

# China Restaurants: Monthly Tracker: Jun update: weakness continued with weather headwind; FMD relatively resilient despite high base

**Jun SSSG performance remained weak, with weather also a headwind during the month.** By brand, Haidilao table turn was stable vs. May at ~3.8x implying LSD% yoy decline; this translates to ~80% recovery compared to 2019, below low-mid 80% in May and similar to Apr levels. Jiumaojiu's Tai Er brand SSSG moderated to MSD% in Jun, impacted by unfavorable weather in the last week of Jun (the first three weeks of Jun saw DD% SSSG). **For freshly made drinks (FMD), while SSSG faced yoy pressure from last year's tough base, several brands showed SSSG resiliency/sequential improvement which is better than market had worried.** For example, ChaPanda SSSG in Jun sequentially improved to slight LSD% decline in Jun, supported by coffee roll-out/campaign and successful products like Iced Lychee Milk. Guming SSSG also improved to slightly LSD% decline, partially thanks to promotion calendar shift (buy one get one free campaign in Jun vs. last year in May). Chagee SSSG/per store GMV in Jun was also sequentially better than May, with support from new product launches. **On pricing**, while promotions picked up compared to May, it was mainly impacted by promotion calendar (i.e. Guming's buy one get one free, Luckin's Rmb9.9 campaign for select SKUs, PH's regular buffet campaign), and the magnitude of promotion remains disciplined.

In this note, we provide updates on a variety of high-frequency indicators, including air traffic run rate, and commodity inflation. We also include competition environment updates, key company news and key reports published over the past month for covered China Restaurants names and peers.

## Brand performance

**1. Haidilao (6862.HK; Neutral):** Haidilao's average table turn was sequentially stable, or down LSD% in Jun. This implies a ~3.8x table turn, implying ~80% recovery level compared to 2019, lower than low-mid 80% in May and similar to Apr level. Haidilao opened 5 company stores and 2 franchise stores, and closed 6 company stores in Jun.

**GS read:** Table turn performance remained relatively soft, and 1H26 average table turn increase of ~2% is behind GSe which assumes 4% per store sales growth yoy, though market expectation also stepped down amid overall consumption softness. The brand net closed 8 stores in 1H which is lower than GSe of 23 net opening (excl. transfer to franchised stores); while newly opened franchised store of 14 in 1H is ahead of GSe of 8.

**2. Guming (1364.HK; Buy on CL):** SSSG significantly improved from May, with benefits from promotion calendar shift (i.e. buy one get one free offered in Jun compared to May last year).

**GS read:** We believe Guming's SSSG in Jun was better than market expectation. Compared to lowered market expectation for the full year SSSG, we are more positive (we look for flat SSSG in 2026E) with continuous coffee category expansion and launch of differentiated new products. However, store opening is weaker than company's expectation earlier this year.

**3. Chagee (CHA; Neutral):** Jun monthly average GMV was above Rmb350k with some sequential increase in both SSSG and GMV level, with support from new product launches (e.g. new products beer-like tea (流沙茶) and lemon milk tea has ~15% GMV contribution).

**GS read:** SSSG in 2Q was largely in line with GSe of -13% yoy implying sequentially improvement in Jun vs. Apr-May at mid-teens% decline. With support from new product launches and peak season, we expect the SSSG improvement trend to continue into 3Q which has a low base. That said, continuous SSSG improvement/turnaround will depend on whether the brand is able to launch successful new products.

**4. Jiumaojiu (9922.HK, Buy):** Tai Er recorded MSD% SSSG in ML China in Jun, decelerated from DD%/low-DD% in Apr/May, negatively impacted by weather headwinds (in first three weeks, SSSG was at DD%); overseas remained a drag on overall SSSG. New model saw HDD% SSSG in Jun, while legacy stores were broadly flat. Tai Er opened a new 6.0 model with upgraded decoration and menu, and initial sales was ~30%-40% higher than the old format in the first week. Jiumaojiu brand SSSG decline narrowed to -HSD% in Jun, with support from new format stores; while Song SSSG remained under pressure.

In 2Q26, Jiumaojiu reported mixed 2Q26 results ([Exhibit 4](#)). Tai Er China SSSG slightly accelerated to 12% (vs 1Q26: +11%) supported by c.1% ASP increase while Tai Er other regions' SSSG -17% yoy (vs 1Q26: -14%) with c.3% ASP decline; Jiumaojiu brand SSSG decelerated to -14% yoy (vs 1Q26: -11%) with flat ASP; Song brand SSSG decelerated to -26% yoy (vs 1Q26: -20%) despite c.6% ASP growth. On store network, Tai Er net closed 5 stores in 2Q26 or 23 stores in 1H26, including 0/1 net addition of franchised stores in 2Q26/1H26. As of Jun 30, 340 stores were upgraded to "Fresh" Model in ML China (vs 477 in total). Jiumaojiu brand net closed 1/2 stores in 2Q26/1H26, with the number of franchised store flat in 2Q26/1H26. In addition, 6 out of 61 Jiumaojiu stores were new-model stores by Jun-end. Song net decreased 5/8 stores in 2Q26/1H26. Shanwaimian net closed 3 stores in 2Q26 or 6 stores in 1H26, all related to franchise stores. Other brands (Lai Mei Li, Fresh Wood, Chaonabian) maintained store count at 1 as of Jun 30, 2026.

**GS read:** While Tai Er's SSSG decelerated in Jun under weather headwinds, the performance of new store formats remained solid and if 6.0 model is tested successfully, it could benefit store productivity increase ahead. Compared to GSe, considering the drag from overseas, SSSG is tracking slightly behind GSe implied low teens% in 2Q; Jiumaojiu is slightly tracking ahead, while Song is tracking behind of GSe.

**5. Gourmet Master (2723.TW; Neutral):** ML China sales decline remained significant at -46% yoy (May: -46%), with store count sequentially stable at 290-300 which implies a >30% yoy decline and transition to franchised stores. In US market, sales growth was

4.9% in Jun (vs, 8% in May), and store count reached 95 with 3 net additions in Jun.

**GS read:** *The sales decline in 2Q at high 40%s in ML China was behind GSe (~-40% yoy decline). In US market, sales growth in local currency of 6% yoy was largely in line with GSe; while in Taiwan market, 2Q growth of >15% implies sequential acceleration and was ahead of GSe.*

## Exhibit 1: Haidilao/Tai Er SSSG was stable/sequentially slower in Jun; several FMD players saw SSSG improvement thanks to new products/category expansion

## Competitive environment

In freshly made drinks, we saw slightly more promotions in the past month into peak season, but remained rational. Luckin offered Rmb9.9 for selective SKUs for two weeks, which we expect to see slight negative impact to ASP yet the magnitude remained disciplined. That said, Cotti slightly narrowed the coupon magnitude for “Cotti Monday”. Guming offered buy one get one free campaign for two days in Jun, compared to May last year; Mixue launched campaign for World Cup with 1mn free coupons offered for select SKUs.

For QSR/restaurants, Jiumaojiu and Haidilao both saw stable pricing trends. Pizza Hut China had buffet during Jun 9-15 (in 1H25 there was one buffet event in Apr, vs. 2 times in Mar and Jun in 1H26), and DPC (Domino Pizza China) also launched a regular buy-one-get-one free campaign in the month.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

### Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

**Regulatory disclosures****Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

**Additional disclosures required under the laws and regulations of jurisdictions other than the United States**

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. ## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
