

Chair Transplant

- We expect the Fed to remain on hold at the June FOMC meeting. The meeting statement will likely drop the easing bias, and we expect the dot plot medians to show rates on hold through the end of 2027.
- We think Chair Warsh will decline to submit his own economic and policy projections. In his first press conference, Warsh may continue to downplay the usefulness of forward guidance, while hinting at a future case for rate cuts.
- CPI and PPI inflation data point to an acceleration in core PCE inflation to 0.345% m-o-m or 3.426% y-o-y in May. Pipeline price pressures measured by PPI data continued to grow and point to an upside risk to the inflation outlook.

We expect the Fed to remain on hold and remove an easing bias

The Fed will likely keep the policy rate on hold for the fourth consecutive meeting at the June FOMC meeting. Since the April meeting, economic indicators show growing inflation risks, while labor markets have stabilized with some signs of acceleration.

Fig. 1: The Fed will likely keep the policy rate on hold

Source: FRB, Bloomberg, Nomura

Fig. 2: We expect Chair Warsh to acknowledge the current hawkish macroeconomic environment, but make a case for policy easing in the medium term

Tool	Key assumptions
Policy rate	
2026	No rate cuts, EOP 3.625%
2027	No rate cuts, EOP 3.625%
Terminal	3.50 - 3.75%
Balance sheet policy	
Size	Reserve management purchases of \$10bn/month. The NY Fed is actively managing reserve management purchases in response to seasonal liquidity demand and market conditions. We expect balance sheet growth to average \$20bn per month in the medium term.
Composition	MBS rundown to continue, with proceeds reinvested into Treasuries. Both reinvestments and eventual reserve management purchases will be skewed towards Treasury bills.

Source: FRB, Nomura

We expect the post-meeting policy statement will remove the easing bias from the forward guidance language with unanimous support. Fedspeak has turned more hawkish recently, with several FOMC participants explicitly discussing the possibility of a rate hike. That being said, a dovish faction on the Committee remains cautiously optimistic about the inflation outlook and sees policy as moderately restrictive.

Revisions to the economic projections will likely be concentrated in the inflation outlook. We expect the median inflation projection for both the headline PCE and core PCE price indices will rise over the near term (Fig. 3). We expect policymakers will make a mark-to-market adjustment to their unemployment rate projections for 2026 and 2027, reflecting

Production Complete: 2026-06-12 19:52 UTC

recent strength in labor markets. We expect real GDP growth projections will remain unchanged from the March meeting.

Fig. 3: We expect the median inflation projection for both headline PCE and core PCE price indices to rise over the near term

Nomura's forecast for the June 2026 Summary of Economic Projections

		2026	2027	2028	Longer-run
Change in real GDP	Jun-26	2.4	2.3	2.1	2.0
	<i>Mar-26</i>	2.4	2.3	2.1	2.0
Unemployment rate	Jun-26	4.3	4.2	4.2	4.2
	<i>Mar-26</i>	4.4	4.3	4.2	4.2
PCE inflation	Jun-26	3.6	2.2	2.0	2.0

Projected appropriate policy path: Median					
	Jun-26	3.625	3.625	3.375	3.250
	<i>Mar-26</i>	3.375	3.125	3.125	3.125

Source: FRB, Haver, Nomura

We do not expect Chair Warsh to submit interest rate projections for the dot plot, consistent with his past criticisms of Fed forward guidance (*Fig. 4*). Such an omission would reduce the total number of dots to 18 from 19. Warsh cannot unilaterally eliminate any aspects of the summary of economic projections, but there is a precedent for participants declining to submit forecasts.

We expect the median dots for 2026 and 2027 will rise to 3.625%, indicating no change from the current rate level for the next one and a half years. Given that most officials have discussed multiple scenarios, it is difficult to gauge individual dots for 2026, but we expect that 4-5 dots will indicate a rate hike, 7-9 dots will correspond to no changes, and 4-6 dots will be consistent with rate cuts. We expect the median 2028 dot to be 3.375%, consistent with one rate cut, and the longer-run median dot (a proxy of the neutral rate of interest) to be revised up to 3.250% from 3.125%, as the FOMC participants' characterization of the policy stance suggests an upward revision to their estimate of neutral rate.

