Demand: Rising industrial profits and positive PPI; Prefer tier 1 cities

We are turning more positive on the China property sector, due to 1) increased housing demand visibility from rising industrial profits (AI supply chain) and positive PPI (our strategy note: [Green shoots emerging?](#)); 2) positive wealth effect from companies with rising profitability/share prices, and mapping of their headquarters indicates a strong concentration in Beijing and Shanghai; 3) falling vacancy rate in tier 1 cities suburb districts, suggesting shadow inventory has been digested. In 2026, we expect property prices in tier 1 cities to stabilize (previously -10%) and in tier 2 cities to still decline by 5% (previously -10%). In 2027, we expect prices in tier 1 cities to increase by 2% and in tier 2 cities to stabilize (previously -5%). We upgrade **COLI** (added to [Key Call list](#)), **BEKE**, **Jinmao** and **CMSK** to Buy on their high exposure to tier 1 cities. We also like **CR Land** for its high tier 1 cities exposure and value unlock from asset securitization.

Demand: Mapping the headquarters of emerging sectors/companies

The surge of AI-related materials, government anti-involution measures and export growth caused industrial profits to grow by 15% YoY in 1Q26 with positive PPI. Historically, industrial profits have a 0.63 correlation to tier 1 cities property price. Among sectors, computer, communication, electronic equipment, non-ferrous metals and chemical sectors' profit surged the most and related sectors' share prices outperformed. Those companies' headquarters are located in Beijing, Shanghai, Suzhou and Dongguan, which is in line with a stronger secondary transaction volume YTD than other cities. This makes us think the recovery this time could be different and more driven by improved profitability at industrial enterprises rather than policy previously.

Supply: Falling vacancy rate in tier 1 cities suburb districts vs three years ago

Apart from falling secondary listing in tier 1 cities, vacancy rate in tier 1 cities suburb districts improved compared to three years ago (2023), which we view as positive. Looking ahead, we expect a declining supply for commodity housing and social housing due to substantial decline in new home starts/land sales during the past three years.

Valuation: Further 30% upside potential

Despite recent share outperformance, we see potential for further 30% share price upside if the sector P/BV reverts to its 15-year average level of 0.85x, vs current trading P/BV at 0.66x. As the market recovery is more confined to tier 1 cities, we prefer **COLI**, **CMSK**, **Jinmao** and **BEKE** for high tier 1 cities exposure (~41% vs peer group below 25%). We raise our price targets for CR Land and C&D and maintain our Buy ratings.

WHAT IS DIFFERENT THIS TIME?

Breaking the negative feedback loop

Over the past five years, there have been false alarms on property recovery, due to a weak job market, enterprises' difficulties to make profit, and rising supply from shadow inventory (vacant property). Since there is a long supply chain related to the property sector, the decline in property sales/price acts as a further drag on industrial enterprise (IE) demand/profitability, i.e. more layoffs and lower income expectations, and hence is negative to housing demand. This causes a negative feedback loop and might explain why IE profit has a good correlation with tier 1 cities property price at 0.63 correlation. See [Figure 2](#) - [Figure 4](#), and our strategy note on [A-share Q126 earnings review](#).

Which sectors drive industrial profit? AI-related

However, it seems the negative feedback loop is unwinding this year. In 1Q26, industrial enterprise profit grew by 15% YoY with rising PPI (Figure 3). Breaking down the industrial enterprise by sectors, the strongest profit growth is in AI-related sectors, i.e. manufacture of computers, communication and other electronic equipment. This sub-sector accounts for 13% of industrial profit, and grew by 125% YoY in 1Q26. Next are non-ferrous metals smelting & pressing, and chemical materials & products, due to rise in commodity prices, capacity reduction and government anti-involution campaign. If we break down the 15% growth in industrial profit, 8.2ppt is contributed by computer, communication & other electronic equipment (i.e. AI-related), 5.2ppt is from non-ferrous metal smelting & pressing, and 2.8ppt is from chemical materials & products. In addition, in April 2026, export growth accelerated to 14% YoY, and shipments of tech exports expanded 0.5% MoM (Figure 6). The continued strength in tech exports likely signals that China is becoming increasingly integrated into the AI supply chain.

