

Energy, Utilities & Mining Pulse: Investors Asking: Where Do We See the Most Positive/Negative 2027 Consensus Revisions?

As exemplified by the sharp outperformance of Refiners compared to Natural Gas this year, Natural Resources equities generally trade with a high correlation to forward consensus revisions. Accordingly, we ask our senior analyst team to identify one Buy-rated stock where there is upside to 2027 FactSet consensus EPS/EBITDA and one Neutral/Sell rated stock where there is downside to 2027 FactSet consensus EPS/EBITDA.

Stocks where we are above consensus: **MPC, TLN, LB, SHLS, and NUE**

Stocks where we are below consensus: **APA, CEG, CQP, SEDG, and CLF**

Oil & Gas:

Among Integrated Oil & Refiners, we highlight Marathon Petroleum Corp. (**MPC**) where we see ~7% upside to consensus EPS estimates in 2027. As highlighted in our recent [top picks across Natural Resources](#) report, our constructive view is driven by the company's exposure to the structurally tighter PADD 5 environment, growing export optionality on the Gulf Coast, low-cost operations, and growing midstream earnings contributions. In addition to the robust refining backdrop, we highlight the company's yield flexibility projects, as well as a continued focus on strong operational execution. Given these considerations, we believe the company is well positioned to generate strong cash flow, ultimately supporting an attractive capital return yield and per share profitability. We note on our updated estimates, we see the stock trading at a ~12%/~9% FCF yield in 2026/2027.

For a stock where we are more than 5% below consensus on 2027 EBITDA, we flag **APA** as a Sell-rated stock within our E&P coverage where our estimates for 2027 EBITDA are 6% below consensus. We seek more clarity around the company's outlook for its net gain on oil and gas purchases and sales in 2027+, as we have seen local Waha pricing tighten relative to Gulf Coast natural gas pricing. On the future outlook for Waha pricing, we continue to seek more clarity on timelines regarding new Permian takeaway pipeline capacity coming online in 2H26/2027. Our lower estimates relative to consensus are also impacted by our mid-cycle Brent oil price estimate of \$75/bbl in 2027, which is ~2% lower than the consensus Brent oil price estimate for APA. Following APA's year-to-date outperformance among our international/diversified E&P coverage, we see 10% downside to shares at current levels and a 10% FCF yield on 2027 estimates relative to peers at 11% (peers include OXY, MUR, TALO).

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Utilities:

Among Buy-rated stocks in power/utilities, we see the most upside consensus risk to Talen (**TLN**). Here, we see 7% upside to consensus EBITDA estimates for 2027. This is driven by (1) recently completed M&A and execution on asset integration/performance, and (2) upside to power prices in 2027 where the forward curve has recently started to firm to the mid \$60s/MWh range across nodes in PJM. We believe if power prices continue to firm, or spark spreads otherwise expand, there could be further upside from running marginal units more to capture the upside. More broadly, we see potential catalysts for shares from improved regulatory clarity in PJM, where the RBP filing is expected by the end of the month, as well as incremental large load PPA signings. We also see valuation as attractive with shares trading at a 10% FCF yield on our 2027 numbers.

For a Neutral/Sell rated stock where we see downside to 2027 consensus estimates, we would highlight Neutral rated **CEG**, where we are 2% below consensus EBITDA. We believe this is driven by slightly softer Texas power prices vs. PJM, as well as higher fuel costs and O&M expenses, which could be attributed to stronger synergy realizations from the Calpine transaction being priced into consensus estimates. Our Neutral view on CEG is predicated on less leverage to EBITDA upside from incremental PPAs and valuation despite a strong fundamental business highly levered to nuclear power assets.

Midstream:

We highlight **LB** as the stock with the most significant upside to 2027 consensus revisions, driven by strong produced water growth and commercial momentum. We forecast + 41% annual EBITDA growth for 2027 (vs. 33% for 2026) and up +7% vs. consensus, underpinned by ramping minimum volume commitment (MVC) volumes from affiliate WBI's kraken and Speedway I pipelines – with management guiding to Speedway I online by mid-2026 and ramping through 2027. Our model also assumes robust third-party volume growth and a broader pick up in Permian produced water activity. Beyond water, we expect solid organic growth from commercial execution across both legacy and newly acquired acreage. We see this support revenue per acre growth from \$696/acre in 2026 to \$921/acre in 2027, though still well below LB's \$1,159/acre average on its pre-2024/ legacy vintage. Additional upside risk to our estimates could come from faster commercial conversion and stronger Speedway I volumes, especially as WBI's commercial progress on Speedway Phase II signals incremental demand that can be absorbed by Speedway I's open capacity (ahead of Speedway II in-service). Overall, we expect further insight into customer project ramp timing and the ability to increase its revenue accretion support upward estimate revisions from here.

