

# Bilibili Inc. (BILI): Investor Day takeaways: Healthy community reinforces monetization flywheel; Enhancing game pipeline info 2026-27

We attended the 2026 Bilibili Investor Day, where key focus and our takeaways centered around: **1) a healthy and unique community ecosystem remaining the foundation of long-term growth**, supported by high-quality content, emerging content formats, creator growth and vibrant interactions; **2) solid advertising momentum to continue**, underpinned by traffic growth, increasing user spending power and expanding monetization of deep content scenarios such as search, playback page and PC/OTT; **3) games continue to execute under a long-term strategy with disciplined expansion**, targeting at least 2 new category-leading long-live titles over the next 2-3 years; and **4) AI is positioned as Bili's major investment priority**, with tangible monetization and efficiency benefits already emerging across content, advertising and recommendation.

We lay out our key takeaways below.

## Content & Community: Healthy ecosystem with strong trust and differentiated engagement

Management continues to emphasize that Bilibili's core moat is its community with differentiated high-quality content.

- Both old and new content remain highly vibrant, with even the video uploaded in 2009 generating 2.03mn additional views in the past year. Meanwhile, video podcasts grew by **500%+ yoy** in the past year, highlighting the platform's ability to incubate new long-form content formats.
- **Community engagement remains high quality.** Over the past year, bullet comments and comments grew **19% yoy**, while comments exceeding 100 characters increased **32% yoy**, reflecting deeper user participation and discussion.
- Trust between creators and users continues strengthening, with creators above 1k followers growing **31% yoy** and creators above 10k followers growing **21% yoy** in the past year.
- Importantly, management views **AI as an amplifier of the ecosystem** rather than as a disruption risk to the platform. It believes **AI improves content creation productivity but does not change the underlying relationship between creators and users**, and Bilibili's essence is community and trust, and therefore generative AI is more likely to strengthen rather than replace the platform model.

### Advertising: Solid momentum driven by growing traffic, rising user consumption power and expanding monetization

Management framed advertising growth around three pillars, including growing traffic, rising user consumption power, and expanding monetization within deep content scenarios.

- The **user traffic foundation remains strong**, with DAU +8% yoy, average daily timespent increasing by 11mins yoy, and total timespent growing **19% yoy** in 1Q26.
- Community ecosystem continues to improve. **Mid-to-long-form content** accounts for more than **65%** of viewing time, while the average user age has reached **27 years old**, with 55% of users located in tier-1 and tier-2 cities. Management believes this demographic profile should continue supporting consumption-oriented advertising budgets over the next several years.
- The content-commercialization flywheel remains healthy. In 1Q26, average creator income increased **24% yoy**, while content submissions from 10k+ follower creators increased more than **50% yoy**, suggesting monetization is reinforcing content supply.
- Monetization through deep content scenarios remains a key growth opportunity. Management highlighted **search, playback pages and PC/OTT viewing** as the company's critical focus on monetization opportunities going forward.
  - **Search** revenue grew **100%+ yoy** in 1Q26, benefiting from users' active content discovery intent.
  - **Playback page** revenue grew **80%+ yoy** in 1Q26, leveraging rich contextual information around video consumption.
  - **PC/OTT** revenue grew **50%+ yoy** in 1Q26, benefiting from more immersive viewing experiences and stronger brand advertising positioning.
  - Management reiterated that monetization of these deep content scenarios will remain a major strategic focus over the coming years.
- **Industry solutions** are characterized by penetrating attractive industries/verticals through focusing on strategic key accounts (SKAs) and leading customers. Management highlighted strong momentum in home furnishing industry, where ad revenue grew **100%+ yoy** in 1Q26. Meanwhile, Bilibili mini-games and mini-programs delivered revenue growth of **3x yoy**, demonstrating success in keeping content-consumption advertisers within the Bilibili ecosystem.

### Games: Enhanced pipeline visibility with more titles to come in 4Q26/2027

Management reiterated its game strategy introduced in 2024 to: 1) build games that **young people** love; 2) **become the first or best** in selected vertical categories; 3) focus on **long-term operations**. The company's goal is to add at least **2 long-lived category-leading games over the next 2-3 years**.

