Equinix (EQIX) 2Q26: Watt a guide!

EQIX reported a strong beat and raise this quarter, most notably updating long-term guidance for 2027-2029. The company has raised its annual AFFO per share growth from 5-9% to 9-12%. Correspondingly, they have also raised their capex guide: from $3-4B annually to $5-7B. We think EQIX has a good chance of achieving this ambitious guide given its build plans, price-up opportunities (particularly in interconnect), and increased cost takeouts; we maintain our Outperform and take our Price Target up to $1270.

We can't say the upped guidance is entirely new news… in our Q1 callback note we pointed out that the build plans had gone from an incremental ~2GW to an incremental ~5GW (including atNorth, scheduled to close later this year and NOT included in today's guide).

The capex numbers will absolutely get some side-eyes, but we're okay with them. EQIX is building to extremely attractive development yields (mid-20s, well ahead of peers). ~80% of that capex is going to 25 top markets where they already have facilities. While there is a 3-4 year lag between capex and stabilized assets, top markets are extremely tight and will be secure for decades. The company doesn't need to issue equity to fund it, and incremental debt will be limited (<1 turn of leverage through end of 2029) - we don't see a ton of downside. Nevertheless, there is a swath of investors who won't like it.

In terms of the quarter itself, performance was strong. This is EQIX's third consecutive quarter of double-digit MRR growth, with many deals driven by AI workloads. A record 9,700 interconnections were added, driving interconnection revenue up ~9% YoY at very high margins (we love this business). Churn remains below the guided range, installed cabinets are coming off the development conveyor, and Adjusted EBITDA margin hit a record 53%, with some more room to run.

Especially in an environment with AI question marks, we believe EQIX represents an asymmetric risk/reward, particularly over the long-term. It does benefit from AI tailwinds, but underneath, enterprise colo demand is durable and sticky. We reiterate our Outperform.

DETAILS

WHAT WE LEARNED.

Equinix delivered an exceptionally strong second quarter, marked by accelerating double-digit recurring revenue growth, record profitability, and the largest single guidance raise in company history, alongside a significantly upsized long-term outlook through 2029. Management emphasized broad-based and durable AI-driven demand, record bookings and backlog, and continued operating leverage, raising full-year 2026 revenue, adjusted EBITDA, and AFFO guidance for the second consecutive quarter while nearly doubling its 2027-29 CapEx plan to capture what it called a materially stronger market opportunity than a year ago.

Underlying demand accelerated further across the core retail colocation and interconnection franchise. 2Q26 revenues totaled $2.625B (+2% vs $2.585B consensus), up 16% YoY on both an as-reported and normalized and constant-currency basis, reflecting strong underlying performance plus one-time xScale fees, including 134 megawatts of xScale leases (including Hampton and Anton) that contributed approximately $120M in nonrecurring fees. Recurring revenues of $2.377B grew 11% YoY on a normalized and constant-currency basis, marking the third consecutive quarter of double-digit monthly recurring revenue (MRR) growth. In-quarter, Equinix delivered $424M of annualized gross bookings, up 23% YoY and its second-highest volume on record, along with approximately $110M of presales activity, for total sales activity growth of over 30% and a record backlog. Management noted the Hampton xScale lease, previously expected in 1Q26, closed in 2Q26 as anticipated with no change to the full-year outlook, and that excluding Hampton, the Americas region still posted low-teens double-digit recurring revenue growth. Management did not attribute any variance to demand softness, instead pointing to very firm pricing, record bookings, and resilient customer spending across regions and verticals.

- **Total interconnection revenue** increased 9% YoY on a normalized and constant-currency basis to $453M, with cloud router (Fabric Cloud Router) bookings up approximately 170% YoY, driven by higher attach rates and rising enterprise demand for virtual connectivity. Net interconnection additions totaled a record 9,700 in the quarter, the most ever, with management emphasizing that interconnection growth is increasingly tied to AI workloads, multi-cloud networking complexity, and demand for low-latency, sovereign connectivity.

- **AI-related demand** became even more prominent and structurally embedded in 2Q26. The vast majority of the company's largest deals were AI-related, consistent with prior quarters, as customer conversations matured across four distinct AI use cases: "stack" (open models on private AI infrastructure to reduce token costs), "sovereign" (data residency and compliance-driven deployments), "batch" (AI factories for model training and batch inferencing, aided by liquid cooling), and "latency-sensitive" (agentic workloads requiring metro-level proximity). Management highlighted that 8 of the top 10 AI model providers and 8 of the top 10 neoclouds are already running key networking workloads on Equinix, and that its ecosystem is approximately twice the size of the next-largest provider. Fabric Geo Zones, a new network-level data sovereignty offering, expanded to approximately 80 enterprises in preview, up from roughly 20 the prior quarter.

