

## AMERICAS INVESTMENT BANKS

## Ahead of 2Q26 EPS, a reasonably healthy operating backdrop, and fairly attractive entry point

**Independent investment bank (IBank) stocks rose ~6% on average in 2Q26,<sup>1</sup> driven entirely by multiple rerating, although underperformed the S&P 500 by 9pp. In our view, the variety of procyclical and countercyclical macro and geopolitical crosscurrents and divergent trends across investment banking have led to an atypically high level of investor debate across the group. All in, we are cautiously optimistic on the group, in light of a reasonably healthy operating backdrop and valuation entry point. Four key themes into quarterly earnings: 1) at potentially the midpoint of the still-healthy M&A growth cycle, what changes could emerge in the two-speed IBanking market, in terms of improvement in mid-cap/sponsor M&A, vs. how much large-cap/strategic M&A can grow from an already strong level; 2) to what extent can IBanks benefit from the robust financing backdrop, as US IPO proceeds reach all-time highs, and AI capex spend continues apace; 3) the cadence of already robust non-M&A advisory growth, specifically within secondaries and restructuring; and 4) whether the**

**somewhat disappointing comp leverage so far this cycle can continue or accelerate.** 2Q26 announced M&A volumes were up 65% YoY, driven by strength in large-cap/strategic M&A (up 202%/89% YoY), vs. mid-cap/sponsor M&A (up 34%/10%). ECM volumes were up ~105% YoY on 353% IPOs growth, 79% higher convertibles, and 44% follow-ons growth. Separately, secondaries (e.g., continuation vehicles and LP stakes) volumes rose 58% YoY in 1Q26.<sup>2</sup> With estimates largely unchanged on average across the group, we now forecast 13%/13%/8% 2026/27E/28E total revenue growth YoY, and 130bps/210bps/120bps of YoY pre-tax margin expansion.

**In our view, valuations offer modest upside, in the context of the balance of upside and downside risks, with NTM P/Es (on GSe) at ~16.5x, or at 60th %ile multiples over the past 11 years.** We expect investor sentiment could remain subdued until there is greater clarity on the sustainability of broader M&A growth beyond large-cap, strategic M&A, such as within sponsor M&A.

| Disclosure Appendix       | 27 |

That being said, given the cycle remains strong, we believe the group could trade above average multiples.

**Given the range of macro and geopolitical outcomes, we continue to prefer firms that offer a more steady, structural growth profile,** either in terms of robust hiring and outsize growth potential outweighing cyclical factors (Buy-rated **EVR** and **LCLN**), or firms that offer more all-weather business models (Buy-rated **HLI**, **PIPR**, **PJT**).

