Laopu Gold - H

2Q miss; underappreciated efforts to drive 2H rebound; maintain OW

Laopu announced a 1H26 positive profit alert on 27 July (adjusted NP up 83-85%). Together with the pre-announced 1Q26 alert, this indicates 2Q earnings of Rmb510mn-760mn, missing our baseline expectation of cRmb800mn (see report) and the market expectation of cRmb900mn-1bn. We think the shortfall was due mainly to: (1) likely lower-than-expected 2Q SSSG – we estimate 2Q SSS down 14-50% vs. our baseline of -20%; and (2) a likely lower-than-expected NPM of 19.2-22.2% vs. our baseline of 21.8%, as higher-than-expected expenses offset robust GPM (JPMe >45%) due to a relatively high fixed salary mix and increased investment into brand. That said, we highlight several objective factors that affected 2Q, including sales pulled forward into 1Q ahead of price increases, unexpected gold price volatility (falling 17% from peak to trough in 2Q) delaying purchase decisions, and elevated volatility in traditional weak season. We expect 2H to rebound, supported by Laopu's active efforts (see report) to navigate the gold volatility since 2Q, including: (1) a more flexible strategy in new product launches; (2) further enhancement of consumer experience; and (3) upgrades in the channel network. We cut 2026E-28E earnings by 14-19% to factor in the impact of gold volatility on SSSG. Our revised DCF-based PT of HK$1,064 implies a 19x 2027E P/E. We see Laopu as the best positioned to benefit from experience-led growth with a systematic approach (disciplined store count, a DTC model and differentiated service quality, upheld by a highly selective/trained team). Maintain OW.

- **Efforts to navigate gold volatility:** (1) accelerated new product launches: Laopu announced 9 new collections in January-June, with the integration of more gemstones into designs (such as sapphire) and the introduction of new elements (such as prayer wheel and Greek cross) vs. 8 new collections announced in 2025 and 4 in 1H; (2) a lower threshold for gifts with purchase since April, e.g., threshold for 5g gold coin gifts down to ticket size >Rmb250k from Rmb500k; (3) enhanced experience, such as the optimization of after-sales service (separate queue for after-sales services currently vs. one queue for both purchase and after-sales services previously) and the enhancement of VIC management; and (4) channel upgrades, including upgrades of 8-12 domestic stores (better locations, such as Shanghai Plaza 66, taking over the former store space of Valentino on 2F), exhibitions of Laopu Classic Collections (e.g., exhibition in Shanghai IFC opened on 19 June), and 4-6 new overseas stores (mainly in 2H26).
- **2026E sales/earnings +39%/+46% yoy**, indicating 2H sales/earnings +19%/+7%, improving from 2Q. We expect top-line growth to be supported by: (1) ASP growth (2-3 price adjustments; product mix shift toward large-weight products); (2) the ramp-up of new boutiques (10 new boutiques in 2025, mostly after May) and the optimization of existing boutiques; (3) more frequent product launches; and (4) overseas expansion. We expect 1ppt NPM expansion, driven mainly by 5ppt GPM expansion, given Laopu's effective price adjustment mechanism, offsetting a 3.9ppt increase in the selling-expense-to-sales ratio, given the step up in brand investment.

Summary Investment Thesis and Valuation

Investment Thesis

Founded in 2009, Laopu Gold is a niche China heritage gold brand and one of the few Chinese jewelry brands positioned in the luxury segment. While Laopu has only 45 boutiques (as of 2025), it has 85%+ sales exposure to tier 1/new tier 1 cities, the highest single-store sales and a pricing premium vs. other Chinese local brands.

We expect Laopu to deliver a sales/NP CAGR of 24%/31% over 2025-28, given: (1) a fast-growing China heritage gold segment; (2) store network expansion opportunities in both China and overseas; and (3) SSSG supported by enhanced brand equity, penetration based on innovation and a strong value proposition vs. international brands, and an outstanding retail experience.

Valuation

Our DCF-based Dec-26 PT of HK$1,064 implies a 19x 2027E P/E. We derive our 9.4% WACC assuming a 4.3% risk-free rate, 7% risk premium, 11.7% cost of equity and terminal growth rate of 3.0%.

Estimate changes

We cut our 2026-28 earnings estimates by 14-19% due to: (1) the impact of gold volatility on SSSG; and (2) increase in A&P expenses.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, https://www.jpmorganmarkets.com.
