Weichai Power - A/H

Positive read-throughs from BE, Innio, GE Vernova:
SOFC, Gas Engines, BTM Demand; stay OW

We summarize in this note the latest read-throughs from [Bloom Energy](#), [Innio](#), and [GE Vernova](#), focusing on SOFC, gas primary engines, gas engines, and BTM (behind-the-meter) power demand. Mark Strouse covers all three names with Overweight ratings, and his recent reviews of results and guidance remain constructive. All three companies reported robust Q2 orders and raised capacity or delivery guidance, with management teams consistently highlighting strong BTM and data center demand, persistent supply constraints, and multi-year order visibility. Despite recent market volatility and investor concerns about BTM overcapacity or potential AI/data center capex cuts, management commentary across the board points to order books that remain full, slot reservations stretching into the 2030s, and no evidence of a material oversupply or demand cliff. Pricing power and margin resilience are recurring themes, with all three companies signaling confidence in their ability to defend profitability even as the competitive landscape evolves.

Stock view: Weichai's latest management update and fireside chat reinforce the AIDC thesis and highlight margin resilience despite sector volatility. The company is tracking in line with its 2026 AIDC shipment guidance of 3,500–4,000 units, with a strong order pipeline and a back-half weighted ramp. Capacity expansion is on track, with AIDC-related engine capacity set to reach 8,000–10,000 units by end-2027, and SOFC ramping from 30MW in 2026 to 200MW in 2027. Following recent share price correction (H/A down c.19%/13% since May vs. MSCI China -5%), Weichai's valuation has turned compelling, trading once again as an industrial cyclical name with a c.4% yield. Notably, on July 21, 2026, Weichai's controlling shareholder, Weichai Group, announced plans to increase its holdings in the company's A-shares by up to Rmb400MM, which we see as a strong signal of confidence in the company's growth outlook and intrinsic value. We view the current reset as an opportunity, supported by resilient delivery, margin discipline, and a multi-year growth runway. Maintain OW on Weichai A/H.

Bloom Energy's results reinforce the structural upcycle in SOFC and BTM, with robust order momentum and pricing power

- Bloom Energy management highlighted that SOFC demand is accelerating, with customer visibility building into 2030 and order books expanding rapidly. The company is targeting utility and incremental machinery expansion, supporting the narrative that SOFC is poised for multi-year growth. This is highly relevant for Weichai's SOFC ambitions, as it suggests the global market is still in the early stages of a multi-year upcycle.

- Data center orders are more than double of total FY25 orders, highlighting structural tailwinds for BTM power solutions. Management sees the total addressable market expanding, driven by AI/data center power shortages and the shift toward distributed generation.
- Pricing power is evident, as management noted robust ASPs and margin resilience despite supply chain challenges. The competitive landscape is evolving, but Bloom's technology and delivery capability are seen as differentiators. The company is investing in capacity and expects demand to remain supply-constrained for several years, which is highly relevant for Weichai's SOFC and BTM ambitions.

Innio's record orders and capacity ramp signal persistent strength in gas engines and BTM, with margin and TAM upside

- Innio reported record 2Q order activity, especially in data center and BTM segments, with a book-to-bill of 6.3x for data centers and 2.0x for utility solutions. Capacity ramp plans to 5 GW by YE26 and 10 GW by 2030 signal accelerating demand and fully booked slot reservations into the 2030s. This supports the view that gas engine demand is not only strong but also likely to remain supply-constrained for several years.
- Demand for gas engines is described as structurally strong, with distributed generation and BTM solutions seeing persistent tailwinds. Management expects supply constraints to persist, supporting pricing and margin power for high-quality suppliers. TAM is expanding, driven by electrification, grid constraints, and data center growth.
- The competitive landscape remains dynamic, but Innio's established technology and service-driven business model are seen as key advantages. Management highlighted favorable margin mix, with FY26 PF EBITDA guidance above Street expectations. Management is confident of maintaining pricing power and expects continued order strength as the market re-rates distributed power solutions.

GE Vernova's strong orders and capacity expansion highlight the durability of the power upcycle and BTM demand

- GE Vernova reported strong 2Q orders of \$24.2B, well above expectations, and announced expansion to 20 GW of gas power capacity is complete, targeting 24 GW in FY28 and 30 GW by 2030. Data center orders are at record levels, underscoring structural demand for gas turbines and BTM solutions. This is a clear signal that the power sector is seeing sustained order strength, and that both gas engines and turbines are benefiting from the electrification trend and AI/data center power shortages.
- The company highlighted positive margin outlook, with FY26 FCF guidance raised to \$11.5–12.5B, up from \$6.5–7.5B previously. Management expects continued order strength and capacity expansion to

drive multi-year growth. Pricing power and supply constraints are persistent, with management noting robust ASPs and margin resilience.

- The competitive landscape is intense, but GE Vernova's scale and diversification are seen as advantages. TAM is expanding, driven by electrification, AI/data center power shortages, and the shift toward distributed generation. Management is confident of maintaining pricing power and expects continued order strength as the market re-rates high-quality suppliers.

Weichai Power - A (Overweight; Price Target: Rmb49.00)

Investment Thesis

Weichai is a leading HDT engine provider, with a ~40% domestic market share. Investors have started to recognize the company's transition from a cyclical, legacy engine story to a multi-year growth platform anchored by AIDC and new energy solutions. The re-rating is still at an early stage, with the market's attention so far focused on the strong momentum in AIDC backup engines, but not yet fully reflecting the scale of the aftermarket opportunity, which could potentially grow to 5x the size of new product sales over the coming years and is not yet modeled in consensus. More importantly, Weichai is moving into the AIDC primary power segment for overseas markets, leveraging its SOFC and gas engine technology to address the next phase of global data center investment. We maintain our bullish view on Weichai.

Valuation

Our Jun-27 PT of Rmb49 is based on our DCF valuation. Key assumptions include:

- A WACC of 8.1%, driven by a cost of equity of 8.6% and a beta of 0.9x (latest Bloomberg data).
- Cost of debt at 5% and a tax rate of 25%.
- Target debt-to-capital of 10% and terminal growth of 3%.
- A 5% A/H discount to value the A-shares.

Risks to Rating and Price Target

Key downside risks include: (1) a slower-than-expected recovery in heavy-duty truck sales; (2) weaker-than-expected market-share gains; and (3) weaker-than-expected performance at Kion.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own

independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