We flag **CQP** as a Sell-rated stock where we see -4% downside to 2027 consensus EBITDA estimates. We estimate EBITDA will be down 8% YoY, reflecting lower blended margins across the Sabine Pass (SPL) footprint as well as higher sequential maintenance activities. On the former, we expect a larger portion of SPL volumes in 2027 to be sold under long-term sale-and-purchase agreements (largely due to contracts startups at CMI throughout 2026 tied to the Corpus Christi Stage 3 project) which brings the blended EBITDA margin per volume lower YoY. On the latter, while we are still awaiting details on the timing of the next major maintenance turnarounds, our model contemplates a turnaround on Sabine Pass Trains 5 and 6 in 2027, resulting in higher opex and lower volumes YoY. Risks to our estimate include the timing of major

maintenance, better than expected production at SPL, and/or better than expected optimization upstream and downstream of CQP's footprint.

Clean Technology:

We highlight **SHLS** as a Buy-rated stock that maintains more than 5% upside to 2027 consensus EPS. In particular, our revenue and EBITDA forecasts remain 1% and 5% above FactSet consensus estimates, respectively, while our adj. EPS forecast of \$0.60 is 17% above consensus at \$0.52. We highlight that our 2027 EBITDA margins of 22.2% remain ~75bps above consensus, and view some discrepancies in interest/other expenses as driving further separation from our EPS forecast. We highlight that SHLS anticipates delivering \$628mn over the next four quarters, up from \$603mn at the end of 2025, and see the potential for management to raise the low-end of its 2026 revenue guidance, which would be supportive of future revenue growth potential. We believe the improvement in revenue, which is being further supported by continued traction expanding its product portfolio and entering new geographies, can drive some margin expansion from economies of scale. Importantly, our ~200bps yoy adj. EBITDA margin expansion in 2027 is only ~30bps above consensus forecasts.

We point to **SEDG** as a Sell-rated stock that has more than 5% downside to 2027 consensus EPS. We note that our 2027 adj. EPS of \$1.10 remains 30% below consensus at \$1.57. Importantly, our 2027 revenue forecast is ~3% below consensus, and recent industry data has suggested that SEDG has lost some inverter market share in the US as a result of RUN shifting away from its affiliate channel, and two large installers that were heavily exposed to SEDG encountering some operational issues, including the bankruptcy of Freedom Forever. We attribute most of the delta on EPS as a result of our higher opex forecast, as consensus anticipates opex declining by ~11% yoy in 2026 and remaining flat in 2027, as compared to our view where opex declines by ~7% in 2026 and increases by 2% yoy in 2027 to support the continued revenue growth and new product launches such as its solid state transformer product. In aggregated, we believe estimates remain elevated and anticipate will contract over the near-term.

Metals & Mining:

We highlight **NUE** as a Buy-rated stock that has ~4% upside vs. 2027 consensus EBITDA. Within the steel commodity and macro backdrop, we are more bullish than consensus with mid-cycle HRC prices of \$1,000 vs. Visible Alpha consensus of \$950. Our upside to consensus estimates includes higher commodity prices, muted scrap costs and higher volumes within the mills segment being slightly offset by start-up costs associated with the West Virginia mill which is set to begin ramping production in 2027 which is set to have a higher value-added product mix. Furthermore, we believe incremental upside will be driven by plate prices which we believe will remain tighter for longer compared to HRC prices. Lastly, we believe there is incremental upside NUE's towers and structures businesses which will have three facilities producing by the end of 2027. Despite guidance of ~\$150mn across the three facilities running at mid-teens margins, we believe there is incremental margin capture for the towers and structures business as NUE will be vertically integrated compared to competitors that import tariffed product and achieve high-teens margins. As a result, we believe NUE can achieve towers and structures margins in the mid-20s.

