The Humanoid Signal - Going Global, Capturing Early Ground

Chinese humanoid integrators are expanding globally despite the industry being at an early stage, aiming to develop the ecosystem and data flywheel for long-term growth. We believe robotics and humanoids will strengthen China's export dominance/manufacturing leadership. Prefer LeaderDrive, Hengli.

In our [2026 outlook](#), we listed 10 key highlights to watch. In this series, we will provide further color on each.

Establishing an early ecosystem: Humanoid integrators are striving to extend deployment of their fleet, and accelerate the data flywheel, critical for model iteration. Establishing partnerships and the ecosystem is the key pathway, both domestically and globally, especially in the current early stages. Not only listcos (such as UBTECH and Dobot), but most startups (such as Unitree and Galbot) are also building overseas sales and partnerships (see [Exhibit 1](#)). At CES 2026 (held in Las Vegas), Chinese companies represented [the majority of the humanoid-robot exhibitors](#), clearly showcasing the “going global” strategy. Collaboration will be a key pathway, working with global partners to enable local deployment (for example, [US-based OpenMind](#) is helping to bring a number of China humanoids in international markets, thus mitigating regulatory barriers).

Similar to domestic trends, sales/cooperation is shifting toward real work verification. Last year, many orders went to research institutions (universities, and tech giants) for internal R&D, as well as entertainment demand, per our conversation with integrators. But as stated in our [2026 outlook](#), humanoids are in a broad commercial verification process, while overseas partnerships are also shifting toward commercial orders/strategic cooperation, for example, UBTECH with Texas Instruments and Airbus, and Unitree with Japan Airlines. We expect the trend to continue as the actual work capabilities for humanoids broaden.

The next chapter in China's dominance in global manufacturing: Overseas markets have stronger spending power and tighter labor dynamics, creating attractive conditions for adoption once humanoid reliability, autonomy, and task performance improve. Moreover, overseas humanoid capacity ramp up also creates demand for China manufacturing equipment (such as [Wuxi Lead's recent humanoid equipment order](#) from a US-based client). Our [Asia Economic team](#) projects that China's export market share will rise from 15% today to 16.5% by 2030, with EV, batteries and robotics driving much of the increase. [Humanoids are poised to become the next major industry supporting China's manufacturing and exports machinery.](#)

Valuation Methodology and Risks

Jiangsu Hengli Hydraulic Co.Ltd (601100.SS)

Our price target is derived by 1) applying a 35x 2026e P/E multiple to its core business (excl. FX impact); and 2) using DCF for the humanoid robot parts business, discounting 2025-50e cash flows at a WACC of 11% and applying a terminal growth rate of 4%. Combining both yields a price target of Rmb133.

Risks to Upside

- Stronger-than-expected excavator and pumps & valves demand.
- Notable penetration into foreign brands' supply chain.
- Faster-than-expected humanoid robots penetration and market share gain in the supply chain.

Risks to Downside

- Sharp decline in excavator and pumps & valves demand in China.
- Failure to expand its share in non-excavator parts.
- Slower-than-expected humanoid robot penetration.

Leader Harmonious Drive Systems (688017.SS)

Base case. We use DCF for Leaderdrive, by discounting 2025-50e cash flow at a WACC of 11% and terminal growth rate of 4%, to derive per share value of Rmb269.

Risks to Upside

- Faster-than-expected growth in industrial robot demand (especially cobot)
- Faster humanoid robot adoption and successfully penetrating the humanoid integrators' supply chain
- Margin expansion via higher capacity utilization and more favorable product mix

Risks to Downside

- Lower-than-expected manufacturing capex in China
- Slower-than-expected humanoid development
- Harmonic reducer is no longer a mainstream solution

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision

to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1546	42%	467	51%	30%	709	44%
Equal-weight/Hold	1568	43%	358	39%	23%	715	44%
Not-Rated/Hold	4	0%	0	0%	0%	1	0%
Underweight/Sell	555	15%	84	9%	15%	202	12%
Total	3,673		909			1627	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.