Where are they based? Beijing and Shanghai

Furthermore, we look at the stock market to see which companies outperformed the most and where they are located. There are 514 stocks with over Rmb10bn market cap whose share prices have increased by over 50% in the past 12 months. Most of them are located in Beijing, Shanghai and Shenzhen, followed by Suzhou and Chengdu. This is due to more AI or related supply chain companies being located in Beijing and Shanghai, which echoes with stronger secondary transactions in Beijing and Shanghai.

Figure 7: Beijing had 43 listed companies of Rmb10bn+ market cap with one-year return over 50%, followed by 50 in Shanghai and 48 in Shenzhen

Improved vacancy rate for T1 cities suburb districts

In the past five-year downcycle, inventory has been underestimated by the market, due to a rise in secondary listings and rental listings from vacant properties. In particular, the vacancy rate in suburb districts in tier 1 cities was higher than city average due to more new home completions in those districts and speculative demand in the past. Those properties were resupplied to the rental or secondary market in 2022-25, which added to downward pressure in rental and property prices.

Our take

In April 2026, we have seen an improvement in vacancy rate in those districts for four tier 1 cities and Hangzhou, see [Figure 8](#). We view this positively, as this means less supply shock to the secondary/rental market in future, i.e. a support to property/rental prices.

We attribute the improvement in vacancy rate to: 1) decline in new home completion in those districts over the past 1-2 years, 2) those vacant properties have been digested through rental or secondary transactions over the years. Looking ahead, we expect the supply from new home, secondary home, rental housing and government social housing should continue to decline, due to declining land sale, new starts and also the government's reduction of new build of social housing.

Methodology

We collected the secondary listing data at individual districts among the five cities from property portals in June 2023 and April 2026. We collected the data for both total secondary listing and bare shell listing, and use the % of bare shell listing divided by total listing as a proxy for vacancy rate, as bare shell properties must be vacant. The April 2026 data showed a decline of 0.6-10.1ppt of vacant properties in suburban districts across tier 1 cities and Hangzhou, compared to June 2023 data.

UPGRADING SECTOR FORECAST 2026-2027

Raise 2026/27E property sales GFA by 6/12%

Based on the discussion above and recent recovery in secondary transactions in tier 1 cities, we expect tier 1 cities to be the first to see price stabilization. If the trend continues, we would expect tier 2 cities to follow. Hence, this would result in a narrowing national sales decline in 2026E and a stabilization in 2027E.

- **Property price:** We expect tier 1 cities to be flat in 2026E (previous: -10%) and to grow by 2% YoY in 2027E (previous: -5%). For tier 2 cities, we expect property price to still decline by 5% in 2026E (previous: -10%) and flat in 2027E (previous: -5%).
- **National property sales and top-100 developers' sales:** We expect national property sales to decline by 3%/ 7% YoY in GFA/value terms in 2026E, a narrower decline vs 2025, due to recent improvement in new home and secondary home transactions in tier 1 cities. We expect top 100 developers' gross property sales to decline by 10% in 2026E and increase by 5% in 2027E, due to market consolidation.
- **Property new starts:** Similar to new home sales, we expect national new starts will decline less in 2026E vs 2025, and stabilize in 2027E. If new home sales continue to improve in tier 1 cities, we would expect developers to increase land acquisition and new starts in tier 1 cities. Also, national new starts is only 55% of new home sales level, which we do not think is sustainable. Hence, we see upside to new starts in 2028E or beyond, after national property price stabilizes.
- **Property completions:** We expect completions to continue to be weak due to over 20% YoY decline per annum in 2023-25 new starts. We expect 2026/27E completions to decline by 25%/15% YoY respectively.
- **Property investment:** We expect a 4% YoY fall in property investment in 2026E and flattish in 2027E, to reflect our forecast of new start declines in 2026E and stabilized new starts in 2027E.
- **Secondary market:** We expect a stronger recovery in secondary market than in new home transactions as the market recovery is more driven in tier 1 cities, where secondary transactions are more dominant. In 2026E, we expect +7% YoY growth in secondary transactions in value terms, driven by 10% growth in GFA terms but offset by 3% decline in secondary property price. In 2027, we expect secondary transaction value to grow by 8%, driven by 6% growth in GFA and 2% ASP growth.

