

U.S. Equity Strategy

Upgrading Into Uncertainty: Raise S&P 500 PT to 7800, FY26 EPS to \$337

★ SIGNATURE

Equities remain choppy as peace talks stop and start, and questions linger around AI spend, funding and monetization, higher for longer rates, and consumer strength. We focus on the improving earnings outlook, taking our FY26 EPS to \$337 from \$321, and our 2026 PT to 7800 from 7650.

- **Macro regime remains complex, but the balance of risks still leans constructive.** Labor data are strong enough to reduce recession risk, but also to push rate cuts further out. Input costs are rising again, though not yet a growth shock large enough to derail the cycle. The equity bull case remains intact, but earnings and AI capex visibility must do more of the work as Fed support fades and positioning is less able to absorb disappointment.
- **We raise our FY26 S&P 500 EPS estimate to \$337 from \$321**, modestly below the Street's \$341 and implying ~21% Y/Y growth from \$279 in FY25. Tech earnings guidance and visibility remains underpinned by expanding AI capex, reflationary pressure should support nominal revenue growth, and the industrial side of the economy looks relatively supportive into 2027, offsetting potential downside to consumer spending. We also introduce our FY27 EPS estimate at \$389 (+15% Y/Y), below the Street's \$398.
- **Our 2026 S&P 500 price target goes to 7800 from 7650.** We trim our valuation assumptions modestly from the last update (23x FY26 EPS, down from ~24x) to account for uncertainties around the scale, funding and monetization timeline of capex, AI-led dispersion, and higher nominal yields and inflation. This leaves earnings to do the work in raising our price target. We also introduce our 2027 price target at 8800.
- **We go to Neutral on Financials and Healthcare.** Our bull thesis on the Financials sector has not played out, as banks-driven positive earnings revisions were offset by private credit concerns, regulatory risks within payments, and AI disruption. We believe downward EPS revisions for Healthcare have mostly run their course, leaving risk/reward more balanced. **The balance of our sector views remain unchanged: Positive on TMT, Industrials and Utilities, Negative on the Consumer space.**
- **Risks we are watching into the back half of the year include** signs of stress in the AI investment cycle, including the ['what-ifs' we debated last September](#): model advancement, availability of power, and funding ([especially as the financing mix grows more complex](#)).

Rates are re-centering as a key risk factor with a new Fed Chair taking the reins amid resurgent inflation. Finally, we are keeping a close eye on the U.S. consumer as higher inflation and lower purchasing power have the potential to generate lagged pressures in 2H26.

2026: the (equity) story so far

U.S. equities entered 2026 with plenty of good news already priced in: Global macro was holding together, AI capex was an undeniable tailwind, and market leadership was beginning to broaden beyond mega-cap Tech into cyclicals, small caps and “old economy” beneficiaries of the AI buildout. But **high valuations left a narrower margin for error.** By February, the months-long debate over AI disruption in software had boiled over, leading the industry to give back all of its outperformance vs. SPX since 2022. Concerns over debt-laden software companies spilled over into already-simmering worries about private credit, which then bled into a broader reassessment of long-duration growth at the same time geopolitical risk was moving to the center of the macro debate. The war in the Middle East then sparked a generational oil shock, stoking renewed fears over inflation, central-bank reaction functions and global growth. Equity markets had to price not just AI disruption, but also the possibility that the soft-landing narrative was drifting toward something closer to stagflation-lite.

We believed there was value in looking through the noise and focusing on both the underlying strength of the U.S. economy and the improving fundamentals within U.S. equities. Indeed, once ceasefire headlines shrunk both the left tail and the immediate geopolitical risk premium, **investors quickly returned to the parts of the market where earnings visibility looked strongest.** Big Tech, Growth and Momentum surged as investors re-engaged with AI- and Tech-exposed names. **A strong 1Q26 earnings season**, with Tech EPS growth sitting at the best levels since 2010 and revisions to full year EPS hitting a record pace, pointed to more fundamental headroom.

Positioning amplified the speed and magnitude of the round trip. Portfolios came into the year very long equities, leaving stocks vulnerable to synchronized de-risking across discretionary and systematic investors as sentiment turned in 1Q26. Long-only managers cut equity exposure to near year-lows and built cash, hedge funds de-grossed, and systematic strategies rapidly cut equity exposure. Clearing the ceasefire overhang saw these exact dynamics play out in reverse: elevated cash provided fuel for redeployment, real money inflows surged, systematic strategies bought the dip, and option flows pointed to upside-chasing in single stocks.

As it stands, the S&P 500 is within a few percentage points of its all-time high, set just earlier this month. While neither the software, private credit nor geopolitical and energy shocks have yet been large or persistent enough to overturn our core equity thesis, **new concerns are emerging into the back half of the year** as markets tangle with resurgent inflation, AI capex scales to unprecedented levels, and a Fed rate path narrows more than before.

