2Q26 miss likely due to one-off voluntary retirement cost

LG Display (LGD) reported 2Q26 revenue of W5.6tn and operating loss of W108bn, where operating loss was in-line with Bloomberg consensus estimate of W110bn but slightly worse compared to GSe of W80bn. Given the sizable one-off voluntary retirement cost of 240bn, excluding the one-off cost, the company would have generated around a W130bn normalized OP. Despite improving OP trend on a yoy basis, the company provided weak ASP guidance which we believe could be due to the pricing pressure stemming from higher memory price, and we hence lowered our expectation for 2H26. Remain Neutral-rated on the stock with updated TP of W11,600 (from W13,500).

Key Takeaways

- **Mobile OLED:** LGD guided company overall ASP to increase by high-teens% in 3Q26, which is well below our prior expectation (up 30% qoq) and implies a yoy decline of 5%–8%. We believe the weak ASP guidance implies pricing pressure on OLED for smartphone and tablet, where key customer brand is facing higher cost burden due to rising memory price ([link](#)). On the other hand, we expect stronger smartphone OLED shipment this year thanks to solid sales of iPhone 17, the company's improved capability of mass production of upgraded specs, and favorable competitive dynamics, and hence raise our smartphone OLED shipment estimates from 82mn units to 86mn units (+13% yoy).
- **Large-size OLED (OLED TV and OLED monitor):** We believe 2Q26 shipment was meaningfully better than expected due to World cup event effect and solid demand for OLED gaming monitor. Notably, the company mentioned that the LCD to OLED transition is progressing fast in high-end gaming monitor segment and expects OLED monitor mix to increase from

low-teens% last year to 20% this year. Reflecting solid demand for OLED gaming monitor, we raise our estimate for this year large-size OLED shipment to 7.5mn units (+17% yoy) where yoy growth is mostly led by growth in gaming monitor. On margin, due to the end of the depreciation schedule of Guangzhou OLED TV fab, we expect large-size OLED OPM meaningfully improved yoy and reached double-digit%.

- **IT OLED (tablet):** We believe weak tablet OLED demand continued in 2Q26 and with the absence of new iPad Pro model launch this year, we lower our annual shipment expectations from 4mn to 3.2mn units and expect 26% yoy decline in shipment. Despite lower fixed costs due to improved capacity efficiency, we expect weak IT OLED shipment and pricing pressure to lead to operating loss for the business this year.
- **Our updated view on 3Q26 and 2026 full year:** Although we raise our shipment estimates for TV and smartphone OLED, reflecting the weak ASP guidance and our view of stronger pricing pressure, we lower our 3Q26 and 2026 full year OP estimates to W400bn (from W564bn) and W958bn (from W1.2tn), respectively.

Lower earnings estimates and TP to W11,600; remain Neutral-rated

Mainly reflecting 2Q26 results, 3Q26 guidance, higher large-size OLED/smartphone OLED shipment, but lower large-size OLED/smartphone OLED ASP and lower tablet OLED shipment, we lower our 2026E/2027E/2028E EPS estimates from KRW 251/2,093/2,221 to KRW -662/1,505/1,843. We maintain our target P/B multiple of 0.9X, while we lower our 12m fwd target P/B based TP to W11,600 (from W13,500) and remain Neutral-rated. Key risks include higher/lower IT LCD panel pricing and higher/lower TV OLED shipment.

Price Target Risks and Methodology - LG Display

Valuation: We are Neutral rated on LG Display with a 12m fwd P/B-based TP of W11,600 (target multiple of 0.9x).

Key risks: Higher/lower IT LCD panel pricing and higher/lower TV OLED shipment

Investment Thesis - LG Display

LG Display (LGD) is an LCD and OLED panels manufacturer with the No.1 market share in OLED TV panels. To secure long-term profitability, the company has been accelerating its restructuring to focus on OLED (LCD TV panel exit, smartphone OLED capacity expansion, entering tablet OLED production). Despite these efforts, we see muted revenue growth as we expect consumer IT device demand growth to be limited, hence are Neutral-rated relative to coverage.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
