Results and Guidance a Mixed Bag; Memory Headwinds Muted (For Now), Offset by Momentum in Broad Markets

SWKS reported solid Jun-Q results, with revenue/EPS beating consensus expectations, though the Sep-Q guide screens slightly sub-seasonal. Alongside the print, the company announced a broad reset of the QRVO merger and capital-returns cadence, with timing of the transaction pulled forward to “as early as” fiscal year-end, and the quarterly dividend eliminated (~\$430M/yr, a ~5% yield) in favor of a new \$2B repurchase authorization (through Jan ‘29), which mgmt framed as repo-first, then deleveraging and accretive M&A. Our key takeaways: (1) The fall build is intact and Dec is largely locked, with mobile guided up high-teens% Q/Q and AAPL growing well above the blended mobile ramp. Book-to-bill is >1, channel inventories are lean, and history suggests any true demand reset for AAPL (if one comes) arrives as a CQ1 mix adjustment after Dec-Q sell-through, making Mar-Q (not Dec-Q) the memory test. (2) The content story improved as the content decline at AAPL is now tracking low-teens% vs. the 20-25% originally framed in Feb ‘25, driven by volume (customer units running +20-22% Y/Y in recent quarters) and favorable model mix rather than socket recapture (cyclical uplift), though it pairs with RF complexity increasing “for the first time in many years”. We would want evidence from the next down-selection cycle before underwriting a durable content inflection at a customer that is still ~57% of revenue. (3) Broad Markets’ optical deceleration (+8% Y/Y in Jun-Q, +5% guided) is a base effect plus consumer IoT absorbing the AI DC supply squeeze. (4) Gross margin is potentially capped until the annual pricing reset, as pressure from input cost inflation continues, and mobile pricing recapture rolls into FY27 negotiations, while BM pricing actions (above-corporate GM%) fold into the mix in the interim. Net, risk/reward screens balanced, in our view, against an undemanding valuation, but with CQ1 mix-adjustment still ahead, GM% ostensibly capped until the FY27 pricing reset, and FCF negative into a ~\$2B debt raise, we prefer to stay on the sidelines. We do continue to view the QRVO acquisition favorably (see note [here](#)), as it should drive scale and diversification benefits. We adjust our estimates and establish a Dec-27 PT of \$65 (from prior Dec-26 PT of \$70).

- **Jun-Q beats on healthy AAPL sell-through and strong US Android quarter.** Jun-Q revenue came in at \$935M (-1% Q/Q, -3% Y/Y) vs. Street ~\$925M, with EPS of \$1.08 also ahead of Street (\$1.03). Mobile revenue (-2% Q/Q, -10% Y/Y) was supported by healthy AAPL sell-through (~57% of total revenue, from ~60% in Mar-Q) and strong new-product ramps at SWKS’ largest Android customer, which mgmt framed as an anomaly of that customer’s launch timing, not repeating in Sep-Q, while Asia Android declines this quarter and next. Broad Markets grew +8% Y/Y (~flat Q/Q), with Wi-Fi/DC/autos (~2/3 of BM) +15% Y/Y collectively (from +30% in Mar-Q), partially offset by a deceleration in consumer IoT. GM of 44.9% (-220bps Y/Y) landed essentially in line with Street (45.0%) as input cost pressures persist.
- **Slightly sub-seasonal Sep-Q guide fell modestly short of expectations.** Sep-Q revenue guidance of \$1,035M (at midpt) implies ~11% Q/Q growth - a touch leaner than typical low-teens%. Mobile is forecast up high-teens% Q/Q on

Summary Investment Thesis and Valuation

Investment Thesis

- Skyworks Solutions is a market leader for RF semiconductors with ~70% exposure to mobile and ~30% exposure to non-mobile end markets.
- Our Neutral thesis is based on the fact that despite Skyworks' strong financial performance, we believe the company's valuation is mostly range bound with a large amount of exposure to the mobile device market and with Apple as its largest customer (>50% of revenues).
- We see the potential for multiple expansion if the company inorganically (or organically over time) diversifies its revenue streams and/or increases its target shareholder returns in line with leading analog peers (of 100% of FCF).

Valuation

Our Dec-27 PT of \$65 (from prior Dec-26 PT of \$70) is based on a ~12-13x multiple applied to our CY28 EPS estimate of \$5.08. The ~12-13x multiple is in-line with pure-play wireless semiconductor solutions peers.

seasonal new-product ramps, with AAPL expected to grow well above the blended rate for Mobile, partially offset by Android. BM is projected up ~5% Y/Y (~flat Q/Q) with growth still supply-gated. GM guidance of 44.5% steps down ~40bps Q/Q on the seasonal mobile mix shift and persistent input-cost inflation.

- **Adjusting estimates and establishing Dec-27 PT of \$65.** We establish a Dec-27 PT of \$65 (from prior Dec-26 PT of \$70), which is based on a ~12-13x multiple applied to our CY28 EPS estimate of \$5.08.

Balance Sheet and Cash Flow

Skyworks exited F3Q26 with \$814M of cash/cash equivalents. Cash flow from operations was \$70M in F3Q26, while capex was \$87M in the quarter. Skyworks generated -\$17M in FCF in F3Q26. Inventories rose to \$1.02B from \$0.89B in the prior quarter.

Adjusting Forward Estimates

Our CY26 revenue / EPS estimates move to \$4.01B/\$4.87 from \$4.05B/\$5.15, and we now forecast CY27 and CY28 revenue / EPS of \$4.26B/\$4.95 and \$4.43B/\$5.08, respectively.

Investment Thesis, Valuation and Risks

Skyworks Solutions *(Neutral; Price Target: \$65.00)*

Investment Thesis

Skyworks Solutions is a market leader in the RF semiconductor market. We believe the company is on pace to drive steady GM/OPM expansion in the next few years. Furthermore, the company's Broad Markets segment should be able to grow even faster than its handset-focused businesses longer term on RF content increases for embedded/IoT applications. Despite strong financial performance, we believe the company's valuation is largely range bound with outsized exposure to the mobile device market. We see the potential for multiple expansion should the company inorganically (or organically over time) diversify its revenue streams and/or increase its target shareholder returns in line with leading analog peers (of 100% of FCF). With expectations of upside in shares in line with that of our broader coverage universe, we remain Neutral SWKS.

Valuation

Our Dec-27 PT of \$65 (from prior Dec-26 PT of \$70) is based on a ~12-13x multiple applied to our CY28 EPS estimate of \$5.08. The ~12-13x multiple is in-line with pure-play wireless semiconductor solutions peers.

Risks to Rating and Price Target

A weaker or stronger than expected macro could provide downside/upside risks to our estimates and rating. Should the macroeconomic environment trend be worse or better than expected, end-user demand for products made by Skyworks' customers could be below or above the company's and our expectations, putting our estimates and rating at risk.

Competition in focus markets could lead to share loss and/or pricing pressure. Any inability to effectively compete in the RF front-end market vs. competitors could adversely affect the company's growth and poses a downside risk to Skyworks' market share and/or could lead to ASP declines.

Market share declines or gains made by major customers. Apple (56% of FY20 revenue) and Samsung are significant customers of Skyworks. Should Apple and/or Samsung, which drive high RF dollar, lose or gain market share, our estimates could have downside or upside risks.

M&A could be positive for the stock. We believe Skyworks could be a participant in M&A should it aim to increase end-market/customer diversification, or Skyworks could be perceived as an attractive asset in an acquisitive environment. In either case, M&A activity involving Skyworks would likely provide upside to the stock, in our view.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.
