Potential Debit Network Sale Could Unlock Value; Another Leadership Change Adds to Uncertainty

What happened: [WSJ reported](#) that US banks are exploring an acquisition of FISV’s debit networks (STAR and Accel) to circumvent debit interchange limits imposed by the Durbin Amendment. The article, citing “people familiar with the matter”, reports that banks including JPM, BAC, WFC, and PNC have engaged with FISV over a potential deal, but that at least “several of the banks” have indicated that they are unlikely to pursue an acquisition. Fiserv and other parties mentioned did not provide a comment to the WSJ and we have no knowledge of any potential transaction. *JPMorgan (JPM), Bank of America (BAC), Wells Fargo (WFC) & PNC Financial Services (PNC) are covered by Manan Gosalia; Capital One Financial (COF) is covered by Jeffrey Adelson.*

Separately, Dhivya Suryadevara’s resignation likely to be viewed as incrementally negative as investors assess execution risk in Financial Solutions, leadership continuity, and durability of strategic reset. Fiserv disclosed today that Dhivya Suryadevara, President of Fiserv, resigned effective July 7, with Andrew Gelb, EVP and COO, Financial Solutions, and Srini Krish, Head of Technology and Operations, Financial Solutions, appointed as interim leaders of the company’s Financial Solutions business. We expect the announcement to add to investor uncertainty around the trajectory of Financial Solutions, particularly given Suryadevara’s relatively recent appointment, her visible role at Investor Day, and her involvement in shaping the turnaround strategy for a business facing bank client churn, technology-conversion challenges, and service-quality concerns. The departure also follows closely on the resignation of CEO Mike Lyons and the appointment of Takis Georgakopoulos as CEO, further reinforcing questions around leadership continuity.

Logic of potential FISV deal for banks: Per the report, the rationale would be similar to COF’s acquisition of Discover, which allows COF to charge higher interchange rates on debit transactions, which COF initially indicated would yield just over \$1B a year in operational synergies.

Implications for MA/V: We ultimately think MA and V’s network scale, speed, security, merchant routing optimization, dispute infrastructure, fraud tools, issuer processing, and acceptance breadth would be costly and complex to replicate. We expect the required investment is perhaps one of the reasons that a similar acquisition hasn’t been pursued before (though we acknowledge valuations are more attractive now than historically). Notably, JPM’s ChaseNet is proprietary closed-loop merchant processing network, launched in 2013, that was designed to

simplify the traditional payment ecosystem by having Chase act as the merchant acquirer, card network, and issuing bank for transactions made with Chase credit and debit cards. However, it still relies on Visa's processing network (VisaNet) to route transactions. If a bank does choose to pursue the own-network strategy to increase debit interchange economics, we estimate the loss of one large debit issuer would likely represent ~0.5-1% headwind to MA or V's revenue (similar magnitude as COF rolling off debit volumes from MA), depending on which bank and timing. Historically, we feel FISV management have been dismissive of the viability of adapting STAR/Accel to being credit networks, and we note there wouldn't be incremental interchange uplift from owning a credit network as those rates aren't regulated.

Potential value to FISV if it announced a sale of its debit networks: FISV does not break out revenue or earnings contribution from its STAR and Accel debit networks, but we estimate that the networks generate ~\$500M in EBITDA. Digital Payments in total makes up \$3.9B or 19% of total revenue, and we believe debit network revenue is about ~\$1B or 10%, with volumes growing low-double digits in 1Q26 following price cuts in '25, and an estimated ~50% EBITDA margin. We estimate current payments valuations likely values the business at around ~\$3-\$4B based on an assumed multiple range of 6-8x, and a potential acquirer that could generate larger synergies from debit interchange uplift might be willing to pay above a 20% premium. Proceeds could support deleveraging or additional buybacks (Street looks for \$7B in buybacks in '27-29, or 25% of market cap).

