Apple Inc. (AAPL)

F3Q26 preview: Expect beat driven by Products, iCloud & AppleCare+ to offset App Store slowdown

AAPL	12m Price Target: **$370.00**	Price: **$333.02**	Upside: **11.1%**

AAPL is outperforming since the start of C2Q26 as (a) investors rotated away from traditional AI infrastructure trades, (b) AAPL has demonstrated market share gains amidst industry-wide price increases due to memory cost inflation, and (c) concerns around AI disruption have been somewhat addressed given the promising progress in Apple Intelligence following WWDC. Though the stock initially reacted negatively to announced price increases to Mac and iPad in June, we expect existing price increases (and to the extent more price increases are announced) to reinforce longer-term earnings growth over the next few quarters as (a) we believe Apple's user base is relatively price inelastic given brand stickiness, US carrier subsidies, and availability of recent low-cost product launches (iPhone 17e, MacBook Neo), and (b) concerns around margin sustainability are somewhat addressed given ongoing memory cost inflation. Across Services, though App Store has continued to decelerate given ongoing commission rate compression across regions including China & Japan, we continue to believe product-related Services drivers (iCloud+, AppleCare+) have meaningful runway to continue driving DD% Services growth. **For F3Q26E, we forecast EPS of $1.93 (above consensus of $1.89), with outperformance on iPhone & Mac revenue, and gross margins**. Looking ahead, AAPL's annual September event, where AAPL should announce the iPhone 18 Pro/Pro Max & the iPhone Fold, should provide greater clarity into sizing the sustainability of iPhone demand given multiple quarters of >20% yoy revenue growth thus far in F2026.

Please read inside for our detailed estimates for F3Q26E, guidance expectations for F4Q26E, and an overview from our latest industry/market checks.

F3Q26 earnings preview

We forecast AAPL F3Q26 EPS of $1.93 (unchanged), above FactSet consensus $1.89, with revenue $110.1 bn (v. consensus $108.8 bn). Revenue of $110.1 bn represents +17% yoy growth, on the high end of AAPL's guidance for revenue to grow between 14-17% year-over-year. First, we forecast iPhone revenue of $54.8 bn (+23% yoy), above consensus $53.7 bn (+21% yoy), reflecting (a) +15% yoy unit growth, in-line with IDC estimates; and (b) ASP growth of +7% yoy on premium mix shift. Second, we forecast Services revenue to grow +15% yoy, in-line with consensus +15% yoy and above company guidance for growth in-line with F2Q26 Services growth (16%) excluding >2.5% forex tailwinds. Services growth should be driven by momentum across iCloud+, AppleCare+, and other subscriptions, partially offset by slower App Store revenue growth. Third, we forecast gross margins of 48.2% (v. consensus 48.1%), on the high-end of AAPL's guidance for 47.5-48.5% gross margins.

Exhibit 1: We expect AAPL to deliver a revenue & EPS beat driven by iPhone, Mac, and Services

FactSet consensus estimates as of 7/17/26

Source: Company data, Goldman Sachs Global Investment Research, FactSet

For the September F4Q26E quarter, we forecast EPS of $2.13 with revenue of $117.6 bn (v. Visible Alpha Consensus Data estimates for EPS of $2.01 and revenue of $114.3 bn), gross margins of 48.3% (v. VA Consensus +47.4%), and opex of $19.2 bn (v. VA consensus $18.8 bn). We expect AAPL to guide to F4Q26E revenue growth of 13%-15% yoy (v. GSe +15% yoy). We are encouraged by continued demand strength for the iPhone 17 family, price increases across the Mac and iPad product family where AAPL should see the first full quarter impact to margins in F4Q26E, and continued momentum in Services categories, where AAPL should benefit from price increases in Apple Care, Apple Music, and benefit from longer-term demand for storage via iCloud+.

Upcoming catalysts include the September event, where AAPL should announce the first foldable iPhone and iPhone 18 Pro/Pro Max and begin rolling out Siri AI with the launch of iOS 27.