**Exhibit 1: IBanks GSe vs consensus into 2Q26 EPS (\$)**

| Ticker | GSe 2Q26 EPS | Cons 2Q26 EPS | vs. Street | Bias into quarter | Comments                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------|--------------|---------------|------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| EVR    | 3.13         | 2.59          | 21%        | ✓                 | We forecast 12% higher revenue on 68% stronger ECM, 8% higher advisory and 14% higher interest income & other. These drive a ~145bps better non-comp ratio, but 25bps higher comp ratio, resulting in a ~125bps higher operating margin and 21% higher EPS.                                                                                                                                                            |
| FCN    | 2.42         | 2.26          | 7%         | ✓                 | We expect total revenue to come in 1% higher than the Street, with 5%/4%/2% stronger revenue in Economic consulting/Technology/Forensic and litigation consulting, partially offset by 1% lower Corporate finance and restructuring and 1% lower Strategic communications. We are in line with street on adj. operating expenses. Overall, we model pre-tax income to be 3% higher than the Street, and 7% higher EPS. |
| MC     | 0.64         | 0.62          | 3%         | ✓                 | We are 2% higher than consensus on revenue, with a 20bps higher operating margin (20bps higher comp ratio but 30bps lower non-comp ratio vs. the Street), resulting in 3% higher EPS.                                                                                                                                                                                                                                  |
| LCLN   | 0.14         | 0.14          | 1%         | □                 | We model 3% higher total revenue, but 6% higher interest expenses and 4% higher operating expenses, with 160bps higher comp ratio but 90bps lower non-comp ratio, leading to a 3% lower pre-tax income. Overall, we expect a 1% EPS beat vs. the Street on in-line net income but 1% lower share count and 10bps lower tax rate.                                                                                       |
| PIPR   | 0.90         | 0.89          | 1%         | □                 | We expect 1% higher total revenue vs. consensus, with 3% percent higher institutional brokerage (3% higher equities and 2% higher FICC) and in-line investment banking revenue (with 16% higher municipal financing and 2% higher advisory revenue, partially offset by 16% lower Corporate financing). We model a 10bps lower comp ratio and 20bps lower non-comp ratio, resulting in 1% higher EPS for the quarter.  |
| HLI    | 1.80         | 1.81          | 0%         | □                 | We are 1% lower than the Street on total revenue, with 2% lower Corporate Finance revenue (-6% QoQ), partially offset by 3% higher Restructuring and 1% higher Financial and Valuation Advisory. We forecast a 40bps lower comp ratio but 30bps higher non-comp ratio vs consensus, resulting in an in-line operating income and EPS estimates with street.                                                            |
| PJT    | 1.55         | 1.62          | -4%        | □                 | We expect total revenue to be 2% lower than consensus with 10bps higher comp ratio and 30bps higher non-comp ratio vs. the Street, resulting in 3% lower operating income and 4% lower EPS expectations for the quarter.                                                                                                                                                                                               |
| PWP    | 0.14         | 0.14          | -5%        | ✗                 | We model 3% higher total revenue, as well as 2% higher expenses (30bps higher comp ratio but 30bps lower non-comp ratio), coupled with 120bps higher tax rate. Overall, we expect a 5% lower EPS vs the street.                                                                                                                                                                                                        |
| LAZ    | 0.32         | 0.51          | -38%       | ✗                 | We model 9% lower advisory revenue partially offset by 4% higher asset management revenue, leading to 4% lower total revenue, but up 12% QoQ. We expect a 260bps higher comp ratio and 100bps higher non comp ratio vs. consensus, resulting in 32% lower operating income (or 38% lower EPS, accounting for 90bps lower tax rate).                                                                                    |
| Median | --           | --            | 1%         | --                |                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Four key themes

1. **At what appears to be the midpoint of the still-growing M&A cycle, how could the two-speed investment banking market evolve?** M&A industry volumes have risen ~90% thus far this cycle, and based on prior cycle trends, there could still be ~65–75pp of growth left, suggesting we are mid-cycle ([Exhibit 2](#)). Within this growth, there is a two-speed investment banking market, with 2Q26 announced strategic/large-cap M&A volumes up ~89%/202% YoY, while sponsor/mid-cap M&A volumes are +10%/34% YoY ([Exhibit 3](#), [Exhibit 4](#)). We see a structural imperative for a degree of further strategic M&A growth from here, given: 1) the growing need for businesses to have scale; 2) the currently less aggressive US antitrust backdrop; as well as 3) strategic M&A volumes as a % of equal weighted market cap remains at 4.9%, 70bps below the trailing 10-yr average. That being said, strategic volumes are already robust, thus growth from here could be more challenging ([Exhibit 8](#)). On the other hand, the sponsor backdrop has remained persistently weak, with 2026 TD sponsor M&A as a share of total M&A at 23% – substantially lower than 34%/32% trailing 5-yr/10-yr average ([Exhibit 6](#)). We see this weakness due to both macro and valuation dynamics, such as whether assets are marked appropriately, and the impact of persistently higher interest rates. This has prompted ongoing debate around the cadence and magnitude of an eventual recovery, and what would catalyze this. Notwithstanding this, there remain structural PE M&A drivers over the longer-term, including: 1) large \$s of aged, deployed capital that needs to be returned, and large quantities of uncommitted capital that need to be deployed; and 2) potential growth if rates fall and reduce financing costs. Consider that sponsor M&A fees have grown by ~1375% since 2001, vs. strategic fees have risen ~130% ([Exhibit 9](#)). *Best positioned: strategic M&A-skewed **EVR, PJT**.*
2. **To what degree can IBanks benefit from the robust financing backdrop, across large, growing AI Capex spend, and potentially record 2026 IPO proceeds?** All in, annualized YTD industry ECM/DCM volumes are up 55%/19% YoY ([Exhibit 10](#), [Exhibit 11](#)). AI Capex driving both debt and equity financing has also accelerated this year, with consensus expectations of \$770bn of AI Capex in 2026, up ~85% YoY (see report from GS portfolio strategy team [here](#)). US IPO proceeds are expected to reach all-time highs in 2026, following four consecutive years of muted issuance, based on GS' portfolio strategy estimates (report [here](#)). The portfolio strategy team estimates 2026E US IPO gross proceeds of \$225bn, ~530%/95% higher than the 2010–25 average/2021 peak ([Exhibit 12](#)). We estimate a 2026 US IPO fee pool of ~\$4.5bn–\$9.0bn, up ~90–280% YoY, based on a 2–4% representative fee rate (which is modestly lower than the long-term average but reflecting larger deal sizes that have lower fees – [Exhibit 14](#)). Healthcare ECM has been one of the strongest ECM sectors, rising 140% YoY YTD (vs. total ECM +68%), and IBanks with ECM businesses are highly levered to healthcare, which should support growth ([Exhibit 17](#)). It remains unclear to what degree IBanks could benefit from this strong financing backdrop, given many firms do not have standalone underwriting businesses, EVR has only an ECM business, and only JEF and PIPR have both ECM and DCM, and EVR, JEF and PIPR's underwriting businesses are narrower than those of large banks. All in, ECM+DCM comprised 5%/21%/19% of EVR/JEF/PIPR revenue ([Exhibit 15](#)). Nonetheless, our