Fig. 4: We think Warsh will decline to submit his interest rate projections for the dot plot, which is consistent with his past criticisms of Fed forward guidance

Nomura's expectation for policymakers' 2026 dots

%	2026 dot as of June (Nomura's expectation)		
3.875	Goolsbee	One rate hike	1
3.875	Schmid	One rate hike	2
3.875	Hammack	One rate hike	3
3.875	Musalem	One rate hike	4
3.875	Logan	One rate hike	5
3.625	Collins	No more rate cuts	6
3.625	Barkin	No more rate cuts	7
3.625	Kashkari	No more rate cuts	8
3.625	Barr	No more rate cuts	9
3.625	Venable	No more rate cuts	10
3.625	Cook	No more rate cuts	11
3.625	Waller	No more rate cuts	12
3.375	Jefferson	One more rate cut	13
3.375	Powell	One more rate cut	14

3.125	Bowman	Two more rate cuts	18
3.125	Warsh	Two more rate cuts	19

Source: FRB, Nomura

In the press conference, we think Warsh is unlikely to call for an immediate rate cut given the current hawkish macroeconomic environment. However, we think Warsh could make a case for policy easing in the medium term, suggesting that a pause in easing is largely driven by uncertainty around the Iran war. As he did at his confirmation hearing, we expect Warsh to reiterate his view that AI will boost productivity and lead to disinflation. Warsh may also characterize currently elevated inflation as a temporary phenomenon due to the Iran war.

Warsh may continue to downplay the usefulness of core PCE inflation and instead propose alternative inflation measures. He may also discuss the possibility of balance sheet reduction, possibly laying out a roadmap or timeframe for a smaller balance sheet. In addition, he could discuss how he might make changes to the Fed's communication strategy.

May CPI and PPI reports point to an acceleration in core PCE inflation

Incorporating CPI and PPI data, we forecast core PCE inflation of 0.345% m-o-m in May from 0.23% in April. This would translate into y-o-y core PCE inflation of 3.426%, the highest reading since October 2023.

Fig. 5: Core PCE inflation likely accelerated in May, driven by components derived from PPI data

Decomposition of m-o-m core PCE inflation by data source

Source: BLS, BEA, Haver, Nomura

Fig. 6: Y-o-y core PCE inflation likely rose to 3.4% in May

Source: BEA, Haver, Nomura

Core CPI inflation moderated to 0.208% m-o-m from 0.376% in April. Core CPI goods inflation turned negative for the first time since May 2025. The tariff impact appears to have continued to wane, while inflationary pressures from global shortages of semiconductors on consumer electronics diminished. We expect core PCE goods inflation also turned negative in May. By contrast, *Core CPI service inflation remained resilient*. Rent-related components remained elevated, and supercore CPI components continued to increase at a decent pace. Transportation service prices (e.g., airline fares and auto insurance prices) were volatile.

Compared with our expectations, PCE-relevant PPI data were mixed, as the strength in portfolio management and investment advice prices was partially offset by an unexpected decline in domestic airline fares. CPI and PPI data suggest that supercore PCE inflation likely accelerated to 0.5% m-o-m, the highest since January 2026. Backward revisions to PPI data suggest that January core PCE inflation will likely be revised up, while March and April core PCE inflation will likely be revised down.

Details of PPI data for manufacturers' production costs and selling prices indicate upward pressure on core goods inflation in the coming months. Production costs for US manufacturers kept growing as PPI's processed materials and components for manufacturing continued to increase, in line with the recent increase in factory surveys' prices paid indices (*Fig. 7*).

Despite the softness in core CPI goods prices, manufacturers continued to pass higher costs on to their consumers, as PPI for finished consumer goods excluding food and energy increased in May (*Fig. 8*). Regional manufacturing surveys' prices received indices also point to pass-through of higher costs into consumer product prices.