A banner year for earnings, with risks at the margin

The earnings growth engine is firing on all cylinders. Activity data remain constructive: industrial production is on the rise, ISM manufacturing PMI is finally back in expansionary territory, and both durable goods and S&P Global manufacturing output point to solid momentum. The jobs market looks solid, but not overheating. Hyperscalers are redoubling commitments to AI capex and expanding their financing toolkit to match liabilities and capital commitments, which is lengthening earnings upside visibility for a growing swath of downstream industries. And **AI is not the only source of investment**; energy infrastructure buildout, rising defense spending and the need to rebuild supply chain resilience could lift investment-to-GDP among advanced economies to levels not seen since the 1990s ([Supersize me: The coming investment cycle](#), 26 March 2026).

To be fair, it is not a clean read all around: **higher rates, slower real income growth, and rising costs all pose risks to consumption.** On the input cost front, our colleagues in commodities argue the market is still underpricing the forward oil strip, expecting crude to still average \$100/barrel this year as inventory buffers continue to erode against still-resilient demand ([Energy Sigma: We have a deal](#), 16 June 2026). Activity, employment and commodity prices all feed the inflation and Fed reaction-function debates, increasingly tilting the narrative toward renewed tightening into year-end.

The rebound in equities following the U.S.–Iran détente reinforces the market’s resilience, but we believe yields are re-centering as a key risk factor for equities. The relationship between yields and equities has turned notably negative, suggesting that higher yields are now being read less as a growth signal and more as a constraint on valuations and liquidity. In this regime, incremental increases in either inflation or term premia carry asymmetric downside risk for equities, particularly given the market’s dependence on longer-duration growth assets.

FIGURE 2. The yield-equity correlation is testing the lower bound of its historical range at current levels of nominal 10Y

Data as of 22 June 2026. 6m rolling correlations observed at monthly average 10Y yields.
Source: Bloomberg, Barclays Research

This makes the path of interest rates from here especially consequential. Even in an environment of broadly stable growth, upside surprises in inflation could challenge the durability of the recent rally if they lead to a durable repricing of the policy path. Markets are already assigning some probability to additional Fed tightening by year-end, at odds with our more benign baseline expectations for policy. **While the historical record surrounding Fed "reversal of easing" suggests that the mere prospect of the Fed resuming hikes has not typically derailed equities ahead of the event, the weeks and months following the event could be a different story.**

FIGURE 3. The prospect of resumed hikes has not typically derailed equities ahead of the event

The Fed did not announce targeted rate changes prior to 1994. For 1983 and 1987, we anchor dates to Fed meetings immediately preceding rates tightening.
Source: Bloomberg, Barclays Research

In addition, **AI capex continues to pose its own risks**. While boosting EPS growth now, it also raises execution risks later. We believe "peak capex" has been deferred further out, reflecting both persistent supply constraints in training compute capacity as well as a material steepening of the demand curve as enterprise adoption accelerates and model improvements unlock new use cases. Hyperscalers are responding with sustained growth in investment over a longer horizon. The result is **a growing mismatch between internally generated cash flow and projected capital requirements**, as our Internet & Semis research teams point out in [AI's S-Curve is Steepening](#) (1 June 2026).

FIGURE 7. ...which is not baked into consensus estimates

Source: Bloomberg, Barclays Research

All in, **while it's clear that the macro regime remains complex, we believe the balance of risks still leans constructive.** Labor data are strong enough to reduce recession risk, but also to push rate cuts further out. Input costs are rising again, though not yet a growth shock large enough to derail the cycle. The equity bull case remains intact, but earnings and AI capex visibility must do more of the work as Fed support fades and positioning is less able to absorb disappointment.

Raise FY26 EPS estimate to \$337 from \$321

We raise our FY26 S&P 500 EPS estimate to \$337 from \$321, modestly below the Street's \$341 and implying 20.8% Y/Y growth from \$279 in FY25. Since our last update, **three developments argue for a higher EPS estimate:** 1) 1Q26 earnings season was materially stronger than expected, confirming that Big Tech and the rest of TMT continue to convert AI-related demand into earnings upside, and upward revisions to full-year consensus are running well ahead of average; 2) reflationary pressure through 2026 should support nominal revenue growth, particularly in sectors with operating leverage or commodity exposure; and 3) the industrial side of the economy looks relatively supportive into 2027, with our economists' forecasts pointing to a better industrial production backdrop next year. **We expect these upside drivers to be modestly offset by weaker consumption:** spending data have cooled and real purchasing power gains look more modest at current inflation.