2026E ECM/DCM forecasts are up 49%/7% YoY across the coverage, in part driven by strength in healthcare ECM ([Exhibit 16](#)). Based on Dealogic, healthcare has comprised 55% of ECM across the three IBanks who have the business ([Exhibit 18](#)). *Best positioned: EVR, PIPR, JEF.*

3. **Continued growth in the already strong secondaries and restructuring businesses?** We expect already strong secondaries and restructuring activity to continue to grow, with these businesses offering structural and countercyclical growth that reduce the procyclicality of M&A. We which we estimate that secondaries + restructuring advisory reached 18% of 2025 total revenue across the IBanks ([Exhibit 19](#)). We see structural secondaries growth as GPs and LPs use this product more, but also cyclical growth, with the current PE backdrop continuing to limit traditional M&A and ECM exits for long-held positions, prompting PE to resort ever more frequently to alternative capital return methods, such as continuation funds. A recent Secondaries Investor survey indicates that 85%/70% of those surveyed see valuation gaps/asset competition as top reasons impacting the ability to deploy capital ([Exhibit 24](#)). We see pressure from LPs for GPS to return capital continuing to mount, given increasingly aged funds, with our analysis suggesting that 54% of private equity (PE) unrealized value is 5+ years aged, vs. 50% historically ([Exhibit 22](#), [Exhibit 23](#)). We see a number of drivers that could drive further growth in restructuring, including: 1) a continued increase in bankruptcy filing ([Exhibit 27](#)); 2) macro and geopolitical uncertainty; 3) the forward curve now pricing a rate hike in 2026 (vs. rate cuts as recently as earlier in 2026); and 4) most importantly, private credit issues, with potential AI disruptions to the software sector. We observe that restructuring revenue has a 58% positive R-squared to the absolute level of Fed funds ([Exhibit 25](#)[Exhibit 26](#)). We forecast 2026E restructuring revenue for the group to remain largely unchanged YoY, and grow 1% in 2027E. *Best positioned: EVR, HLI, PJT* ([Exhibit 19](#)).
4. **Despite a healthy top-line trajectory, comp leverage remains somewhat elusive:** We now model 130bps/210bps/120bps of YoY pre-tax margin expansion in 2026E/27E/28E on average ([Exhibit 28](#)). Given crosscurrents within parts of the IBanking market, and the elevated cost of hiring senior bankers, comp leverage across many within the group remains fairly modest. We see comp leverage pushed out, with 80bps/110bps/70bps of comp leverage in 2026E/27E/28E ([Exhibit 29](#)). We continue to be constructive on mid-cap skewed IBanks on this theme, given more variable compensation structures, due to less reliance on large fixed comp guarantees and deferred stock, vs. in large-cap M&A. This means that these firms' comp ratios are close to all time record low levels already, supporting strong current pre-tax margins. Further, these have less risk of increasing from here, if the cycle were to worsen.