Product: iPhone & Mac strength to drive beat

We estimate F3Q26 Product revenue of $78.7 bn (+18% yoy), above FactSet consensus $76.8 bn (+15% yoy) driven by strength in iPhone (GSe +23% yoy v. consensus +21% yoy) and Mac (GSe +15% yoy v. consensus +8% yoy). We forecast product gross margins of 36.8% v. consensus 36.4% as premium mix shift (toward iPhone and within iPhone models), forex, and component in-sourcing offset commodity cost inflation.

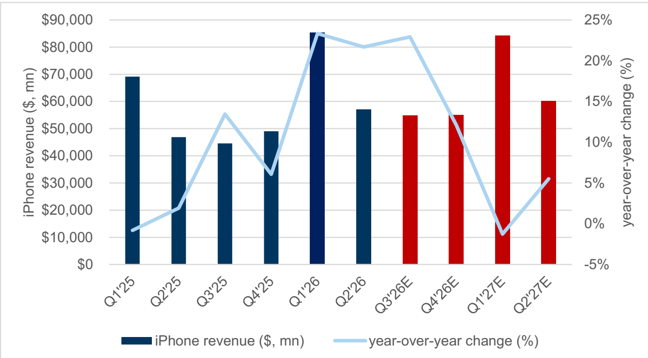
#1: iPhone: Revenue +23% yoy on continued iPhone 17 family strength & market share gains, ASP growth to accelerate

We estimate F3Q26E iPhone revenue of $54.8 bn (+23% yoy), just above FactSet consensus (+21% yoy), driven by +15% yoy growth in units and +7% yoy growth in ASP. Our in-quarter iPhone unit shipment estimate is in-line with IDC (55.8 mn, +15% yoy), and should be driven by continued strength in iPhone 17 generation demand, particularly given (a) refresh of aging devices with legacy technology, and (b) market share gains given pricing increases at competitors. Notably, per IDC, Apple gained ~4 pp of market share in China year-over-year (18% of total China market shipments in 2Q26) where competitors Samsung, Xiaomi, Vivo, and Oppo have raised prices this year. Separately, AAPL's commentary during F2Q26 earnings around being supply constrained on advanced nodes for SOC should reinforce sell-in shipment strength.

Our estimate for +7% yoy growth in ASP is underpinned by continued premiumization of the iPhone installed base, as well as (a) $100 starting price increases on the iPhone 17 Pro (v. 16 Pro) and iPhone Air (v. 16 Plus) driven by the elimination of the 128 GB starting storage model; and (b) introduction of the new premium 2 TB storage option for the iPhone 17 Pro Max.

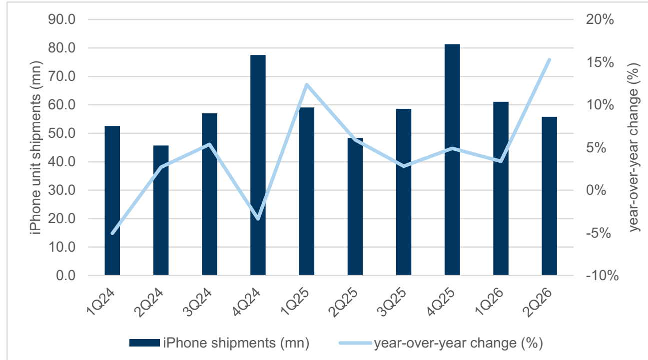
On a forward basis, we expect iPhone revenue to grow +20% yoy in F2026E as AAPL continues to benefit from continued device refresh and market share gains as competitors raise prices and are limited by memory supply constraints. That said, iPhone shipments should decline in F4Q26E and F1Q27E given the widely anticipated bifurcation of iPhone 18 model launches, whereas detailed in our product pipeline tracker below, AAPL should launch premium iPhone 18 family models in September 2026 (iPhone foldable, iPhone Pro/Pro Max), and lower-end models in Spring 2027 (iPhone 18e, iPhone 18 base, iPhone Air 2). As a result, though shipments should see tough comps with year-ago full iPhone 17 base/Air/Pro/Pro Max launches, ASPs should benefit as iPhone purchasing demand is concentrated across premium models. Additionally, given recent price increases on AAPL's Mac and iPad product portfolio and iPhone price increases in Japan, we expect any additional price increases to iPhone to drive upside to our estimates.

