Australia Macro+ Week Ahead | Asia Pacific

Feedback on the Outlook

In our recent Mid-Year Outlook, we emphasised that the investment case for Australia had changed – with broad implications for equities. Investor debate (ex-Budget) has centred on RBA reaction function, capex resilience, market earnings risk, labour market, and potential energy supply resolution.

What's Topical? Key Investor Debates: Our recent Mid-Year Outlook highlighted the meaningful shifts seen across the Australian investment landscape, even relative to what was being experienced just a few months ago (see [Australia Macro+ Mid-Year Outlook: A Whole New Set of Arrangements](#), 18 May 2026). Our discussions since that publication have centred on five key areas of investor debate: 1) RBA reaction function to slowing growth but elevated inflation; 2) how resilient the capex pipeline will prove to be; 3) how much risk there is to consensus earnings estimates and what that means for the index; 4) what are the second order impacts of a weaker labour market; 5) what sectors would benefit most from a resolution to Middle East energy disruption (more below).

Macro Catalysts – GDP (1Q), Building Approvals (April), Trade Balance (April):

We expect GDP to have grown 0.4%Q in 1Q, a sharp slowing from the prior quarter, but enough to keep annual growth at a strong 2.6%Y. For April Building Approvals, we expect a further fall of 5.0%M, continuing weakness seen in March. We expect the trade balance will rise to an A\$2.5bn surplus, a reversal of the narrowing seen in the prior month – largely an unwind of the material import lift.

Last Week – CPI (April), Private Capex (1Q), Household Spending (April):

Headline CPI fell more than we or consensus expected in April, from 4.6% to 4.2%. Temporary fuel and public transport subsidies were the main driver. Trimmed mean CPI was more resilient, ticking up from 3.3%Y to 3.4%Y with a 0.31% monthly increase - still above the RBA's target. There was a sharp fall in household spending in April, -1.1%M, 4.9%Y, materially weaker than we and consensus expected, following a 1.6%M rise in March. Separately, capex momentum remains strong – 1Q spending rose 6.5%Q, 14.6%Y, driven by non-mining investment and a notable surge in IT-related spending (+96%Q).

Keeping Score – ASX closed up last week (0.9% WoW); Consumer Discretionary led, while Energy lagged: The ASX 200 12-month forward P/E multiple is now at 16.7x – above the long-term average of 14.9x. Aggregate consensus EPS growth estimates for FY26 and FY27 are 11.9% and 12.3%, respectively.

What's Topical: Key Investor Debates

Our 2026 Mid-Year Outlook highlighted our view that the investment case for Australia has changed, and requires investors to take a meaningfully different view on the outlook versus what they have been used to in the past. See [Australia Macro+ Mid-Year Outlook: A Whole New Set of Arrangements \(18 May 2026\)](#).

Below we highlight the five key areas of debate we have had with investors over the past few weeks following this Outlook.

#1: RBA Reaction Function to Slowing Growth and High Inflation

Data over the past few weeks have notably softened, and investors' expectations of the domestic cyclical outlook have deteriorated following the RBA's rate hikes and [tax increases announced in the FY27 Budget](#). A key source of debate is what that means for the RBA – particularly in the context of an inflation pulse that is likely to move further away from the RBA's target over coming months.

Our view is that the weaker domestic outlook is likely to give the RBA more "space" to stay on hold and not hike rates further, particularly given that [weakness from here is likely to come via the housing market](#) – which the RBA views as its most important domestic channel of monetary policy. However, we expect communication will still be relatively hawkish on the potential need for further rate hikes if demand does not soften sufficiently, and we expect that a shift towards more dovish commentary is likely to require not just softer growth but also softer inflation trends – something we do not envisage occurring until next year.

Exhibit 2: The outlook for domestic demand conditions has deteriorated meaningfully

Source: WBC-MI, NAB, Morgan Stanley Research

Exhibit 3: But elevated inflation is likely to limit how dovish the RBA is able to turn

Source: ABS, Morgan Stanley Research

#2: How Resilient Is the Capex Pipeline?

One area of our outlook where we are relatively more positive is the [capex outlook, where we see a policy-linked pipeline that is relatively resilient to higher rates or softer economic](#)

conditions. While investors do generally view this as a relatively good performer for the domestic economy, there is some pushback on how resilient some of this spending can be, given the broad economic headwinds likely to emerge through the rest of the year. In our view, there are areas of capex that are clearly more vulnerable in the near term – housing being a good example; we expect near-term cyclical headwinds to outweigh medium-term structural tailwinds.

For most other categories, though (defence, energy, resources, data centres), we think the combination of policy support and global tailwinds is likely to dominate, so we still see this area as an important buffer for the domestic economy.

