

CHINA IP RETAILER AND TOY TRACKER

May update: Pop Mart China online growth decelerated with higher base; Miniso/Bloks accelerating IP/product launch

In this note, we provide updates on China IP retailers and toy companies, including new products/IP, sales momentum, and overseas market updates. **Pop Mart's** domestics online sales grew +29% yoy in May, slower than Apr at +95% yoy growth with higher base. On Douyin, run-rate into Jun is lagging both sequentially and YoY, facing a tough comparison against June 2025 supply surge of Labubu's Big Into Energy series. In the US market, May's YoY decline (-36% yoy) slightly narrowed vs Apr (-43% yoy) thanks to an easier prior-year base; however, the comparison base will become more challenging heading into June. 2Q-to-date credit card sales tracking remained negative (c.40% yoy decline QTD according to BBG data, compared to LSD% growth in 1Q). In the US and China, secondary market price/google trends did not indicate significant IP momentum improvement in May. Whether the upcoming World Cup (Jun 11-Jul 19) could restore momentum for the Labubu IP is among the market focus for the upcoming month. **Miniso** continued its rapid IP rollout in May and early-Jun, and more high quality IPs will be launched into summer peak season. Mgmt noted Apr-May performance saw positive SSSG and Labor day sales recorded +high-teens% yoy growth, on track with company's guidance. In the US market, growth in May sequentially improved from Apr thanks to favorable base, while base into Jun will be tougher. 2Q26-to-date sales growth decelerated from 1Q due to a higher base, i.e. ~26% yoy QTD vs. close to 50% in 1Q according to BBG credit sales data. **Bloks** accelerated 2QTD new product launches, increasing the number of series/SKUs launched both YoY and QoQ. Overall, Tmall+JD+Douyin sales yoy growth accelerated in May vs. Apr based on our tracker, driven by new releases focusing on existing major IPs. More details within.

China market

Pop Mart:

- **New IPs/products:** 1) Dear Birds multi-IP series debut in May, which was not sold out in the first few days after debut. It recorded >32k/>10k sales volume in Douyin/Tmall and still available as of Jun 8, which is relatively muted compared to previous multi-IP series. Have a good run which was sold out quickly after debut and recorded >200k sales volume in Douyin for the first month. 2) New plush toy series released by Crybaby and Hicipupu in May did not sell out in the first few days after debut, while Zsiga was sold out in Douyin. More specifically, Zsiga's new plush toy series (launched on Jun 4) recorded >10k/>14k sales volume on Tmall and Douyin as of Jun 8; Hicipupu's new series (launched on May 28) registered >4k/>3k sales volume in Douyin/Tmall and still available as of Jun 8; Crybaby's new plush toy series (launched on May 21) recorded >70k/>40k sales volume in Douyin/Tmall and still available as of Jun 8. In the secondary market, for the new series, only few non-secret SKUs are trading at SD%-low teens% premium, while others are trading at discounts as of Jun 8.
- **Secondary market prices:** Secondary market discounts saw further expansion for IPs including Labubu, Molly, Dimoo in May and stabilization/slight recovery for IPs including Skullpanda, CryBaby for the sample SKUs we track. **1) Labubu:** Discounts for the sample SKUs we track is generally at 30%-45% currently, slightly expanded from Apr. The FIFA plush pendant saw a deeper discount at c.15% in May. **2) Twinkle Twinkle:** For the sample SKUs we track, secondary market discount narrowed to LSD% in May but dropped to HSD% in early-Jun.
- **Marketing:** **1)** Labubu participated in Lisa's World Cup MV, which had 13.6mn views on Youtube so far. However, based on Google index, we didn't see meaningful improvement on its popularity. **2)** Collaborations launched include McDonalds (Twinkle Twinkle); Coca Cola (Labubu); Ninebot (Sweet Bean) in May.
- **Online sales:** Based on a third-party database, combined sales on Tmall and Douyin flagship stores grew +29% yoy in May, slower than Apr at +95% yoy growth. Based on our Douyin flagship store tracker, plush toy sales in May also lagged Apr and run-rate in Jun is currently lagging behind May as of Jun 6.

Miniso:

- **Recent performance:** The company continued its rapid IP rollout in May and early-Jun, featuring in-house IP Yoyo, movie-related IPs (such as Star War, Toy Story) and popular IPs including Chiikawa x Sanrio, Loopy, etc. Mgmt noted Apr-May performance saw positive SSSG and Labor day sales recorded +high-teens% yoy, outperforming overall retail sales with daily sales reaching historical highs.
- **Marketing:** **1)** Gallery was launched in Shanghai in mid-May. Its first exhibition was featured by Indonesian artist RYOL; **2)** YOYO appeared on the Met Gala red carpet as a bag accessory worn by model Paloma Elsesser and was featured as part of the official event souvenirs in early-May.