Fig. 7: Recent business surveys' show firming of prices

Manufacturing prices paid index vs. PPI's input costs for manufacturing

Source: BLS, ISM, S&P, Haver, Nomura

Fig. 8: PPI's finished consumer goods prices excluding food and energy continued to increase in May, suggesting pass-through of higher costs into consumer goods prices

Source: BLS, BEA, NY Fed, Philly Fed, Dallas Fed, KC Fed, Haver, Nomura

Data next week

We expect retail sales rose 0.5% m-o-m in May, as gasoline spending remained strong and motor vehicle sales picked up. Strong payroll income growth and higher tax refunds from the OBBBA have supported spending thus far, despite inflationary headwinds from the Iran war ([Fig. 9](#) & [Fig. 10](#)).

Fig. 9: Strong payroll income growth has supported spending

Aggregate private payroll income

Source: BLS, Haver, Nomura

Fig. 10: Higher tax refunds appeared to offset the sentiment and cashflow drag from higher gasoline prices

YTD tax refunds

Source: US Treasury, Bloomberg, Haver, Nomura

We expect industrial production growth slowed to 0.2% m-o-m in May and manufacturing production was flat. Core manufacturing (i.e., manufacturing excluding motor vehicles and parts production) likely grew 0.3%. Manufacturing surveys scheduled for release next week (the Empire State and Philly Fed surveys) are likely to point to increased production, while prices paid and received indices will remain elevated, in line with the May PPI report.

Separately, we continue to expect housing data next week to show a pickup in activity in Q2. We expect single-family housing starts ticked up, while volatile multifamily starts fell.

Pending home sales likely rose. The NAHB Housing Market Index likely remained unchanged from May, as mortgage rates ticked down, while rising building material costs and elevated uncertainty weighed on builder sentiment.

Q2 GDP tracking

We have revised our Q2 GDP tracking estimate to 2.4% q-o-q ar from **2.3% last week**. Our estimate for real final sales to private domestic purchasers now stands at 2.7% from 2.6% previously. Inflation data this week led to a slightly smaller GDP contribution from real personal consumption. A downside surprise in defense outlays in May weighed on government spending, which was offset by strength in net exports and residential investment, as the April trade balance and May existing home sales had a positive impact on our tracking estimate.

Data Preview

The week ahead

We expect the FOMC to hold rates steady at the June meeting and signal no cuts.

Industrial production (Monday): We expect industrial production growth slowed to 0.2% m-o-m in May following a 0.7% increase in April. Manufacturing production was likely flat in May as motor vehicles and parts production declined, offsetting an increase in other components.

Core manufacturing (i.e. manufacturing excluding motor vehicles and parts production) likely remained strong and grew 0.3% m-o-m. Manufacturing surveys suggest production rose in the month, and aggregate employment in the sector improved. Volatile components were mixed in May, as a strong increase in mining production was somewhat offset by weakening utilities production.

NAHB housing market index (Monday): We expect the NAHB Housing Market Index remained subdued at 37 in June, essentially unchanged from May. Mortgage rates ticked up during the survey reference period, and elevated uncertainty coupled with rising building material costs likely continued to weigh on builder sentiment.

Import prices (Tuesday): We expect import prices remained elevated in May as crude oil prices continued to be driven up by the Iran war. Ex-petroleum import prices likely moderated due to the lagged effect of a weaker dollar. Note, the scope of BLS's import prices excludes tariffs.

Housing starts (Tuesday): We expect housing starts slowed to 1445k in May from 1465k in April. Volatile multifamily starts likely fell, reversing a sharp increase in April, while single-family starts likely ticked up. Lead indicators (including building permits and home sales) suggest activity is likely to pick up in Q2 following a slowdown in Q1. Building permits likely edged down slightly to 1415k from 1423k in April, driven by a slowdown in multifamily permits.

Retail sales (Wednesday): We expect retail sales rose 0.5% m-o-m in May following a 0.5% advance in April. Gasoline sales remained strong, while motor vehicle sales also picked up in the month. Strong payroll income growth and higher tax refunds from the OBBBA have supported spending thus far, despite headwinds from the Iran war.