Around our base case of \$337, we estimate a relatively tight bull/bear range of \$343/\$329, underscoring that the core debate is less about directional earnings risk and more about the magnitude and persistence of key cyclical drivers. The dispersion is primarily a function of uncertainty around the durability of Tech beat-and-raise alongside the trajectory of goods consumption and whether recent resilience can be sustained into a softer macro backdrop. Industrial activity represents a second-order swing factor, particularly given its sensitivity to both global demand and inventory dynamics, while the path of inflation also remains critical.

FIGURE 10. FY26 base, bull & bear case EPS scenarios

Data as of 10 Jun 2026
Source: LSEG Data & Analytics, Bloomberg, Barclays Research

Looking ahead, we introduce a preliminary FY27 EPS estimate of \$389, reflecting a modest deceleration in growth. Our framework assumes a partial recovery in consumption on a Y/Y basis, coupled with continued strength in industrial production as the lagged effects of prior tightening fade. This is partially offset by a normalization in nominal pricing power, particularly as disinflationary forces broaden. The resulting bull and bear cases of \$397/\$380 capture a similar set of crosscurrents, with upside tied to a more durable demand recovery and sustained Tech momentum, while downside reflects the risk of a more protracted normalization in margins and growth.

FIGURE 11. We estimate \$389 in FY27 EPS (+15% Y/Y) vs. Street at \$398

Data as of 10 Jun 2026
 Source: LSEG Data & Analytics, Bloomberg, Barclays Research

FIGURE 12. FY27 base, bull & bear case EPS scenarios

Data as of 10 Jun 2026
 Source: LSEG Data & Analytics, Bloomberg, Barclays Research

We recognize that a central pillar of our EPS framework rests on the view that Tech can continue to deliver positive earnings upside even as consensus estimates and revisions already sit at elevated levels vs. history. Skepticism around the magnitude and durability of this outperformance is understandable, particularly given **concerns about where we are in the AI investment cycle and whether current growth assumptions embed an implicit peak**. Still, our industry analyst colleagues see good reason to believe that much of the supply-demand imbalance in AI compute will persist well into CY27 ([Making the Case for Another Leg Higher in the Memory Trade](#), 26 May 2026), and we think this visibility provides a degree of near-term de-risking to NTM estimates. While we do not dismiss the possibility of normalization further out, current conditions argue that earnings estimates for Tech over the near term are not overly heroic.

FIGURE 13. YTD revisions to full-year EPS are running well ahead of 10Y norms...

Raise 2026 price target to 7800 from 7650

Our SOTP valuation framework assigns Big Tech a lower baseline multiple than in March (26x vs. 27.5x). We continue to believe the group offers durable earnings growth, but we trim our valuation assumptions to account for uncertainties around the scale, funding and monetization timeline of the AI infrastructure buildout. **We also trim our baseline multiple assumption for the rest of the Tech sector to 23.5x from 25.0x.** While data center capex and AI adoption are broadening, valuation dispersion is increasing as investors look to separate the AI winners from losers within the broader Tech space.

For the rest of the S&P 500, we derive a fair value P/E of 21.5x based on 10Y Treasury yields, trimmed PCE inflation, and manufacturing PMI. These macro inputs are less supportive than at the start of the year, but not weak enough to warrant a material de-rating. Nominal yields have remained relatively contained since March, and [our rates colleagues continue to frame the Fed's reaction function as patient rather than signaling a return to aggressive tightening](#). At the same time, manufacturing activity and nominal growth indicators remain firm enough to support earnings, while still-elevated inflation underpins nominal revenue growth.

Applying the blended multiple takes our YE26 S&P 500 target up to 7800 from 7650, 23x our \$337 FY26 EPS estimate. Our upwardly revised EPS estimate does the heavy lifting, as our valuation assumptions are reduced modestly from our last update. Our base case reflects a still-constructive backdrop where AI-driven capex supports earnings resilience, while the broader macro backdrop stays durable in the face of higher for longer inflation and rates. Upside to 8500 in our bull case would require a stronger translation of AI investment into productivity and margins, alongside a more benign macro path. Conversely, our 6300 bear case embeds a slowdown in AI capex and tighter financial conditions, driving both EPS and multiple compression risks highlighted in prior work.

FIGURE 17. 2026 S&P 500 price target goes to 7800 from 7650

Data as of 11 Jun 2026
Source: LSEG Data & Analytics, Bloomberg, Barclays Research

FIGURE 18. 2026 base, bull & bear case PT scenarios

Data as of 16 Jun 2026
Source: LSEG Data & Analytics, Bloomberg, Barclays Research

Extending the horizon into 2027, we introduce targets of 8800 in our base case, 9600 in the bull case and 7100 in the bear case, reflecting a more tempered but still constructive long-duration pathway for equities. These estimates are derived by modestly trimming our 2026 multiple assumptions by roughly a half turn across scenarios, acknowledging the impact of a longer discounting period as well as greater uncertainty around the durability of AI-led earnings expansion, the terminal level of Fed policy rates, and the broader macro equilibrium.