Adjusted EBITDA reached $1.396B (+3% vs $1.358B consensus), a record margin of 53%, up 22% YoY on a normalized and constant-currency basis (24% as-reported), driven by continued cost discipline, scaling operating leverage, and xScale leasing fees; excluding scale leasing fees, the adjusted EBITDA margin still expanded approximately 150 basis points YoY. AFFO totaled $1.168B, up 19% YoY on a normalized and constant-currency basis (20% as-reported), while AFFO per share rose to $11.78 (+4% vs $11.29 consensus), up 18% YoY on a normalized and constant-currency basis. Churn was 1.8% in the quarter, primarily reflecting renewal process execution and some delayed churn, with management guiding toward the low end of its typical 2%-2.5% target range for the back half of the year.

Capacity expansion and capital deployment accelerated meaningfully under the Build Bolder strategy. Equinix ended the quarter with 52 major projects underway across 33 markets (up from 46 projects across 32 markets in 1Q26), including new projects added in Madrid, Milan, Silicon Valley, Chicago, Istanbul, and Johor, and accelerated more than 7,000 cabinets from 2027 into 4Q26. Approximately 30% of remaining 2026 retail capacity expansion has already been pre-sold, and 194 stabilized assets are collectively 82% utilized, generating a 27% cash-on-cash yield on gross PP&E. Second-quarter capital expenditures totaled approximately $1.6B, with roughly 90% directed toward growth and capacity expansion. Net leverage stood at 3.6x annualized adj. EBITDA, with approximately $7.7B of available liquidity including an upsized revolving credit facility.

Equinix raised full-year 2026 guidance for the second consecutive quarter, reflecting outperformance and a stronger outlook for the remainder of the year:

- **Revenue**: Raised by $100M to $10.205-$10.285B, representing 11%-12% growth (up from the prior 10%-13% range from 1Q26)
- **MRR growth**: Expected around 10%, at the high end of the prior range
- **Adjusted EBITDA**: Raised by $62M to $5.210-$5.270B, reflecting an adjusted EBITDA margin of approximately 51%, a 200bps improvement YoY
- **AFFO**: Raised by approximately $50 million to $4.240-$4.300B, with AFFO per share growth guidance increased to 10%-12%
- **CapEx**: Raised to $5.0-$6.0B (excluding real estate acquisitions and xScale), up materially as the company accelerates capacity expansion, including doubling the cabinets delivered in the second half of the year
- **Churn**: Expected to trend toward the lower end of the typical 2%-2.5% target range for the back half of 2026

THE LONG VIEW

EQIX is the juggernaut of the enterprise data center market, with sticky, durable revenue. Interconnection, major metro locations, and service continue to be important to enterprise buyers, and on those metrics, EQIX is hard to beat. In recent years, EQIX has not built apace with the market, putting a ceiling on near-term growth opportunity. For reference, EQIX implied share of market supply has fallen from ~8% in 2020 to ~5% in 2025. However, EQIX is working to course-correct, and is bringing cabinets online at an impressive rate, particularly demonstrated in the last couple of quarters.

We model a multi-year lag from large-scale build to revenue, with elevated capex in the interm. While we were initially skeptical of xScale, EQIX's hyperscale-focused fund ($15B, EQIX has 25% share), we think there may be some upside here. We are not optimistic that it will outperform the hyperscaler data center market, but that market is growing quickly and EQIX has seen some early traction. We are therefore modeling ~$500M of net income contribution by 2030.

For catalysts, we are watching EQIX's available and billing cabinets across geographies, capacity online, and xScale commentary, in addition to the closing of their atNorth acquisition later this year, which is expected to be immediately accretive.

VALUATION METHODOLOGY

Equinix, Inc.

We value EQIX on a forward Price-to-Adjusted Funds From Operations (AFFO) per share multiple. Our $1,270 price target is based on ~25x NTM+1 AFFO per share of $51.19.

RISKS

Equinix, Inc.

The main downside risks to our price target/Outperform rating on EQIX are 1) Slowdown in enterprise demand for data center capacity, 2) Increased competition in the interconnection space, and 3) Continuing decline in market share of data center supply may elevate pricing pressures

RATINGS DEFINITIONS, BENCHMARKS AND DISTRIBUTION

EQUITY RATINGS DEFINITIONS

Bernstein brand

The Bernstein brand rates stocks based on forecasts of relative performance for the next 12 months versus the S&P 500 for stocks listed on the U.S. and Canadian exchanges, versus the Bloomberg Europe Developed Markets Large and Mid Cap Price Return Index EUR (EDME) for stocks listed on the European exchanges and emerging markets exchanges outside of the Asia Pacific region, versus the Bloomberg Japan Large and Mid Cap Price Return Index USD (JPL) for stocks listed on the Japanese exchanges, and versus the Bloomberg Asia ex-Japan Large and Mid Cap Price Return Index (ASIAX) for stocks listed on the Asian (ex-Japan) exchanges -unless otherwise specified.