Exhibit 2: We estimate iPhone revenue should grow +23% yoy to $54.8 bn in F3Q26E
iPhone revenue ($, mn) & year-over-year change (%)



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 3: IDC estimates C2Q26 iPhone unit shipments grew 15% yoy to 55.8 mn, representing 20% of overall market shipments (+4 pp of share v. 2Q25)
iPhone unit shipments (mn) & year-over-year change (%)



Source: IDC

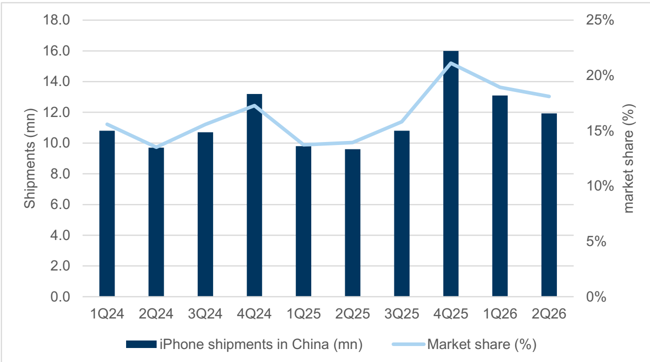
Exhibit 4: IDC's iPhone unit growth estimate is near that implied by Omdia and above that of Counterpoint
Industry unit shipment growth estimates across third party data vendors, smartphone market vs. iPhone

YoY growth (%)	IDC	Omdia	Counterpoint	Average
Smartphone market	-7%	-4%	-11%	-7%
iPhone	15%	20%	3%	13%

Omdia and Counterpoint iPhone year-over-year growth estimates are implied based on 2Q26 & 2Q25 market share data

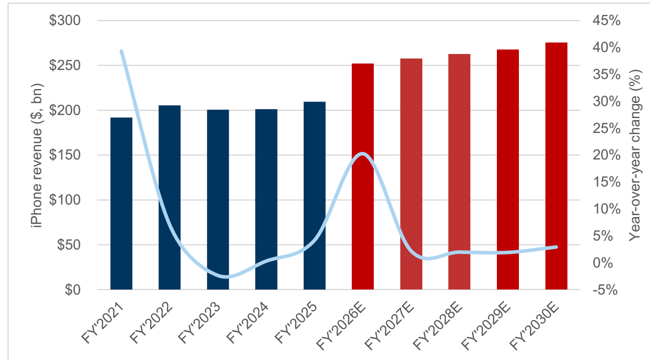
Source: IDC, Omdia, Counterpoint Research

Exhibit 5: iPhone unit shipments in China of 11.9 mn grew 24% yoy, representing 18% market share
iPhone shipments in China (mn) & market share (%)



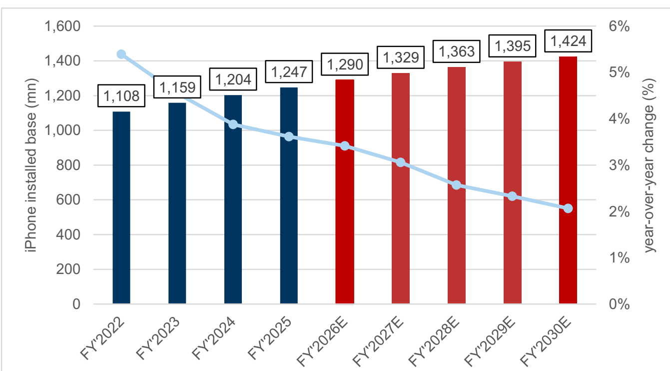
Source: IDC

Exhibit 6: We estimate iPhone revenue will grow 20% yoy in F2026, though should decelerate into F2027
iPhone revenue ($, bn) and year-over-year change (%)