FIGURE 19. We introduce our 2027 preliminary PT at 8800

Sector and factor recommendations

As a preamble to our sector views, we'd point out that the evolution of the AI narrative continues to reshape market structure. **Correlations within sectors have collapsed to historically low levels**, reflecting a market increasingly dominated by idiosyncratic earnings outcomes and positioning, as well as AI disruption narratives. At the same time, concentration in a narrow group of leaders has widened the gap between single-stock and index behavior, with single-stock volatility rising alongside heightened event risk. Together, we believe these

dynamics have reduced the effectiveness of sectors as an expression of views, reinforcing the shift toward stock selection and narrow thematic exposure (sub-industries, AI winners & losers, select factors) in a dispersion-rich environment.

FIGURE 21. Correlations collapsing between AI winners/losers

Data as of 18 June 2026.
Source: Bloomberg, Barclays Research

FIGURE 22. The single stock vs index vol spread is elevated compared to history

Data as of 17 June 2026.
Source: Bloomberg, Barclays Derivatives Research

Against this backdrop, we implement two changes to our sector positioning. First, **we downgrade Financials to Neutral**. While earnings estimate revisions for banks remain constructive (supported by stronger net interest income, resilient loan growth, and improved trading and capital markets activity), the broader sector faces more mixed fundamentals. Regulatory risks around credit card fees and lingering concerns over private credit exposure and AI disruption continue to weigh on non-bank components. As a result, we see modest downside risk to consensus EPS growth expectations at the sector level. Valuations are undemanding, but largely reflect these risks, leaving the overall risk/reward more balanced. Within Financials, we continue to prefer banks, where earnings visibility remains stronger.

Second, **we upgrade Healthcare to Neutral**. Earlier concerns around downside risk to FY26 EPS, driven by difficult comparisons, have partially played out; consensus estimates have been revised materially lower. With expectations now reset, we see only modest additional downside risk. At the same time, the sector trades modestly above its 5Y median forward P/E despite meaningful underperformance YTD. This combination suggests a more balanced setup, where neither valuation nor earnings presents a strong directional signal.

The balance of our sector views remains unchanged: Positive on TMT, Industrials and Utilities, Negative on the Consumer space. We provide rationale in the table below.

FIGURE 23. Barclays US Equity Strategy Sector Views

Sector	View	'26 EPS Δ% (Barclays)	'26 EPS Δ% (Street)	vs. Street	Current Valuation	Rationale
Big Tech	POS	36.10	23.19	12.91	23.9x	We remain Positive on the TMT complex. Big Tech core verticals (digital ads, public cloud) are performing well as the group positions for further AI monetization. Expanding capex boosts EPS for component names across chips, memory & equipment. Overall Tech P/E's remain below 2Y/3Y medians.
Rest of Tech	POS	81.28	69.44	11.84	23.6x	
Communication Services	POS	8.82	12.09	(3.26)	35.6x	
Industrials	POS	12.96	7.30	5.66	25.7x	We see upside to FY26 EPS as PMIs/IP improve. Positioned to benefit from both fiscal spending and AI capex, while relatively insulated from reflation. Valuations elevated but remain off YTD highs.
Utilities	POS	8.81	12.18	(3.37)	17.5x	We see modest downside to Street FY26 EPS but still expect Utilities to be one of the better AI-adjacent earnings growth stories at a reasonable valuation.
Financials	NEU ↓	4.44	7.65	(3.21)	15.5x	Downgrade to Neutral; setup for banks remains favorable but rest of the sector challenged by regulatory risks, private credit and AI disruption.
Real Estate	NEU	3.36	2.79	0.57	28.5x	We see little risk to consensus FY26 earnings growth, but P/FFO multiples look elevated with respect to current nominal Treasury yields.
Energy	NEU	29.19	48.69	(19.50)	6.3x	We believe revisions to FY26 earnings estimates have run too far, too fast even with respect to higher oil prices. But valuations have come in from March peaks and Barclays sees upside to consensus crude forecasts.
Materials	NEU	28.85	39.84	(10.99)	18.0x	Supply-demand imbalance and resource nationalism leave industrial metals looking better positioned than commodity chemicals.
Health Care	NEU ↑	(0.70)	1.13	(1.83)	17.8x	Upgrade to Neutral; downward revisions to FY26 EPS are likely to have mostly run their course, but we expect earnings growth to remain weak vs. tough 2025 comps.
Consumer Staples	NEG	5.58	4.63	0.94	22.1x	We remain Negative on the Consumer complex. While spending data remains resilient, moderating income gains and higher inflation (including gas prices) are likely to create lagged pressure in 2H, leading to a modest consumption slowdown.
Consumer Discretionary	NEG	3.95	4.76	(0.81)	23.0x	

Data as of 16 June 2026. Our sector earnings framework combines bottom-up and top-down approaches, adjusting consensus estimates based on historical bias and macro variables relevant to each sector. EBITDA and EV/EBITDA applied instead of EPS and P/E for Energy; FFO and P/FFO applied for Real Estate. Consumer Discretionary valuation is a simple average of constituent P/E, to adjust for the influence of TSLA. Arrows next to sector views denote changes.

