【 Semiconductor sputtering target】

Material	Metal price	Main applications	Outlook
Aluminum (Al)	~\$3/kg	Wiring materials for wide/legacy nodes	Usage ratio to decrease with semiconductor miniaturization
Copper (Cu)	~\$8/kg	Wiring materials, via layers	Still mainstream, but approaching limits with miniaturization
CuMn	--	Barrier-less wiring materials	Usage ratio may increase with miniaturization
Tantalum (Ta)	~\$200/kg	Barrier layers	Demand expands along with Cu, but may be replaced by other materials
Titanium (Ti)	~\$12/kg	Barrier layers	Used in mature generations
Tungsten (W)	~\$30/kg	Contact layers, via layers	Maybe replaced by low-resistance materials like Co with miniaturization
Cobalt (Co)	~\$40/kg	Contact layers, liner layers, next-generation wiring materials?	Potential for expansion
Ruthenium (Ru)	~\$15,000/kg	Next-generation wiring materials?	Potential for expansion

Disco (6146): Major Singulation Technologies

	Blade	Laser Ablation	Laser Stealth Dicing	Plasma Dicing
Processing method	Cut using a blade	A process in which lasers are concentrated locally and solids are sublimated and evaporated	Lasers are concentrated inside the work piece, and after forming a reforming layer, they are cut off by external force	Processing to remove cutting points using plasmaized etching gas
Features	- Highly versatile, and can be used with a variety of materials by replacing blades - Technologically established with a large number of track records	- Low mechanical load due to non-contact processing - Corresponds to hard materials that are difficult for blades	- Low processing scrap due to internal processing - Can be dry processed without using water	- Batch processing of wafer front surface, for microchips - Low processing damage and high chip strength
Applications	Most IC/LSI	Elimination of insulation film (low-k film) with low mechanical strength used in high-speed logic ICs	- MEMS devices with small mechanical structures - Imaging devices that want to avoid processing waste	RFID etc.
Major devices	- DRAM - NAND - Logic - Ceramic capacitor	- Logic - Controller - BSI (Image sensor) - LCD driver	- MEMS - NAND Flash

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
