Schneider: A Year in a Day

Schneider's weaker operating leverage over the past 12 months has been heavily scrutinised by investors. To be fair to management, they recognised improvement was needed and set a course to accelerate productivity, cost savings and pricing. H1 appears to be an emphatic demonstration that a renewed focus on execution, traditionally a strength of Schneider's, is paying off. This marks an important turning point, reflected in the >10% share price move yesterday (a far cry from [this time last year](#)), with the focus shifting back to strong positioning and best-in-class growth prospects.

A year to fix it, a day to prove it... Execution, Schneider's historic strength-turned-weakness which had beleaguered the shares for the last year, turned a corner in H1. Pricing did not disappoint, accelerating 2.5x in Q2 against the c.2% Products pricing in Q1 to deliver c.2.8% pricing over H1. We model pricing accelerates c.50bps in H2 as fresh Q2 pricing runs into tougher comps (Exhibit 4). We illustrate how the strong H1 raw material (RM) headwinds could moderate using disclosure and peer benchmarking for SU's RM exposures. We assume Schneider hedge 20% of their top 3 commodities by value, and though a crude measure, RM inflation could moderate in H2, helped by 'easier' comps (Exhibit 3). Schneider is fighting an uphill battle, attempting (and succeeding) to balance RM inflation group-wide through pricing on <50% of their sales. With only 2 margin touchpoints per year, we think the shares responded well to the +120bps yoy LFL margin expansion, helped on by H1 productivity of €535m, and +80bps excluding the tariff refund (+30bps vs cons).

We see Schneider's decades long experience in prefabricated solutions as a growing competitive advantage. With peers such as Vertiv highlighting the challenges of scaling increasingly integrated AI infrastructure solutions, Schneider appears relatively well positioned. Growth continues to be stand-out, and Energy Management continues to hold the title of fastest growing Electrical. Management framed the challenge primarily as one of capacity and supply-chain scaling rather than project execution, supported by strong customer visibility and disciplined capacity planning. Importantly, Schneider is leveraging partners such as Foxconn and Softbank to add manufacturing scale and AI rack integration capabilities, while still supplying the underlying equipment themselves, allowing it to scale deployment without relying solely on its own production footprint and capex.

Investment Implications

We reiterate our Outperform rating on Schneider, upgrading group organic growth by 280bps for 2026 and by 80bps for 2027 on the back of an exceptional Q2'26 print. This underpins our price target upgrade to €330, putting SU on a target FY27 P/E multiple of c.25x. This implies a PEG of <2x given FY27-30 EPS CAGR of 13%, which we see as fair value, as we still see Schneider as offering the best growth potential sector-wide.

EXHIBIT 2: **Schneider organic growth supremacy continues.**

Though not all Electricals have reported, nVent would have to post 37% LFL growth in Q2 to surpass Schneider in Q2, and for Eaton and Siemens 19% and 20% LFL, respectively.

EARNINGS RECAP

KEY POINTS FROM THE CALL

Pricing commentary constructive, H2 requires continued execution focus.

Management quantified Q2 price realization at approximately 2.5x Q1 (c.2%), reflecting the pass-through of actions taken at the start of the year. June exit rates appear sufficient to offset raw-material inflation and tariffs if sustained in H2. However, net price remained negative in H1, while tariff developments remain uncertain; the FY offset depends on maintaining the stronger Q2 run-rate, which we think is well underpinned.

Modular data center capacity is being expanded through an asset-light model.

The Foxconn partnership will add North American capacity for prefabricated modular data center solutions without Schneider manufacturing the full requirement internally. This should support faster scaling while reducing fixed-cost and stranded-capacity risk if data center growth eventually moderates.

KEY POINTS FROM THE RELEASE

Positives:

- **Organic growth beat in every region and every segment.** At the group level, LFL sales growth was close to +6pp ahead of consensus, coming in at 16.5%. EM LFL growth of 17.7% (+620bps vs cons) was driven by impressive NA LFL growth of 24.8% (+840bps vs cons), a large beat here was missing in Q1 and is reassuring. IA growth of 11.0% was +490bps vs consensus, and driven by a standout performance in China & East Asia, up 19.6% LFL (+12pp vs cons). Data centers remain strong, with orders up triple digits in Q2.
- **Margins outperformed strongly.** Group adj. EBITA margins of 19.3% were +80bps ahead of consensus. Organic margin development of +120bps was more than 2x consensus LFL margin improvement of +53bps, and driven by EM, where margins reached 22.4% (+70bps vs cons) and expanded +100bps LFL yoy. Group figures were also supported by -2% lower corporate costs in absolute terms. Gross pricing of €280m implies 3% pricing over H1 and Q2 closer to 4% (vs Q1 c.2%, Legrand Q2 3.6%).
- **Guidance upgraded.** Organic growth guidance upgraded to 11.5% at the midpoint (+10-13%), +3pp vs prior guidance and +110bps vs FY26 consensus. Upgraded midpoint adj. EBITA margin guidance of 19.6% (19.4-19.6%) is now +20bps ahead of consensus, culminating in absolute adj. EBITA for the full-year 2% ahead vs cons.

Negatives:

- **Despite strong LFL growth, IA margins disappointed.** IA margins came in at 14.0%, missing consensus by -70bps, despite the (above) growth beat. IA LFL margin improvement was +50bps in H1, below EM (+100bps) and group (+120bps) progression. Absolute IA adj. EBITA came in -2% below consensus, though the miss made little dent at the group level (group abs. adj. EBITA +7% vs cons).

VALUATION METHODOLOGY**Schneider Electric SA**

Our PT of €330 for Schneider is based on DCF with a WACC of 7.8% and a terminal growth rate of 2.5%. We think a DCF is appropriate for Schneider as it's a cash generative company and delivers stable cash flows irrespective of the point in the cycle.

RISKS**Schneider Electric SA**

Key downside risks to our price target and forecasts: 1) We assume growth rate of 13.7% for 2026 which assumes continued strength in Energy Management and improvement in IA. 2) Pull back in data center demand given technology changes which alter the composition of electrical infrastructure required in data centers and therefore demand for certain Schneider Electric products. 3) Imposition of additional tariffs in the US that lower demand for Schneider's products given weaker consumer buying power (we expect Schneider to be able to pass on any tariff costs, but demand may not be as elastic).
