Asia Power Equipment

Addressing investors' concerns on pricing, policies, over-capacity and delay in transmission build-out

Power Equipment and Utilities

We have observed rising investor skepticism regarding the upcycle for Asian power equipment companies. In this note, we summarize investors' key questions and our responses. For Korean power equipment companies, we believe the key concerns include the recent flattening in T&D equipment prices, as indicated by monthly data (Figure 2-Figure 3), delays in ultra-high-voltage transmission lines in the U.S., and a high base for new orders in 1Q. Our view is that pricing for high-voltage T&D equipment is still holding up well, with ~40% OPM or above for UHV products, supported by delays in capacity expansion plans by some players, the difficulty for EM players such as China and India to penetrate the U.S. regulated market, and exceptionally strong demand from both utilities and data centers. While there have been delays in UHV transmission build-out in the U.S., we see this more as a near-term scheduling/phasing issue rather than a structural slowdown in transmission needs. The recent heatwave and spike in power prices (Figure 5) have brought grid constraints to the forefront, while decades-long underinvestment in transmission lines remains unresolved (Figure 6). Although upcoming 2Q26 results could be less exciting for names such as Hyosung Heavy, given a high base and potential order delays related to Middle East conflicts (see our 2Q preview), we view this as an opportunity to accumulate quality names. We see a good entry level for Hyosung Heavy if it falls below KRW 3,000k, implying <20x 2028E P/E.

- **Have U.S. T&D equipment prices plateaued?** We have noted recent concerns about potential overcapacity in gas turbines/engines (see note by our U.S. machinery analyst), and we have received questions on whether T&D equipment pricing has started to decline as capacity increases. Our takeaways are: (1) Our channel checks suggest high-voltage T&D equipment prices have held up well, given muted capacity expansion YTD; (2) While numerous power equipment manufacturers have announced capacity expansions, the pace of execution remains uncertain due to lengthy regulatory approval

See page 7 for analyst certification and important disclosures, including non-US analyst disclosures.

stephen.tsui@jpmorgan.com

processes and labor shortages. Supply growth is constrained and we have seen limited opportunities for Chinese and Indian suppliers to penetrate the regulated U.S. market (see our takeaway note from the investor tour). While the U.S. PPI for transformers appears to be flattening, this is a lagging indicator and includes T&D equipment across all voltage levels, which may not fully reflect pricing power for high-voltage T&D transformers and switchgear. Also, we believe margin expansion is a function of a more favorable geographical mix (i.e. higher US sales), and product mix (e.g. higher sales for UHV products, which carry 5-10ppt higher operating margin than other products).

- **Would behind-the-meter generation for DCs dampen T&D demand?** The US government has released policies to support behind-the-meter power generation for data centers (see note by our US clean energy analyst). This has sparked concerns that less transmission build-out and grid investments may be required. Our takeaways are: (1) While behind-the-meter generation is gaining momentum, the need to ramp up transmission investment remains. This is driven by renewable build-out (and the associated need for long-distance transmission), rising power consumption (from manufacturing reshoring and electrification), and replacement demand; (2) High-voltage T&D equipment is still required for behind-the-meter generation, as data centers grow in size and operate at higher voltages. For example, the Stargate data center in Texas requires extensive high-voltage infrastructure, including a 345kV substation with five main power transformers and multiple high-voltage circuit breakers (Figure 4).
- **Why would the US continue to ramp up T&D capex despite the proliferation of BTM?**Recent events underscore that grid constraints remain a binding risk. During the late-June heatwave, PJM—the largest US grid operator—highlighted major transmission congestion alongside sharp wholesale price spikes, with spot power prices rising to ~US$300/MWh (versus a more typical ~$25–40/MWh, per Reuters). As peak loads rise with extreme weather and the generation mix shifts toward renewables, the system becomes more exposed to congestion and outage risk—especially when conditions tighten across a broad footprint. This pressure is compounded by structural demand growth from data centers and EVs; Reuters reported that PJM's wholesale power costs rose 68% YoY in the first five months of 2026. In this context, expanding high-voltage transmission is a practical reliability and economic response: extra-high-voltage lines (e.g., 765 kV) can be materially more cost-efficient on a $/MW basis than lower-voltage alternatives (often cited as ~75% lower per MW vs. 230 kV) for moving large blocks of power over long distances. More broadly, high-voltage AC and HVDC buildout is needed to deliver firm capacity to growing load centers and to integrate remote wind and solar resources, supporting grid stability as power flows and operating requirements evolve.

- **Could the delay in approval of 765kV transmission lines post downside risks to equipment demand**? The Public Utility Commission of Texas (PUC) has delayed decisions on several 765-kilovolt (kV) transmission projects, including the Longshore-to-Drill Hole route in West Texas and the Bell County East to Big Hill project in Central Texas. This has raised concerns about a broad-based delay in UHV transmission in the US, in our view. Overall, we believe the timing slippage raises "execution" concerns, not "demand" concerns. Admittedly, such UHV buildout could face knock-on permitting/solicitation bottlenecks, but we view this as a near-term scheduling/phasing issue rather than a structural slowdown in UHV need. Grid stress events reinforce the need for such build-out (see above).