Source: Bloomberg, Barclays Research

On factors, we recently downgraded Momentum to Neutral, reflecting historically crowded positioning that creates downside asymmetry despite Momentum's strong NTM earnings growth and reasonable valuations. We remain Positive on Growth and Neutral on Value, underpinned by powerful Tech-led 1Q26 earnings momentum, supportive valuations and AI capex tailwinds within Growth. Our Positive Large-over-Small view is maintained as small caps remain vulnerable due to weak earnings revisions, near-record negative beta to the 10-year yield, and valuation excesses in segments like small-cap software, in contrast to mega-cap hyperscalers. We remain Negative on Quality as markets look through geopolitical risks in a risk-on regime, Neutral on High-over-Low Volatility given stretched valuations and AI-linked exposure offset by committed capex and favorable June–July seasonality, and Neutral on Yield as the long/short Yield basket is pressured by AI-driven inflation impulses and flow diversion, though cheap valuations and light positioning limit further downside.

Explanation of the U.S. Equity Strategy sector rating system:

Positive Outlook: We recommend clients increase their level of portfolio exposure to the sector (as defined below)

Neutral Outlook: We recommend clients maintain their current level of portfolio exposure to the sector (as defined below)

Negative Outlook: We recommend clients decrease their level of portfolio exposure to the sector (as defined below)

Sector Definitions:

Our custom sector definitions are derived from GICS sectors as follows:

No changes to GICS Level 1 for Energy, Consumer Staples, Industrials, Real Estate, Healthcare, Utilities, Materials, and Financials.

"Big Tech": Seven stocks - AAPL, AMZN, GOOG, GOOGL, META, MSFT, NVDA - have been removed from their corresponding GICS Level 1 sectors.

"Rest of Tech" is GICS Level 1 Information Technology with AAPL, MSFT, and NVDA excluded.

"Communication Services" is GICS Level 1 Communication Services with GOOG, GOOGL, and META excluded.

"Discretionary" is GICS Level 1 Consumer Discretionary with AMZN excluded.

Guide to the Barclays Fundamental Equity Research Rating System:

Our coverage analysts use a relative rating system in which they rate stocks as Overweight, Equal Weight or Underweight (see definitions below) relative to other companies covered by the analyst or a team of analysts that are deemed to be in the same industry (the "industry coverage universe").

In addition to the stock rating, we provide industry views which rate the outlook for the industry coverage universe as Positive, Neutral or Negative (see definitions below). A rating system using terms such as buy, hold and sell is not the equivalent of our rating system. Investors should carefully read the entire research report including the definitions of all ratings and not infer its contents from ratings alone.

Stock Rating

Overweight - The stock is expected to outperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Equal Weight - The stock is expected to perform in line with the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Underweight - The stock is expected to underperform the unweighted expected total return of the industry coverage universe over a 12-month investment horizon.

Rating Suspended - The rating and target price have been suspended temporarily due to market events that made coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Industry View

Positive - industry coverage universe fundamentals/valuations are improving.

Neutral - industry coverage universe fundamentals/valuations are steady, neither improving nor deteriorating.

Negative - industry coverage universe fundamentals/valuations are deteriorating.

Types of investment recommendations produced by Barclays Equity Research:

In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts within Equity Research. Any such investment recommendations shall remain open until they are subsequently amended, rebalanced or closed in a future research report.

Barclays may also re-distribute equity research reports produced by third-party research providers that contain recommendations that differ from and/or conflict with those published by Barclays' Equity Research Department.

Disclosure of other investment recommendations produced by Barclays Equity Research:

Barclays Equity Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays Equity Research in the preceding 12 months please refer to <https://live.barcap.com/go/research/Recommendations>.

Disclaimer:

This publication has been produced by Barclays Research Department in the Investment Bank of Barclays Bank PLC and/or one or more of its affiliates (collectively and each individually, "Barclays").

