Takeaways from Founder/CEO meeting: Pursuing ultimate price-to-performance; reiterate Buy

0100.HK 12m Price Target: **HK\$860.00** Price: **HK\$199.30** Upside: **331.5%**

We attended an analyst meeting hosted by MiniMax Founder & CEO Dr. Yan Junjie and the management team at its Shanghai headquarters on July 23. Key topics discussed include the company's top focus in pursuing the best price-to-performance for each of its models, its relative early-mover in building out computing infrastructure amongst independent AI labs, the latest LLM industry landscape and rising importance of 'price' alongside 'performance' and agentic/industry capabilities, and the company's multi-modal approach a key differentiation.

1) The company's top focus in pursuing the best price-to-performance for its models, in particular with M3 model currently at trillions of daily tokens at healthy gross margins for its open platform/API revenues (targeting eventual high double-digits GPM driven by inference efficiencies, at current pricing) and the company expectations that its upcoming M3 Pro (at the 3 trillion parameter size class, targeting launch in Sep-Oct 2026) will have significant cost efficiencies vs. comparable models of its class. MiniMax Sparse Attention, activated parameters and KV Cache optimization were mentioned as drivers.

2) Its early-mover in building out computing infrastructure amongst independent AI labs: the company believes its decision to significantly ramp up self-operated computing (via. acquiring/long-term renting domestically and globally) since Sep 2025 as an advantage amongst peers, when GPUs/AI servers were at much lower long-term rental prices vs. today and will be one of the key drivers of its cost competitiveness via. attractive hardware/rental prices and at high utilization/efficiency (e.g. training+inferencing in a same cluster) given its years of experience in self-operating AI infrastructure.

3) LLM industry landscape and rising importance of 'price' alongside 'performance' and agentic/sector-specific

capabilities: the company commented that their M2 model series outperformed peers in time-to-market and on price-to-performance earlier this year, but acknowledged its upcoming M3 Pro has lagged slightly as the company pursued a two-model within the M3 family and as the company was ramping up its self-operated computing clusters over 1Q26. With Chinese players' focused on post training data and reinforcement learning that is bringing coding performance uplift across the board (where MiniMax is focusing on as well), the company believes user switching between models can be fast and sees pricing/cost efficiencies/speed to become other drivers to user adoption amongst the handful of 3 trillions parameter sizes models to be launched from Chinese players over the next few months.

4) Multi-modal approach as a key differentiation, where the company continues to iterate/refine M3 multi-modal capabilities that will be applied to M3 Pro. Meanwhile, its upcoming H3 model will be more than a video-generation model (Hailuo) but a new architecture as an Omni-model, that understands all modals (text, image, video, audio, music) with stable output across video, image, audio based on user needs/prompts. The company expects imminent launch of its H3 model (that is in its final stages of launch preparations) with implications to the multi-modal industry landscape (offering alternatives to existing video generation products).

Implications: We view multiple positive share price drivers from here; positive skewed risk-reward

With MiniMax eligible for Southbound Connect from Aug 2026 and given the steep market cap discount (US\$8.5bn) vs. China video-generation model peer Kling post-money valuation of US\$18bn (see our [report](#)) and Z.ai/Zhipu last close at US\$71bn, we view the company's articulated strategy in addressing M3 model competitiveness and imminent H3 multi-modal launch as positive drivers for ARR ramp up that could drive significant room for valuation repair over 2H 2026 (vs. ARR of US\$400mn+ in early June 2026 before M3 launch, at a run-rate likely at half of Zhipu at the mid-year mark 2026). We see a clear positive skew to risk-reward and reiterate Buy.

We continue to see MiniMax as well positioned amongst Chinese AI model companies to capture the significant global TAM growth potential across text/coding, multi-modal, agentic/co-worker (digital labor) and multi-modal generation on the back of its comprehensive multi-modal offerings, strong commercialization capability, AI model per token cost advantages and high organizational efficiency.

Key risks: Weaker-than-expected model performance amid competition in the global foundation model industry; Slower-than-expected path to profit visibility; Weaker-than-expected commercialization capability; risks around IP/content generation; cash burn/self-funding capability; risks around geopolitics under an intensified tech race between the US and China.

Price Target Risks and Methodology - MiniMax Group

We are Buy rated on MiniMax with a 12-month target price of HK\$860. Our valuation is based on DCF valuation, with 12% WACC and 2% terminal growth rate, where we assume 0.2-0.7ppts global subscription+API revenue market share gains p.a. over 2027-30E (reach LT market share of 2.5%).

Key risks: Weaker-than-expected model performance amid the competition in the global foundation model industry; Slower-than-expected path to profit visibility; Weaker-than-expected commercialization capability; risks around IP/content generation; cash burn/self-funding capability; risks around geopolitics under an

intensified tech race between the US and China.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock’s total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region’s Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts’ investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs’ involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
