## India Technology: 2Q26 CIO Survey | Asia Pacific

## IT Services: 2026 Budget Growth Expectations Reduced

2026 IT Services budget expectations indicate deceleration vs. the 1Q26 survey, despite improving overall IT budget expectations.

AlphaWise 

## Key Takeaways

- AI spending remains largely additive but is increasingly funded through IT budget reallocations rather than net-new budget dollars.
- Vendor discounting trends remain broadly stable and ongoing vendor consolidation is creating selective share-gain opportunities.
- GenAI is most widely deployed across IT Operations, Software Development, Customer Service, and Supply Chain and Inventory Management in organizations.
- Public cloud migration momentum remains intact, with CIOs expecting cloud workloads to increase meaningfully through 2028.

**Slight improvement in 2026 IT budget growth expectations:** In our latest CIO Survey, CIOs pointed to modestly more constructive 2026 IT budget growth (3.8% growth in 2026) vs. the 1Q26 survey (3.7% growth), with levels remaining below the 4.1% 2010-2019 average. Sequentially, 2026 IT budget growth expectations have improved for Communications (+2.6%, +35 bps QoQ) and Hardware (+1.6%, +12 bps QoQ), while those for Software budgets have remained stable (+4.1%).

**IT Services budget expectations for 2026 down QoQ:** The 2Q26 CIO Survey points to 1.8% y/y growth in 2026, decelerating 20bps QoQ vs 1Q26. Spending intentions diverge across US and EU respondents, as those in the US now expect deceleration of 40bps to 1.9% y/y growth (vs. +2.3% in 1Q26) while those in the EU see acceleration of 40 bps to 1.3% y/y growth (vs. +0.9% in 1Q26). Among verticals, Technology, Services, Retail and Manufacturing saw negative revisions in their spending intentions on IT Services vs. the previous quarter, while Financial Services and Energy verticals saw upward revisions with stable spending intentions for the Healthcare vertical.

**Takeaways for India IT:** Survey data points support our view that F27 revenue growth will be in line with/lower than F26 for India IT vendors. Further trends show budgets being re-prioritized and IT services seeing deceleration since the first expectations for 2026 were released during late 2025. 1QF27 results thus far have shown no signals of further deterioration; there are hopes for a rebound, but we note that the macro environment remains fluid.

## Key Data Points Relevant for Service Providers

**1) Spending on AI net additive or cannibalistic?** AI spending still appears more additive than cannibalistic, but the funding story is less clean than in 4Q25 and increasingly includes trade-offs within existing IT budgets. In 2Q26, 33% of CIOs indicated funding AI / LLM initiatives through net new IT budget dollars, down from 37% in 4Q25. CIOs are increasingly funding AI through budget trade-offs: IT-budget reallocations totaled 32% in 2Q26, up from 23% in 4Q25, including 15% from existing Software budgets, 6% from Professional Services, 6% from another area of the IT budget, 3% from Hardware, and 2% from Communications / Data Networking.

**2) Initial indications of business units where Generative AI is most widely deployed across organizations:** IT Operations (47%), Software Development (44%), Customer Service (33%), and Supply Chain and Inventory Management (15%) are most widely adopting GenAI today.

**3) Momentum toward public cloud to continue:** CIOs expect further momentum in the shift to public cloud, with current workload mixes still tracking ahead of historical migration trends. 2Q26 survey data suggest 48% of application workloads are running in the public cloud today, up from 47% in 4Q25 and 44% in 2Q25. CIOs now expect 52% of application workloads to run in the public cloud by the end of 2026, and 66% by the end of 2028.

**4) Vendor discounting appears broadly stable, with mixed signals on pricing behavior:** In 2Q26, 35% of CIOs perceived vendors as more aggressive in discounting, modestly above 31% in 3Q25 and 32% in 2Q25, while 27% reported vendors have become less aggressive and 38% reported no change. Vendor consolidation continues; 52% of respondents indicated consolidating their vendor relationships (vs. 54% in 4Q25) and the survey showed TCS emerging as a marginal beneficiary vs. peers in our coverage.

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan

Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

## Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.