Source: Company data, Goldman Sachs Global Investment Research

Exhibit 7: We believe that the active iPhone installed base will approach ~1.3 bn in F2026 as first smartphone and switchers continue to more than offset churn
iPhone active installed base (mn)



Source: Company data, Goldman Sachs Global Investment Research

#2: Mac: Unit demand strength, ASP growth to accelerate on price increases

We estimate F3Q26 Mac revenue of $9.3 bn (+15% yoy v. FactSet consensus +8% yoy) driven by +10% yoy growth in units (in-line with IDC estimates) and +5% yoy ASP growth. Strength in unit demand should be driven by (a) continued refresh of aging devices, and (b) popularity of MacBook Neo, M5 Pro & M5 Max MacBook Pros, and M5 MacBook Airs (all launched in March 2026), which should help drive market share gains given competitor price increases prior to Apple's June 26th Mac price increases. Separately, ASPs should grow by ~5% in the quarter and accelerate afterwards given (a) premiumization of the Apple product installed base, (b) prior March 2026 starting price increases across new M5 MacBook Airs and M5 Pro & M5 Max MacBook Pros, with partial offset by the debut of the $599 MacBook Neo ($699 following June 2026 price increases).

As a result, on a forward basis, we expect Mac revenue to grow +10% yoy overall in F2026, supported by the ~18% price increases across the product portfolio, demand strength for the March 2026 Mac releases, as well as market share gains within the <$800 segment of the PC market, where MacBook Neo should be well-positioned to compete against other players that have meaningfully increased prices to address rising memory prices (e.g., Dell, HP, Lenovo). Though investors have been concerned around demand deterioration with portfolio price increases, we expect Apple, with its strong competitive moat around macOS (and iOS more generally), to be better positioned against windowsOS competitors where demand may be more elastic.

#3: iPad: Forward ASPs to accelerate on price increases, in-quarter units challenged by tough year-ago launch comps

We estimate F3Q26 iPad revenue of $6.8 bn (+4% yoy v. FactSet +8% yoy), driven by -2% unit growth and +5% yoy ASP growth. Unit decline of -2% yoy should be driven by tough year-ago comps with the year-ago release of the A16 base iPad, though the segment should benefit from the March M4 iPad Air launch as well as October 2025 release of the M5 iPad Pro. That said, unit growth should improve given the upcoming launch of the 8th-gen iPad Mini & early 2027 refreshes of iPad (12th-gen), iPad Air (M5 chip), and iPad Pro (M6 chip). Our +3% ASP growth estimate is underpinned by our belief that iPad ASPs should continue to benefit from premiumization given (a) user preferences, and (b) the aged portfolio of lower ASP models including the base iPad (11th-gen, last released in March 2025) and iPad Mini (last released October 2024) relative to more premium iPad Air and iPad Pro models. On a forward basis, we anticipate ASP growth to accelerate in F4Q26 & F1Q27 given recent price increases across the new iPad lineup, where prices increased by over 20% on average. Given that price increases took place on June 26, 2026, we expect a 1 pp ASP uplift to F3Q26 numbers.

Due to lagged historical data releases from Omdia (formerly Canalys), we show data reported as of C1Q26.

#4: Product Pipeline

We update our product pipeline tracker for the latest reported upcoming AAPL products. **AAPL's most important product launches for the remainder of 2026 are expected in the fall, and include the premium-end iPhone 18 generation products (foldable iPhone, iPhone 18 Pro, and iPhone 18 Pro Max), an M6 MacBook Pro, and Smart Home Device.**

Exhibit 20: AAPL continues to have a breadth of upcoming product releases throughout 2026 and beyond
Illustrative AAPL Product Pipeline

