

# Australian Autos: June 2026 VFACTS: Record month driven by EV/China vehicles

**GS take:** June new vehicle sales have bucked the downward trend to deliver a record month with 140k (+10%) sales with BYD marginally below Toyota (243 units) for top brand in the month, while Tesla Model Y was again the top selling vehicle. Key indicators for ARB/AOV continued to soften (GS index -16%; LCVs -13%; EVs +147%; China +85%). We expect elevated interest rates, fuel security concerns and supply constraints (e.g. Toyota) to continue to support the consumer shift to low-cost China/EVs, to which ARB/AOV have lower relative exposure, and which have lower take-up/spend rates for aftermarket accessories. **Amotiv (Buy), ARB Corp (Neutral).**

## Key takeaways:

- **GS key model index down 16% in June 2026.** Our GS Index tracking across a composite of 10 key models, based on estimated 4x4 accessory take-up/spend, was down 16% YoY in June driven by Toyota supply constraints and the shift towards EV/China models. Toyota Hilux -16% YoY (-1,020 units), Ford Ranger -5% YoY (-294 units) and Toyota Prado -21% YoY (-447 units).
- **Total new vehicle growth +10%, led by small/medium SUVs as large SUV/4x4 decline.** Total vehicle sales +10% YoY with SUV +23% (small/medium/large +18%/+55%/-15%), LCV -13% (4x4s -14%) and Passenger -5%.
- **Fuel security and shifting consumer preferences accelerating EV demand.** Tesla topped the chart for the second consecutive month in Australia with EV sales +147% to 32.6k, Petrol -29% to 34.7k and Diesel -18% to 31.8k.
- **China brands accelerate share gains, led by BYD.** China vehicles (Chery, GWM, MG, BYD) +85% YoY to 55.5k units and 40% new vehicle sales, a material increase from 8% in July 2021. The BYD Shark also posted a record month +13% to 3.4k units and was 16% of 4x4 sales.
- **Upcoming releases.** Toyota HiLux (9th Gen) in late-2025/early-2026 (volumes impacted by supply/transition); Nissan Navara (D27) in March 2026; Ford Ranger Super Duty mass market release in mid-2026; Toyota RAV4 (6th Gen) in 2HCY26; Nissan Patrol (Y63) in late-2026/early-2027.

**Valuation methodology (ARB):** Our 12m TP of A\$22.30 is based off a blended (50/50) DCF (WACC 9.2%; TGR +2.5%; RfR 3.5%) and PE multiple (20x weighted FY26/27E) valuation methodology to best represent the company's short- and long-term prospects as well as reflect how investors value the stock. Our 20x weighted multiple (vs 10-year average of 25x) reflects the lower growth outlook for ARB with our FY25-28E Npat cagr of +1.1% below its historical (pre-Covid) average of +6.5%. **Key risks:** 1) New vehicle sales; 2) Cost inflation; 3) Production and supply chain; 4) People and culture; 5) Reputation; 6) Distribution disruption; 7) Disruptive technology; 8) Slowdown in consumer discretionary spending.

**Valuation methodology (AOV):** We are Buy-rated on Amotiv (AOV.AX) with our 12m of A\$10.70 based on a blended (50/50) DCF (WACC 9.7%; TGR +1.5%; RfR +3.5%) and P/E methodology (13x weighted FY26/27E) to best represent Amotiv's short- and long-term prospects as well as reflect how investors value the stock. Our 13x P/E multiple is broadly in line with Amotiv's 10-year average and reflects a normalization in the operating environment and a stabilization in internal operations post Amotiv's strategic restructure. **Downside risks (-):** (1) Production and supply chain risk; (2) product technology obsolescence; (3) over-reliance on a single customer, or new entrants; (4) labour shortages; (5) acquisition and integration risk impacting operations.

### GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

### M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

### Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and [https://www.goldmansachs.com/disclosures/cftc\\_fcm\\_disclosures](https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures). Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

**Differing Levels of Service provided by Global Investment Research:** The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
