China Healthcare | Asia Pacific

Trip Takeaways from Pharma Companies

We met with Hengrui, Hansoh and Henlius (a Fosun Pharma subsidiary) during our China healthcare trip. Common topics included potential impacts from the new sales rep management guidelines, ASCO highlights and other key pipeline updates, and BD outlook. Below we offer our key takeaways.

Key Takeaways

- Feedback on the new sales rep policies appear mixed. Innovative drugs with clear clinical value and pharma with established systems indicates limited impact.
- ... but some lower-tier hospitals may take time to adjust to the new sales rep registration and appointment requirements, affecting sales of some legacy drugs.
- On BD, comments are largely consistent, with ongoing discussions between China and global biopharma underway, supporting unchanged or more optimistic BD target.
- ASCO is a near-term catalyst, with most abstract release on May 21 and LBAs through May 29-Jun 2, followed by the ADA Conference in June 5-8.
- The proposed ban of using China data in supporting US IND filings should not affect BD outlook in most cases under versatile global development strategies.

Hengrui (1276.HK/600276.SS)

BMS deal (note) and BD outlook: Management framed the BMS collaboration as evidence of increasing global recognition for the breadth and quality of China biopharma's innovative pipeline, including for next-gen early-stage assets. They noted that discussions expanded materially beyond the initial specific assets to broader platform technologies, and to co-development agreements for next-gen assets. The four out-licensed programs are generally close to IND-enabling stages, while the five earlier next-gen programs may take longer to move to the clinic. Hengrui also highlighted sustained biopharma interest in its pipeline portfolio, partly supported by AI-enabled drug discovery. It reiterated that the BMS deal will not affect its potential collaborations with other global biopharma companies.

Product sales and operations on track: Innovative drug sales are ramping up on track, with no hiccups in hospital entry or compliant sales activity observed. Hengrui emphasized that it has already implemented the sales rep practice guidelines with internal controls in place, and expects limited impacts. It further views the policy shift as a long-term positive, which could further differentiate drugs with proven clinical value, and benefit established biopharma with comprehensive and compliant sales management capabilities.

More Analysis

Hengrui (1276.HK/600276.SS) continued

Robust nHCM Phase 2 data for myosin inhibitor recently presented: Hengrui and BraveHeart (NewCo) recently presented Ph2 nHCM data for **HRS-1893 (myosin inhibitor)** at the ESC 2026. The high-dose cohort (20-40-60mg) achieved a placebo-adjusted KCCQ-CSS improvement of +5.5 points, with 52% of patients achieving ≥ 20 pt symptom improvement, while pVO₂ improved by +0.9 mL/kg/min versus placebo. Hengrui highlighted the fast titration of HRS-1893 (7 days) vs. contenders and favorable safety profiles - no severe treatment-related adverse events, no discontinuations and only transient LVEF declines that resolved following dose reduction. Overall, the data compares favorably within the emerging myosin inhibitor landscape, we believe. See [our lateral read on peer data](#).

RAS strategy in light of rising competition: Hengrui's pan-RAS (ON) inhibitor is designed to have a balanced PK (pharmacokinetics)/PD (pharmacodynamics) profile with differentiated tissue distribution relative to peers, which is likely to lead to reduced skin exposure and lower skin rash events, pending clinical validation. Mgmt noted that some degree of rash may be inevitable with the pan-RAS class due to NRAS and HRAS inhibition. KRAS inhibitors could potentially circumvent the rash toxicity, but with the key challenge of GI tolerability and absorption. Partly due to this consideration, Hengrui's first-gen KRAS G12Di is an IV formulation, while it also has an oral KRAS G12D in Phase I and oral pan-KRAS in earlier stages. See [our in-depth work on the RAS franchise China's Emerging Frontiers: Jiangsu Hengrui: Biopharma Moonshot #1 – The Underappreciated RAS Portfolio \(4 May 2026\)](#).