Product Category	Upcoming Model	Expected Release	Specs	Sources
iPhone	iPhone 18 (Foldable, Pro, Pro Max)	Sept. 2026	Foldable book-style form factor without visible crease and Touch-ID at over $2,000; 2-nm A20 series chip; variable aperture camera on Pro model; under-screen Face ID for Pro/Pro Max; removing dynamic island. Pro models to include C2 chip (instead of Qualcomm modem)	1, 2, 3, 4, 5, 6, 7, 8, 9
	iPhone 18 (base, 18e, Air 2)	early 2027	2-nm A20 series chip; 9 GB RAM	5, 10, 11
	iPhone 19 (Pro, Pro Max)	Sept. 2027	All-screen glass display on iPhone Pro	5, 7, 12
Mac	Mac mini	mid-2026	M5 and M5 Pro chips	13,14
	Mac Studio	late-2026	M5 Max and M5 Ultra chip	13, 14, 15
	iMac	2026	M5 chips	14
	MacBook Pro	late 2026	M6 chip	16
	MacBook Ultra	late 2026-2027	First OLED Mac, touch screen, thinner design, more expensive than MacBook Pros with M5 Max chips ($3599 starting), M5 Pro & M5 Max chips	17, 43
	MacBook Air	early 2027	Similar design to current gen	43
	MacBook Neo (2nd-gen)	2027	A19 Pro chip, 12 GB of Ram	18, 19, 20, 43
	MacBook Ultra	late 2027-early 2028	M7 Pro and M7 Max chips	43
	MacBook Air	2028	OLED display	43
	Mac Studio	2028	M7 Ultra chip, better heat sink	21
iPad	iPad Mini (8th-gen)	2026	A19 Pro chip; potentially OLED display	22
	iPad (12th-gen)	2027	A18 chip	23
	iPad Air	early 2027	M5 chip	24
	iPad Pro	early 2027	M6	8
	iPad (foldable)	2029	$3,000 price range; 18-inch display	25
Wearables & Accessories	Magic Mouse	2026	Relocated charging port & updated design	26
	AirPod Pro with cameras (Ultra)	2026/2027	Infrared cameras to feed Visual Intelligence into Siri; priced above AirPods Pro	27, 28, 29
	Smart Glasses	2027	Pairs with iPhone; no display. Includes speakers, cameras, and voice-control capabilities. Embedded battery	30, 31
	AI Pin	2027	Wearable pin (thin, flat circular disk) with two cameras to capture photos of surroundings. Includes speaker and microphone. Similar size as AirTag.	32
	Smart Glasses with Display	2028 or later	Features display	30
Misc	Home Pod mini 2	Fall 2026	New S-series chip; improved sound quality; additional colors; contains Apple's designed Bluetooth and Wi-Fi chip (instead of Broadcom's), supporting Wi-Fi 6	33, 34, 35
	Smart Home Device	Fall 2026	7-inch display tied to AI Siri; controls smart home devices; music playback; note taking; web-browsing; video-conferencing; $350; snap to wall feature	36, 37, 38, 39, 40
	Apple TV (updated)	2026	A17 Pro chip; camera for FaceTime; contains Apple's designed bluetooth and wifi chip (instead of Broadcom's), supporting Wi-Fi 6	33, 34, 41, 42
	Home security cameras	2026	Home security camera with battery lasting between several months to a year. Has facial recognition and infrared sensors.	36, 39
	Tabletop robot	2027	iPad mounted on a movable limb that can swivel and reposition itself to follow users in a room. Can inject into conversation using AI Siri. 9 inch display	36, 39

Services: Expect in-line revenue growth despite App Store deceleration

We estimate Apple F3Q26E Services revenue of ~$31.4 bn (+15% yoy), above Apple's prior guidance for Services revenue to grow in-line with F2Q26 Services growth excluding >2.5pp of foreign exchange tailwinds (~13% yoy). The two largest contributors to Services revenue should be App Store (~23% of F3Q26E Services revenue, F3Q26E revenue +3% yoy GSe) and TAC (~23% of total Services revenue, F3Q26E +11% yoy GSe), which along with strong DD% yoy growth across Apple's other Service categories, which should support longer-term growth.

As we will discuss later in our App Store analysis, we continue to believe App Store should be a meaningful driver of Services revenue over the long run despite concerns around third party payments. That said, we expect near-term App Store revenue slowness driven by (a) competition from off-app payment options; (b) headwinds from changes in commission fee structures in China, Japan, and Brazil; and (c) macro-economic volatility. However, we expect continued faster growth across Apple's broader Services categories to support >10% yoy Services revenue growth through the rest of F2026E.