We flag **CLF** as a stock where we are (4%) below consensus on 2027 EBITDA. Despite the

positive rate of change on commodity increases, CLF maintains a large portion of fixed price contracts which only reset between 1–3 years. Furthermore, CLF has a large, fixed cost basis as a blast furnace operator. As a result, the company is less exposed to the pricing leverage other mills across our coverage experience while also having a higher cost basis. Additionally, given the large automotive exposure, we believe inflation, higher rates and lower consumer sentiment could weight on US automotive production, which has already been depressed. As a result, volume upside may be limited in 2027 as well. Furthermore, we believe the chunkier cost-cutting initiatives that have been undertaken over the past 3–4 years have likely been exhausted, resulting in improvements to cost profile likely being limited.

Conversations we are having with investors

E&P

MGY. MGY has been a stock in focus this week with investors following the company's recently announced plans on July 20 to acquire WildFire Energy, LLC for \$4.06 bn. Investor conversations have centered around the outlook for the pro forma accretion potential stemming from the pending WildFire transaction, as well as MGY's outlook on taking on additional debt following the company's proposed offering of \$500 mn Senior Notes on July 22. Those more constructive on MGY note the potential operational efficiencies the company can drive for the pro forma business, including the potential for extending lateral lengths toward the 10,000-15,000 ft range discussed by management. Those more cautious on MGY have noted the recent \$1.1 bn equity offering pricing announced on July 21 and seek more clarity on the company's outlook to optimize the pro forma cost structure. Investor conversations on MGY have also focused on the company's outlook for a pro forma oil cut of ~54%, as many investors seek more clarity on the potential for realized oil pricing tailwinds from legacy WildFire assets' exposure to incremental Gulf Coast liquids pricing.

EQT. Following the company's reporting of 2Q26 earnings on July 21, EQT has been a name in focus this week with investors following outperformance on 2Q26 production. The company reported total production of 6.97 Bcfe/d for the quarter relative to FactSet consensus at 6.65 Bcfe/d. Investors have noted the company's commentary around compression projects driving a shallower base decline rate, as many investors begin to focus on the potential for incremental efficiencies to the maintenance capital program in 2027+ as a result of EQT's organic growth projects. Those more constructive on EQT note the company's announcements for incremental power and LNG agreements alongside 2Q26 earnings. On the 10-year power supply deal with CPV Shay, investors have been focused on the premium pricing structure linked to PJM pricing as well as the potential for a 2031 start-up as was messaged by EQT. On the 5-year LNG offtake agreement with an undisclosed large integrated Asian energy company, investors have noted EQT's expectation for a \$45 mn uplift to 2028 FCF at recent strip pricing. Given the ongoing pressure in the US natural gas macro environment, investors continue to focus on EQT's long-term outlook for regional Appalachian power demand growth to ease the currently robust near-term expectations for US natural gas supply growth.

Majors & Refining

Refining. This week within the refining complex, we have received incremental inbounds around relative valuation following strong YTD equity moves. Conversations remain focused on the refining macro, with discussions particularly around ongoing supply disruptions, the extent to which RIN prices remain elevated, and the potential magnitude for small refinery exemptions. Among the large caps, discussions have been primarily around relative valuation and the cadence for share repurchases amid strong cash flow generation. Among SMID cap refiners, we have received some inbounds around CVI given the magnitude of underperformance, with some bullish investors viewing the dislocation as presenting an attractive entry opportunity. Additionally, bullish investors we speak to remain constructive on DK given SOTP efforts, balance sheet strength, and potential to receive 100% SREs across the asset base. Lastly, for PARR, sentiment has improved more recently though investors are mindful of the Hawaii turnaround and look for further clarity on the third quarter outlook given crude price volatility.

Canadian Oils. Based on our conversations marketing in Toronto this week, investors continue to express interest in the setup for Canadian Oils amid renewed geopolitical tensions and commodity price volatility. We note CVE remains a highly debated stock ahead of 2Q26 earnings, with long-only and Canadian investors keenly focused on volume and free cash flow growth as West White Rose comes online. Additional upside exists at Christina Lake North, where integration is tracking ahead of schedule. Given strong year-to-date outperformance, however, we find some investors with shorter horizons may be inclined to position for a mean-reversion trade. Into the print, the market looks for solid Upstream execution but expects Downstream margin capture to normalize toward 70%. Investors also look for continued progress on debt reduction amid elevated commodity prices, with a potential path to C\$6 bn of net debt by year-end. Meanwhile, sentiment remains constructive on SU and IMO.TO's strong integrated exposure with refining a larger share of the total earnings mix, though valuation for the latter still screens as expensive to some. Lastly, we highlight investor appetite for CNQ to catch up with peers following year-to-date underperformance, despite lingering questions over capital spend on medium and long-term projects.