- **Is AIDC capex losing steam?** Meta (META US, Neutral, covered by JPM's Doug Anmuth) is exploring the creation of an AI infrastructure business that would allow external developers to rent access to its AI models and underlying compute capacity (see note). In our view, this has raised concerns among some investors about potential overcapacity in AIDC. Our analyst believes that monetizing infrastructure would give Meta greater flexibility and help the company recoup part of its substantial investment, similar to what we have seen with other large infrastructure players. Our analysts forecast AI capex rising meaningfully from US$600bn in 2026E to approximately US$1.4tn by 2030E (Figure 7). The long-term outlook for AI infrastructure investment remains robust: total AI capex spending is now expected to reach $5.5tn through 2030, up from $5.1tn in prior forecasts, which is expected to drive 138GW of new data center capacity.

- **Have Hyundai Electric/Hyosung Heavy reached peak multiples?** HDE and Hyosung Heavy trade at 25x 2027E P/E on average, versus LS Electric at >40x. We believe their valuation discount reflects limited direct exposure to data centers. Note that HDE/HYS derived almost 90% of new orders from utilities and grids last year; as a result, investors may view them as purer T&D plays, while LS Electric commands a premium given its higher direct exposure to data centers (30–50% of new orders this year, on our estimates). That said, we think the valuation gap could gradually narrow if HDE/HYS increase their direct exposure to data centers. Local news reported that HDE recently won a US data center order with a contract value of >US$700mn. For Hyosung Heavy, the company has announced plans to establish a joint venture with Quanta Services (PWR US, OW, covered by JPM's Mark Strouse) to supply circuit breakers to data centers, utilities, and other customers. These developments suggest further progress on data center order wins, and we believe investor perception could improve as the companies demonstrate additional DC project wins.

- **Is the upside from domestic opportunities priced in?** The Korean government and major AI companies shared their long-term vision for an AI mega-project last week, including a >KRW 4,700tn long-term investment plan (see note by our Tech analyst). The investment timeline is distant (through 2040E/2033E for Samsung/SK Group, respectively), and actual capacity build-out execution is highly dependent on industry supply-demand dynamics, given the cyclical nature of the memory industry. Yet our Tech analyst believes this is a long-term positive for power infrastructure suppliers. We believe the Street has only priced in single-digit growth in domestic power equipment demand over the next few years, which could lead to potential earnings revisions in the medium term once we have more details on the domestic T&D capex plan and the broader mega tech investment plan.
- **Would Korean electrical equipment companies suffer from concentration risk due to country exposure?** One key pushback we've received from investors on Korean power equipment names is country exposure: the companies we cover have a high concentration of new orders from the US market. This has raised concerns about heavy reliance on US order momentum tied to the tech capex cycle. That said, we are seeing increasing progress in winning orders outside the US. For example, Hyosung Heavy Industries has signed a long-term agreement with AusNet (operator of Victoria's transmission network in Australia) to supply UHV transformers and reactors, with a contract value of KRW 310bn. This follows another win in March: a KRW 142bn ESS order in Queensland. Note that Hyosung has a leading market share in the ultra-high voltage circuit breaker market in India and India accounted for ~5-10% of Hyosung's Heavy Industries revenue last year. LS Electric also aims to accelerate its push into Europe, which could become its next strategic market (per Korea Times). Note that the company is attempting to obtain more certifications in Europe to open paths into its green procurement market. Hyundai Electric also saw a >15% increase in Europe revenue in 1Q26.
- **Would capacity expansion by Indian players lead to over-capacity issues for T&D equipment?** Some investors are concerned that the US T&D market's demand/supply outlook could deteriorate, driven by meaningful capacity expansion plans by Indian players, and CG Power has also reported a US order win for power transformers for a large-scale US data center project. Our view is that we are not aware of Indian players winning AIDC-related orders in the US in any meaningful way—unlike Chinese players, where multiple companies have already announced order wins (see our takeaway note from the data center conference)—and it therefore does not appear that Indian players are materially gaining share in electrical equipment for US data centers. While the Indian subsidiaries of GE Vernova and Hitachi are expanding T&D equipment capacity, they do not contract directly with data center customers; orders are primarily routed through their parent companies. Domestic demand in India also remains strong (see our initiation note on India power equipment).

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

Coverage Universe: Tsui, Stephen T: CK Infrastructure (1038.HK), CLP Holdings (0002) (0002.HK), China Gas Holdings (0384.HK), China Resources Gas (1193.HK), China Resources Power (0836.HK), ENN Energy (2688.HK), ENN Natural Gas – A (600803.SS), HD Hyundai Electric (267260.KS), Hangzhou Oxygen (002430.SZ), Hong Kong & China Gas (0003.HK), Huaming Equipment - A (002270.SZ), Huaneng Power - H (0902.HK), Hyosung Heavy Industries (298040.KS), Kunlun Energy (0135.HK), LS Electric (010120.KS), Nari Technology - A (600406.SS), Power Assets (0006.HK), Qingdao TGOOD Electric (300001.SZ), Sieyuan Electric - A (002028.SZ), Wasion Holdings Ltd - H (3393.HK), Xuji Electric - A (000400.SZ)

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	**Neutral** (hold)	**Underweight** (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

***Please note that the percentages may not add to 100% because of rounding.**
****Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.**
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 (“the FPO”); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA’s policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