- **Online sales:** Based on a third-party database, combined sales on Tmall, JD and Douyin in May grew 21%, faster than 10% growth in Apr but decelerated from 1Q26 (+43% yoy) partly due to the higher base.

Bloks:

- **New IP/products:** New product launches in May focused on existing major IPs (such as Ultraman, Transformers, Kamen Rider). Number of series/SKUs launched in 2Q-to-date has increased YoY and QoQ.
- **Product momentum:** For adult lines, based on Tmall flagship store sales, most adult IPs saw sequential sales volume increase in May except for Pokemon. Overall, Tmall+JD+Douyin sales yoy growth accelerated vs. Apr based on our tracker.

Overseas market

In the US, non-farm payrolls in May was well above expectations with unchanged unemployment rate, and core retail sales increased 0.5% in Apr, slightly above expectations. That said, UMich consumer sentiment fell by 5.0pt to 44.8—its lowest level on record—while the Conference Board’s consumer confidence index decreased by 0.7pt to 93.1 in May, also point to retrenchments in consumer confidence in recent weeks. Our economists noted G10 consumers generally continue to benefit from healthy balance sheets, but labor markets are more mixed, sentiment has worsened from already low levels following the start of the war in the Middle East, and spending headwinds are expected as higher energy prices erode real incomes in the next few months. Elsewhere, consumer sentiment in Singapore/Indonesia also deteriorated, while sentiment in Malaysia/Euro area slightly recovered (Exhibit 16).

For players in diversified retailer sector, we noticed FIVE 1Q26 comp was at +22.7% (above GS/consensus) driven by strong store execution, customer engagement, and strong product trends. However, the company is cautiously guiding the 2H of the year, keeping guidance in those quarters unchanged due to the challenging macro. That said, mgmt did not see any data suggesting a shift in behavior or trade-down. On margin, the company expected OPM to expand for the FY, driven by gross margin, and higher fuel costs are being offset by better tariff costs. **We view it as a mixed read to Miniso and Pop Mart in US.** Resilient consumption behaviors was observed and tariff tailwinds could be expected. Yet, the company’s cautious guidance on the 2H26 with concerns on macro may imply Miniso/Pop mart will hold similar stance.

Pop Mart: 1) US: The YoY US credit card sales decline narrowed in May arriving at -36% yoy (vs c.43% decline in Apr). Secondary market prices for Labubu remained overall stable in May at ~50% average discount, with an initial dip followed by a recovery. Google search trends was also largely stable, while APP MAU recovered sequentially. **2) Other regions:** Google Trends in Europe and ASEAN was largely stable. APP MAU declined in Europe, while picked up in ASEAN. **3) New IPs/products updates:** In the US, we noticed that multi-IP Dear Birds series and Hacıpupu’s Enchanted Realm Tales series were not offered on the US official website as of Jun 8, while Zsiga and Peach Riot’s new

plush series were still available. In France, Hacipupu and Peach Riot's new series were sold out, while Zsiga and Dear Birds new series remained available in the official website. In Thailand, new series (Zsiga/ Hacipupu/ Dear Birds/ Peach Riot new series) were all available on the official websites as of Jun 8.

Miniso: US credit card sales growth of +31% yoy in May accelerated sequentially from +19% in Apr, leading to 26% growth in 2Q26-to-date.

Price Target Risks and Methodology - Miniso

We are Buy rated on Miniso with 12-m TPs of US\$21.2/HK\$41.2 per ADR/H-share. Our 12m price targets are based on a 15x 2026E P/E. Key risks: 1) Lower store productivity in China from intensified competition, lagging product innovation or product quality issues that could discourage retail partners' willingness to expand; 2) worse-than-expected SSSG recovery and store expansion globally; 3) geopolitical risks; 4) higher-than-expected OPEX and additional investments; 5) Yonghui's earnings performance.

Price Target Risks and Methodology - Pop Mart

We are Neutral rated on the stock with a 12-m TP of HK\$164. Our price target is based on a 15X 2027E P/E, discounted back to 2026E at a 12% CoE. Downside risks: 1) Single IP risks or inability to expand the IP portfolio, 2) increasing competition, 3) cost/OPEX control. Upside risks: 1) strong sales derived by more IP launches, IP popularity and category expansion, 2) Pop Mart outcompetes through IP strength and launch frequency and S&M, 3) better supply chain management, 4) more disciplined cost control, 5) faster-than-expected overseas development.

Price Target Risks and Methodology - Bloks Group Ltd.

We are Neutral rated on Bloks with 12-m TP of HK\$63. Our 12m price target is based on an 18x 2026E P/E. Key risks include: 1) stronger-/weaker-than-expected sales derived by expanding IP portfolio and longevity; 2) better/worse capabilities in managing channels and inventories; 3) higher-/lower-than-expected brand awareness and popularity; 4) success/failure to expand customer base; 5) higher/lower market growth and competition; 6) better/worse margins and returns; 7) loosening/tightening regulatory risks.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