Energy Services

HAL. Conversations focused on HAL this week after the company reported an in-line quarter vs GS estimates, and guided to a softer 3Q than Street was anticipating. Investors queried what North America activity may look like through the end of the year and into 2027, and if there will be increases in pricing for frac activity in the coming quarters. While we continue to price in potential pricing increases for US frac activity, we see more moderated pricing gains, and expect upside in North America frac to come from decreasing white space. For HAL specifically, investors are focused on the international opportunity for the company, as the management team is focused on incremental activity adds across multiple regions. With multiple awards in the Middle East recently, investors are focused on the implication of incremental work and rising activity levels on HAL's 2027 results, and the resulting magnitude of earnings increase as a result.

Utilities

PJM. As we continue to get closer to improved regulatory clarity in PJM on how the grid operator will handle the influx of data center load, investor conversations this week have been focused on the IPPs and regulated utilities exposed to the PJM marketplace.

- **IPPs.** Conversations this week were most highly focused on the IPPs, as the stocks have bounced WTD and investor start to think about earnings updates. Specialist investors have demonstrated improving sentiment as regulatory clarity in PJM gets closer, with the RBP expected to be filed to the FERC by the end of July, and as valuation for the IPPs continues to screen as undemanding per conversations. Across the single stocks, we have seen the most interest in VST, in large part given the balanced exposure to the ERCOT and PJM power markets. For NRG, investors have been focused on if the company will reiterate its timing to deliver at least 1 GW of data center deals in 2026, due to previous mismatches in expectations on timing to deal execution earlier this year. For TLN, investors have been focused on potential guidance updates post the Cornerstone acquisition, and given the power price move in PJM, how ultimately a mark to market of 2027/2028 power curves to the financial plan could be read by the market. Some are concerned that it could be viewed as marking the top and posing downside risk to numbers if power prices soften. Lastly on CEG, investors have been focused on timing of an incremental large scale nuclear data center PPA. Lastly, we continue to receive inbounds from more generalist investors that are starting to do more work on power given the valuation of the IPPs.
- **Regulated utilities.** Investor sentiment remains more muted on the T&D utilities in PJM, including for PEG and EXC. While investors see movement on the regulator front as positive for the IPPs with PJM exposure, there is more concern from investors that affordability and elections will weigh on the ability of regulated utilities to earn constructive rates of return on their investments. For those that are fully exposed to PJM markets and do not have any generation offset, like EXC, investors are concerned that despite having a strong management team, there may be fewer places to reallocate capital if one state jurisdiction becomes more challenged. This is exacerbated by the momentum that removing the RTO adder has gained, which could pose downside risk to FERC transmission ROEs. More recently, FERC spend has been viewed as more of a regulatory defensive strategy during periods of challenge at the state level.

MLPs/Pipelines

Modest Progress on PowerBridge Data Center Development. This week, LBRT announced a JV with PowerBridge to support data center development in Texas, focusing initially on PowerBridge's planned 2 GW Alpha Digital Campus. This project currently holds a lease agreement with LandBridge (LB) for ~3.4k acres. Consistent with the original lease terms, LBRT targeted first power delivery in 4Q27 with larger-scale development extending into 2028. While investors view the LBRT agreement as a helpful step in the development of the project, investors continue to be focused on whether PowerBridge can get a commercial customer (e.g., hyperscalers), remaining cautious on the likelihood of potential upside for LB and WBI. For context, LB previously highlighted a revenue potential of \$10-40m per GW – which, in the context of this project, would represent \$20-80m or +6-23% upside vs. GSe 2029 EBITDA. For WBI, the company has signaled a potential partnership with PowerBridge to provide water solutions – either to the data center or for power generation. Investors have become increasingly focused on the role of produced water in data center power and cooling (specifically how players like WBI can support net-zero-water initiatives at the hyperscalers). However, given that water usage discussions remain in early stages and the continued lack of contract details – specifically regarding future power agreements (i.e., the use of water and power) – investors remain cautious on pricing in the top end of LB's range and potential upside to WBI (we continue to expect the low end of this range to be most likely). Overall, while this development is supportive of LB and WBI's long term growth story, near term focus remains on PowerBridge's commercial progress and its ability to secure customers with no definitive change to the project's outlook at this stage.