Hansoh (3692.HK)

2026 guidance reiterated: Hansoh reiterated double-digit % growth guidance for product sales and BD income (excluding contributions from any new transactions) for 2026, plus at least one more new BD deal in the year. Key product sales drivers remain its flagship products of **Ameile**, **Xinyue**, **Hengmu** and **Xinfu**, supporting visibility through 2026-27 ahead of key new launches, such as GLP-1/GIP inj. and B7H3 ADC from 2027 onwards. Generic drug sales are expected by management to decline modestly to ~Rmb2.1-2.2bn in 2026 before stabilizing at ~Rmb2bn in outer years, all covered by VBP. Operating expense guidance implies relatively stable SG&A ratio, and ~30% YoY R&D expense growth as pivotal trials progress.

Ameile has obtained EU approval, but potential sales contribution is not in guidance yet: Ameile's recent EU approval was highlighted as an important validation of China-originated asset and clinical data (the data pack contains some non-Asian ethnicity data too). EU sales of Tagrisso is ~US\$1.4bn now and still growing. Hansoh is looking for a potential partner in Europe for Ameile.

Pipeline updates: For **oncology** assets, **HS-20093 (B7H3 ADC)** is expected to release China Ph3 data in SCLC and osteosarcoma in 2026, with expected approval in 2027. **HS-20089 (B7H4 ADC)** has entered Ph3 studies globally for ovarian and endometrial cancer. Additionally, GSK is expected to initiate three additional Ph3 studies this year across new

indications, reinforcing confidence in the broader ADC platform. Management also reiterated plans to bring at least one new ADC candidate into the clinic annually.

Beyond ADCs, Hansoh discussed continued progress across KRAS and hematology programs. **Oral KRAS G12D** is in early Ph1 basket studies, while **KRAS G12C** is expected to focus on combo strategies. Hansoh also expressed confidence in its fourth-gen **Bcr-ABL** (licensed in from Terns) opportunity given strong data and external validation, including MSD's acquisition of Terns (See [our US's comments on MRK's acquisition](#)). Mgmt believes there remains meaningful room for this asset across both resistant and earlier-line CML settings, and high synergies with its existing CML products.

In **non-oncology**, mgmt highlighted broad pipeline depth spanning immunology, metabolism, nephrology and CNS:

- In *autoimmune*, 1) **oral TYK2** Ph3 topline data are expected this year with full data release likely in 2027; 2) **oral IL23 peptide** released encouraging Ph1 data for moderate-to-severe psoriasis in SID: On a weekly dosing interval (vs. contenders mostly daily dosing), at week 4 PASI score reductions reached 39.1% (100mg QW) and 54.5% (25mg QW), rising to 58% and 90.5% at week 10, respectively. Notably, PASI75 response reached 75% in the 25mg group with IGA 0/1 response hitting 87.5% while IL-17A and hBD-2 levels declined consistently, with favorable safety across the subjects. Mgmt also emphasized the company's long-standing peptide development and manufacturing capabilities; 3) **IL23p19 injectable** asset is expected to launch around 2029, differentiated by potentially improved skin safety versus currently marketed products; 4) **oral BTK** for chronic urticaria in Ph1 and 5) **CFB inhibitor (HS-10642)** for IgAN in Ph2 are also continue progressing;
- In *metabolism*, 6) **HS-20094 (GLP-1/GIP)** is expected to release full Ph3 data (following [robust topline result](#)) and file NDA shortly for likely approval in 2027. Mgmt highlighted the favorable GI tolerability profile as a key differentiator, and sees it as foundational metabolic backbones suitable for future combination strategies. Partner Regeneron has launched global Ph2 and will progress to global Ph3 this year; 7) **oral GLP-1 (HS-10501)**, for which Hansoh still holds global rights) are progressing through Ph2 studies in obesity and T2D with potential data readout in 2H26 or 2027, while 8) **oral PCSK9** in Ph1; and 9) **siRNA** first candidate to move to the clinic in 2026.
- Within *CNS*, the 10) **OX2R** for insomnia has already entered Ph3; 11) **HS-10380** for schizophrenia continues enrolling both treatment-naïve and previously treated patients, with a focus on functional improvement; Ph3 initiation is expected this year alongside upcoming Ph2 data presentation later in 2026.

