## Promotional event analysis, takeaways from IR call, and updating estimates

**ULTA** 12m Price Target: **\$648.00** Price: **\$479.57** Upside: **35.1%**

We analyze traffic trends around Ulta's key promotional events. YTD, we have found that foot traffic accelerated for the Spring Haul and Big Summer Beauty Sale (2Q event). Web traffic has increased ~DD% for all events, which we find to be representative of Ulta's successful marketing strategies. We also discuss key takeaways from our recent conversation with IR at Ulta, including a growing focus on exclusivity, long term guidance, and the launch of TikTok Shop earlier in 2026.

Ulta continues to be heavily debated, as investors are concerned on the top line and SG&A expectations for the remainder of the year. Many question whether Ulta's 1Q strength is sustainable, noting the company faces its most difficult compare in 2Q, and the likely set up of decelerating SSS. Longer term, investors are increasingly highlighting risk around the beauty industry's increased points of distribution. However, we continue to reiterate our Buy on Ulta as we believe there could be upside to Ulta's SSS expectations given it is being fueled by a healthy cosmetics category, with the company's investment in marketing, labor, and service resulting in market share gains. Moreover, 2Q guidance appears relatively conservative, in our view, despite the tougher compare. We also highlight that Ulta's P/E multiple has lowered significantly to 15.8x vs. 1 year/3 year historicals of 19.5x/17.6x. We are increasing our 2Q comp estimate to reflect what we think are better trends in the quarter based on our work around the bigger promotion events and observed sales.

### Traffic trends around promotional events

Management has consistently highlighted marketing as a key aspect of their growth strategy, noting that increased investments have led to higher traffic and guest conversion. Specifically, marketing investments include in-store events, creating exclusive collaborations with brand partners, accelerated digital and personalization efforts, and key promotional activation events.

### Takeaways from our call with IR

**Ulta is focused on driving a higher percent of exclusivity in its mix.** In FY25, exclusive products comprised 11% of the company's assortment, up from 9% the prior year. Especially given the evolution of distribution in beauty, the company is thinking about how to further differentiate its assortment. Management is positive on the company's newness pipeline and feels good about the consistency, while explaining it will likely continue to evolve and look different in terms of the brands. We will likely see more smaller, emerging brands given there are not as many large brands Ulta does not already carry.

**Long term guidance remains intact; 12% operating margin floor is no longer relevant.** The company's long term algorithm includes top line sales growth in the +4-6% range with operating profit growth in-line or better than that and +LDD EPS growth. When considering how to manage SG&A, management is focused on efficiency; the company plans to continue investing to gain share, but not at the elevated level from the last couple of years. At a recent conference, management explained that the 12% operating margin floor is no longer relevant as the company delivered 12.4% during an investment year in FY25.

**Ulta launched its TikTok Shop in March.** While this is not expected to be material for the year, management is pleased with the brand interest. Ulta's initial approach is to focus on exclusive brands. From a strategic standpoint, the goal is to get in front of a younger beauty enthusiast (i.e., member acquisition), as well as to use this as a brand-building lever. The company is looking to drive a more economic model through bundles vs. individual SKUs, with Ulta selling multi-branded bundles. Management explained that Ulta is one of the only retailers offering multi-branded bundles, which is a key opportunity for them. The company launched with 17 exclusive brands and 30 exclusive bundles.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at

<https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
