

Doosan Enerbility

2Q beat; Orders on track with strong GT orders;
Doosan our top pick

Doosan Enerbility's (Doosan) 2Q OP beat expectations at W314bn vs. JPMe/BBGe (W283bn/W279bn), driven by a stronger-than-expected Bobcat contribution on resilient US construction equipment demand; parent OP was broadly in line at W97bn (slight miss vs. JPMe W105bn). Parent 2Q order intake was W4.3tn, keeping FY orders on track vs. W13.3tn guidance (53% run-rate), led by gas turbine-related wins (W5.0tn progress vs. W6.2tn FY guidance incl. combined-cycle gas EPC). 1H gas turbine orders totaled 12 gas/6 steam turbines and 5 LTSAs (long-term service agreements), with management citing tight supply and high-visibility negotiations for 2030-31 slots. Nuclear commentary was constructive (Korea 12th Basic Plan by year-end; US long-lead orders visibility), while SMR remains the key watch as the ~W1tn annual target needs to be secured in 2H. Maintain Overweight; top pick among nuclear EPC companies.

- 2Q OP beat, driven by Bobcat; parent broadly in line, with gas turbines leading orders.** Doosan reported 2Q OP of W314bn, ahead of JPMe/BBGe (W283bn/W279bn), mainly on a stronger-than-expected contribution from Doosan Bobcat amid resilient US construction equipment demand. Parent-level OP of W97bn was a slight miss vs. JPMe (W105bn). Parent 2Q order intake was W4.3tn, keeping the company on track vs. its W13.3tn full-year guidance (53% run-rate), driven by strong gas turbine-related wins (W5.0tn progress vs. W6.2tn annual guidance, including combined-cycle gas plant EPC). We see potential upside to full-year orders from incremental gas turbine wins in 2H, while we believe the key downside risk centers on SMR, where management's ~W1tn annual order target needs to be secured in 2H.
- Gas turbine updates.** Doosan secured orders for 12 gas turbines, 6 steam turbines, and 5 LTSAs (long-term service agreements) in 1H, while maintaining its cumulative targets of 71 units by 2030 and 110 units by 2034. Management noted high-visibility negotiations for 2030-31 delivery slots and expects supply tightness to persist for the next five years, supporting additional order momentum despite a tight production schedule.
- Nuclear updates.** In Korea, management expects the 12th Basic Plan to be announced by year-end, with potential upside tied to the Southwest mega project supporting semiconductor fab and datacenter buildouts. In the US, management sees visibility to receive long-lead material orders from Westinghouse projects this year. On SMRs, the company is targeting NuScale orders in 2H, while discussions with other SMR design companies continue around long-lead material supply and major sub-component orders.
- Maintain Overweight and Dec-27 PT at W130,000.** We revise our 2026-28 OP estimates up by 1-7%, mainly reflecting an upward revision to Bobcat following the 2Q results. Doosan remains our top pick among nuclear EPC coverage, supported by its expanding orderbook and balanced portfolio across large-scale nuclear, SMRs, and gas turbines. We view Korea's US investment announcement as a key sector catalyst, and believe Doosan is positioned to benefit across scenarios ([link](#) to our sector update note).

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over

the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
