

MORTGAGE & STRUCTURED PRODUCTS TRADER

Consumer credit holds, sentiment splits

Agency MBS: Prefer GN II/FN 4.0s swap over the GN II/FN 4.5s swap

- We find the GN II/FN 4.0s swap offers better relative value vs. the GN II/FN 4.5s swap, within the Ginnie Mae (GN) and Fannie Mae (FN) complexes.
- In recent months, the GN II/FN 4.5s swap has benefited from a higher share of refinance loans in recent GN II 4.5s issuance vs. FN 4.5s issuance. However, the mortgage rate back-up and seasonal increase in purchase issuance could change this trend in the coming months.
- We believe the larger deliverable float of recently produced GN II 4.5s compared to FN 4.5s could exert downside pressure on the swap, especially vs. 4.0s where the size of the floats are more comparable between GNs and conventionals.

RMBS: Lower prepayment risk driving prime jumbo outperformance

- The OAS differential of prime jumbo seniors relative to same-coupon FN TBAs has tightened in recent months, driven by the back up in mortgage rates. Current differential is in line with fair value adjusted for collateral rate incentive.
- If mortgage rates hold steady, rising GWACs on future prime jumbo deal issuance could drive the OAS/price differential vs. TBAs to tighten further.

ABS: Consumer credit is holding up, despite falling sentiment

- Recent consumer sentiment indicators have been mixed - the University of Michigan Sentiment Index collapsed to a record low, as high gasoline prices and rising inflation weighed on personal finances, while the Conference Board index remained resilient anchored by a stable “low-hire, low-fire” labor market.
- Philadelphia Fed’s LIFE survey data revealed a widening gap in financial security, with higher-income households reporting significant improvements in making ends meet while lower-income segments remain pressured, signaling a potential widening between prime and non-prime delinquency rates within ABS.
- Despite the sentiment trough, consumer ABS delinquencies remain remarkably insulated and track seasonal norms; we maintain that the threshold for energy price driven credit deterioration remains high.

Agency MBS

Reracking the GN belly: Prefer owning GN II/FN 4.0s swap over GN II/FN 4.5s swap

Performance across the belly coupon GN II/FN swaps has been mixed this year. While the GN II/FN 3.5s and 4.0s swaps remain deeply negative, the GN II/FN 4.5s swap has rapidly appreciated to around 6 ticks currently from a low of -12 ticks in January (Exhibit 1). Interestingly, the swap price turned around largely around the same time when GN II 4.5s TBA began trading to a shorter effective duration vs. the FN 4.5s TBA (Exhibit 2). We believe this may have been due to the decline in mortgage rates and a greater increase in the share of refinance loans in the GN float vs. the conventional float (Exhibit 3). As we have noted previously, the weighted average loan age (WALA) ramps for refinance loans are much steeper than that for purchase loans. However, following the recent back-up in mortgage rates as well as the expected increase in purchase issuance during the spring/summer months, we expect GN issuance to migrate towards a greater share of purchase loans. The flatter purchase ramps could once again cause GN II 4.5s to trade with a longer duration vs. FN 4.5s. Finally, we believe the relative sizes of the deliverable floats should negatively impact GN II 4.5s vs. FN 4.5s (Exhibit 4). Interestingly, the size of the 2025-26 vintage float for GN II 4.0s is comparable to that in FN 4.0s (after excluding specified pools); however, the GN II 4.5s 2025-26 vintage float is much larger than the FN 4.5s 2025-26 vintage float. Based on these factors, we expect downside pressure for the GN II/FN 4.5s swap to emerge in the coming months. We expect the price difference between the GN II/FN 4.5s swap and the GN II/FN 4.0s swap to narrow and suggest shorting the GN II/FN 4.5s swap vs. owning the GN II/FN 4.0s swap.

