adidas (ADSGn.DE, covered by Richard Edwards) reported largely in-line 2Q26 results with 2Q26 cFX sales +14% (company-compiled consensus +13% yoy) led by solid apparel and DTC growth. **Full-year topline guidance was raised with FY26 cFX sales** now expected to grow 9%-10% from +HSD% previously (1H26 cFX sales +14% yoy, ahead of full-year guidance). We see a **mixed-to-positive read-across** to our covered OEMs, distributors and local brands.

In 2Q26, adidas China revenue **maintained the above-industry growth at cFX +15% yoy.** Though slightly moderated from +17% last quarter, this still **meaningfully outpaced peers as** Nike China declined -17% yoy in the May quarter, Pou Sheng was -3% yoy in 2Q26, and major domestic sportswear brands/retailers' sell-through growth (Anta brand/Fila/Li Ning/Xtep delivered +LSD/+LSD/-LSD/-MSD growth in 2Q26).

**1. We view it positive-to-mixed on OEMs:** we expect adidas orders to remain a key growth driver for our covered OEMs in 2026-27, underpinned by the strong brand momentum and wallet share gains. We also see growth engines outside of classics footwear product cycle concerns: **performance category accelerated to +39%** led by +DD% growth in Football, Running, and Motorsport as well as +HSD% in Training, **while lifestyle category moderated to +2%** (+6% in 1Q26) due to industry discount pressure in lifestyle footwear category. By category, **apparel accelerated to +35% cFX yoy, driven by +DD% apparel growth in Football and Originals, and strong increases in Running, Training, Motorsport, and US Sports, implying a better outlook for apparel makers;** on the other hand, footwear **slowed to +1% cFX yoy mainly on a lag in lifestyle footwear due to competition and discounting which implies pressure among footwear OEMs, but mgmt expects footwear growth to improve into 4Q26/1Q27 as order books improve and channel inventory normalizes.** 2Q26 inventory +12% cFX yoy was slightly slower than cFX sales growth, with the overall inventory structure remaining healthy. **On oil-price related cost increase,** the company noted that oil prices have been off-peak and the cost impact on raw material/freight has been under control given costs have been locked in. **On balance, we believe apparel maker Shenzhou should benefit the most from solid adidas momentum especially in apparel/China. Footwear makers face competition, but on the positive side, mgmt's constructive outlook into 4Q26/1Q27 may benefit future orders**. Huali would still benefit from solid wallet share gain in adidas supply chain this year, while Yue Yuen may focus on high-end adidas orders.

**2. Relatively positive for distributors: on the positive side,** 1) we are encouraged to see adidas China continued to take share in 2Q26 thanks to successful execution of localization strategy, as seen from the local events / products e.g. the backyard legends activation event in Shanghai, the premium lux collection launched in the China market; 2) the company has been increasing local-for-local sourcing in China which should improve supply chain efficiency, reduce inventory take backs from distributors and alleviate inventory concerns. Despite this, 1) we believe that adidas's solid reported figures may not fully translate into retailers' growth given retailers have been more skewed to offline retail, 2) Nike as the largest competitor for adidas and largest brand for Topsports/Pou Sheng still struggles.

**3. Negative for domestic brands:** adidas' continued momentum despite a relatively soft macro backdrop underscores the strength of its product innovation, brand equity, marketing, channel management, and localization capabilities, and could intensify competition. Meanwhile, the overall macro and demand backdrop remains challenging; as a reference, we previously removed sportswear brand from our preferred sector list considering the fluid 2Q26 demand and weaker than expected pricing trends. **On the positive side,** the market share gain opportunities from Nike's prolonged adjustment and slower reset could offer opportunities for domestic brands, though we need to closely monitor Nike's strategy on potential inventory management from these online channels which could lead to a more promotional environment.

**Within the whole apparel/footwear value chain,** we like Anta's multiple brand strategies to capture different demand scenarios with an in-line 2Q26 and above-expectation 1H26 run-rate.

**By market:** cFX revenues for the adidas brand increased +14% yoy, reflecting its continued broad-based momentum. By region, cFX revenues were LATAM +28% yoy, Emerging Markets +12% yoy, Europe +6% yoy, Greater China +15% yoy, Japan/South Korea +18% yoy and North America +17% yoy.

**Greater China:** mgmt highlighted Greater China's strong momentum (+15% yoy) continued to be supported by the localization strategy. 2Q China Gross margin improved 1.9 pp yoy to 56.0%, and China 2Q EBIT margin came in at 23.0% (+0.3pp yoy).

**By category:** Apparel sales grew cFX 35% yoy in Q2 (vs. +31% in 1Q26) driven by double-digit increases in Football and Originals, also strong increases in Running, Training, Motorsport, and US Sports. Footwear revenues for the adidas brand grew cFX +1% yoy in Q2 (vs. +4% in 1Q26), and the company noted the strong product offering drove double-digit footwear increases in several performance categories, led by Running and Training, alongside strong growth in many lifestyle footwear franchises. Though footwear moderated from 1Q26, mgmt expects footwear growth to improve into 4Q26/1Q27 as the order book for wholesale improves **and channel inventory normalizes.**

**Inventories** increased 13% by Jun-quarter and were up 12% yoy Cfx, slower than cFX sales growth. End-Jun inventory (~€6.0bn) was slightly higher than end-Mar (~€5.8bn) mainly due to lower than expected Middle-East sell-through. Overall the inventory structure remained healthy with only 9% from previous seasons.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

## GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

## M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

## Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.
