Retail Trading Activity Overview

- **Over the past week, retail investor flows have swung from one extreme to another**—from outsized Tech buying last week to record-selling the sector this week. In aggregate, retail dollar imbalances fell to their lowest weekly reading in more than a year, Figure 11, reflecting weakness across both ETFs (2.8%ile) and Single Stocks (0.8%ile). Retail selling was concentrated in two clear liquidation sessions, Friday and Tuesday; in fact, Friday was the largest retail selling day in over a year.
- **When de-risking, retail investors disproportionately reduced exposure to Tech ETFs and Tech ex-Mag 7 stocks.** Activity appeared largely performance-driven — P&Ls suffered drawdowns, although they did not meaningfully erode any outperformance, e.g. Figure 3; retail investors seemingly cut their losses amid Tech weakness, rather than selling to raise liquidity in anticipation of prospective opportunities (for example, there was no broad-based net selling / profit-taking as markets rebounded on Monday).
- Retail investors' activity reflected the broader market rotation out of AI/Tech winners and into more defensive areas, e.g. Consumer Staples.
 - Within ETFs, retail investors overwhelmingly sold **Tech ETFs—the heaviest selling on record (-3.7z)**, Figure 3, and a complete reversal from last week when buying hit extreme levels (3.1z). Selling was particularly pronounced in SOXL (-2.8z), IGV (-1.5z), SMH (-2.0z), and the related Korea ETF EWY (-2.5z).
 - Within Single Stocks, retail investors **sold Tech ex-Mag7 and bought Staples**, Figure 14. The most-sold names this week included former favorites MU (-3.2z) and MRVL (-6.9z), alongside AMD (-3.0z), INTC (-2.0z), ARM (-7.0z) and DELL (-4.0z). It is worth noting that there was no broad-based “buying-the-dip” across Tech, with only moderate

exceptions in AVGO (0.7z) and SNDK (0.5z). ASML attracted comparatively stronger inflows (3.2z) as it outperformed its US Tech peers. Meanwhile, NVDA and TSLA, along with other Mag 7 names, returned to the top of retail buy lists, while AAPL reappeared among the most-sold stocks. ORCL was bought today (0.6z) into its earnings; the stock dropped ~8% post-market following the announcement.

- As the US launches new waves of strikes on Iran, we note that retail positioning has steadily increased in USO and BNO (Figure 7 and Figure 9), while stabilizing in SCO, Figure 11. **Crowding in Oil Sensitive** Outperformers vs. Underperformers remains persistent and has not meaningfully converged over the past few weeks, Figure 4. Outside of oil, retail investors sold GLD (-1.4z), CPER (-1.2z) and were neutral /positive IBIT (0.2z).
- The **World Cup** starts on Thursday, but retail investors are **not actively trading the theme**, Figure 16. The expectations for likely beneficiaries are quite low given a challenging macro backdrop, geopolitical uncertainty and growing concerns about the low-end consumer. Given the magnitude of this approaching catalyst, we expect market sentiment to improve. We therefore **recommend going tactically long 2026 World Cup Beneficiaries Basket (JPRWC26B)** created in conjunction with input from our broader Equity Research department to best capture World Cup spending, see [report](#).

Single Stock Stories with Elevated Retail Activity

Hedge Funds vs. Retail: High Short Interest Meme Stocks

- **CELH (\$10M bought last 1.1z, Figure 99):** The stock fell as much as 5% on June 4 following reports of a Texas Attorney General probe into the company's energy drink marketing practices, which allegedly targeted younger consumers. Despite this, retail sentiment has reversed sharply, with net purchases totaling \$100 million since March 2026, alongside rising short interest now at ~18% of float, up 10% since March 2026.
- **PENG (\$2.4M sold last week, -1.4z, Figure 100):** The stock jumped as much as 22% on June 2 after management changes and a reaffirmed outlook ([link](#)). Retail inflows have also been strong, with net purchases totaling \$25 million since May 2026, alongside elevated short interest at ~20% of float, up 10% since July 2025.
- **SNBR (\$13M bought last week, 9z, Figure 101):** The stock fell 16% on June 3 and a further 67% on June 4 amid reports the company is preparing to file for bankruptcy to address a heavy debt load and weakening performance. Retail interest has surged over the past month, with net purchases totaling \$15 million, against a backdrop of high short interest at ~40% of float.

Macro & Fundamental Stories:

- The last week's US equity performance reflected a **rotation out of AI/Tech winners and into more defensive areas**, with Consumer Staples and Healthcare outperforming Technology by +11-12%. Among the best performing stocks were **COO** (\$0.1M bought in the last week as of Jun 9th, 0.1z, Figure 106), **PODD** (\$1.8M bought in the last week, 0.3z, Figure 108), **HUM** (\$7.5M bought in the last week, 0.9z, Figure 110), **BAX** (\$1.7M bought in the last week, 0.9z, Figure 112), **CAH** (\$3.5M bought in the last week, 0.5z, Figure 114), **SJM** (\$11.4M sold in the last week, -2.4z, Figure 116), **CLX** (\$0.6M sold in the last week, -0.2z, Figure 118), **CASY** (\$21.6M bought in the last week, 2.5z, Figure 120), and **CPB** (\$14.4M bought in the last week, 1.7z, Figure 122), while the worst performing included **CIEN** (\$18.3M bought in the last week, 1.9z, Figure 124), **SMCI** (\$49.8M sold in the last week, -1.6z, Figure 126), **AVGO** (\$271.8M bought in the last week, 1.7z, Figure 128), **QCOM** (\$49.8M sold in the last week, -1.6z, Figure 130), **FSLR** (\$7.9M sold in the last week, -0.7z, Figure 132), **WDC** (\$20M sold in the last week, -1.3z, Figure 134), **ON** (\$19.5M sold in the last week, -3.0z, Figure 136), and **MU** (\$76.0M sold in the last week, -0.9z, Figure 138). With the exception of SJM where retail investors were better sellers, they chased the rally in CASY and CPB. Activity was more subdued in the remaining top performers, but they were generally better buyers, while also buying the dip in AVGO and CIEN. Elsewhere in the AI/Tech space underperformers, they offloaded SMCI, QCOM, WDC, ON and MU.

Meme Battlegrounds: Retail Buying vs. Hedge Fund Shorting

In this section, we are flagging a few stocks that are heavily mentioned on Social Media and have high Retail buying as well as high Hedge fund Shorting. These stocks may experience unexpected flows in case of increased activity.

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://>.

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