Exhibit 1: Among the belly coupon swaps, the GN II/FN 4.5s swap has diverged from the GN II/FN 3.5s and 4.0s swaps over the past few months

Source: Yield Book, Goldman Sachs Global Investment Research

Exhibit 2: The price of the GN II/FN 4.5s swap appreciated just as GN TBAs traded to a shorter duration vs FN TBAs

Source: Yield Book, Goldman Sachs Global Investment Research

Exhibit 3: The share of refinance loans in recent GN II 4.5s issuance has exceeded that in FN 4.5s

Source: eMBS, Goldman Sachs Global Investment Research

Exhibit 4: The size of the outstanding float is most comparable across GNs and conventionals (UMBS) in the 4.0% coupon

Conventional float excludes balances locked in CMOs, held by the Fed or trade as specified pools. GN float is based on the GN II Multi pools and excludes balances locked in CMOs or held by the Fed; vintage for GN defined as issuance year.

RMBS

Prime Jumbo RMBS: Recent outperformance driven by dampened prepayment risk

Prime jumbo RMBS has outperformed over recent weeks, with OAS differentials between super-senior pass-throughs with a 5.5% coupon (SSNR PT 5.5s) and FN 5.5s TBA tightening to levels last seen towards the end of 2025. The tightening was likely driven by dampened prepayment risk, as mortgage rates backed up over the past three months. Prime jumbo issuance continues to remain healthy year-to-date, highlighting the strong demand for the deal type. As the GWAC of future prime jumbo deals increase and if mortgage rates hold steady, we believe the OAS differentials could tighten further.

OAS differentials have tightened in recent weeks, likely reflecting declining

refinance incentives: Prime jumbo SSNR PT spreads have tightened relative to same-coupon FN TBAs in recent weeks, based on Yield Book OAS for new issue tranches that are priced closest to par dollar price (Exhibit 5). The latest OAS differential of around 20bp between SSNR PT 5.5s and FN 5.5s TBA is comparable to the differential in early December 2025. This recent tightening was likely driven by the uptick in mortgage rates and a corresponding decline in prepayment risk. Based on the relationship between the OAS differential on closest-to-par SSNR PT 5.5s vs TBA FN 5.5s and the corresponding collateral's rate incentive, we find that the current OAS differential is consistent with the historically observed relationship (Exhibit 6). If mortgage rates remain around current levels, the gross weighted average coupons (GWACs) of future deal issuance will begin to climb higher. This should bring the collateral closer to being at-the-money and can help compress the OAS/price differential vs. TBA, in our view.

Exhibit 5: Treasury OAS for prime jumbo super senior PT 5.5s has tightened as mortgage rates moved higher over the past three months

Exhibit 6: Recent OAS differentials between prime jumbo SSNRs and FN TBAs appear fair, adjusted for collateral rate incentive

Polynomial best-fit between the collateral rate incentive and the OAS differential between the closest-to-par prime jumbo SSNR PT 5.5s and FN 5.5s TBA

Source: Intex, Yield Book, Goldman Sachs FICC & Equities, Goldman Sachs Global Investment Research

Execution arb estimates have continued to decline: Earlier this year, we noted that the execution economics of prime jumbo RMBS deals have drifted closer towards par and more in line with our estimate of fair levels. We estimate that this trend has persisted for the recently priced deals as well (Exhibit 7). Overall pricing is closer to the FN 5.5s TBA than FN 6.0s TBA. A rise in GWACs on future prime jumbo deals, coupled with tightening spreads vs. TBAs, could lead to improved execution economics (Exhibit 8).

Exhibit 7: Prime Jumbo deal arb has continued to decline in line with lower GWACs

Exhibit 8: Deal prices are trading below fair value estimates, stemming from negative rate incentives

Fair value estimate calculated based on the Optimal Blue 30-year conforming fixed rate and closest-to-par FN TBA as of deal pricing; additional pricing parameters are calibrated to sample deal pricing

Source: Bloomberg, Intex, Goldman Sach Global Investment Research

Monthly issuance volumes are broadly comparable to 2025 trends: Prime jumbo RMBS issuance activity remains healthy, with year-to-date issuance (through May 28th) surpassing \$16 billion. On average, monthly issuance volumes are on track to slightly outpace 2025 volumes (Exhibit 9). The trends remain the same even with the inclusion of prime agency-eligible deals. We retain our forecast for total prime issuance (jumbo+agency eligible) to reach \$52 billion this year (Exhibit 10).

