect data center product segment sales to grow by >20% yoy in 2Q26, supported by **strong overseas UPS ODM shipment** and **a gradual recovery of domestic data center construction demand**. Meanwhile, solar inverter sales will see severe yoy contraction given the domestic solar installation weakness, in our view. We also model yoy and qoq improvement for both GPM and OPM at 30.0%/13.0% as overseas sales mix increases, but we model NP to grow slower after baking in ~Rmb20mn FX losses during the quarter due to CNY appreciation.

Key debates and watchpoints:

1. Investors are worried that UPS will quickly be replaced by 800VDC products which is a key overhang for the share price and trading multiple, but we have been arguing the **global UPS demand should remain intact in the mid term**. Recent evidence includes: (1) Kstar's production line for large-power UPS (mainly for AI data centers) has been running at close to full utilization rate since May 2026 and they are expanding capacity by converting the ones for solar inverters to manufacture UPS; and (2) company has made much new progress in the overseas market so far this year, such as working with a new Taiwanese customer on supplying integrated power distribution solutions (including BESS, or battery energy storage system), getting certified by a new Japanese customer and a new European customer on supplying UPS systems as part of these 2 new customers' modular data center solutions, and winning a >Rmb200mn order from a new colocation customer for the UPS at a European data center project that will be rent to a major US hyperscaler. Going forward, we believe **new customer wins and overseas orders** will be key to monitor, and solid UPS sales growth in 2H26E and 2027E as confirmed by quarterly earnings could ease investor concerns and trigger a re-rating on the stock.
2. In our opinion, any **commercialization update on 800VDC products** will be the one of most important catalysts for the share price and valuation multiple, potentially showcasing that Kstar is able to remain globally competitive and ride through the **upcoming technology shift from AC to 800VDC architecture** that will start to happen at scale from 2H27 the earliest, in our view. For context, Kstar launched its AC-800VDC power conversion modules in May 2026, and targets to launch its 800 VDC systems (i.e. 800VDC power racks) and send to several overseas customers for onsite testing in 3Q26E, before receiving small batch orders for 800VDC products around as early as end-2026. We continue to be constructive on Kstar's positioning on 800VDC given its solid power conversion technology and manufacturing know-how, proven data center project track records, as well as trusted relationships with global electricals giants.
3. On the ESS segment, demand from Europe, Australia, Middle East, and SEA has been robust in 1H26, per company. That said, as investors find it hard to model future growth rates for **residential/C&I ESS,** which has a much shorter business cycle vs.

utility-scale projects, any positive commentaries or guidance from management or new long-term orders will be helpful to justify the **growth sustainability for Kstar's overseas ESS business**.

Earnings and TP changes: We revise down 2026E net income forecasts by 2% mainly to factor in the FX headwinds, but we keep 2027-30E net income forecasts largely unchanged given Kstar's solid customer progress in the global data center supply chain. Accordingly, our TP remains at Rmb67.0, still based on 26x 2028E P/E discounted back to 2026E with 11% CoE. Maintain Buy with the stock trading at an attractive evaluation of 23x/16x 2026/27E P/E with 56%/43% earnings growth.

Kehua (002335.SZ, Neutral)

2Q26 preview: Post market close on Jul 13, 2026, Kehua pre-announced 1H26 net income in the range of Rmb365mn~390mn (+50%~60% yoy) with most of the growth driven by the one-off gains from the sales of a data center asset as recurring NI was only Rmb230~254mn (+3%~14% yoy). Per company announcement in Apr, the one-off gain (before-tax) was roughly Rmb147mn. Implied 2Q26 net income was Rmb287mn~312mn (+65%~79% yoy), but the 2Q26 recurring NI was Rmb165mn~189mn (+2%~17%), below our expectation. Following the announcement, we now forecast 2Q26 sales/GP/EBIT/NP at Rmb2,793mn/609mn/155mn/300mn (+11%/+7%/-9%/+72% yoy). We believe the sales growth will be mostly driven by (1) the data center products segment as data center capacity buildout is improving in China with easing domestic AI chip supply constraints; also **Kehua is penetrating into domestic CSP supply chain**, gaining >Rmb100mn orders from Alibaba on modular power distribution products and CDU (coolant distribution unit) in 1H26; and (2) the **overseas energy storage segment** as Kehua takes orders from local ESS integrators from diverse regions such as Bulgaria and India, and ramps up its PCS (power conversion system) supply for international integrators. On the other hand, **domestic energy storage and solar inverters** will likely be major drags on growth and margins due to solar industry weakness and higher lithium costs, and we expect muted growth for the macro-sensitive smart power segment as well. All in, we expect 2Q26 GPM to decline yoy from 22.5% to 21.8% as the high-margin overseas energy storage business is offset by the intense competition in the domestic data center products segment.