Henlius (2696.HK; a subsidiary of Fosun Pharma - 2196.HK/600196.SS)

ASCO in focus for HLX43 (PD-L1 ADC) and Serplulimab (PD-1): HLX43 (PD-L1 ADC)

update in NSCLC is a key ASCO focus. The updated Ph1/2 NSCLC data will include separate PFS data for squamous, non-squamous and EGFR wild-type and mutant subgroups, from a near-200 patient dataset and end-April cutoff date. Safety data with longer follow-up period, which had been a debate area in prior dataset, is also key to watch. Besides NSCLC, additional NPC dose-ranging data will be shown in a poster session, while GC data were deferred given limited sample size.

Global trial progress for HLX43 in NSCLC: The US Ph2 study in 2L+ EGFRwt NSCLC has enrolled >40 patients toward a ~100-patient target by August, while broader global enrollment includes >100 patients across a planned ~200-patient study. In 3L+ squamous NSCLC, particularly docetaxel-resistant patients with limited SOC, mgmt plans to discuss ORR-based endpoints with FDA around mid-year. In 2L squamous/non-squamous NSCLC, the likely registrational study design is a head-to-head trial versus docetaxel using PFS as the primary endpoint. In 1L NSCLC, company plans to explore combo with its own PD-L1/VEGF, head to head with pembrolizumab + chemo in PD-L1 TPS<50% and pembrolizumab in PD-L1 TPS>50% subgroups. Additionally, Henlius may also explore HLX43 monotherapy in 1L NSCLC. See [earlier clinical trial updates for HLX43](#)

Serplulimab entering a catalyst-rich year for global development: For **Serplulimab (PD-1)**, peri-operative gastric cancer approval in China is expected before end-June, likely in time for NRDL negotiation, and mgmt sees potential for several hundred million RMB incremental sales in 2H26 and Rmb2-3bn peak sales domestically. US BLA submission for SCLC remains on track for mid-2026, with bridging data from ~200 patients expected at WCLC or ESMO in 2H26. Longer term, mgmt continues to see sizeable peak potential across GC, SCLC and CRC, with 1L CRC Ph3 data expected in 2027 and overall global peak potential framed at ~Rmb10bn.

Biosimilar globalization strategy: Overseas biosimilar growth remains a major strategic focus, where Henlius reiterated its target to reach US\$1bn in overseas biosimilar revenue by 2030, primarily driven by the US and Japan markets where pricing and profitability remain structurally more attractive than in Europe. On the economics for biosimilar sales, mgmt indicated a ~30% revenue sharing of end-market sales on a blended basis, through both manufacturing markups and revenue sharing from its partners. Henlius will bear COGS, which shall be fairly low, while does not need to bear any sales & marketing expenses by its partner. Hence it expects most of its ~US\$1bn biosimilar revenue to pass through directly into profit. Henlius also plans to pursue first-wave biosimilars for more blockbuster drugs including Keytruda, Opdivo and PCSK9 mabs in future years.

VBP and policy takes: Guidelines and timeline for the Anhui-led biosimilar VBP remains unclear at this stage. Our conversations with other industry players suggest a 2027 implementation is more likely. Separately, mgmt acknowledged near-term disruption from recent China sales rep policy tightening, particularly restrictions on hospital access in lower-tier hospitals industry wide, but believes that Henlius is relatively well positioned given it has been shifting toward more academically focused engagement, with greater emphasis on basic research collaboration.

Other Pipeline Updates:

Mgmt also highlighted continued progress across several differentiated oncology platforms.

- **HLX22 (HER2 mab)** demonstrated encouraging Ph2 data in 1L HER2+ gastric cancer with 28.5-month+ PFS versus ~10 months for SOC, while mgmt also emphasized a clean safety profile relative to competitors. The global MRCT study is progressing with 550 planned patients across 256 sites, with enrollment expected to complete by 2026 year-end and data potentially available between 2H27-1H28. Additional studies are ongoing in HER2-low breast cancer (combo with Enhertu), with initial data potentially available in 2H26, while colorectal cancer

expansion remains under consideration.