Exhibit 9: Prime jumbo issuance volume has remained healthy throughout 2026

Source: Bloomberg, Intex, Goldman Sachs Global Investment Research

Exhibit 10: Total prime issuance is also largely tracking 2025 volumes

Prime RMBS issuance volumes by pricing calendar year and month; prime deals include prime jumbo and agency-eligible collateral

Note: Issuance estimate as of May 28, 2026.

Source: Bloomberg, Intex, Goldman Sachs Global Investment Research

Prepays risks subside following the recent back-up in mortgage rates: Prime jumbo prepaes have largely tracked 30-year mortgage rates in recent months. Prepaes spiked in April, corresponding to the mortgage rate declines in January and February. However, the sharp reversal in rates since then has resulted in prepaes subsequently dropping in May (Exhibit 11). Initial reporting indicates that the prepay decline is observable across GWAC buckets (Exhibit 12).

Exhibit 11: Prepaes slowed in May as mortgage rates remain relatively high

ABS

Consumer credit holding up, despite falling sentiment

As the conflict in the Middle East crosses the three month mark and hopes for a resolution continue to swirl, consumers are increasingly feeling the impact of the oil disruption. Average gasoline prices are hovering near \$4.40 a gallon while both headline

and core inflation have begun to tick back upwards, moving the market to assign a roughly 50% probability to the Fed hiking once in 2026. Analysis of consumer sentiment data from the University of Michigan, the Conference Board, and the Philadelphia Fed shows that even though aggregate consumer balance sheets remain resilient, consumers are somewhat pessimistic about the economy, with feelings of financial fragility intensifying in the lower income brackets.

The University of Michigan Consumer Sentiment Index fell to a record low of 44.8 in its final May 2026 reading, down from 49.8 in April (Exhibit 13). This represents the third consecutive monthly decline and sits below the previous historical trough of June 2022. Unsurprisingly, the trailing three-month average of respondents citing high prices as the primary factor eroding their personal finances reached 48%, the highest share on record (again, Exhibit 13). Notably, while younger and lower income consumers are reporting lower sentiment than older and higher income consumers (Exhibit 14), the differences reported by the University of Michigan are relatively minimal.

Exhibit 13: The University of Michigan Consumer Sentiment Index fell to a new record low in May, with an average of 48% of consumers citing high prices as eroding their financial wellbeing

University of Michigan Consumer sentiment index (left panel), 3 month trailing average share of consumers who stated high prices were eroding their personal finances (right panel)

Source: University of Michigan, Goldman Sachs Global Investment Research

Exhibit 14: Consumer sentiment is worse for younger and lower income consumers, but only marginally so

Consumer sentiment by income tercile (left panel) and age bracket (right panel)

Source: University of Michigan, Goldman Sachs Global Investment Research

In contrast, the Conference Board Consumer Confidence Index showed relative stability,

edging down only slightly to 93.1 in May from 93.8 in April (Exhibit 15). This read represents the 40th percentile of the index since 1980. Although this report is not very optimistic, it is still more positive than the record lows reported by the university of Michigan. Why the divergence? The Conference Board Consumer Confidence Index is more closely tied to labor market conditions, which have remained in a “low-hire, low-fire” equilibrium. This contrasts with the University of Michigan data, which is more closely tied to consumers personal finances. In general, the consumer confidence index is a better measure of big-ticket purchases with long-payoff periods such as housing, while the sentiment indicators are a better indicator of general consumer spending.