- The execution strategy focuses on: 1) expanding into more youth-oriented genres; 2) pursuing both self-developed and licensed titles; 3) building **global and multi-platform** games from day one.

- Management noted that game project approval within Bilibili is now far more **disciplined** than in previous years, although **the number of self-developed titles are expected to increase slowly but grow faster than licensed titles over time.**
- **Pipeline visibility continues improving.** For 2026, management highlighted **Lumi Master** (闪耀吧噜咪) and **Sangokushi: Wangdao Tianxia** (三国志: 王道天下) as key **4Q26 launches**, while other titles are currently scheduled for 2027 and beyond.
  - **Sangokushi: Wangdao Tianxia** (三国志: 王道天下) is positioned as a complementary offering to Sanguo: NSLG rather than a cannibalistic product. Sanguo: NSLG targets users seeking lighter gameplay and lowers monetization pressure, while Sangokushi: Wangdao Tianxia is designed for **more intense and immersion-oriented SLG players**. Management believes the title will help Bili establish broader coverage within the Sanguo SLG category and further strengthen its competitive positioning in the segment. The game has recently entered another round of testing and is currently planned for **4Q26 launch**.
  - **Sanguo: Ncard** (三国百将牌) is a strategy card title where management explicitly **prioritizes long-term retention over short-term monetization**. The game has started soft-launch and remains under active testing and iteration, with development efforts focused on optimizing retention metrics and **gradually scaling DAU** through continuous product refinement, consistent with Bili's long-term operations philosophy.
  - **Lumi Master** (闪耀吧! 噜咪) is a **self-developed pet-collection adventure mobile game** targeting the fast-growing monster-catching genre. The game's core differentiation lies in distilling the fundamental fun of monster collection while delivering a lighter and lower-burden gameplay experience. **Global launch** is currently scheduled for **4Q26**.
  - **Sanguo: The Ravages of Time** (三国火凤燎原) is a self-developed title based on the well-known comic IP. The game focuses on the Wargame/tactical RPG segment, which management views as a category with long lifecycle potential. **Initial testing is scheduled for July 2026**, while both **PC and mobile** versions are expected to launch **globally**, highlighting the company's multi-platform and globalization strategy.
  - **Guild Wars Series** (激战系列) represents Bili's first global publishing projects. Management views the title as highly compatible with Bili's content ecosystem given the strong concentration of strategy-card and MMO enthusiasts on the platform. Importantly, this will be a true **global multi-platform launch across PC and mobile**, underscoring its growing international publishing capabilities.
  - The **undisclosed MMORPG** remains one of the most intriguing projects in the pipeline. Management described it as the official sequel to a globally recognized top-tier gaming IP with a history spanning over two decades. The title is being built natively based on PC while supporting multi-platform deployment across **PC and mobile**. **Formal unveiling is expected around late July or early August**.
  - **Escape from Duckov Mobile**. Management noted the title is slated for **2027**

**launch** and emphasized that development is focused on reworking core gameplay systems rather than a simple mobile port. The company aims to preserve the franchise's unique gameplay experience while improving mobile fit, with the ultimate goal of turning the title into another hit product on mobile following the strong success of the PC version.

### AI: Major investment priority with clear business KPIs

Management stated that **AI will be the only major investment priority over the next several years**. Importantly, every AI project must directly improve business metrics through cost reduction, efficiency gains, user growth or revenue expansion, per management.

For example, AI capability has meaningfully improved advertising monetization efficiency.

- **Semantic data asset.** With the help of AI, user behaviour, comments and creator content are converted into structured advertiser insights. This has already delivered **11%+ ROI improvement** within gaming advertisers and has expanded into education, consumer electronics, novels and short-drama verticals.
- **AIGC ad materials.** More than **50%** of advertisement video covers and titles are already AI-generated on Bili platform, accounting for over **40%** of advertising spending. Management plans to roll out **fully AI-generated video production** across mini-games, short dramas and gaming advertisers by year-end.
- **Recommendation and matching algorithms** also remain key focus areas. Management expects ranking-layer upgrades in 2H26 to deliver **5%+ eCPM uplift**.
- **Fully-managed advertising products** have already demonstrated strong results in e-commerce testing, with spending from mid-sized merchants increasing more than **2x**.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

### Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

### Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total

return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints.

As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