Waha strength vs. Permian G&P upside. Permian gas prices have strengthened significantly over the past two months as new pipeline capacity has come online, with Waha now at \$2.44 vs. the 2Q26 average of nearly -\$3/mmbtu. This ramp was faster than we expected due to the early (partial) in-service of ET's Hugh Brinson project, and a key question going into midstream earnings season is how this could change 2H26 guidance across the Permian G&P group. Fundamentally, new egress is a clear positive for this cohort as it allows existing production to be debottlenecked and opens space for new growth to flow. Thus, we will be watching for sequential processing volume step-ups QoQ and – most importantly – early reads on 3Q flows. We continue to see upside to 4Q/1Q volumes vs consensus for several names (notably TRGP) and would expect positive management commentary on growth expectations into YE. One challenge for the group, however, will be the loss in marketing earnings that most of these names earn by capturing the Waha spread to Gulf Coast pricing. While lower quality than underlining processing volume EBITDA and not typically capitalized going forward, investors have focused on names like OKE, KNTK, and even EPD and KMI who could lose more EBITDA from lower spreads than they gain in a processing pickup. While transitory, we expect the debate to stay topical as we get through this earnings season and approach 3Q results.

Clean Technology

XYL. Investor inbounds increased on XYL this week as investors continue to debate what it will take for the stock to re-rate following a disappointing start to the year. With the stock now trading at ~19x P/E, down from ~24x at the start of 2026 and below its ~25x three-year average, conversations centered on whether execution and margin expansion can be enough to drive renewed investor interest. Investors acknowledged the progress management has made in improving profitability through its 80/20 initiatives, but debated how much additional upside remains as portfolio optimization efforts mature. Conversations also focused on the company's strategic withdrawal from specific business lines and geographies, with investors evaluating the initial rationale for entering those markets. While municipal spending trends were discussed, investor focus remained primarily on execution and the company's progress toward achieving its goal of a mid-to-high 20% margin profile over the longer term.

Water. Investor interest in the data center opportunity across water names also remained elevated this week as investors continue to assess the size of the opportunity and potential impact on estimates. While companies such as XYL, VLTO, and WTS offer products tied to cooling, water treatment, reuse, and flow management, direct exposure remains relatively small today. For XYL specifically, data center revenue is approximately 1% of sales, leading most investors to view the theme as a longer-term growth opportunity rather than a meaningful near-term driver of results.

Metals & Mining

STLD. Investor inbounds increased on STLD this week following the company's earnings print. Despite margins being lighter than anticipated, price realizations were much better than expected. Investors view this as a positive read across for the sector which has raised the bar ahead of CLF and NUE earnings. On the aluminum business, some investors still believe consensus estimates are low, evidenced by ASPs coming in ~50% higher than Street estimates resulting in significantly higher revenue despite lower volumes. Investors largely gave the shipment miss a pass as a result of 84kt of production which implies the mill is already operating at ~50%.

Valuation and Key Risks

NUE. Our 12-month price target to \$275 is based on a 9.2x EV/EBITDA multiple on average FY2026-FY2028 EBITDA. Risks. 1) Higher than expected scrap costs; 2) Reductions in tariffs; 3) Increases in domestic capacity could drive downward pressure on prices; 4) Slower-than-anticipated economic growth could drive a deceleration in US steel demand. Closing Price: \$235.90

CLF. Our 12-month price target of \$10 is based on an 85% fundamental weighting and a 15% M&A based weighting. For our fundamental weighting we apply a 6.8x multiple on average FY2026-FY2028 EBITDA and results in a \$9 fundamental value. For the theoretical M&A value, we obtain a \$15 value by applying an 8.6x multiple to our EV/EBITDA valuation component, consistent with the most recent direct comparable transactions (not done by CLF) and above \$500mn in deal value. Risks include 1) Market share gains/losses; 2) Better/worse than expected pricing; 3) increased/decreased competition; 4) Deal risks. Closing Price: \$9.45