**At what appears to be the midpoint of the still-growing M&A cycle, how could the two-speed**

## investment banking market evolve?

## Top picks

- **EVR (Buy, \$399 12-month PT, 17% upside):** We expect EVR to deliver above average revenue growth and market share gains, as multiyear investments across M&A and other IBanking businesses compound, with its M&A business skewed to areas we believe are poised to grow more ([Exhibit 33](#)). Overall, we model a 15% 2025-28E revenue CAGR, outpacing 11% for peers on average. Near-term, while the company guided to 2Q26 revenue closer to 2Q25, which implies a meaningful step down QoQ (up to a ~40% QoQ decline), we believe that Dealogic trends have already materially outperformed the low end of the guide, and thus we see 12% upside to 2Q26 Street revenue. Further, we remain constructive on the story for the following reasons: 1) We believe that the lumpiness of very large deals drove this QoQ stepdown, and indicates that the large-cap M&A backdrop is very strong (which management also alluded to at 1Q26 EPS) – a few large announced deals could put notable upward pressure on revenue. 2) EVR has notably diversified its business over the years to a greater degree than peers, which should allow it to perform in a wider range of market backdrops, and make it more of an all-weather firm ([Exhibit 34](#)). For example, secondaries advisory contributed 14% of 2025 revenue for EVR, vs. only 5% for the group ([Exhibit 35](#)).
- **HLI (Buy, \$171 12-month PT, 22% upside):** We remain constructive on HLI, underpinned by structural growth, given a robust track record of organic and inorganic investment, and its through-the-cycle business mix, given best-in-class restructuring skew (ex. PJT) at 22% of revenue (vs. 10% for peers – [Exhibit 36](#)). We expect momentum in restructuring to persist and potentially accelerate, given dislocations in private credit and software, as well as elevated energy price volatility. The company's mid-cap and sponsor skew also offers greater upside optionality, relative to large-cap M&A that is already strong. Finally, the company offers best-in-class margins, and much less relative margin downside, due to its fixed 61.5% comp ratio. We model a ~26% 2026E pre tax margin, vs. ~17% for peers on average ([Exhibit 37](#)). We expect HLI's valuation premium to the group could widen, which has historically occurred when investors expect M&A could weaken. HLI's P/E premium (lagged 1Q) has increased by ~6.0x to up to ~7.0x in periods in which M&A weakens, and currently sits at a ~0.5x discount ([Exhibit 38](#)).
- **LCLN (Buy, \$27.50 12-month PT, 12% upside):** LCLN offers a best-in-class top-line and earnings growth trajectory over the medium term, driven by: 1) its smaller scale supporting more rapid growth; 2) market share gains through organic investment; with 3) inorganic growth upside potential. We forecast a 2025-28E revenue CAGR of 14%, vs. 10% for peers ([Exhibit 39](#)). We forecast organic growth catalyzed by continued senior banker hiring, with a 6% 2025-28E MD CAGR ([Exhibit 40](#)). The company's investments in IBanking Advisory and in Valuations and opinions continue to diversify the business beyond M&A and reduce procyclicality, with M&A representing ~2/3 of 2025 revenue, down from 82% in 2021 ([Exhibit 41](#)). The company has a structurally growing Valuations and opinions business, which benefits from continued alternative asset management AUM growth, as well as increasing frequency of valuations across the industry. Further, the company offers clients access to its aggregated proprietary valuation data, which represents a differentiated client

acquisition strategy ([Exhibit 42](#)). LCLN's IBanking advisory revenue benefits from a constructive M&A market backdrop, with leverage to the steady growth area of mid-cap M&A, and long-term structural sponsor M&A growth. Strong top-line growth supports best-in-class margin expansion, with LCLN's normalized pre-tax margins forecasted to rise ~6pp from 2025-28E, vs. only ~3pp for peers ([Exhibit 43](#)) LCLN trades at ~18.5x GSe NTM P/E, as compared to a peer average of 16.5x, which we view as still undervaluing the premium growth profile.

- **PIPR (Buy, \$90 12-month PT, 25% upside):** PIPR offers a healthy through-the-cycle earnings growth trajectory, underpinned by a diversified model across financials corporate finance, acyclical trading, and downside protection from a less volatile comp ratio. PIPR's M&A/DCM revenue is skewed towards Financials (34%/69%), in which we see idiosyncratic upside tied to the improving financials regulatory backdrop. PIPR's trading revenue provides an acyclical hedge, growing steadily at a 7% CAGR between 2011-25, with no significant downside in times of macro weakness, given the inventory-light model, meaning that volumes are driven more by volatility, often prevalent in uncertain macro backdrops ([Exhibit 45](#)). We expect higher and more stable margins (~22% 2026E pre tax margin, vs. ~18% for peers on average) and less negative structural comp leverage, reflecting a more variable comp model, and less fixed comp burden (we estimate 61% fixed comp as a percent of 2026E revenue, vs. 63% for peers). PIPR trades at a ~14.5x GSe NTM P/E (a ~55th percentile level over the past five years), and we continue to see further rerating potential over time, as the market more fully discounts PIPR's through-the-cycle model.
- **PJT (Buy, \$189 12-month PT, 21% upside):** PJT offers a unique through-the-cycle, structural growth profile, with best-in-class exposure to large-cap strategic M&A, restructuring and secondaries, each an area of strength across IBanking, which drives our constructive earnings outlook, in a more challenging macro and geopolitical backdrop. We estimate 35%/18% of the company's 2025 revenue derived from countercyclical restructuring/structural growth secondaries (vs. 9%/4% for peers), and the company has best-in-class skew to large-cap and strategic M&A at 48%/73% of revenue, vs. 26%/50% for the group. We believe that, as the market begins to discount PJT's lower net income volatility and smaller earnings surprises, relative to peers, this could prompt relative rerating, as the market has discounted historically across the group ([Exhibit 49](#)).

