

Asian Tech

2026 Computex Takeaways Part 1

In this note, we summarize the highlights from NVIDIA's GPU Technology Conference (GTC) and QCOM's keynote sessions at Computex.

- Few new product introductions, other than the much awaited N1X for Windows PCs, bringing agents to the client device:** Overall, the event was light on new product reveals, with NVIDIA announcing its first processor for Windows PCs, N1X or RTX Spark, designed in partnership with Mediatek. This chip has been in the works for ~2 years and should span desktop, notebook and Workstation categories of Windows PCs, bringing high-end token processing capabilities to the PC. NVIDIA envisions this to become a key enabler in bringing AI Agents to client devices with 1 petaflops of AI capability, and the ability to run 120b parameter LLMs at up to 1M context window. We believe the re-imagining of the application suite (for agentic AI) and compatibility of legacy x86 applications (something that has held back Qualcomm's ARM PC growth) are still key factors in determining the success of this product in the medium term. On PCs overall, the key watch point is whether the increasing edge AI adoption will stimulate incremental PC unit shipments. For Mediatek, this is a small (1-2%) revenue driver (largely royalty-based for the ARM CPU and other connectivity chip sales), but it could establish its presence in the Compute space, after its recent success with Chrome/Googlebook. Qualcomm did not introduce any new products during its keynote, with a passing mention of its Dragonfly AI Server racks, likely to be introduced in late June, at its analyst day. Our supply chain checks indicate that Qualcomm's inference-focused ASICs and Datacenter CPUs are likely for Bytedance and one US hyperscaler, with volumes ramping in 2027.
- Agentic AI workloads as key focus, split between edge and cloud, will be interesting to watch:** Both keynotes from NVIDIA and Qualcomm spent a lot of time on agentic AI workloads (as expected), given the rapid rise of AI agents. NVIDIA framed the AI agent as comprising four components—LLM (brain), Harness (body/orchestration), Tools, and Runtime (working environment)—noting that GPUs, CPUs and DPUs are all part of the hardware stack required for agentic AI. In addition, NVIDIA highlighted its move towards being the full-stack enabler of agentic AI infrastructure and software for enterprises (CUDA-X libraries, Nemotron open models, etc., in addition to various forms of compute) and highlighted indicative agentic workloads such as a partnership with Cadence on a chip-design super-agent that accelerates verification cycles by ~40x, from weeks to hours. Qualcomm's CEO, Cristiano Amon, highlighted the staggering growth in token consumption, projecting a 40x growth from 2026 to 2030. Qualcomm expects agentic AI to redesign how applications are written for personal devices like smartphones and expects agents to work across multiple devices in the future, rather than be tethered to one primary device. Interestingly, QCOM expects agentic AI workload to be distributed between on-device and cloud over time (unlike now, where almost 100% of the AI workload resides in the cloud), which could trigger a replacement cycle for edge devices. Qualcomm indicated that several

workloads such as coding/webpage creation could run with 30-60% less tokens and potentially run faster using a device-cloud hybrid approach. In this context, what Apple announces at its WWDC next week could be more important, potentially giving momentum to the idea of a resurgence in edge-based AI compute. In the near term, we believe the quest for faster LLMs is likely to keep most of compute on the cloud.