Key debates and watchpoints

1. Kehua continues to be viewed as a **proxy for domestic hyperscaler capex**. While domestic data center buildout activities are picking up sequentially in 2Q26 based on our industry checks, investors are looking for signs of accelerating industry capex and hyperscaler tending activities into 2H26E-2027E. Kehua's orders directly from **major hyperscalers such as Tencent and Alibaba** as well as indirectly from **colos in China and in SEA** are key to monitor to gauge its data center products segment growth ahead, although domestic margins are tough given intense competition and strong pricing pressure from the domestic hyperscalers.
2. We believe the market currently has **limited expectation on Kehua gaining significant breakthroughs in the global (especially US) data center supply chain** in the near term, based on our conversations with investors, so any updates on this front could potentially drive the share price as the company has been in touch with

several global customers and is trying to get its power distribution and CDU certified since 2025.

3. While we model strong overseas energy storage sales growth in 2026E from an easy base, guidance on 2027E growth and margins is key to watch given the **increasing number of Chinese companies getting into the global utility-scale ESS market** which might lead to intense competition. Geopolitical tensions such as potential restrictions on Chinese inverters in Europe and US also raise investor concerns on the export sustainability of Kehua's utility-scale ESS products.

Earnings and TP changes: We revise down our 2026-30E net income forecasts by 5% to reflect the cost pressure in the domestic energy storage business as well as higher SG&A expense as a result of the 2026 ESOP plan recently granted in early Jul, partially offset by the one-off gains in 2Q26 and solid overseas energy storage progress. Accordingly, our 12m TP moves to Rmb35.0 (vs. Rmb37.24 previously), still based on 30x 2027E P/E. Maintain Neutral.

Megmeet (002851.SZ, Neutral)

2Q26 preview: We forecast 2Q26 sales/GP/EBIT/NP at Rmb3,300mn/759mn/173mn/140mn (+40%/+52%/+256%/+110% yoy). We expect **server power supplies sales will ramp up** in 2Q26 and drive >60% yoy sales growth for the overall power supplies segment as company noted during 1Q26 call that they haven been receiving orders for GB200/GB300. **Home appliance control will also be a major growth contributor** in 2Q26, growing >40% yoy in sales on the back of a low base in 2Q25 when the intermittent rainfall affected air-conditioner demand in India, in our view. According to multiple news reports (link 1, link 2), the AC industry sales in India saw strong growth this summer driven by the extended summer heat wave. Meanwhile, we model still **soft growth for the EV components business** during the quarter as a result of the broader domestic EV sales weakness. We look for 32% yoy SG&A expense growth as the company **continues to invest heavily** on R&D for future-gen products, sales & marketing to gain more customer access, and capacity expansion. That said, our strong NP growth forecasts (from a low base) are based on favorable product mix changes towards higher-margin businesses offsetting the raw material cost inflation pressure as well as slight improvement on operating leverage.

Key debates and watchpoints:

1. With the shipment of **Vera Rubin racks** ramping up in 2H26E, we await management comments on Megmeet's latest updates (e.g. wallet share allocation) for the **18.5kW PSU / 110kW power shelf.** Megmeet management noted during 1Q26 earnings call that they are aligned with global peer in terms of overall product development, sampling and verification timeline. Meanwhile, we believe the **server power supplies sales in 2026E will still mainly be supported by GB200/GB300 related products**, and it will be key to watch if there is any new customer win for the 5.5kW products.
2. We note there were **more than a half dozen brands showcasing their 800VDC sidecar prototypes** during Computex Taiwain exhibition in June 2026, so the commercialization of 800VDC products is key to watch to determine Megmeet's industry positioning in 2028 and beyond. Management previously guided they would receive more sampling orders for 800VDC power racks around mid-2026E.

3. As the company recently announced **a broad-based ASP increase across most product segments** due to raw material price cost inflation, it would be key to learn about customers' feedback and how the price adjustment affects company's expectations on growth and margins for different product segments. At the moment, we believe that the core control & automation businesses will see some pressure on volume growth post the price hike especially in the pricing-sensitive domestic market, while server power supplies will likely see smoother pass-through to overseas customers.
4. Megmeet filed for a **HK IPO application** in June 2026: Some investors see this as a sign that the company is confident in share gains in the future, while some question whether there are sufficient orders to support the future capacity.

