Appliances: Fourth of July 2026 Pricing Update

WHR

12m Price Target: **\$53.00**Price: **\$38.10**Upside: **39.1%****Net Price Up Sequentially and YOY as OEMs Show Greater**

Discipline: To better assess the competitive environment around the Fourth of July we scanned appliance pricing across three retailers and five major manufacturers. Overall, we found net industry pricing up 702bps YOY, vs +508bps over Memorial Day and +199bps over Presidents' Day, as manufacturers look to offset rising costs including commodity and freight inflation along with Section 232 tariffs. This includes a 43bps contraction in discounts vs Memorial Day to 21%, down 473bps YOY, with a 693bps delta between producers. LG was the most promotional at 25% while Electrolux and Whirlpool both trailed at 18%. We note Whirlpool saw the largest sequential decline vs Memorial Day at 162bps—230bps below the group average—and down 238bps YOY. Notably, the range of discounts between categories narrowed relative to prior sales events with washers at 23% vs more discretionary products including ranges and dishwashers at 22%. Our findings come as Whirlpool implemented a 10% promotional increase on April 17 and a 4% list price increase effective July 9. This compares to a 0.7% list price increase for WHR over this holiday, though we see a path to upside as these efforts come through supported by similar actions from peers. Our channel checks also suggest a move towards a shorter promotional period. As such, we expect net pricing to further expand in the coming months. Given ongoing demand headwinds, we model North America industry shipments down 4% in 2026. We expect the loss of operating leverage along with higher input costs and tariff headwinds to drive Whirlpool's 2Q26 North America major domestic appliance segment operating margin down 370bps YOY to 2.2% with the full-year off 128bps to 3.6%.

List Price Increases Driven by Newer SKUs: On average, list prices grew 0.7% compared to +4.1% a year ago and +1.0% YOY at Memorial Day. The YOY gain was led by LG up an average of 1.6% with 12% of SKUs higher while GE and Samsung rose an average of

0.2% with declines across 19% and 15% of items, respectively. On a two-year stack, industry prices rose 4.8% vs 4.5% at Memorial Day with 11% of SKUs higher YOY vs 40% a year ago. Growth continues to be led by new products as manufacturers and retailers look to stimulate demand. In turn, we see potential upside as these offerings gain momentum and drive positive mix.

Inventories Decline vs Memorial Day as Product Offerings Transition: Best Buy and Home Depot had the fewest out-of-stock items among surveyed retailers while Lowe's had the most. By manufacturer, GE had the greatest availability while LG trailed. By retailer, Lowe's had more SKUs that were permanently discontinued given the transition to newer launches followed by Best Buy and Home Depot. We also note significant changes to Electrolux's portfolio led by freezers. In our view, this is consistent with the broader efforts noted above.

Valuation & Risks: We are Neutral rated on WHR with a \$53, 12-month price target, which is based on 7.0x our Q5-Q8 adj. EBITDA estimate. Downside risks include: 1) rising competition drives greater promotional activity, 2) inability to deliver on strategic initiatives, 3) increase in raw material costs and the inability to pass them through, and 4) changes in trade actions adding to revenue and margin headwinds. Upside risks include: 1) greater traction in recently launched products and more limited trade down by consumers, 2) the benefits of pricing and cost actions drive upside to margins, 3) recovery in housing, and 4) efforts to reduce debt.

Net Price Rises as Manufacturers Gain Discipline to Offset Margin Headwinds

Discounts Drop Sequentially and Remain Meaningfully Lower YOY Despite Weak Demand

In order to better assess the promotional environment around the Fourth of July we scanned appliance prices across three major retailers. The weighted-average discount of 20.5% was 473bps lower vs 2025 and 43bps below Memorial Day. There was a 693bps variation among brands compared to 814bps last year. LG was the most promotional at 25.1%, down 359bps YOY, while Electrolux and Whirlpool trailed at 18.3% and 18.2%, respectively, off 488bps and 238bps YOY. Sequentially, discounts declined the most for Whirlpool at -162bps vs Memorial Day despite recent promotional pricing actions. We note our scan does not consider the shorter promotional period versus a year ago as producers and retailers look to balance rising costs against a weak consumer backdrop.

By category, freezers were the least discounted at 13.8%, declining 458bps YOY, while washers were the most at 22.6%, off 357bps vs last year. We note the gap in promotions among product categories narrowed meaningfully vs prior holidays as manufacturers' efforts come through. We expect this to persist given recent promotional pricing actions from WHR and others' efforts to offset inflation.