We expect nominal "control" retail sales growth slowed to 0.4% m-o-m from 0.5% previously. Food services sales likely slowed and building material sales likely fell in May.

Pending home sales (Wednesday): We expect pending home sales rose 0.9% m-o-m, down from 1.4% m-o-m in April. Weekly data from Redfin suggest home sales remained strong.

FOMC meeting (Wednesday): The Fed will likely keep the policy rate on hold for the fourth straight meeting next week. We expect the Committee to remove the easing bias from the policy statement with unanimous support.

The median projections for the federal funds rate will likely show no changes in the policy rate for 2026 and 2027, followed by one rate cut in 2028. We expect the median longer-run projection to be revised slightly higher.

Chair Warsh is unlikely to submit his own economic and policy projections, downplaying the benefit of providing forward guidance. He may acknowledge the current hawkish macroeconomic environment, but will likely make a case for policy easing in the medium term.

Jobless claims (Thursday): Initial and continuing jobless claims continued to rise this week, but remain relatively subdued. Initial jobless claims are now closer to their recent pattern of a pickup in summer months.

US Economic Outlook

We expect the Fed to stay on hold indefinitely due to diminished political pressure, elevated inflation, and hawkish Fedspeak.

Economic activity: Growth momentum has accelerated, supported by easing tariff uncertainty, fiscal stimulus from the One Big Beautiful Bill Act, and the lagged impact of Fed rate cuts amid easy financial conditions. *Business investment appears to be broadening beyond the AI sector*. Higher tax refunds and strong payroll income growth have supported consumer spending thus far, despite headwinds from the Iran war. A broad range of indicators point to resilience and tentative signs of reacceleration in the labor market. We expect the unemployment rate will decline, reaching 4.1% by year-end. We think that the US economy remains relatively insulated from *the crude oil price shock due to the Iran war* given the small share of energy-goods consumption in household spending, as well as domestic energy production.

Inflation: Core inflation remains well above the Fed's 2% target, and we believe risks are skewed to the upside. We forecast Q4 2026 core PCE inflation of 3.3% y-o-y. We expect tariff price pressures will diminish in the coming quarters. However, this will likely be offset by new price pressures driven by supply shortages caused by AI (memory chips, electricity, etc.) along with spillovers from higher energy prices. Wage growth seems to have moderated gradually, but remains higher than the level consistent with the Fed's 2% inflation goal, which is likely to lead to stickiness in supercore service inflation. We expect rent disinflation to continue, but at a very gradual pace.

Policy: *We expect the Fed to remain on hold indefinitely*. Fed Chair Warsh likely remains motivated to ease policy, but recent elevated inflation readings and hawkish Fedspeak suggest he may not be able to convince the majority of the Fed to support rate cuts. Moreover, support among Fed officials for an easing bias has begun to wane. While hikes appear unlikely in the near term, the Fed's hesitance to respond to tentative signs of inflation pressure raises the risk that they may end up "behind the curve," needing to hike quickly to re-establish credibility. The balance of risks is tilted towards tightening at this moment. On tariffs, wider Section 122 exemptions, lower tariff rates, and a greater focus on affordability suggest *limited further escalation* in US trade policy.

Risks: Further escalation of geopolitical risks could lead to a tightening of financial conditions and worsening of the fiscal outlook. Increased political pressures on individual FOMC participants could undermine the Fed's credibility, soliciting sharp market reactions. A bust of the AI boom could lead to material corrections in asset valuations. A continued shortage of memory chips and supply chain disruption due to a protracted Iran war could lead to a second round of goods price increases.

Fig. 13: United States: Details of the forecast

Week in Review

Fig. 14: Weekly data tracker and its decomposition

Note: We estimate a latent factor that contributes the most to the total variance of 13 daily and weekly US indicators covering industrial and consumer sectors via principal component analysis (i.e., the first principal component). We calibrate this factor to track four-quarter changes in real GDP.

