China Power Equipment

Notes from the road; takeaways from industry conferences in Shanghai

We attended industry exhibitions last week in Shanghai, including the Data Center Industry Exhibition and the Smart Energy/PV conference, and came away with the following takeaways: first, a larger-than-expected number of Chinese electrical equipment suppliers are receiving orders from the U.S., suggesting their competitiveness on lead times and pricing is resonating with more U.S. customers; second, many electrical equipment companies are investing in R&D for solid-state transformers (SSTs) and HVDC products, and while most have not yet commercialized these offerings, Eaton (ETN.US) has launched a medium-voltage SST for AI data centers in China and Southeast Asia. TGOOD also announced a strategic cooperation with Eaton to jointly develop fully prefabricated data-center power solutions, combining Eaton's SST and medium-voltage DC capabilities with TGOOD's high-voltage prefabricated cabin systems, targeting a full-chain 220kV-to-800V DC architecture for next-generation AI data centers. There is ongoing debate about SST adoption in China, as some industry participants cite cost concerns and the pace of the shift toward higher-density solutions. (3) Companies are generally bullish on electrical equipment demand from U.S. data centers in 2027, noting that the larger AI data-center procurement cycle has not fully started and many projects remain in the pipeline; (4) factory prefabricated modules are gaining traction due to shorter lead times and lower capex, which could drive stronger demand amid China's RMB2 trillion data-center capex plan, according to [Bloomberg](#). With rising domestic data-center capex and opportunities in the U.S., we remain positive on the sector; our top picks include Wasion Holdings (low-teens P/E with >20% CAGR) and TGOOD Electric (growing opportunities in prefabricated solutions for both T&D networks and data centers).

- **A larger-than-expected number of Chinese power equipment suppliers are gaining traction in the U.S.** Our channel checks suggest rising penetration across HV/LV equipment, driven by tight supply and lead-time advantages. One T&D equipment supplier cited transformer delivery of 6–12 months versus 2–3 years for Western peers, while several companies are expanding capacity to meet overseas demand. U.S. economics are also stronger, with one supplier citing transformer gross margins of potentially 30–40%+ versus only ~teens in China, and ASPs several times domestic levels while still undercutting Western alternatives. Data centers are the main entry point and U.S. distributors/CSPs are evaluating Chinese suppliers; some CSPs reportedly visited Chinese factories earlier this year and have placed orders. Companies with U.S. exposure include Eaglerise Electric (002922 CH, NC), Ankura Intelligent Power (300617 CH, NC), Shanghai Electric (2727 HK / 601727 CH, NC; SOE), and Shandong Taikai (private). Utility exposure remains limited given stricter requirements for track record, certification and procurement-list access. Suppliers typically work through local sales teams, EPCs / contractors / distributors, while U.S. standards require additional product redesign, testing, and certification before meaningful scale-up.
- **SST remains an emerging product under the 800V DC architecture, with Eaton providing reference cases in Asia.** Eaton launched its MV SST 2.0 (solid state transformers) in China at IDCE 2026, based on a 10kV medium-

See page 4 for analyst certification and important disclosures, including non-US analyst disclosures.

voltage AC input to 800V DC output architecture for AI data centers. Disclosed specifications include 2.5MW single-system capacity, 98.5% end-to-end efficiency and >99.999% availability, alongside claimed footprint and delivery-cycle savings versus traditional architectures. Eaton indicated it has a domestic reference project that has been operating for over a year, supporting product validation, though broader market adoption still appears to be at an early stage. The product mainly targets China and Southeast Asia, while Eaton's U.S. MV SST product uses different design parameters, including voltage level and cooling method, reflecting differences in grid standards and customer requirements.