Exhibit 15: Conference Board data came in at the 40th percentile since 1980, far from the record lows of the University of Michigan survey

Source: Conference Board, Goldman Sachs Global Investment Research

While weak consumer sentiment can be driven by multiple factors, the Philadelphia Fed’s Labor, Income, Finances, and Expectations (LIFE) survey queries respondents with a focus on their financial situation, much like the University of Michigan survey. The LIFE survey gathers information from roughly 5,000 individuals each quarter, with the first survey conducted in January 2023. The most recent survey for April 2026 was conducted between March 27th and April 9th, covering a period where national gasoline prices averaged over \$4 a gallon. We focus on the question around how concerned respondents are regarding their ability to make ends meet. Relative to a year ago, nearly every demographic reported less concern around making ends meet, with nearly every change being statistically significant. However, there was a notable dispersion across income segments (Exhibit 16). Higher income consumers (>\$150k annual income) reported the greatest decline in concern over the 6-month and 12-month horizons. On the other hand, middle- and lower-income consumers remain stressed and the share of borrowers reporting concerns showed much smaller declines. In the ABS world, this divergence could translate into further widening in the spread between delinquency rates for prime and non-prime borrowers.

Exhibit 16: Higher income consumers have experienced a much greater improvement in their financial situation vs. lower income consumers

Percentage of Respondents Concerned About Making Ends Meet in 0–6 Months (left panel) and 7–12 months (right panel)

Source: Federal Reserve Bank of Philadelphia Consumer Finance Institute LIFE Survey Data, Goldman Sachs Global Investment Research

Despite the rocky sentiment, delinquencies within consumer ABS have been largely unfazed since the start of the conflict. Tax refund season brought with it relatively normal seasonal drops in delinquencies across prime auto, subprime auto, and consumer unsecured (Exhibit 17). Given the direct exposure to the already pressured subprime consumer, as well as the linkages between rising oil prices and the cost burden of transportation, subprime auto is likely the sector most likely to show impact from the conflict. Consumer unsecured deals generally average out to “near prime” credit scores, with different platforms targeting different parts of the credit score spectrum. Using a sample of 142 deals originated prior to the start of 2024 who have already reported data covering delinquency patterns in April, delinquencies have remained in line with pre-existing patterns (Exhibit 18). It remains our base case that the bar is high for rising fuel prices to translate directly to higher delinquencies.

Exhibit 17: With tax refund season fully in the rearview, seasonal drops in delinquencies have largely been in line with historical norms