(l) Nomura Fiduciary Research & Consulting Co., Ltd. ('NFRFC') Tokyo, Japan. (m) Nomura Orient International Securities Co., Ltd ('NOI'), is a majority owned joint venture amongst Nomura Group, Orient International (Holding) Co., Ltd, and Shanghai Huangpu Investment Holding (Group) Co., Ltd. In accordance with the laws of the People's Republic of China ("PRC", excluding Hong Kong, Macau and Taiwan, for the purpose of this document), NOI is licensed in the PRC to provide securities research and investment recommendations and it operates independently from the other members of the Nomura Group; in particular, NOI's interests in PRC securities are not disclosed to, or aggregated with the holdings of, any other Nomura Group entities and the interests in PRC securities of other Nomura Group entities are not disclosed to, or aggregated with the holdings of, NOI. An individual name printed next to NOI on the front page of a research report indicates that individual is employed by NOI to provide research assistance to NIHK under a research partnership agreement. 'NSFSPL' next to an employee's name on the front page of a research report indicates that the individual is employed by Nomura Structured Finance Services Private Limited to provide assistance to certain Nomura entities under inter-company agreements. 'Verdhana' next to an individual's name on the front page of a research

report indicates that the individual is employed by PT Verdhana Sekuritas Indonesia ('Verdhana') to provide research assistance to NIKH under a research partnership agreement and neither Verdhana nor such individual is licensed outside of Indonesia.

THIS MATERIAL IS: (I) FOR YOUR PRIVATE INFORMATION, AND WE ARE NOT SOLICITING ANY ACTION BASED UPON IT; (II) NOT TO BE CONSTRUED AS AN OFFER TO SELL OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITIES IN ANY JURISDICTION WHERE SUCH OFFER OR SOLICITATION WOULD BE ILLEGAL; AND (III) OTHER THAN DISCLOSURES RELATING TO THE NOMURA GROUP, BASED UPON INFORMATION FROM SOURCES THAT WE CONSIDER RELIABLE, BUT HAS NOT BEEN INDEPENDENTLY VERIFIED BY NOMURA GROUP.

Other than disclosures relating to the Nomura Group, the Nomura Group does not warrant, represent or undertake, express or implied, that the document is fair, accurate, complete, correct, reliable or fit for any particular purpose or merchantable, and to the maximum extent permissible by law and/or regulation, does not accept liability (in negligence or otherwise, and in whole or in part) for any act (or decision not to act) resulting from use of this document and related data. To the maximum extent permissible by law and/or regulation, all warranties and other assurances by the Nomura Group are hereby excluded and the Nomura Group shall have no liability (in negligence or otherwise, and in whole or in part) for any loss howsoever arising from the use, misuse, or distribution of this material or the information contained in this material or otherwise arising in connection therewith.

Opinions or estimates expressed are current opinions as of the original publication date appearing on this material and the information, including the opinions and estimates contained herein, are subject to change without notice. The Nomura Group, however, expressly disclaims any obligation, and therefore is under no duty, to update or revise this document. Any comments or statements made herein are those of the author(s) and may differ from views held by other parties within Nomura Group. Clients should consider whether any advice or recommendation in this report is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The Nomura Group does not provide tax advice.

The Nomura Group, and/or its officers, directors, employees and affiliates, may, to the extent permitted by applicable law and/or regulation, deal as principal, agent, or otherwise, or have long or short positions in, or buy or sell, the securities, commodities or instruments, or options or other derivative instruments based thereon, of issuers or securities mentioned herein. The Nomura Group companies may also act as market maker or liquidity provider (within the meaning of applicable regulations in the UK) in the financial instruments of the issuer. Where the activity of market maker is carried out in accordance with the definition given to it by specific laws and regulations of the US or other jurisdictions, this will be separately disclosed within the specific issuer disclosures.