Earnings and TP changes: We keep our 2026-30E net income largely unchanged, as our higher home appliance control sales forecasts are mostly offset by the lowered EV components revenue. Our 12m TP remains at Rmb112.0, still based on 32x 2028E P/E discounted back to 2026E with 11% CoE. Maintain Neutral.

Investment thesis, valuation methodology and risks

Kstar (002518.SZ, Buy)

Investment thesis: Kstar specializes in electric power conversion technology, providing data centers and energy storage systems (ESS) with a constant and stable power supply. It has achieved the largest UPS (uninterruptible power supply) shipments in China for more than 20 years. For Kstar, we expect the company to deliver solid revenue/net income growth, mainly driven by: (1) overseas AIDC customer expansion and product innovation (including high-power UPS, 800 VDC, SST etc.) serving broader regions including the North American market; (2) domestic data center revenue growth pick-up, riding on increased capex from both SOE and POE hyperscalers and expanding customer base in the domestic data center market, and (3) overseas ESS business recovery benefiting from channel inventories normalization and C&I ESS demand. We are Buy-rated on the stock considering the attractive P/E valuation on its long-term growth profile and better margin and returns vs. peers.

Price target risks & methodology: Our 12m target price of Rmb67.0 is based on 2028E P/E of 26x discounted back to 2027E at 11% CoE. Key downside risks: (1) Lower-than-expected US ODM order growth; (2) Slower new product launches especially 800V DC products; (3) Lower-than-expected overseas ESS growth and margin.

Kehua (002335.SZ, Neutral)

Investment thesis: Kehua is a leader in China's Uninterruptible Power Supply (UPS) market, with globally competitive power management products supported by a technology-focused and stable core management team. Since the early 2010s, Kehua has been broadening its offerings beyond stand-alone UPS products to tailor-made power management solutions for various industries, notably rail transit, data centers, electronics, oil & gas, base stations, etc. Kehua is also the one of the top PCS (Power Conversion System) makers in China with increasing overseas ESS exposure. We expect Kehua to ride on the tailwind of domestic data center capex growth given increasing AI applications and increased power demand of data centers. That said, we believe the current share price has factored in the domestic capex growth outlook while its overseas expansion (especially in the US) is slower vs. peer Kstar. We are Neutral-rated on Kehua given we see a relatively balanced risk/reward considering the current valuation level.

Price target risks & methodology: Our 12m target price of Rmb35.0 is based on 2027E P/E of 30x. Key up/downside risks: (1) Faster/Slower-than-expected overseas (especially US) expansion progress; (2) Better/worse-than-expected domestic hyperscaler capex; (3) Better/worse-than-expected price competition on domestic data center/ESS products.

Megmeet (002851.SZ, Neutral)

Investment thesis: Megmeet is undergoing a structural transformation from an automation & control specialist to a global AI server power supply contender. The company has secured volume orders for 5.5kW PSUs (GB200/GB300) with new orders and shipments to continue through 2026. While its entry into the NVIDIA MGX ecosystem validates its R&D capabilities, a gap remains in its high-efficiency product portfolio compared to tier-1 peers such as Delta Electronics. Moreover, the blurring of supply chain boundaries - with increasing new entrants could intensify competition for next-gen 800 VDC products and potentially higher uncertainties with the adoption of solid-state transformers (SST). At current valuations, we see a balanced risk-reward profile, with upside potential contingent on faster GPU/ASIC order wins or accelerated 800V product validation. Going forward, we will continue to monitor its execution on mass production yields and R&D progress of next-generation products. We are Neutral rated on a sector-relative basis considering earnings growth rate, return profile and P/E valuation.

Price target risks & methodology: Our 12-month TP of Rmb112.0 is based on 32x 2028E P/E discounted back to 2027E with 11% CoE. Key up/downside risks: (1) Faster/slower AI server PSU market share gain within NVIDIA ecosystem; (2) Faster/slower product validation progress with ASIC hardware supply chains; (3) Better/worse-than-expected execution on mass production; (4) Shorter/longer R&D cycles on 800VDC power products; (5) Faster/slower industry adoption on 800V DC power distribution architecture; (6) Global AI capex growth sustainability and AIDC supply/demand dynamics.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis.