It has been prepared for institutional investors and not for retail investors. It has been distributed by one or more Barclays affiliated legal entities listed below or by an independent and non-affiliated third-party entity (as may be communicated to you by such third-party entity in its communications with you). It is provided for information purposes only, and Barclays makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to any data included in this publication. To the extent that this publication states on the front page that it is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242, it is an "institutional debt research report" and distribution to retail investors is strictly prohibited. Barclays also distributes such institutional debt research reports to various issuers, media, regulatory and academic organisations for their own internal informational news gathering, regulatory or academic purposes and not for the purpose of making investment decisions regarding any debt securities. Media organisations are prohibited from re-publishing any opinion or recommendation concerning a debt issuer or debt security contained in any Barclays institutional debt research report. Any such recipients that do not want to continue receiving Barclays institutional debt research reports should contact debtresearch@barclays.com. Unless clients have agreed to receive "institutional debt research reports" as required by US FINRA Rule 2242, they will not receive any such reports that may be co-authored by non-debt research analysts. Eligible clients may get access to such cross asset reports by contacting debtresearch@barclays.com. Barclays will not treat unauthorized recipients of this

report as its clients and accepts no liability for use by them of the contents which may not be suitable for their personal use. Prices shown are indicative and Barclays is not offering to buy or sell or soliciting offers to buy or sell any financial instrument.

Without limiting any of the foregoing and to the extent permitted by law, in no event shall Barclays, nor any affiliate, nor any of their respective officers, directors, partners, or employees have any liability for (a) any special, punitive, indirect, or consequential damages; or (b) any lost profits, lost revenue, loss of anticipated savings or loss of opportunity or other financial loss, even if notified of the possibility of such damages, arising from any use of this publication or its contents.

Other than disclosures relating to Barclays, the information contained in this publication (including third-party data) has been obtained from sources that Barclays Research believes to be reliable, but Barclays does not represent or warrant that it is accurate or complete. Third-party data, including third-party forecasts and predictions, is provided for information purposes only, has not been adopted or endorsed by Barclays, and does not represent the views or opinions of Barclays. Presentations by Third-Party Speakers: Any views or opinions expressed by third-party speakers during a Barclays-hosted event are solely those of the speaker and do not represent the views or opinions of Barclays. Barclays is not responsible for, and makes no warranties whatsoever as to, the information or opinions contained in any written, electronic, audio or video presentations by any third-party speakers, and such presentations have not been adopted or endorsed by Barclays and do not represent the views or opinions of Barclays. Content from third-party presentations is provided for information purposes only and has not been independently verified by Barclays for its accuracy or completeness.

The views in this publication are solely and exclusively those of the authoring analyst(s) and are subject to change, and Barclays Research has no obligation to update its opinions or the information in this publication. Unless otherwise disclosed herein, the analysts who authored this report have not received any compensation from the subject companies in the past 12 months. If this publication contains recommendations, they are general recommendations that were prepared independently of any other interests, including those of Barclays and/or its affiliates, and/or the subject companies. This publication does not contain personal investment recommendations or investment advice or take into account the individual financial circumstances or investment objectives of the clients who receive it. Barclays is not a fiduciary to any recipient of this publication. The securities and other investments discussed herein may not be suitable for all investors and may not be available for purchase in all jurisdictions. The United States imposed sanctions on certain Chinese companies (<https://ofac.treasury.gov/sanctions-programs-and-country-information/chinese-military-companies-sanctions>), which may restrict U.S. persons from purchasing securities issued by those companies. Investors must independently evaluate the merits and risks of the investments discussed herein, including any sanctions restrictions that may apply, consult any independent advisors they believe necessary, and exercise independent judgment with regard to any investment decision. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including changes in market liquidity). The information herein is not intended to predict actual results, which may differ substantially from those reflected. Past performance is not necessarily indicative of future results. The information provided does not constitute a financial benchmark and should not be used as a submission or contribution of input data for the purposes of determining a financial benchmark.

This publication is not investment company sales literature as defined by Section 270.24(b) of the US Investment Company Act of 1940, nor is it intended to constitute an offer, promotion or recommendation of, and should not be viewed as marketing (including, without limitation, for the purposes of the UK Alternative Investment Fund Managers Regulations 2013 (SI 2013/1773) or AIFMD (Directive 2011/61)) or pre-marketing (including, without limitation, for the purposes of Directive (EU) 2019/1160) of the securities, products or issuers that are the subject of this report.

Third Party Distribution: Any views expressed in this communication are solely those of Barclays and have not been adopted or endorsed by any third party distributor.

United Kingdom: This document is being distributed (1) only by or with the approval of an authorised person (Barclays Bank PLC) or (2) to, and is directed at (a) persons in the United Kingdom having professional experience in matters relating to investments and who fall within the definition of "investment professionals" in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"); or (b) high net worth companies, unincorporated associations and partnerships and trustees of high value trusts as described in Article 49(2) of the Order; or (c) other persons to whom it may otherwise lawfully be communicated (all such persons being "Relevant Persons"). Any investment or investment activity to which this communication relates is only available to and will only be engaged in with Relevant Persons. Any other persons who receive this communication should not rely on or act upon it. Barclays Bank PLC is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority and is a member of the London Stock Exchange.