There are several trends underpinning our expectations for Apple to be able to maintain >10% yoy quarterly Services revenue growth. **First, resilient Google search traffic & user trends support long-term growth in Google's TAC payments** to Apple and demonstrates the stickiness of browser search relative to AI app usage. **Second, continued scaling of iCloud+ should support greater levels of high-margin recurring Services revenue** as members of the Apple installed base aggregate greater levels of data that require storage (e.g., more photos & saved content, growing App sizes as developers integrate more data and features across apps, greater iOS storage requirements with growing levels of Apple Intelligence features). **Third, long-term growth in AppleCare+ adoption** should support sustainability in Services revenue growth as Apple users refresh aging devices or add additional devices to their Apple ecosystem. Recent price increases across new iPad and new Mac AppleCare+ subscriptions, as well as Apple Music subscription price increases, demonstrate that AAPL continues to be able to reinforce longer category growth through pricing. **Fourth, Apple TV streaming subscription price increases** from August 2025 should similarly support growth through the rest of F2026, particularly as churn rates normalize and AAPL scales its service through continued content development.

Separately, we see expansion of Advertising offerings and AI feature launches as key growth accelerators for Services on a forward basis. First, Apple should benefit from the introduction of ads across greater iOS environments, particularly with local business ads launching on Apple Maps later this summer. Second, we view AI feature launches as potential monetization opportunities through product refreshes (driven by advanced AI features, like expressive voices and advanced dictation for AI Siri being restricted to devices with 12 GB+ memory), iCloud+ plan attach, or new first or third party app offerings.

#1: App Store: Deceleration amids commission fee structure changes

We estimate F3Q26 Apple App Store revenue of $7.33 bn (+3% yoy), decelerating from F2Q26 (~+8% yoy). Per Sensor Tower, C2Q26 App Store spending decelerated to +3% yoy (v. +8% yoy), driven by worsening growth trends throughout each month in the quarter (+5% yoy in April, +3% yoy in May, +2% in June). Spending deceleration throughout the quarter was consistent in Games (~40% of total App Store revenue) and Photo & Video (~9% of total), though Entertainment (~16% of total) saw moderate growth acceleration throughout the quarter. Geographically trends across App Store's largest regions were mixed, with the US (~34% of total) decelerating to -6% yoy (v. flat in C1Q26), and Japan (~10% of total) decelerating to -2% yoy (v. -1% in C1Q26), though China (~20% of total) accelerated to +10% growth in C2Q26 (v. +3% yoy in C1Q26). During the quarter, Apple potentially saw pressure from off-app payment options in the US, as well as commission fee changes in China and Japan which we previously estimated to represent ~5 pp headwinds to App Store revenue growth. Additionally, during the quarter, Apple announced changes to Brazil App Store commission fees (Brazil represented ~1% of App Store revenue in

C1Q26 per Sensor Tower), which we estimate should represent a slight negative headwind to App Store revenue growth on a full-quarter basis. Accordingly, we adjust our forecasts for App Store revenue growth for the next four quarters, and recognize the risk for continued commission rate compression across Apple's other App Store regions.

Exhibit 24: We estimate F3Q26E Apple App Store revenue decelerated to +3% yoy growth to $7.33 bn (v. +8% yoy growth in F2Q26)
App Store revenue ($, mn) & year-over-year change (%), GSe

Exhibit 32: We estimate that recent changes in Apple App Store commission rates in Brazil should present a slight headwind to App Store revenue growth on a year-over-year basis
Changes to App Store commission fee structure in Brazil

Country	Change date	Old commission rate	New commission rate	Prior avg	After avg	C1Q26 revenue share (%)	App Store headwind (%)
Brazil	6/18/2026	- IAP: **30%** - IAP for Small Business Program/Mini Apps Partner Program/Auto-renewals of IAP subscriptions after first year: **15%**	- IAP: **26%** (21% + 5%) - IAP for Small Business Program/Mini Apps PartnerProgram/Auto-renewals of IAP subscriptions after first year: **15%** (10% + 5%) - Commission on externally-linked website payments: **15%** (or reduced-program related rate of 10%) - Transactions for iOS apps made through alternative marketplaces: 5% (Core Technology Commission)	24%	21%	1.4%	**(0.2%)**

