

Unimicron

ABF GM could reach 60%

Unimicron held a local analyst meeting on 29 July. The strong 2Q GM margin expansion and rising capex are consistent with the thesis in our results flash note ([link](#)). We lift our 2026/27e outlook on faster-than-expected margin expansion, thus our PT rises from NT\$1,150 to NT\$1,225 (still based on 27.5x 2027e EPS). While no exact guidance was provided, we expect 3Q rev to be up 15% q-o-q, while GM could expand by another 6-7ppt this quarter. We found management's comments on long-term ABF margin and EMIB-T developments quite insightful, and think this should boost investors' confidence in the medium to long run.

- Strong outlook for long-term ABF GM.** Management (we believe for the first time) indicated that, given the rapid spec migration and ability to deliver value-adds to customers, ABF GM could eventually reach 60% on a recurring basis. We expect such a level to be attained by 2H27e, which could help Unimicron set a new GM record (overall company) in early 2027. The company also echoes our view that, going forward, the importance of mix improvement could outweigh like-for-like price hikes (the key margin drivers in 2Q/3Q, consistent with our view). The AI mix in ABF is rising from 60% in 1H to +70% in 2H, driven by new AI accelerator product launches. We believe these new products offer much higher ASP (at least 2-3x vs. per unit ASP) vs. the consumer grades (even after the successful like-for-like hikes), and the gap will likely widen, as substrate barriers to entry are quickly rising. According to Unimicron, a highly capable supplier such Unimicron should be well-compensated for its efforts (the company noted that even yield losses could be paid by customers).
- Remain a major player in EMIB-T.** Meanwhile, management also shared a positive outlook on EMIB-T. While it still sees cost and OSAT capacity constraints, the very attractive overall packaging cost reduction (but substantial boost in substrate content value; we estimate substrate ASP+2x vs. CoWoS) means it could soon become another key option for advanced packaging (vs. the current mainstream CoWoS). Meanwhile, the company believes it is among the three major substrate technology development partners globally. Management suggested there's a well-laid out scheme for critical equipment procurement (likely die bonders from Toray) set forth by the customer, and the company is in position to receive 1/3 of the available tools. While some may be concerned this could imply the existing high shares for ASIC could start to drop, we are positive on the company's ability to execute to meet the yield checkpoints which suggests the V9 project should be on track.

Summary Investment Thesis and Valuation

Investment Thesis

We are OW on Unimicron, given long-term positive ABF substrate demand growth and emerging technological convergence, which we think puts the company in a good position to leverage opportunities such as SLP, Rigid-flex PCBs, etc. For ABF, there is a strong content growth opportunity (~50-100%) from rising layers/areas for HPC/AI/5G chips. The company has also been increasingly prudent regarding execution and capital spending, in our view.

Valuation

Our Dec-26 PT of NT\$1,225 is based on an FY27E P/E of 27.5x, which is ~1.5 STD above the average multiple since 2018 (which excludes extremes). We believe this multiple is justified by the growth in key ASIC projects together with the GPU project ramp-up.

Key Takeaways from Unimicron 2Q26 Analyst Meeting

2Q26

- ABF rev +22% QoQ, BT -3% QoQ, HDI +14% QoQ.
- ABF/BT/HDI mix 52/9/27%.
- GM24.8% (+6ppt QoQ), mainly driven by pricing actions. Other accretive factors include higher UTR, mix improvement, and yield increase.

Capex

- Revised up capex from ~NT\$34bn to ~NT\$54bn: 80% of the capex will be dedicated to ABF substrate.
- NT\$17-18bn of the incremental portion will be for equipment for KF2 and YM2 fab equipment.

EMIB-T

- Unimicron does not view the technology as bundled with one single client or chip generation. Instead, it's one of the diversified technologies that tackles some existing problems.
- Client adoption: Unimicron expects multiple generations of chips adopting EMIB if mass production is successful, as the technology itself is quite complex to adopt.
- Capex: less than 10% of capex is invested in EMIB; less than 15% of this number is for EMIB-exclusive equipment, as Unimicron also wants to maintain capacity flexibility.
- Pricing: Unimicron's profitability is protected in pricing terms under different yield assumptions.

BT exposure

- The rapid mix drop (down by 3-5/5-10ppt QoQ/YoY) is inflated by strong ABF revenue growth.
- Unimicron might not exit BT entirely as some BT products see high GM (similar to other AI-related products) such as memory controllers.

Pricing action

- Strategy: focuses mainly on raw material price hikes globally.
- ASP improvement going forward: more on structural product mix improvement towards high-end products.

HDI

- Strategy (for both AI server HDI and optical module PCB): fulfill clients' target OOC (out-of China) demand.
- Capacity expansion: 1) upgrading existing PCB fabs, and 2) Thai production site (mass production should start from 2027e)

Investment Thesis, Valuation and Risks

Unimicron (*Overweight; Price Target: NT\$1,225.00*)

Investment Thesis

We are OW on Unimicron, given the long-term positive ABF substrate demand growth and emerging technological convergence, which we think puts the company in a good position to leverage opportunities such as SLP, Rigid-flex PCBs, etc. For ABF, there is a strong content growth opportunity (~50-100%) from rising layers/areas for HPC/AI/5G chips. The company has also been increasingly prudent regarding execution and capital spending, in our view.

Valuation

Our Dec-26 PT of NT\$1,225 is based on an FY27E P/E of 27.5x, which is ~1.5 STD above the average multiple since 2018 (which excludes extremes). We believe this multiple is justified by the growth in key ASIC projects together with the GPU project ramp-up.

Risks to Rating and Price Target

Downside risks to our rating and price target include:

- Threats from alternative packaging technologies, such as silicon interposers and 3D ICs, which could significantly reduce the value-add of substrates.
- ABF capacity expansion by Japanese/Korean peers that more than compensates for demand growth.
- Macro overhang that pressures capital investments and CE/enterprise demand. A muted smartphone outlook could adversely affect demand for SLP/BT.
- Delays in 5G mmWave pull-in demand, which could be negative for the contribution upside from BT.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s

team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of

risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