Relative Value Views

Exhibit 20: Relative value views

Relative Value views by sector		
Agency MBS and CMBS	MBS Basis	Neutral: Spreads are likely to move sideways near-term as support from GSE backstop will be offset by seasonal increase in supply from originators. Convexity selling can drive underperformance in further rate back-up scenario. Longer-term: Spreads likely to end the year wider than YTD average as market focus shifts to 2027 supply-demand technicals and the lack of smaller GSE backstop.
	Coupon stack	Prefer FN 5.0s. Premium coupons (FN 6.0s-6.5s) are trading tighter vs. March wides and have greater extension risk.
	Specified pools	TBAs likely to outperform pools near-term, although specified pools could outperform longer-term due to worsening convexity profile of TBA and scarcity value from GSE retention. Prefer middle loan-balance (175k-275k) stories as they are most insulated from prepay/policy risks.
	GNs	Modest underweight: Seasonals could boost GN supply more than conventional supply.
	CMO floaters	DMs in line with March wides for 6.0% and 6.5% cap floaters should provide an opportunity to own floating rate exposure.
	Agency CMBS	Spreads likely to hold steady near-term on healthy demand for asset swap into uncapped floaters, although expect modest widening pressure during 2H due to supply seasonals
	Agency MBS vs. IG	Prefer MBS vs IG: MBS offers attractive diversification benefits
Non-agency RMBS	Non-QM	Overweight non-QM AAAs vs MBS basis: Expect spread differentials to narrow to around 5-10bp, driven by better convexity profile and strong investor demand for non-QM. Prefer up-in-quality exposure: BB and B credit curve is extremely flat.
	Prime Jumbo	Offers wider spreads vs higher coupons TBAs, should outperform TBAs in a rate back-up scenario.
	CES	We prefer CES AAAs vs non-QM AAA, and expect CES spreads to trade tighter than non-QM due to its more favorable convexity profile.
	RPL	Neutral RPL AAAs, as spreads are comparable to non-QM. RPLs are attractive in a rate rally scenario due to its favorable convexity profile
ABS	Prime Auto	Neutral: Spreads are largely insulated from geopolitical and commodities induced volatility, and outperform during such events. The BBB tranches offer compelling spreads with thick enough credit enhancement.
	Subprime Auto	Underweight at a sector level: High interest rates and inflated auto prices have increased delinquencies and losses. We advocate an up-in-quality positioning with careful manager selection.
	Consumer Unsecured	Overweight vs subprime auto: Heavy fintech participation and alternative underwriting differentiate the sector. We favor the middle to higher-rated tranches (AA, A, BBB)
	Home Improvement	Overweight vs. consumer unsecured: Home improvement bonds have historically priced similarly to consumer unsecured deals while reporting significantly better collateral performance.
	Solar	Underweight the sector on performance concerns. We prefer solar lease deals over solar loans.
	Aircraft	Overweight aircraft ABS relative to subprime auto ABS at the A-rated tranches. Strong travel demand and favorable supply and demand imbalances keep aircraft valuations well supported.
	Digital infrastructure ABS/CMBS	Neutral at a sector level. In general, prefer hyperscaler exposure. Datacenter ABS: Among the widest A-rated spread in ABS, with wide dispersion across trusts. We favor trusts with long track record, high DSCRs and long lease terms. Fiber ABS: Less exposed to AI risk, lower dispersion across issuers - trades tighter than datacenter ABS. Datacenter CMBS: Wider spreads vs. datacenter ABS, although smaller market and less diversification. Diversification is the best way to hedge maturity default risk.

Disclosure Appendix

Reg AC

We, Arun Manohar, Ben Shumway and Neth Karunamuni, hereby certify that all of the views expressed in this report accurately reflect our personal views, which have not been influenced by considerations of the firm's business or client relationships.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

Contributing Authors: Arun Manohar Goldman Sachs & Co. LLC, Ben Shumway Goldman Sachs & Co. LLC, Neth Karunamuni Goldman Sachs & Co. LLC.

Unless otherwise stated, the individuals listed in the Contributing Authors disclosure of this report are analysts in Goldman Sachs' Global Investment Research division.

Disclosures

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with a subject company, public appearances and trading in securities covered by the analysts.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of Global Investment Research of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at <https://www.gs.com/worldwide/brazil/area/gir/index.html>. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 10th Floor, Ascent-Worli, Sudam Kalu Ahire Marg, Worli, Mumbai-400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Investment in securities market are subject to market risks. Read all the related documents carefully before investing. Registration granted by SEBI and certification from NISM in no way guarantee performance of the intermediary or provide any assurance of returns to investors. Goldman Sachs (India) Securities Private Limited compliance officer and investor grievance contact details can be found at: <https://www.goldmansachs.com/worldwide/india/documents/Grievance-Redressal-and-Escalation-Matrix.pdf>, and a copy of the annual audit compliance report can be found at this link: <https://publishing.gs.com/content/site/india-annual-compliance-report.html>. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: <https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html>. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered

companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at <https://www.gs.com/disclosures/europeanpolicy.html> which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan Type II Financial Instruments Firms Association, and Investment Management Association of Japan. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research within the European Economic Area.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is focused on investment themes across markets, industries and sectors. It does not attempt to distinguish between the prospects or performance of, or provide analysis of, individual companies within any industry or sector we describe.

Any trading recommendation in this research relating to an equity or credit security or securities within an industry or sector is reflective of the investment theme being discussed and is not a recommendation of any such security in isolation.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g.,

marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