In earlier-stage development, four IND-approved assets have entered clinical studies and six additional candidates are expected to file INDs or enter Ph1 shortly.

- **TCE platform:** Mgmt highlighted **DLL3/DLL3/CD3/CD28** and **STEAP1/CD3/CD28** programs, which demonstrated potentially improved durability and safety profiles in preclinical studies versus competing assets. The former has already entered Ph1 development, while the latter is expected to enter Ph1 in May/June - both assets carry potential BD interest, per mgmt.
- Additional notable programs include potentially BIC **KAT6 A/B inhibitors**, a FIC **B7H3/sialidase** fusion protein and multiple next-generation ADCs. The **cMET/EGFR ADC** utilizes a TOPO payload with enhanced bystander effect versus DXd-based approaches and optimized cMET affinity intended to reduce EGFR-related toxicity, while the **HER2/HER2 ADC** and **CDH17 ADC** programs are also advancing to early clinical stages.

Important Regulatory Disclosures on Subject Companies

As of April 30, 2026, Morgan Stanley beneficially owned 1% or more of a class of common equity securities of the following companies covered in Morgan Stanley Research: Abbisko Cayman Ltd, APT Medical Inc, Asymchem Laboratories, Inc, DaShenLin Pharmaceutical, Dian Diagnostics Group Co Ltd, InnoCare Pharma Ltd, Jiangsu Hengrui, Keymed Biosciences Inc., Pharmaron, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, Yifeng Pharmacy Chain Co Ltd, Yixintang Pharmaceutical.

Within the last 12 months, Morgan Stanley managed or co-managed a public offering (or 144A offering) of securities of 3SBio, Akeso, Inc., Duality Biotherapeutics Inc, Everest Medicines Ltd, Hansoh Pharmaceutical Group Co Ltd, Innovent Biologics Inc, Insilico Medicine, Jiangsu Hengrui, Keymed Biosciences Inc., Medtide, Nanjing Leads Biolabs Co Ltd, RemeGen Co., Ltd., Shenzhen Edge Medical, Simcere Pharmaceutical Group, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc..

Within the last 12 months, Morgan Stanley has received compensation for investment banking services from 3SBio, Akeso, Inc., Everest Medicines Ltd, Hansoh Pharmaceutical Group Co Ltd, Innovent Biologics Inc, Insilico Medicine, Jiangsu Hengrui, Keymed Biosciences Inc., Medtide, RemeGen Co., Ltd., Shenzhen Edge Medical, Simcere Pharmaceutical Group, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc..

In the next 3 months, Morgan Stanley expects to receive or intends to seek compensation for investment banking services from 3SBio, Abbisko Cayman Ltd, Adicon Holdings Ltd, Aier Eye Hospital Group, Akeso, Inc., Alibaba Health Information Technology, Angelalign Technology Inc, Beauty Farm Medical and Health Industry, China Medical System, CSPC Pharmaceutical Group, Duality Biotherapeutics Inc, Everest Medicines Ltd, Fosun Pharmaceutical, Fu Shou Yuan International Group Ltd, Genscript Biotech Corporation, Hansoh Pharmaceutical Group Co Ltd, HUTCHMED (China) Ltd, Hygeia Healthcare Holdings Co., Ltd., InnoCare Pharma Ltd, Innovent Biologics Inc, Insilico Medicine, Jiangsu Hengrui, Jinxin Fertility Group Ltd, Keymed Biosciences Inc., Medtide, MicroPort Scientific Corp., Mindray Bio-Medical, Nanjing Leads Biolabs Co Ltd, Peijia Medical Ltd, Ping An Healthcare and Technology, Shenzhen Edge Medical, Simcere Pharmaceutical Group, Sino Biopharmaceutical, Sinopharm Group, VISEN Pharmaceuticals, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc., Yifeng Pharmacy Chain Co Ltd, Yunnan Baiyao Group, Zhejiang Huahai Pharmaceutical Co. Ltd., Zylox-Tonbridge Medical Technology Co..