LB. We are Buy rated with a 12-month price target of \$84 based on a 23.00x multiple on our 2027 EBITDA estimate. Key downside risks include: 1) Lower Permian oil drilling activity, 2) regulatory changes for produced water disposal, 3) execution on additional commercial opportunities including data centers 4) discipline around M&A, 5) sponsorship ownership concentration, and 6) clarity around the capital returns profile. Closing Price: \$77.79

CQP. We are Sell rated on CQP with a 12-month price target of \$50 based on a 12x multiple on our 2027 EBITDA estimate. Upside risks include: 1) Upside from the SPL Expansion project, 2) more favorable financing terms for the SPL Expansion project, 3) better than expected marketing flow-through from CMI, and 4) a high-multiple roll-in from sponsor LNG. Closing Price: \$64.56

SHLS. Our 12-month price target of \$13 is based on a 20.0X P/E multiple on our Q5-Q8 EPS forecasts. Key risks include warranty issue, slower than expected demand growth, lower than expected margins, and worse than expected policy development. Closing Price: \$10.43

SEDG. Our 12-month price target of \$34 is based on a 22.5X P/E multiple on Q5-Q8 EPS. Key risks include increases in energy prices, interest rate decline, increase in inverter pricing, lower costs, and broad market acceptance of SSTs. Closing Price: \$47.88

MPC. We are Buy rated on MPC, and our 6-month, P/E (15.0x on normalized EPS) and SOTP-based price target is \$376. Key risks relate to refining margins, operational execution, and midstream earnings. Closing Price: \$315.91

APA. Our 12-month price target of \$32 is based on a target FCF yield of 13.0% on 2027/2028 estimates with \$75/\$75 per bbl Brent oil price and \$3.50/\$3.50 per MMBtu Henry Hub gas price. We apply an M&A rank of 2 for the stock with an 85% weight to a fundamental valuation of \$31 and a 15% weight to an M&A theoretical valuation of ~\$39 based on \$80/\$80 per bbl Brent oil price and \$3.75/\$3.75 per MMBtu Henry Hub gas price for 2027/2028. Key risks include operating costs, well results, commodity price volatility and government pronouncements. Closing Price: \$36.18

TLN. We value Buy rated TLN with a blended EV/EBITDA and FCF yield based valuation, and our 12-month price target of \$499 reflects a target EV/EBITDA multiple of 10.0x and FCF yield of 7.0%. Key risks for TLN include 1) Regulatory and interconnection risk, 2) lower than anticipated power prices, 3) slowdown in data center demand. Closing Price: \$377.41

CEG. We are Neutral rated on CEG with a blended P/E and FCF yield based valuation, and our 12-month price target of \$305 reflects a target P/E multiple of 21.0x and FCF yield of 5.0%. Key risks for CEG include 1) Regulatory and interconnection risk, 2) higher/lower than anticipated power prices, 3) increase/slowdown in data center demand. Closing Price: \$274.90

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DA CF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Cheniere Energy Partners and LandBridge is/are relative to the other companies in its/their coverage universe: Antero Midstream Corp., Cheniere Energy Inc., Cheniere Energy Partners, DT Midstream Inc., EagleRock Land, Energy Transfer LP, Enterprise Products Partners LP, Exxcelerate Energy Inc, Golar LNG, Hess Midstream LP, Kinder Morgan Inc., Kinetik Holdings, Kodiak Gas Services Inc., LandBridge, MPLX LP, NextDecade Corp., ONEOK Inc., Plains All American Pipeline LP, Plains GP Holdings, South Bow Corp., TC Energy Corp., Targa Resources Corp., Venture Global, WaterBridge Infrastructure, Williams Cos.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	34%	16%	65%	59%	43%

As of July 1, 2026, Goldman Sachs Global Investment Research had investment ratings on 3,104 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures**Disclosures required by United States laws and regulations**

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details, a copy of the annual compliance audit report and other relevant information and disclosures can be found at this link: <https://www.goldmansachs.com/worldwide/india/research-analyst>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken

by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

Global product; distributing entities

Goldman Sachs Global Investment Research produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal

trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
