BOTTOM LINE: We refresh our Orlando, Florida tourism market indicators for the month of May 2026 (as part of our efforts to measure intra-quarter demand for Disney and Universal theme parks). This includes: (1) Orlando International Airport flight arrivals (source: Greater Orlando Aviation Authority); and (2) Orange County, Florida Tourist Development Tax receipts, which is a 6% tax paid on hotel and short-term accommodations (source: Orange County, Florida Comptroller's office).

Key takeaways from our analysis include:

- **Orange County's Tourist Development Tax (TDT) collections rose 9% yoy** to \$32.8 mn in May 2026, a moderation from the +14% yoy pace in April 2026, though notably marking the strongest May collections on record.
- **May 2026 Orlando airport arrivals declined 2% yoy** (per the Greater Orlando Aviation Authority), a deceleration from +3% yoy in April 2026. The yoy softness was driven by a -3% yoy decline in domestic deplanements, partially offset by a +2% yoy increase in international deplanements. That said, international visitation has now posted two consecutive months of growth following three months of relative weakness—consistent with management's commentary that international visitation to U.S. parks has cleared its pandemic-recovery overlap period and is no longer showing signs of further deterioration.
- **C2Q26 MCO passenger deplanements are tracking to +1% yoy**, in line with GSe's estimate of +1% yoy growth in C2Q26 DIS-reported domestic attendance, assuming June trends approximate the average of April and May.

KEY NUMBERS:

- 1. Orlando airport arrivals in May 2026 decreased 2% yoy** (per

Rating, price target, key risks, investment thesis

Valuation. We are **Buy rated** on shares of Walt Disney Co. Our 12-month price target of **\$163** is based on a sum-of-the-parts valuation methodology based on the following

assumptions: Parks and Experiences at 11X NTM+1Y EBITDA, Consumer Products at 15X NTM+1Y EBITDA, Linear Networks at 4X NTM+1Y EBITDA, Content Sales and Licensing at 20X NTM+1Y EBITDA, Sports at 6X NTM+1Y EBITDA, and DTC based on an EV/subscriber methodology with an implied EV/EBITDA of 21X.

Key downside risks: intensified cord-cutting, sports rights cost inflation, streaming competition, economic slowdown impacting consumer spending, weak theatrical slate, M&A, unfavorable regulatory or policy reforms, higher than expected interest rates and FX.

Investment Thesis Summary: Disney produces, distributes and licenses filmed entertainment content across its various brands (Walt Disney Studios, ESPN, ABC, Hulu) and is a leading destination theme park owner and operator in the US, Europe and Asia. Its long history of 1) generating genre defining film and television content via its iconic characters and studio brands (Disney Princesses, Mickey and Friends, Pixar), 2) operating industry leading destination parks with global demand, and 3) producing and distributing a global leading sport-focused entertainment brand have contributed to the company's established brand strength.

We are Buy rated on DIS, as we believe the company is a high-quality EPS compounder supported by 1) continued progression to scaled long term DTC profitability made possible by wholesale arrangements, bundled offerings, password sharing restrictions and other initiatives; 2) studio performance improvement (from a period of under earning) enabled by cost rationalization and organizational restructuring; 3) effective sports rights cost mitigation and cord-cutting headwind management via ESPN DTC flagship, live rights sub-licensing, portfolio curation, and corporate actions; and 4) robust theme park growth enabled by industry tailwinds and a \$60bn investment over the next 10 years.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an

investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