This document may contain information obtained from third parties, including, but not limited to, ratings from credit ratings agencies such as Standard & Poor's. The Nomura Group hereby expressly disclaims all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of the information obtained from third parties contained in this material or otherwise arising in connection therewith, and shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of any of the information obtained from third parties contained in this material or otherwise arising in connection therewith. Reproduction and distribution of third-party content in any form is prohibited except with the prior written permission of the related third-party. Third-party content providers do not, express or implied, guarantee the fairness, accuracy, completeness, correctness, timeliness or availability of any information, including ratings, and are not in any way responsible for any errors or omissions (negligent or otherwise), regardless of the cause, or for the results obtained from the use or misuse of such content. Third-party content providers give no express or implied warranties, including, but not limited to, any warranties of merchantability or fitness for a particular purpose or use. Third-party content providers shall not be liable (in negligence or otherwise, and in whole or in part) for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including lost income or profits and opportunity costs) in connection with any use or misuse of their content, including ratings. Credit ratings are statements of opinions and are not statements of fact or recommendations to purchase hold or sell securities. They do not address the suitability of securities or the suitability of securities for investment purposes, and should not be relied on as investment advice. Any MSCI sourced information in this document is the exclusive property of MSCI Inc. ('MSCI'). Without prior written permission of MSCI, this information and any other MSCI intellectual property may not be duplicated, reproduced, re-disseminated, redistributed or used, in whole or in part, for any purpose whatsoever, including creating any financial products and any indices. This information is provided on an "as is" basis. The user assumes the entire risk of any use made of this information. MSCI, its affiliates and any third party involved in, or related to, computing or compiling the information hereby expressly disclaim all representations, warranties or undertakings of originality, fairness, accuracy, completeness, correctness, merchantability or fitness for a particular purpose with respect to any of this material or the information contained in this material or otherwise arising in connection therewith. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in, or related to, computing or compiling the information have any liability (in negligence or otherwise, and in whole or in part) for any damages of any kind. MSCI and the MSCI indexes are services marks of MSCI and its affiliates.

The intellectual property rights and any other rights, in Russell/Nomura Japan Equity Index belong to Nomura Fiduciary Research & Consulting Co., Ltd. ("NFR") and FTSE Russell ("Russell"). NFR and Russell do not guarantee fairness, accuracy, completeness, correctness, reliability, usefulness, marketability, merchantability or fitness of the Index, and do not account for business activities or services that any index user and/or its affiliates undertakes with the use of the Index.

Investors should consider this document as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Nomura Group produces a number of different types of research product including, among others, fundamental analysis and quantitative analysis; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons, methodologies or otherwise. The Nomura Group publishes research product in a number of different ways including the posting of product on the Nomura Group portals and/or distribution directly to clients. Different groups of clients may receive different products and services from the research department depending on their individual requirements.

Figures presented herein may refer to past performance or simulations based on past performance which are not reliable indicators of future or likely performance. Where the information contains an expectation, projection or indication of future performance and business prospects, such

forecasts may not be a reliable indicator of future or likely performance. Moreover, simulations are based on models and simplifying assumptions which may oversimplify and not reflect the future distribution of returns. Any figure, strategy or index created and published for illustrative purposes within this document is not intended for "use" as a "benchmark" as defined by the European Benchmark Regulation. Certain securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment.

With respect to Fixed Income Research: Recommendations fall into two categories: tactical, which typically last up to three months; or strategic, which typically last from 6-12 months. However, trade recommendations may be reviewed at any time as circumstances change. 'Stop loss' levels for trades are also provided; which, if hit, closes the trade recommendation automatically. Prices and yields shown in recommendations are taken at the time of submission for publication and are based on either indicative Bloomberg, LSEG or Nomura prices and yields at that time. The prices and yields shown are not necessarily those at which the trade recommendation can be implemented.

The securities described herein may not have been registered under the US Securities Act of 1933 (the '1933 Act'), and, in such case, may not be offered or sold in the US or to US persons unless they have been registered under the 1933 Act, or except in compliance with an exemption from the registration requirements of the 1933 Act. Unless governing law permits otherwise, any transaction should be executed via a Nomura entity in your home jurisdiction.