Exhibit 2: FISV's Digital Payments business makes up 19% of total

CHYM/XYZ could see greater implications long-term if FISV announced the sale of its debit networks: We think any such potential deal, if announced, could create more competitive intensity in the low-end consumer segment of the market, as large banks could more economically serve that segment through the same exempted debit interchange revenue stream that CHYM and XYZ's Cash App generate. If large banks can recapture higher debit interchange economics through owned-network structures, they could redeploy those economics into debit rewards, free checking, early-paycheck access, overdraft relief, ATM access, or lower-fee consumer-banking products. That would directly pressure the value proposition that has helped CHYM and Cash App serve debit-heavy, lower-income, and paycheck-to-paycheck consumers at lower fees. For reference, we estimate debit-interchange related revenue is 40% of Chime's total, and 15% of XYZ's total.

Exhibit 3: We estimate higher debit interchange rates support 40% of CHYM's revenue, and drive the pricing advantage for other features

Valuation Methodology and Risks

Chime Financial Inc (CHYM.O)

Our 5x EV/Txn Profit multiple on our '27 forecasts is at a modest premium to peers on a growth-adjusted basis, given Chime's 1) higher quality customer relationships, 2) consistent execution + product development, and 3) less cyclical overall revenue exposure, with limited credit revenues and 70% nondiscretionary purchase volume. Our 5x multiple is a ~3x premium to slower-growing Block (Cash App) and a 3x discount to slightly faster-growing AFRM.

Risks to Upside

- Faster rollout of unsecured credit card with well managed losses
- Improved capture of young or higher-income customers within forecast period
- Strong execution on Chime Enterprise that accelerates user acquisition
- Better than expected profitability ramp

Risks to Downside

- Worsening macro/employment conditions
- Increased regulatory risk related to Durbin Debit amendment.
- High loss rates on newer credit products

Fiserv Inc. (FISV.O)

Our PT is derived by applying a 7x P/E multiple on our 2027 Adj. EPS. This is at a slight discount to payments peers on a growth adjusted basis given modest execution risk.

Risks to Upside

- Client wins
- FIs increase outsourced tech spend
- Clover significantly outpaces peers
- Faster deleveraging, resulting in new accretive M&A

Risks to Downside

- Competitive losses or decreased outsourced tech spend
- Security breach leading to client loss/investments
- Consolidation of FIs
- Competition drives up investments, pressuring margins
- Pricing sensitivity returns to merchant acquiring

MasterCard Inc (MA.N)

Based on a 30x target P/E multiple on our base-case 2027 EPS estimate. This target multiple is generally in-line with where MA has historically traded and at a ~8x premium to where the stock currently trades.

Risks to Upside

- Uptick in consumer spending trends
- New client wins in the US/Europe

Risks to Downside

- Impact from regulatory action in Europe and elsewhere
- Material slowdown in consumer spending
- Potential for market share loss in Europe as V becomes more aggressive

Visa Inc. (V.N)

Based on 27x target P/E multiple on our base-case CY27 EPS estimate. This target multiple is slightly below V's 5-year average multiple and at a ~6x premium to where V currently trades.

Risks to Upside

- Faster than expected recovery of cross-border tourism
- Ability to continue to meet/beat expectations
- Faster-than-expected adoption/scaling of B2B solutions, driving multiple expansion

Risks to Downside

- Material slowdown in consumer spend; Slow recovery in cross-border growth
- Portfolio losses in the US
- Regulatory changes in key markets promoting domestic schemes

Block, Inc (XYZ.N)

Our price target applies an 18x multiple to CY27 SBC-burdened adjusted EPS, which is in-line to peers' on a growth-adjusted basis.

Risks to Upside

- Faster ramp in Cash app credit products could accelerate revenue/user growth
- Faster-than-expected move up-market, without deterioration in take rate, could drive upside from core payment
- Meaningful profitability outperformance

Risks to Downside

- Expansion internationally/up-market pressure margins, and slow vol. ramp limits growth.
- Competition drives pricing pressure across merchant segments
- Regulatory intervention

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those

who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.
