We expect BYDE's revenue growth to recover in 2027E supported by stabilizing demand for smartphones and PCs amid relatively stable memory costs, and the company's product mix upgrade with growing revenues exposure to Apple and BYD, along with expanding to the AI servers supply chain (liquid cooling, power supply). We continue to expect GM recovery through 2028E, while our previous estimates of 8-9% in 2026-28E could be difficult to achieve, considering the 4-5% GM in 4Q25 / 1Q26 when high memory costs tempered demand across consumer electronics and EVs. With lower forward year fundamentals (NI YoY and OPM), and sector de-rating amid the high memory costs, we lower our target price to HK$21 (vs. HK$40 previously). With less upside compared to the average of our Greater China Technology coverage (-2% implied downside for BYDE vs +41% for sector average), we downgrade BYDE to Sell from Neutral.

Since adding the stock to the Neutral list on Feb 9, 2026, its share price has been down 34% vs. a 14% decline in the Hang Seng Index; we attribute this underperformance to its smaller revenue exposure from AI servers and high memory costs weighing on the end market demand of its consumer electronics and EVs business. We would turn more positive on BYDE if the company delivers faster than expected AI servers ramp up, or we see a stronger than expected consumer electronics or automotive electronics recovery once memory costs become more stabilized.

Earnings revision

We reduce net income by 38% / 30% / 30% in 2026-28E mainly on lower revenues and GM. We reduce revenues across automotive electronics and consumer electronics, reflecting the modest end demand amid high memory costs, while we have added AI computing infrastructure into our forecasts, reflecting the company's expansion toward AI data centers. Despite the revenues cut, we continue to expect a recovery in 2H26 at +23% HoH, considering the stabilizing memory costs could bring better end market demand across EVs and consumer electronics, along with better seasonality and more flagship model launches. LPDDR4X / LPDDR5X mobile DRAM pricing rose 73-78% / 80-85% QoQ in 2Q26, and GS expects it to grow 18% QoQ in 3Q26 for SEC pricing; NAND pricing was up 55-60% QoQ in 2Q26, and GS expects it to grow 21% QoQ in 3Q26 for SEC pricing (report link), indicating that memory costs are gradually stabilizing. The lower GM reflects both modest end market demand and unfavorable product mix, in which we reduce the automotive electronics revenues contribution from 20-26% in 2026-28E to 18-25%, reflecting the slow EV market: BYD's shipment declined 16% YoY in 1H26 and the growth is mainly driven by export (link).

Despite the cut, our net income compared to Bloomberg consensus is largely in line, which is 5% / 1% ahead of consensus in 2026 / 27E. We expect the company's growth to trough in 1H26, and its net income to grow at +26% CAGR in 2026-28E driven by stabilizing end market demand, the company's product mix upgrade (focusing more on leading brand customers and reducing assembly business for China smartphones), and expansion toward AI servers, supporting its GM expansion from 5.9% in 2026E to 6.6% by 2028E.

Valuation

We continue to use near-term P/E to derive our target price for BYDE, and continue to derive our target P/E multiple based on peers' average ratio of 2027E P/E to 2028E NI YoY and OPM. With peers' avg. ratio of 0.4x (vs. 0.5x previously) and BYDE's 19% 2028E NI YoY (vs. 19% previously) and 2.5% 2028E OPM (vs. 3.6% previously), we derive a target P/E multiple of 9x (vs. 12.3x previously), which is also in line with the company's avg.-1stv. PE of 9x, reflecting our concerns about slow smartphone end demand amid the high memory costs. Accordingly, our 12m TP falls to HK$21 (9x 2027E P/E vs. 19% NI YoY in 2028E) from HK$40. With less relative upside vs. peers in our coverage (-2% implied downside for BYDE vs +41% for sector average), we downgrade BYDE to Sell from Neutral.

Upside risks:

- **Stronger-than-expected smartphone end market demand** could pose upside risks to our estimates as the company has revenue exposure across iPhones and Android smartphones (mainly China smartphones), and across assembly and components. Changes in smartphone end market demand could be caused by changes in memory prices, which could affect end-consumers' willingness to purchase new phones.
- **Healthier-than-expected competition in automotive electronics:** BYDE's automotive electronics is mainly for its parent company, BYD, and the competition dynamics could affect BYD's EVs shipments, smart driving adoption rate, and supply chain margin pressure.
- **Faster-than-expected expansion to AI servers components:** AI servers components enjoy better GM thanks to stronger end market demand compared to consumer electronics, and continuous specification upgrade in AI infrastructure. The pace of this new business expansion could pose upside risks to our earnings estimates for BYDE.

Investment Thesis - BYDE

BYDE is a global leading smartphone casing supplier, across metal, glass, ceramic, etc. and across iPhones and Android smartphones. The company has expanded from the casing business to smartphone assembly, automotive electronics, AI servers components (e.g. liquid cooling, power supply, optical modules), etc. and is focusing on leading customers (e.g. Apple, BYD) and components to drive growth and margin expansion. The stock currently trades at 10x 2027E P/E, close to our target P/E multiple of 9x; we believe the positives are largely in the price. With less upside compared to the average of our Greater China Technology coverage, we are Sell rated on BYDE.

Price Target Risks and Methodology - BYDE

Valuation methodology: We are Sell rated on BYDE with a 12-month TP of HK$21. We apply a 9x target P/E multiple to our 2027E EPS estimate, and convert it to HKD. Our target P/E is derived from BYDE peers' average ratio of 2027E P/E to 2028E fundamentals (NI YoY and OPM). Our target P/E multiple of 9x, is also in line with the company's avg. -1stv. of 9x, reflecting our concerns about slow smartphone market demand amid rising memory prices and a saturated market. **Upside risks:** (1) Stronger-than-expected smartphone end market demand; (2) healthier-than-expected competition in automotive electronics; and (3) faster-than-expected expansion to AI server components.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.