European Economic Area ("EEA"): This material is being distributed to any "Authorised User" located in a Restricted EEA Country by Barclays Bank Ireland PLC. The Restricted EEA Countries are Austria, Bulgaria, Estonia, Finland, Hungary, Iceland, Liechtenstein, Lithuania, Luxembourg, Malta, Portugal, Romania, Slovakia and Slovenia. For any other "Authorised User" located in a country of the European Economic Area, this material is being distributed by Barclays Bank PLC. Barclays Bank Ireland PLC is a bank authorised by the Central Bank of Ireland whose registered office is at 1 Molesworth Street, Dublin 2, Ireland. Barclays Bank PLC is not registered in France with the Autorité des marchés financiers or the Autorité de contrôle prudentiel. Authorised User means each individual associated with the Client who is notified by the Client to Barclays and authorised to use the Research Services. The Restricted EEA Countries will be amended if required.

Finland: Notwithstanding Finland's status as a Restricted EEA Country, Research Services may also be provided by Barclays Bank PLC where permitted by the terms of its cross-border license.

Americas: The Investment Bank of Barclays Bank PLC undertakes U.S. securities business in the name of its wholly owned subsidiary Barclays Capital Inc., a FINRA and SIPC member. Barclays Capital Inc., a U.S. registered broker/dealer, is distributing this material in the United States and, in connection therewith accepts responsibility for its contents. Any U.S. person wishing to effect a transaction in any security discussed herein should do so only by contacting a representative of Barclays Capital Inc. in the U.S. at 745 Seventh Avenue, New York, New York 10019.

Non-U.S. persons should contact and execute transactions through a Barclays Bank PLC branch or affiliate in their home jurisdiction unless local regulations permit otherwise.

This material is distributed in Canada by Barclays Capital Canada Inc., a registered investment dealer, a Dealer Member of Canadian Investment Regulatory Organization (www.ciro.ca), and a Member of the Canadian Investor Protection Fund (CIPF).

This material is distributed in Mexico by Barclays Bank Mexico, S.A. and/or Barclays Capital Casa de Bolsa, S.A. de C.V. This material is distributed in the Cayman Islands and in the Bahamas by Barclays Capital Inc., which it is not licensed or registered to conduct and does not conduct business in, from or within those jurisdictions and has not filed this material with any regulatory body in those jurisdictions.

Japan: This material is being distributed to institutional investors in Japan by Barclays Securities Japan Limited. Barclays Securities Japan Limited is a joint-stock company incorporated in Japan with registered office of 6-10-1 Roppongi, Minato-ku, Tokyo 106-6131, Japan. It is a subsidiary of Barclays Bank PLC and a registered financial instruments firm regulated by the Financial Services Agency of Japan. Registered Number: Kanto Zaimukyokucho (kinsho) No. 143.

Asia Pacific (excluding Japan): Barclays Bank PLC, Hong Kong Branch is distributing this material in Hong Kong as an authorised institution regulated by the Hong Kong Monetary Authority. Registered Office: 41/F, Cheung Kong Center, 2 Queen's Road Central, Hong Kong.

All Indian securities-related research and other equity research produced by Barclays' Investment Bank are distributed in India by Barclays Securities (India) Private Limited (BSIPL). BSIPL is a company incorporated under the Companies Act, 1956 having CIN U67120MH2006PTC161063. BSIPL is registered and regulated by the Securities and Exchange Board of India (SEBI) as a Research Analyst: INH000001519; Portfolio Manager INP000002585; Stock Broker INZ000269539 (member of NSE and BSE); Depository Participant with the National Securities & Depositories Limited (NSDL): DP ID: IN-DP-NSDL-478-2020; Investment Adviser: INA000000391. BSIPL is also registered as a Mutual Fund Advisor having AMFI ARN No. 53308. The registered office of BSIPL is at Nirlon Knowledge Park, 9th floor, Block B-6, Off. Western Express Highway, Goregaon (East), Mumbai – 400063, India. Telephone No: +91 22 61754000 Fax number: +91 22 61754099. Any other reports produced by Barclays' Investment Bank are distributed in India by Barclays Bank PLC, India Branch, an associate of BSIPL in India that is registered with Reserve Bank of India (RBI) as a Banking Company under the provisions of The Banking Regulation Act, 1949 (Regn No BOM43) and registered with SEBI as Merchant Banker (Regn No INM000002129) and also as Banker to the Issue (Regn No INBI00000950). Barclays Investments and Loans (India) Limited, registered with RBI as Non Banking Financial Company (Regn No RBI CoR-07-00258), and Barclays Wealth Trustees (India) Private Limited, registered with Registrar of Companies (CIN U93000MH2008PTC188438), are associates of BSIPL in India that are not authorised to distribute any reports produced by Barclays' Investment Bank.