Number of SKUs Seeing List Price Increase Moderates Compared to Recent Holidays

Our scans indicate list prices increased an average of 0.7% YOY off an increasingly challenging comp of +4.1% last year and +1.0% YOY at Memorial Day. On a two-year stack, industry list prices rose 4.8% vs +4.5% at Memorial Day and +4.1% a year ago. The range of +0.2% to +1.6% across brands is significantly narrower vs the -2.2% to +15.2% last year with only 11% of SKUs seeing higher list prices vs 40% a year ago. By manufacturer, this was led by LG up 1.6% with 12% of products higher despite a tough comp, while GE and Samsung trailed at +0.2% each with declines across 19% and 15% of items, respectively.

Although companies and retailers are focused on innovation to stimulate demand, we expect ongoing mix headwinds as consumers look to stay within budget. Despite this, we look for momentum around recently launched products to support positive price/mix

for Whirlpool in 2H26. We note the company transitioned 30+% of the North America MDA portfolio in 2025, the largest in its history, partially contributing to the list price gains over recent holidays. More broadly, we expect list price increases to continue in the coming months as manufacturers navigate higher commodity and other input costs as well as tariffs.

Net Price Increases Significantly as Cost Pressures Persist

In order to better understand the impact of moves around list prices and promotions, we also consider the net change. For the Fourth of July, we find net industry price grew 702bps YOY on top of a 354bps rise last year and vs +508bps YOY at Memorial Day. This was led by GE and Samsung up 1,053bps and 873bps YOY, respectively, while Whirlpool saw the smallest gain, up 375bps YOY vs -88bps at Memorial Day. That said, we expect Whirlpool's net pricing to improve through the year given: 1) list price actions, 2) recent product launches, 3) promotional price increases, and 4) shorter promotional periods. These factors are key to our forecast for the company's North America MDA segment

net price (ex-FX) up 1.0% YOY in 2026.

Cost Update: Monitoring Input Costs and Tariffs

Prices for key commodity inputs to appliances have diverged over the past month, and we generally expect them to stay elevated through year-end despite the recent developments related to the conflict in the Middle East. As such, we estimate \$361mn in raw material inflation and tariff exposure for Whirlpool in 2026, roughly in line with management's expectations. Against this, we model \$205mn of price/mix tailwinds coupled with \$123mn in cost reductions contributing to our 2026 consolidated adj. EBIT margin forecast of 4.1%, down 60bps YOY. Steel and resins each account for 8-9% of COGS, while logistics are 10%.

We provide more details around the key cost inputs below.

Key Input Costs Further Rise Through the Spring

US hot rolled steel prices further rose in June and currently trade at \$1,155/ton, up 24% YTD and 36% YOY. Our steel team expects realizations to remain elevated through 2H26, averaging \$1,070/ton during the period. This reflects: 1) higher shipping costs increasing the landed cost of imports and pushing import parity prices upward, 2) disruptions in global supply chains and shipping routes creating more uncertainty around availability of imports, 3) methodical price increases by US mills leading to more sustained import suppression, tightening US steel supply, and 4) extended domestic lead times. They note demand remains healthy across a majority of end markets aside from rate sensitive pockets.

Exhibit 6: US Steel Prices, YOY Change

Source: FactSet, Goldman Sachs Global Investment Research

Given the drop in energy prices following the recent developments related to the conflict in the Middle East, US polyethylene and propylene prices are down an estimated 27% and 1% from their June highs, though they are up 34% and 51% YTD, respectively. Looking out, our chemicals team expects domestic PE prices to further decline though holding above pre-conflict levels as they exit 2026 up 40% YOY.

Exhibit 7: North American Resin Prices, YOY Change

Logistics Costs Surge

Through June 26 spot dry-van freight rates (including fuel surcharges) have rallied 52% YOY and are up 29% since late February led by higher fuel prices and more limited capacity/driver pool availability given tighter CDL restrictions and English language enforcements. As these factors are expected to last, our transportation team recently raised its 2H26 spot rate expectations (ex. fuel) with recent trends supporting upside to their year-end forecast of +15% YOY. They look for contract rates to follow, potentially reaching high-single to low-double digit gains YOY at resigning.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DAFCF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across

their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