Within the last 12 months, Morgan Stanley has received compensation for products and services other than investment banking services from 3SBio, Adicon Holdings Ltd, Angelalign Technology Inc, Hygeia Healthcare Holdings Co., Ltd., Simcere Pharmaceutical Group, Sino Biopharmaceutical, The United Laboratories, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc..

Within the last 12 months, Morgan Stanley has provided or is providing investment banking services to, or has an investment banking client relationship with, the following company: 3SBio, Abbisko Cayman Ltd, Adicon Holdings Ltd, Aier Eye Hospital Group, Akeso, Inc., Alibaba Health Information Technology, Angelalign Technology Inc, Beauty Farm Medical and Health Industry, China Medical System, CSPC Pharmaceutical Group, Duality Biotherapeutics Inc, Everest Medicines Ltd, Fosun Pharmaceutical, Fu Shou Yuan International Group Ltd, Genscript Biotech Corporation, Hansoh Pharmaceutical Group Co Ltd, HUTCHMED (China) Ltd, Hygeia Healthcare Holdings Co., Ltd., InnoCare Pharma Ltd, Innovent Biologics Inc, Insilico Medicine, Jiangsu Hengrui, Jinxin Fertility Group Ltd, Keymed Biosciences Inc., Medtide, MicroPort Scientific Corp., Mindray Bio-Medical, Nanjing Leads Biolabs Co Ltd, Peijia Medical Ltd, Ping An Healthcare and Technology, RemeGen Co., Ltd., Shenzhen Edge Medical, Simcere Pharmaceutical Group, Sino Biopharmaceutical, Sinopharm Group, VISEN Pharmaceuticals, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc., Yifeng Pharmacy Chain Co Ltd, Yunnan Baiyao Group, Zhejiang Huahai Pharmaceutical Co. Ltd., Zylox-Tonbridge Medical Technology Co..

Within the last 12 months, Morgan Stanley has either provided or is providing non-investment banking, securities-related services to and/or in the past has entered into an agreement to provide services or has a client relationship with the following company: 3SBio, Abbisko Cayman Ltd, Adicon Holdings Ltd, Akeso, Inc., Angelalign Technology Inc, Duality Biotherapeutics Inc, HUTCHMED (China) Ltd, Hygeia Healthcare Holdings Co., Ltd., Innovent Biologics Inc, Insilico Medicine, Jinxin Fertility Group Ltd, Keymed Biosciences Inc., Medtide, Nanjing Leads Biolabs Co Ltd, Peijia Medical Ltd, RemeGen Co., Ltd., Simcere Pharmaceutical Group, Sino Biopharmaceutical, The United Laboratories, VISEN Pharmaceuticals, WuXi AppTec Co Ltd, WuXi Biologics Cayman Inc, WuXi XDC Cayman Inc., Zylox-Tonbridge Medical Technology Co..

Morgan Stanley & Co. LLC makes a market in the securities of Zai Lab Ltd.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1546	42%	467	51%	30%	709	44%
Equal-weight/Hold	1568	43%	358	39%	23%	715	44%
Not-Rated/Hold	4	0%	0	0%	0%	1	0%
Underweight/Sell	555	15%	84	9%	15%	202	12%
Total	3,673		909			1627	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommendation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.

Certain information in Morgan Stanley Research was sourced by employees of the Shanghai Representative Office of Morgan Stanley Asia Limited for the use of Morgan Stanley Asia Limited. Morgan Stanley is not incorporated under PRC law and the research in relation to this report is conducted outside the PRC. Morgan Stanley Research does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. PRC investors shall have the relevant qualifications to invest in such securities and shall be responsible for obtaining all relevant approvals, licenses, verifications and/or registrations from the relevant governmental authorities themselves. Neither this report nor any part of it is intended as, or shall constitute, provision

of any consultancy or advisory service of securities investment as defined under PRC law. Such information is provided for your reference only.