***Brazil prior average assumes 40%/60% split on discounted/non-discounted commission revenues*
***Brazil after assumes 50%/20%/15%/15% split across non-discounted/discounted//external website/alternative marketplace rates*

Estimates represent the estimated full-quarter impact of these changes relative to under prior commission rates. We compare to C1Q26 revenue shares to compare impact to pre-commission rate changes in Brazil

Source: Company data, Goldman Sachs Global Investment Research

#2: TAC: Continued outlook for growth with search stickiness

We forecast F3Q26E TAC revenue of ~$7.1 bn (+11% yoy), in-line with GS estimates for Google TAC growth of ~9% yoy (per GS' C2Q26 GOOGL preview). We continue to view TAC revenue as a substantial driver of long-term Services growth, and we are encouraged by to-date resilience in Google Chrome usage trends (per Sensor Tower) despite continued AI chatbot optionality, which should reinforce the stickiness of the browser search experience.

Exhibit 33: We forecast an AAPL TAC revenue CAGR of 11% (F25-30E)...
Estimated Apple TAC advertising revenue ($, bn) and year-over-year change (%)

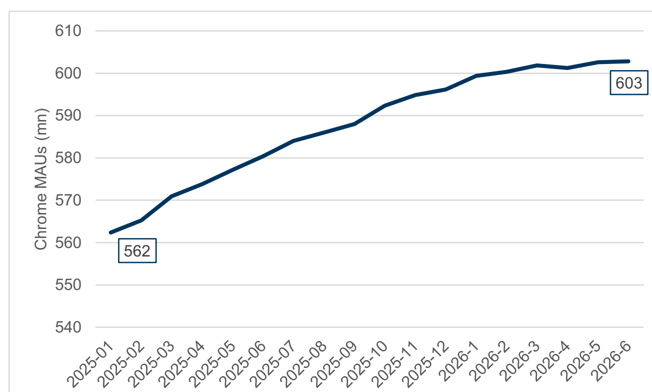
Exhibit 36: Google Chrome MAUs (iOS) continue to grow over time
Google Chrome MAUs (mn)



Only includes iOS usage data

Source: Sensor Tower

3: Apple TV: Continued content investment to drive long-term

subscriber growth

We estimate F3Q26 Apple TV revenue of ~$2.2 bn (+38% yoy) driven by both continued subscriber growth and August 2025 price increases. First, our paid subscriber estimate reflects a net 3 mn paid adds during the quarter as the company benefits from continued investment in content. During C2Q26, we estimate Apple TV released ~90 episodes of original series content, which along with film spend, results in content amortization costs of ~$772 mn. Beyond F3Q26, AAPL should continue to focus on content investment (GSe $747 mn in C3Q26E) which should continue to attract subscriber net adds.

Exhibit 37: Based on the Apple TV film and TV slate, we estimate Apple TV had ~$772 mn of content amortization in C2Q26
Estimated content amortization for Apple TV films and TV series ($, mn), calendar quarters

Thesis summary, rating, price target, key risks

We are **Buy rated** on Apple with a 12-month target price of $370 (v. $330 prior) reflecting 37X (v. 34X prior) our NTM+1Y EPS. The increase in our target multiple reflects our growing confidence in the iPhone replacement cycle and AI initiatives.

Key risks include:

Weakening consumer demand for products and services. Apple's products and services are typically sold to consumers and any weakness in the macroeconomic environment could reduce demand for Apple products and services. Apple generated ~50% of its revenue from iPhones (F2025), which is highly dependent on purchases driven by upgrades. Lengthening replacement cycles due to macroeconomic headwinds, improved product durability, or lackluster product innovation could all negatively impact upgrade demand.