This document has been approved for distribution in the UK as investment research by Nlplc. Nlplc is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Nlplc is a member of the London Stock Exchange. This document does not constitute a personal recommendation within the meaning of applicable regulations in the UK, or take into account the particular investment objectives, financial situations, or needs of individual investors. This document is intended only for investors who are 'eligible counterparties' or 'professional clients' for the purposes of applicable regulations in the UK, and may not, therefore, be redistributed to persons who are 'retail clients' for such purposes.

This document has been approved for distribution in the European Economic Area as investment research by Nomura Financial Products Europe GmbH ("NFPE"). NFPE is a company organized as a limited liability company under German law registered in the Commercial Register of the Court of Frankfurt/Main under HRB 110223. NFPE is authorized and regulated by the German Federal Financial Supervisory Authority (BaFin).

This document has been approved by NlHK, which is regulated by the Hong Kong Securities and Futures Commission, for distribution in Hong Kong by NlHK. This document is intended only for investors who are 'professional investors' for the purposes of applicable regulations in Hong Kong and may not, therefore, be redistributed to persons who are not 'professional investors' for such purposes.

This document has been approved for distribution in Australia by NAL, which is authorized and regulated in Australia by the ASIC.

This document has also been approved for distribution in Malaysia by NSM.

In Singapore, this document has been distributed by NSL, an exempt financial adviser as defined under the Financial Advisers Act (Chapter 110), among other things, and regulated by the Monetary Authority of Singapore. NSL may distribute this document produced by its foreign affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. This document is intended for accredited, expert or institutional investors as defined by the Securities and Futures Act (Chapter 289). Where the recipient of this document is not an accredited, expert or institutional investor, NSL accepts legal responsibility for the contents of this document in respect of such recipient only to the extent required by law. Recipients of this document in Singapore should contact NSL in respect of matters arising from, or in connection with, this document. THIS DOCUMENT IS INTENDED FOR GENERAL CIRCULATION. IT DOES NOT TAKE INTO ACCOUNT THE SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS OF ANY PARTICULAR PERSON. RECIPIENTS SHOULD TAKE INTO ACCOUNT THEIR SPECIFIC INVESTMENT OBJECTIVES, FINANCIAL SITUATION OR PARTICULAR NEEDS BEFORE MAKING A COMMITMENT TO PURCHASE ANY SECURITIES, INCLUDING SEEKING ADVICE FROM AN INDEPENDENT FINANCIAL ADVISER REGARDING THE SUITABILITY OF THE INVESTMENT, UNDER A SEPARATE ENGAGEMENT, AS THE RECIPIENT DEEMS FIT. Unless prohibited by the provisions of Regulation S of the 1933 Act, this material is distributed in the US, by NSI, a US-registered broker-dealer, which accepts responsibility for its contents in accordance with the provisions of Rule 15a-6, under the US Securities Exchange Act of 1934. The entity that prepared this document permits its separately operated affiliates within the Nomura Group to make copies of such documents available to their clients.

This document has not been approved for distribution to persons other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' (as defined by the Capital Markets Authority) in the Kingdom of Saudi Arabia ('Saudi Arabia') or a 'Market Counterparty' or a 'Professional Client' (as defined by the Dubai Financial Services Authority) in the United Arab Emirates ('UAE') or a 'Market Counterparty' or a 'Business Customer' (as defined by the Qatar Financial Centre Regulatory Authority) in the State of Qatar ('Qatar') by Nomura Saudi Arabia, Nlplc or any other member of the Nomura Group, as the case may be. Neither this document nor any copy thereof may be taken or transmitted or distributed, directly or indirectly, by any person other than those authorised to do so into Saudi Arabia or in the UAE or in Qatar or to any person other than 'Authorised Persons', 'Exempt Persons' or 'Institutions' located in Saudi Arabia or a 'Market Counterparty' or a 'Professional Client' in the UAE or a 'Market Counterparty' or a 'Business Customer' in Qatar. Any failure to comply with these restrictions may constitute a violation of the laws of the UAE or Saudi Arabia or Qatar.