## EVR

**Exhibit 31: EVR M&A completions/backlogs have grown by ~27%/173% since 1Q23...**

Source: Dealogic, Company data, Goldman Sachs Global Investment Research

**Exhibit 32: ...with its completions up ~60% YoY, vs. +7% for the group**

Source: Dealogic, Goldman Sachs Global Investment Research

**Exhibit 33: EVR has strong skew to areas of the M&A cycle we prefer (strategics, large-caps), and those with structural growth going forward like healthcare and cross-border...**

Note: Ranking is based on avg. revenue skew from 2020-2025 (1 is best, 10 is worst).

Source: Dealogic, Company data, Goldman Sachs Global Investment Research

**Exhibit 34: ...and has diversified its revenue mix into non-M&A streams more than peers**

Source: Dealogic, Company data, Goldman Sachs Global Investment Research

**Exhibit 35: EVR's 2025 secondaries revenue comprised 14% of revenue, vs. 5% across the group**

Note: PIPR 2024 total secondaries revenue is calculated for Aviditi Advisors. We assume a revenue of \$1mn/employee for 47 disclosed employees in line with company productivity. We assume 51%/34% 2025 YoY growth rate, and a 15% 2026 YoY growth rate for GP/LP-led deal volumes. For LCLN, we estimate 50% of Private Funds Advisory revenue to be attributable to secondaries.

## Valuation and new vs. old

Our investment bank stocks rose 6% on average in 2Q26,<sup>3</sup> driven by multiple rerating, partially offset by estimate downgrades, underperforming the S&P 500 by 9pp, as the market factors in a variety of procyclical and countercyclical macro and geopolitical crosscurrents and divergent trends across parts of investment banking. In our view, current valuation offers modest potential upside, given the strength of the IBanking backdrop. The group trades at ~16.5x/16.0x GSe/consensus NTM P/E, or ~60th/55th %ile P/E multiples over the last 11 years (Exhibit 55).

**Exhibit 51: IBanks have underperformed the broader market by 9pp in 2Q26.**

Note: We have considered market capital weighted price performance for each group.

### New vs. old:

**Based on updated Dealogic data for the quarter, and the macro & geopolitical backdrop, we hold our 2026E/27E/28E IBank earnings estimates unchanged, with dispersion in EPS estimate changes largely driven by differences in business mix and Dealogic trends. We decrease our target Q5-Q8 P/E multiples by 0.4x to account for lower market multiples, with our 12-month price targets decreasing by 2% on average (Exhibit 56). We now project an upside of 13% and a dividend yield of 3%, resulting in an average total return of 16%.**

**Exhibit 56: Old vs. new estimates and price targets**

## Disclosure Appendix

### Reg AC

We, James Yaro, Divyam Harlalka, Matthew Weng and Lokesh Kumar Sangewar, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

**Contributing Authors:** James Yaro Goldman Sachs & Co. LLC, Divyam Harlalka Goldman Sachs India SPL, Matthew Weng Goldman Sachs & Co. LLC, Lokesh Kumar Sangewar Goldman Sachs India SPL.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

### Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

### Disclosures

### Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

|        | Rating Distribution |      |      | Investment Banking Relationships |      |      |
|--------|---------------------|------|------|----------------------------------|------|------|
|        | Buy                 | Hold | Sell | Buy                              | Hold | Sell |
| Global | 50%                 | 34%  | 16%  | 65%                              | 60%  | 45%  |

As of April 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,074 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

**Regulatory disclosures****Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to

FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

## Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for “wholesale clients” within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for “professional investors” within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither “registered banks” nor “deposit takers” (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for “wholesale clients” (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

**European Union and United Kingdom:** Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

**Japan:** Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon

associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

## Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Public Communication Channel Goldman Sachs Brazil: 0800 727 5764 and / or [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou [contatogoldmanbrasil@gs.com](mailto:contatogoldmanbrasil@gs.com). Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

**European Economic Area:** Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

## General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