Supply chain disruption. Although Apple's suppliers have a global footprint, the majority of final assembly occurs in China. Increased geopolitical tension may result in disruptions to global trade including through tariffs. While Apple has a robust supply chain network, it may rely on one or a few key suppliers for unique or hard-to-manufacture at scale parts.

Intensifying competition. Apple competes across personal devices (e.g., handsets, tablets, PCs, headphones) and a variety of services (e.g., video streaming, app distribution, advertising, music streaming, online fitness, cloud storage, product warranties). Although Apple is the largest company and the most well resourced among its competitors, it is not the market leader in every single business line. For instance, in video streaming, it faces several key competitors that invest more heavily than Apple in content.

Regulatory risks. Apple is subject to intense regulatory scrutiny in all the major markets that it operates in. Regulatory intervention could result in weakening Apple's competitive advantages if it is forced to make its proprietary products or services available for competitors to use.

Capital allocation execution. Apple has a history of M&A, which has no guarantee of success. AAPL also has a history of share repurchases, which could prove to offer lower ROI or come under deeper regulatory scrutiny.

Thesis summary

Apple designs, manufactures, and markets personal technology devices and sells a variety of related services. Its long history and track record of **(1) designing category-defining and innovative products** (e.g., Mac, iPhone, iPad, Apple Watch, AirPods, iPod); **(2) protecting digital privacy**; and **(3) delivering premium services & experiences** have contributed to an unmatched brand strength. Apple's brand loyalty has resulted in a growing installed base of users that provide Apple with visibility into revenue growth by reducing customer churn, lowering customer acquisition costs for new product and services launches (e.g., Apple TV+, Apple Fitness, Apple Watch), and encouraging repeat purchases, such as phone upgrades.

We are Buy-rated on AAPL as we believe that the market's focus on slower product revenue growth masks the strength of the Apple ecosystem and associated revenue durability & visibility. Apple's installed base growth, secular growth in services, and new product innovation should more than offset cyclical headwinds to product revenue, such as a reduced iPhone unit demand due to a lengthening replacement cycle and reduced consumer demand for the PC & tablet category. Valuation is attractive relative to AAPL's historical multiple - both on an absolute & relative basis - and compared to key tech peers. The majority of gross profit growth over the next 5-years should be driven by Services, which should mark an inflection point in the Services investment narrative and support AAPL's premium multiple. The durability of Apple's installed base and the resulting revenue growth visibility from attaching more Services and Products is what underpins the recurring revenue - or Apple-as-a-Service - opportunity.

Key risks to our view include weakening consumer demand, supply chain disruption, intensifying competition, regulatory risks, and capital allocation execution.

We raise our F26/27/28 EPS estimates by 2% on average on greater product revenue following price increases across AAPL's Mac and iPad portfolio & market share gains in iPhone & Mac.

Disclosure Appendix

Reg AC

I, Michael Ng, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Michael Ng, CFA Goldman Sachs & Co. LLC, Katherine Murphy Goldman Sachs & Co. LLC, Yash Goenka, CFA Goldman Sachs India SPL, Lindsey Shema Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Apple Inc. is/are relative to the other companies in its/their coverage universe: AT&T Inc., American Tower Corp., Apple Inc., Arista Networks Inc., Axon Enterprise Inc., Blend Labs, Celestica Inc., Charter Communications Inc., Cisco Systems Inc., Cogent Communications Holdings, Comcast Corp., Compass Inc., Crown Castle Inc., Dell Technologies Inc., Digital Realty Trust Inc., Equinix Inc., F5 Inc., HP Inc., Hewlett Packard Enterprise Co., IREN Ltd., Ingram Micro, Lumen Technologies Inc., NetApp Inc., Opendoor Technologies Inc., Optimum Communications Inc., Penguin Solutions Inc., SBA Communications Corp., Stagwell Inc., Super Micro Computer Inc., T-Mobile US Inc., TD SYNNEX Corp., Verizon Communications, Versant Media Group, Walt Disney Co., Zillow Group

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst**

compensation: Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: https://www.goldmansachs.com/worldwide/india/research-analyst. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints.

As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