- **Competitive interest in SST is high, but adoption timing remains uncertain.** We met with multiple electrical equipment companies (~10 companies) working on SST / HVDC products, including transformer suppliers, LV electrical companies and SOEs, but most offerings still appear to be in prototype, sample, certification or early reference-project stages. Views on China adoption are mixed: some suppliers see 800V DC / SST becoming necessary as AI rack density rises and traditional AC architecture becomes less suitable, while others believe high-density demand remains limited and AC will likely remain the mainstream architecture over the next few years. SST remains more expensive than traditional solutions today, though suppliers expect ASPs to decline with scale and technology maturity; broader shipments may become more visible in 2027–28.
- **TGOOD launched “AI PowerHouse,” a system-level AI data-center power solution centered on prefabrication and green-power integration.** The product integrates high-voltage transformers, GIS, medium-voltage switchgear, SST, protection and controls into factory-prefabricated modules, with 110/220kV input and 800V DC output to the data hall. TGOOD claims 150-day full-station delivery versus 12–18 months for traditional substations, 20% lower station capex, 30% lower token power cost through green-power direct connection / storage / compute-power coordination, and 99.9998% reliability. Its self-developed high-voltage SST is expected to complete grid-connected demonstration in 2027. TGOOD has recently won / signed data center projects with China telcos, Huaneng and Tencent.
- **U.S. data-center demand for electrical equipment will be even stronger in 2027.** One company we visited cited around Rmb1bn of U.S. data-center-related T&D orders YTD, but noted that the larger AI data-center procurement cycle has not fully started, with many projects still in the pipeline and constrained by power availability, grid connection and long equipment lead times. Some demonstration projects are already pre-ordering transformers given lead times of over a year. Looking ahead, more data-center grid connections and behind-the-meter generation projects should drive even stronger demand for electrical equipment. On the procurement strategies for data centers, customers still appear to prefer leading global electrical brands for critical components, such as Schneider, Siemens and ABB, especially in high-spec projects. Chinese suppliers may still have opportunities in more cost-conscious projects or where customer requirements allow local substitution, but broader adoption will likely depend on product validation, certification and end-customer acceptance.
- **EE companies are seeking differentiated ESS Solutions.** Some companies noted weaker 1Q ESS profitability and more selective new order intake due to lithium battery price volatility and limited cost pass-through, with suppliers increasingly seeking price-adjustment clauses, customer-supplied cells or stricter payment terms. Others are differentiating through grid-forming ESS, frequency regulation and hybrid supercapacitor + battery systems. Supercapacitors address the second- / minute-level high-power needs, batteries cover the hour-level backup, while diesel/gas or longer-duration resources can sit further behind in a layered backup architecture.

Companies Discussed in This Report (all prices in this report as of market close on 11 June 2026, unless otherwise indicated)
Qingdao TGOOD Electric(300001.SZ/Rmb36.31/OW), Wasion Holdings Ltd - H(3393.HK/HK\$19.88/OW)

Analyst Certification: The Research Analyst(s) denoted by an “AC” on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an “AC” on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst’s personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst’s compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst’s analysis was made in good faith and that the views reflect the Research Analyst’s own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

- **Market Maker/ Liquidity Provider:** J.P. Morgan is a market maker and/or liquidity provider in the financial instruments of/related to Qingdao TGOOD Electric or related entities.
- **Market Maker/ Liquidity Provider (Hong Kong):** J.P. Morgan Securities (Asia Pacific) Limited and/or J.P. Morgan Broking (Hong Kong) Limited and/or an affiliate is a market maker and/or liquidity provider in the securities of Wasion Holdings Ltd - H or related entities and/or warrants or options thereon, which are listed or traded on The Stock Exchange of Hong Kong Limited.
- **Client:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients: Wasion Holdings Ltd - H or related entities.
- **Client/Non-Investment Banking, Securities-Related:** J.P. Morgan currently has, or had within the past 12 months, the following entity(ies) as clients, and the services provided were non-investment-banking, securities-related: Wasion Holdings Ltd - H or related entities.
- **Potential Investment Banking Compensation:** J.P. Morgan expects to receive, or intends to seek, compensation for investment banking services in the next three months from Wasion Holdings Ltd - H or related entities.
- **Non-Investment Banking Compensation Received:** J.P. Morgan has received compensation in the past 12 months for products or services other than investment banking from Wasion Holdings Ltd - H or related entities.
- **Debt Position:** J.P. Morgan may hold a position in the debt securities of Qingdao TGOOD Electric, Wasion Holdings Ltd - H or related entities, if any.

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

South Africa: J.P. Morgan Equities South Africa Proprietary Limited and JPMorgan Chase Bank, N.A., Johannesburg Branch are members of the Johannesburg Securities Exchange and are regulated by the Financial Services Conduct Authority (FSCA).

Taiwan: J.P. Morgan Securities (Taiwan) Limited is a participant of the Taiwan Stock Exchange (company-type) and regulated by the Taiwan Securities and Futures Bureau. Material relating to equity securities is issued and distributed in Taiwan by J.P. Morgan Securities (Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange ("Non-Taiwan Listed Securities"), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material.

Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission. The registered address is 548 One City Center Building, 50th Floor, Ploenchit Road, Lumpini, Pathum Wan, Bangkok 10330.

UK: Research is produced in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: [J.P. Morgan EMEA - Research Independence Policy](#).

U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