Exhibit 4: We forecast that capex in six key categories will rise from A\$225bn in FY25 to A\$326bn in FY30

Source: Morgan Stanley Research

Exhibit 5: Recent developments have highlighted the policy support and global tailwinds to the capex pulse

Capex Category	Update
Defense	A\$53bn additional funding announced in Federal Budget
Energy Transition & Security	A\$15bn energy security package in Federal Budget
Housing	Announced tax changes to negative gearing and capital gains (negative) likely to outweigh further supply measures (housing infrastructure fund) near-term
Resources	A\$1bn funding for Critical Minerals Strategic Reserve. Commodity prices provide additional support for capex
Data Centres	Unprecedented rise in computer equipment imports for March signals data centre capex uplift underway

Source: Morgan Stanley Research

#3: What Is the Index Downside If Earnings Correct Meaningfully?

There is a lot of focus from investors on the market earnings outlook. Current consensus expectations are for robust growth with >10% EPSg for both FY26 and FY27. Investors generally agree with our view that FY27 expectations are likely to come down sharply (we expect ~6% growth), but some question whether this can go further, and if there is a risk of a material de-rating that brings further downside for index levels as a result. We think this is possible, but have some comfort from the Resources sector, which is currently providing a meaningful portion of market earnings growth and where we expect earnings will remain relatively well supported. Earnings downside looks much more likely ex-Resources, in our view, and this rotation impact should limit the extent of index-level weakness.

Exhibit 6: Consensus earnings expectations are for robust market earnings growth over coming years

Source: RIMES, IBES, Morgan Stanley Research. Data as of May 22, 2026

Exhibit 7: Our top-down earnings models point to a much more cautious earnings outlook

Source: RIMES, IBES, Morgan Stanley Research

#4: What Are the Labour Market Implications of a Slowdown?

We have had many questions around the labour market impact of an economic slowdown from investors – given how strong employment has been over recent years and the extent to which this has been a broad support for the economy. We expect the unemployment rate will rise this year, to 4.7% by year end, and then continue to increase into 2027. While government spending remains a support to labour conditions, growth is unlikely to accelerate, while at the same time we expect a meaningful slowdown in private sector employment. Alongside these cyclical headwinds is the prospect of AI-driven labour market impacts, with a weaker revenue environment a potential catalyst to accelerate some of these changes. A [softer labour market](#) would be a material change for the aggregate economy, driving more consumer caution and weaker sentiment trends versus what has been experienced over the past few years.

Exhibit 8: Unemployment remains relatively low, but we expect this will rise through the year

Source: ABS, Morgan Stanley Research

Exhibit 9: Forward indicators are now starting to turn more negative

Source: NAB, WBC-MI, Morgan Stanley Research

#5: What Would Rally in Response to Middle East Improvement?

Investors have started to get more positive on energy developments over the last week or so – and have been interested in what sectors could benefit in Australia from a resolution

of Middle East disruption. Since the start of the oil price shock, the sectors that have had the strongest negative correlation with the oil price have been Discretionary, Industrials, REITs, and Healthcare. We would be cautious about assuming discretionary outperformance given the domestic headwinds the sector faces, but the other sectors could benefit if a resolution resulted in lower oil prices and yields.

ABS, Morgan Stanley Research estimates. International releases are dated based on the Australian time zone.

Macro Releases

Housing Prices for May (1 June): We expect house price growth to have slowed in May, with momentum expected to weaken from here, particularly following tax changes announced in the FY27 Budget. We expect a two-speed pace across states, with Sydney and Melbourne likely weaker than Perth and Brisbane.

Building Approvals for April (2 June): We expect building approvals will have fallen 5.0%M in April, continuing weakness seen in March. Nevertheless, annual growth remains robust at 9.8%Y. We are cautious on the outlook from here – while approvals should stay structurally supported by the policy design of tax changes, we think cyclical challenges will dominate the near-term outlook – mainly higher rates, higher construction costs, and lower housing prices.

GDP for 1Q (4 June): We expect GDP to have grown 0.4%Q in Q1, a sharp slowing from the prior quarter, but enough to keep annual growth at a strong 2.6%Y. We expect private investment spending and government spending to be key drivers of growth in the quarter, offset by a large deduction from net exports (reflecting the partially imported nature of the capex) as well as a further slowing in consumer activity. We expect economic growth to slow further through 2026 and expect the slowdown will remain driven by housing and the consumer, with capex relatively resilient.

Trade Balance for April (4 June): We expect the trade balance will rise to an A\$2.5bn surplus in April, a reversal of the narrowing seen in March. We expect this will be largely an unwind of the material import lift in ADP equipment and fuel – these categories are volatile and likely overstated the deterioration in underlying trade position.

Last Week in Review

AlphaWise Survey: Cracks Emerging (28 May 2026): Our ninth annual AlphaWise survey of Australian Households shows a generally resilient backdrop, but evidence of caution emerging and an overly optimistic outlook for income and wealth. As the economy slows, the distributional data suggests most risk across leveraged and low income households.