- **NVIDIA Vera Rubin now in full production, focus on co-design of various rack elements and token maximization:** NVIDIA confirmed that Vera Rubin is now in full production, with Microsoft and Dell/CoreWeave already standing up engineering racks. Based on our checks, we believe a larger-scale rack production ramp would likely be in 4Q this year. The production efficiency leap is meaningful—VR racks can now be assembled in approximately 5 minutes compared with 2 hours for the prior Blackwell generation, due to limited cabling and fans, replaced with liquid cooling and a mid-plane PCB for interconnections. The emphasis on Vera Rubin is on the co-design of various compute elements (Vera Rubin, Vera CPU, Bluefield DPU, storage rack, Spectrum SPX rack with Co-packaged Optics, LPX for fast tokens) to enable much higher token throughput (10x higher compared to GB300s) and maximizing revenue per GW. Overall mass production timelines are largely in line with our expectations; we continue to expect Rubin shipments to be constrained by HBM4 supply and minor issues in CoWoS-L packaging through 2026 and expect ~2M units of front-end shipments, which should translate to ~10k racks of VR200 NVL 72 deliveries in 2026 (major vendors such as MSFT/Dell are expected to produce 1-2K in 2026, in our view).
- **Heavy focus on Vera CPU and designing CPUs purpose-built for agentic AI:** NVIDIA's CEO Jensen Huang spent significant time detailing the Vera CPUs designed specifically for agentic AI workloads. Vera CPU delivers 1.8x agentic AI sandbox performance versus x86, with the highest instructions per clock (IPC) in the world, per management. The chip is the first to implement PCIe 6 and LPDDR5X memory at 1.2 TB/s, delivering 3x bandwidth both internally and externally while consuming 40% lower peak memory latency. On database workloads, Vera runs SQL 3x faster than x86. NVIDIA appears to be positioning standalone Vera CPU sales as a major incremental growth driver for the company, given the rise in agentic AI workloads. We believe that Vera CPU shipments should start ramping up from 2H26 (we estimate 0.6M units in 2026) but with a strong ramp (3M+ units with potential for upside) in 2027, with packaging solutions coming from TSMC, Amkor, and potentially ASE. Hon Hai and Quanta are likely to be the key standalone rack vendors, with more vendors likely to be added over time. We do expect competition to increase over the next few quarters given the rise of CPU as a new TAM, with Qualcomm and potentially Mediatek entering the fray, along with in-house projects at all major CSPs. For the semiconductor ecosystem (TSMC, OSATs such as ASE, substrate vendors), datacenter CPUs represent a very strong new TAM growth opportunity, adjacent to AI accelerators, which should prolong the supply shortages well into 2027. Meanwhile, for cooling specifically, CPU racks have more cold plates and QDs, potentially benefitting AVC and Fositek, in our view.
- **Moving beyond the compute rack to full-stack infra – NVIDIA launches DSX as a full-stack infra reference design solution to empower AI factories:** NVIDIA also launched the DSX platform at the GTC, showcasing its expanded capabilities from chip/rack sales to a reference design for a full AI factory infrastructure, integrating power optimization and infra/platform software. As the capital intensity grows higher than ever (from \$20-30bn per GW in prior generations to potentially \$80-100bn per GW in the future), DSX is intended to improve AI factory efficiency and cost of ownership for CSPs. DSX MaxLPS is one of the highlighted software suites that utilizes 45-degree Celsius hot liquid cooling and optimizes GPU deployment within the same power budget (given NVIDIA believes that today's datacenters overprovision power by up to 40%), while the DSX Flex platform can help dynamically adjust workloads based on grid conditions. DSX early adopters include CoreWeave and Lambda, among others. Key beneficiaries

in the Asian tech supply chains, in our view, include liquid cooling supplier AVC and power supply vendor, Delta.

Note: NVIDIA (NVDA US) is covered by J.P. Morgan analyst Harlan Sur, and Qualcomm (QCOM US) is covered by J.P. Morgan analyst Samik Chatterjee.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.

Morgan Grupo Financiero is member of the Mexican Stock Exchange (“Bolsa Mexicana de Valores”) and the Institutional Stock Exchange (“Bolsa Institucional de Valores”), and it is authorized to act as a broker dealer by the National Banking and Securities Exchange Commission (“Comisión Nacional Bancaria y de Valores”).

New Zealand: This material is issued and distributed by JPMSAL in New Zealand only to "wholesale clients" (as defined in the Financial Markets Conduct Act 2013). JPMSAL is registered as a Financial Service Provider under the Financial Service providers (Registration and Dispute Resolution) Act of 2008.

Philippines: J.P. Morgan Securities Philippines Inc. is a Trading Participant of the Philippine Stock Exchange and a member of the Securities Clearing Corporation of the Philippines and the Securities Investor Protection Fund. It is regulated by the Securities and Exchange Commission.

Singapore: This material is issued and distributed in Singapore by or through J.P. Morgan Securities Singapore Private Limited (JPMS) [MDDI (P) 057/08/2025 and Co. Reg. No.: 199405335R], which is a member of the Singapore Exchange Securities Trading Limited, and/or JPMorgan Chase Bank, N.A., Singapore branch (JPMCB Singapore), both of which are regulated by the Monetary Authority of Singapore. This material is issued and distributed in Singapore only to accredited investors, expert investors and institutional investors, as defined in Section 4A of the Securities and Futures Act, Cap. 289 (SFA). This material is not intended to be issued or distributed to any retail investors or any other investors that do not fall into the classes of “accredited investors,” “expert investors” or “institutional investors,” as defined under Section 4A of the SFA. Recipients of this material in Singapore are to contact JPMS or JPMCB Singapore in respect of any matters arising from, or in connection with, the material.

South Africa: J.P. Morgan Equities South Africa Proprietary Limited and JPMorgan Chase Bank, N.A., Johannesburg Branch are members of the Johannesburg Securities Exchange and are regulated by the Financial Services Conduct Authority (FSCA).

Taiwan: J.P. Morgan Securities (Taiwan) Limited is a participant of the Taiwan Stock Exchange (company-type) and regulated by the Taiwan Securities and Futures Bureau. Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange (“Non-Taiwan Listed Securities”), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the “Important Disclosures” in this material.

Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission. The registered address is 548 One City

Center Building, 50th Floor, Ploenchit Road, Lumpini, Pathum Wan, Bangkok 10330.

UK: Research is produced in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