This material is distributed in Singapore by the Singapore Branch of Barclays Bank PLC, a bank licensed in Singapore by the Monetary Authority of Singapore. For matters in connection with this material, recipients in Singapore may contact the Singapore branch of Barclays Bank PLC, whose registered address is 10 Marina Boulevard, #23-01 Marina Bay Financial Centre Tower 2, Singapore 018983.

This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a "Wholesale Client" as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom (PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly, (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, "Barrenjoey"), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC or (iii) such other non-affiliated third-party distributor(s) as may be clearly identified to you. Such non-affiliated third-party distributor(s) are not agents of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 ("FMCA"), and is not a disclosure document or "financial advice" under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited ("Barrenjoey"), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to "wholesale investors" that meet the "investment business", "investment activity", "large", or "government agency" criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 ("Advisory Law"). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

This material is distributed in the United Arab Emirates (including the Dubai International Financial Centre) and Qatar by Barclays Bank PLC. Barclays Bank PLC in the Dubai International Financial Centre (Registered No. 0060) is regulated by the Dubai Financial Services Authority (DFSA). Principal place of business in the Dubai International Financial Centre: The Gate Village, Building 4, Level 4, PO Box 506504, Dubai, United Arab Emirates. Barclays Bank PLC-DIFC Branch, may only undertake the financial services activities that fall within the scope of its existing DFSA licence. Related financial products or services are only available to Professional Clients, as defined by the Dubai Financial Services Authority. Barclays Bank PLC in the UAE is regulated by the Central Bank of the UAE and is licensed to conduct business activities as a branch of a commercial bank incorporated outside the UAE in Dubai (Licence No.: 13/1844/2008, Registered Office: Building No. 6, Burj Dubai Business Hub, Sheikh Zayed Road, Dubai City) and Abu Dhabi (Licence No.: 13/952/2008, Registered Office: Al Jazira Towers, Hamdan Street, PO Box 2734, Abu Dhabi). This material does not constitute or form part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase, any securities or investment products in the UAE (including the Dubai International Financial Centre) and accordingly should not be construed as such. Furthermore, this information is being made available on the basis that the recipient acknowledges and understands that the entities and securities to which it may relate have not been approved, licensed by or registered with the UAE Central Bank, the Dubai Financial Services Authority or any other relevant licensing authority or governmental agency in the UAE. The content of this report has not been approved by or filed with the UAE Central Bank or Dubai Financial Services Authority. Barclays Bank PLC in the Qatar Financial Centre (Registered No. 00018) is authorised by the Qatar Financial Centre Regulatory Authority (QFCRA). Barclays Bank PLC-QFC Branch may only undertake the regulated activities that fall within the scope of its existing QFCRA licence. Principal place of business in Qatar: Qatar Financial Centre, Office 1002, 10th Floor, QFC Tower, Diplomatic Area, West Bay, PO Box 15891, Doha, Qatar. Related financial products or services are only available to Business Customers as defined by the Qatar Financial Centre Regulatory Authority.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. If you are not a Qualified Investor according to the laws of the Russian Federation, please dispose of any copy of this material in your possession.

Sustainable Investing Related Research: There is currently no globally accepted framework or definition (legal, regulatory or otherwise) of, nor market consensus as to what constitutes a ‘sustainable’, ‘ESG’, ‘green’, ‘climate-friendly’ or an equivalent company, investment, strategy or consideration or what precise attributes are required to be eligible to be categorised by such terms. This means there are different ways to evaluate a company or an investment and so different values may be placed on certain sustainability credentials as well as adverse ESG-related impacts of companies and ESG controversies. The evolving nature of sustainable investing considerations, models and methodologies means it can be challenging to definitively and universally classify a company or investment under a sustainable investing label and there may be areas where such companies and investments could improve or where adverse ESG-related impacts or ESG controversies exist. The evolving nature of sustainable finance related regulations and the development of jurisdiction-specific regulatory criteria also means that there is likely to be a degree of divergence as to the interpretation of such terms in the market. We expect industry guidance, market practice, and regulations in this field to continue to evolve.

Any information, data, image, or other content including from a third party source contained, referred to herein or used for whatsoever purpose by Barclays or a third party (“Information”), in relation to any actual or potential ‘ESG’, ‘sustainable’ or equivalent objective, issue, factor or consideration is not intended to be relied upon for ESG or sustainability classification, regulatory regime or industry initiative purposes (“ESG Regimes”), unless otherwise stated. Nothing in these materials, including any images included therein, is intended to convey, suggest or indicate that Barclays considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG or sustainability classification, label or similar standards that may exist under ESG Regimes. Barclays has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

IRS Circular 230 Prepared Materials Disclaimer: Barclays does not provide tax advice and nothing contained herein should be construed to be tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties; and (ii) was written to support the promotion or marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.