- Link: [Australia Macro+: AlphaWise Survey: Cracks Emerging \(28 May 2026\)](#)

Sharp Fall in Household Spending for April, Strong Rise in Capex (28 May 2026): Sharp fall in household spending in April, -1.1%M, 4.9%Y, materially weaker than we and consensus expected, following a 1.6%M rise in March. Across categories, transport is the key drag (-4.7%M), largely reflecting the impact of the oil price shock; with air travel the main contributor to the decline. Ex-transport, spending was still soft – Apparel fell 2.2%M, while Food fell 1.3%M, with the ABS noting a shift toward cheaper supermarket products. Separately, capex momentum remains strong - with 1Q spending up 6.5%Q, 14.6%Y, driven by non-mining investment; and a notable surge in IT-related spending (+96%Q). Overall, the divergence is becoming clearer – softer consumption alongside a resilient capex profile – reinforcing our capex over consumption call.

- Link: [Australia Macro+ Data Pulse: Sharp Fall In Household Spending For April, Strong Rise In Capex \(28 May 2026\)](#)

Capex Pipeline Is Still Intact (27 May 2026): The domestic economic outlook has worsened, but we still see policy-linked capex as a continuing domestic buffer. The FY27 Budget highlighted areas of spending lift (defence, energy) that are also reinforced by global trends, while recent data are supportive for data centre and resources capex.

- Link: [Australia Macro Matters: Capex Pipeline Is Still Intact \(27 May 2026\)](#)

Slightly Softer but Still Strong (27 May 2026): Headline CPI fell more than we or consensus expected in April, from 4.6% to 4.2%. Temporary fuel and public transport subsidies were the main driver. Trimmed mean CPI was more resilient, ticking up from 3.3%Y to 3.4%Y with a 0.31% monthly increase – still above the RBA's target. Housing inflation was strong and picked up in the month, contributing ~10bps to the monthly core increase. Construction and rents both contributed. Elsewhere, administered prices rose because of the higher health insurance increases, while market goods and services have both slowed over the past three months. There is still relatively limited evidence of broadening impact of oil price shock. This is likely to become more evident in coming months.

- Link: [Australia Macro+: April CPI: Slightly Softer But Still Strong \(27 May 2026\)](#)

June Preview – Final Cut (25 May 2026): Rebalance positioning remains well anchored despite volatility, with leadership stability supporting promotion candidates while ongoing underperformance sharpens exclusion risk. We formalise targeted changes across the 50, 100 and 200, with select shifts at the margin.

- Link: [Australia Macro+ Index Analytic: June Preview - Final Cut \(25 May 2026\)](#)

Morgan Stanley & Co. LLC makes a market in the securities of Life360, News Corporation, Resmed Inc.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1546	42%	467	51%	30%	709	44%
Equal-weight/Hold	1568	43%	358	39%	23%	715	44%
Not-Rated/Hold	4	0%	0	0%	0%	1	0%
Underweight/Sell	555	15%	84	9%	15%	202	12%
Total	3,673		909			1627	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures.

For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

As of May 27, 2026, Morgan Stanley beneficially owned a net short position exceeding 0.5% of the total issued share capital of the following companies covered in Morgan Stanley Research: BWP Trust.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Any access and/or use of Morgan Stanley Research is subject to Morgan Stanley's Terms of Use (<http://www.morganstanley.com/terms.html>). By accessing and/or using Morgan Stanley Research, you are indicating that you have read and agree to be bound by our Terms of Use (<http://www.morganstanley.com/terms.html>). In addition you consent to Morgan Stanley processing your personal data and using cookies in accordance with our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html), including for the purposes of setting your preferences and to collect readership data so that we can deliver better and more personalized service and products to you. To find out more information about how Morgan Stanley processes personal data, how we use cookies and how to reject cookies see our Privacy Policy and our Global Cookies Policy (http://www.morganstanley.com/privacy_pledge.html). Please use the provided link to review the Terms and Conditions and Most Important Terms and Conditions for Morgan Stanley India Company Private Limited (https://www.morganstanley.com/assets/pdfs/about-us-global-offices/india/Terms_and_conditions.pdf) and the following link to review the audit report (https://ny.matrix.ms.com/eqr/research/webapp/researchdocs/MSICPL_Morgan_Stanley_Research_Audit_Report.pdf).

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.

To our readers based in Taiwan or trading in Taiwan securities/instruments: Information on securities/instruments that trade in Taiwan is distributed by Morgan Stanley Taiwan Limited ("MSTL"). Such information is for your reference only. The reader should independently evaluate the investment risks and is solely responsible for their investment decisions. Morgan Stanley Research may not be distributed to the public media or quoted or used by the public media without the express written consent of Morgan Stanley. Any non-customer reader within the scope of Article 7-1 of the Taiwan Stock Exchange Recommended Regulation Regulations accessing and/or receiving Morgan Stanley Research is not permitted to provide Morgan Stanley Research to any third party (including but not limited to related parties, affiliated companies and any other third parties) or engage in any activities regarding Morgan Stanley Research which may create or give the appearance of creating a conflict of interest. Information on securities/instruments that do not trade in Taiwan is for informational purposes only and is not to be construed as a recommendation or a solicitation to trade in such securities/instruments. MSTL may not execute transactions for clients in these securities/instruments.