The Bernstein brand has three categories of ratings:

- Outperform: Stock will outpace the market index by more than 15 pp
- Market-Perform: Stock will perform in line with the market index to within +/-15 pp
- Underperform: Stock will trail the performance of the market index by more than 15 pp

Coverage Suspended: Coverage of a company under the Bernstein research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Not Covered (NC) denotes companies that are not under coverage.

Bernstein brand stock ratings are based on a 12-month time horizon.

Autonomous brand – common stocks

The Autonomous brand rates common stocks as indicated below. As our benchmarks we use the Bloomberg Europe 600 Financials Price Return Index (E600BK) and Bloomberg Europe Dev Mkt Financials Large and Mid Cap Price Ret Index EUR (EDMFI) index for developed European banks and Payments, the Bloomberg Europe 600 Insurance Price Return Index (E600IN) for European insurers, the S&P 500 and S&P Financials for US banks and Payments coverage, S5LIFE for US Insurance, the S&P Insurance Select Industry (SPSIINS) for US Non-Life Insurers coverage, the Bloomberg Emerging Markets Financials Large, Mid and Small Cap Price Return Index (EMLSF) for emerging market banks and insurers and Payments, and the Bloomberg Japan Financials Large & Mid Cap Price Return Index (JPFILM) for Japanese Financials. Ratings are stated relative to the sector (not the market).

The Autonomous brand has three categories of common stock ratings:

- Outperform (OP): Stock will outpace the relevant index by more than 10 pp
- Neutral (N): Stock will perform in line with the market index to within +/-10 pp
- Underperform (UP): Stock will trail the performance of the relevant index by more than 10 pp

Coverage Suspended: Coverage of a company under the Autonomous research brand has been suspended. Ratings and price targets are suspended temporarily, are no longer current, and should therefore not be relied upon.

Not Rated: A rating assigned when the stock cannot be accurately valued, or the performance of the company accurately predicted, at the present time. The covering analyst may continue to publish research reports on the company to update investors on events and developments.

Those denoted as 'Feature' (e.g., Feature Outperform FOP, Feature Under Outperform FUP) are our core ideas.

Not Covered (NC) denotes companies that are not under coverage.

Autonomous brand common stock ratings are based on a 12-month time horizon.

Autonomous brand – preferred stocks

The Autonomous brand has three categories of preferred stock ratings:

- Outperform (OP): The total return of the preferred instrument is expected to outperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Neutral (N): The total return of the preferred instrument is expected to perform in line with preferred securities of other issuers operating in similar sectors or rating categories over the next six months.
- Underperform (UP): The total return of the preferred instrument is expected to underperform preferred securities of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous preferred stock ratings are based on a 6-month time horizon.

AUTONOMOUS CREDIT RESEARCH

Where this report contains investment recommendations for credit instruments, as defined in article 3(1)(35) of the Market Abuse Regulation, the information below is presented to comply with its disclosure requirements.

The report may also include reference(s) to published opinions by other Autonomous or Bernstein analysts covering the equity securities of the issuer(s) referenced herein. Please note an investment recommendation for credit instruments published by the author(s) of this report may differ from the published view of the analyst covering equity securities for the issuer(s) contained in this report and vice versa.

CREDIT RATINGS DEFINITIONS

The Autonomous brand has three categories of credit ratings:

- Credit Outperform (C-OP): The total return of the Reference Credit Instrument is expected to outperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Neutral (C-N): The total return of the Reference Credit Instrument is expected to perform in line with the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.
- Credit Underperform (C-UP): The total return of the Reference Credit Instrument is expected to underperform the credit spread of bonds of other issuers operating in similar sectors or rating categories over the next six months.

Autonomous credit ratings are based on a 6-month time horizon.

A list of all investment recommendations produced by the author(s) of this report alongside credit ratings history are available upon request.

III. OTHER IMPORTANT INFORMATION AND DISCLOSURES

Separate branding is maintained for “Bernstein” and “Autonomous” research products.

- Bernstein produces a number of different types of research products including, among others, fundamental analysis and quantitative analysis under both the “Autonomous” and “Bernstein” brands. Recommendations contained within one type of research product may differ from recommendations contained within other types of research products, whether as a result of differing time horizons, methodologies or otherwise. Furthermore, views or recommendations within a research product issued under one brand may differ from views or recommendations under the same type of research product issued under the other brand. The Research Ratings System for the two brands and other information related to those Rating Systems are included in the previous section.

- Autonomous operates as a separate business unit within the following entities: Bernstein Institutional Services LLC, Bernstein Autonomous LLP, Sanford C. Bernstein (Hong Kong) Limited 盛博香港有限公司 and Sanford C. Bernstein (India) Private Limited. For information relating to “Autonomous” branded products (including certain Sales materials) please visit: www.autonomous.com. For information relating to Bernstein branded products please visit: www.bernsteinresearch.com.

Analysts are compensated based on aggregate contributions to the research franchise as measured by account penetration, productivity and proactivity of investment ideas. No analysts are compensated based on performance in, or contributions to, generating investment banking revenues.