Destocking to continue in 2026, to potentially end by February 2027

Based on our updated sector forecast and inventory model, we expect national inventory destocking to end by February 2027 (previously mid-2027). We expect national property prices by then to have stabilised. Among cities, we expect tier 1 cities have stabilized already, and tier 2 cities property price may stabilize in 2H26.

Stock Pick Criteria

Conclusion

As we discussed above in the mapping of the companies with rising profitability, we expect the market recovery is more confined in tier 1 cities. Hence, we expect divergent fundamentals across developers, depending on 1) saleable resources in tier 1 cities (incl. Hong Kong), 2) land banking intensity in 2025, and 3) whether the companies acquired land bank in tier 1 cities (incl. Hong Kong) in 2025. Based on these criteria, **COLI, CMSK, CR Land** and **Jinmao** stand out to us due to 1) more saleable resources in tier 1 cities, 2) more aggressive land banking in 2025, and 3) a higher % of land acquisition in tier 1 cities.

Saleable resources in tier 1 cities

Among developers, CR Land, COLI, Yuexiu Property and CMSK have the highest exposure in tier 1 cities (incl. Hong Kong) at 46-57% exposure in 2026 saleable resources by value. On the other hand, C&D, Greentown China, Poly Developments, Longfor and Seazen have lower exposure in tier 1 cities.

Figure 24: CR Land, COLI, Yuexiu and CMSK have 46-57% of saleable resources in tier 1 cities in 2026

Source: Company data, UBS estimates. Note: saleable resources are based on gross value basis, except Poly Developments, Yuexiu Property and Seazen based on gross GFA. Tier 1 cities include Beijing, Shanghai, Shenzhen, Guangzhou and Hong Kong.

Land banking intensity in 2025

We believe most developers undertook destocking in 2025 due to the weak property market in 2H25, evidenced by the fact that developers replenished less than their contract sales, with the exception of C&D. In addition, CMSK, COLI and Greentown China have been relatively more active in land acquisition, with saleable resources to contract sales at 0.90-0.95x.

Figure 25: Most developers were destocking in 2025, except for C&D

Source: Company data, UBS estimates. Note: Ranked by saleable resources to contract sales ratio.

However, we note that most developers (except for Yuexiu Property and Longfor) spent more on land acquisition in 2025 vs 2024, due to the recovery in the property market in 1Q25. Among developers, CMSK, Jinmao and COLI were more aggressive in land banking, with 33-62% YoY in 2025.

Figure 26: Major developers' land acquisitions grew by 25% YoY in 2025...

Source: Company data. Note: Ranked by 2025 land acquisition growth.

Were they acquiring land in tier 1 cities?

Amid a weak property market, developers appear to be becoming more prudent in their investments, focusing on tier 1 cities (incl. Hong Kong) in terms of land acquisition. On average, 57% of total land acquisition in 2025 was in tier 1 cities (incl. Hong Kong). Among developers, Yuexiu Property, COLI, CR Land, Jinmao and Longfor were more focused on tier 1 cities, with 61-77% of investments in tier 1 cities (incl. Hong Kong).

Figure 27: ...and on average they spent 57% in tier 1 cities

Rating, PT and earnings estimates changes

COLI: raise PT from HK\$13.80 to HK\$25.00; upgrade from Neutral to Buy

We believe this round of recovery will benefit COLI, as the company had a high exposure in tier 1 cities (incl. Hong Kong) at 50% by 2025 contract sales. In 2026, COLI prepared saleable resources of Rmb600bn, among which 50% was in tier 1 cities (incl. Hong Kong). Therefore, we revise up 2026E contract sales forecast to 10% YoY growth and 2027E to 5%, vs previously -10% decline, and expect a flat contract sales in 2028E. As we expect property price to stabilize in 2026E in tier 1 cities, we also raise 2026-28E gross profit margin to 15.5-18.5%, vs previously 14.0%. Hence, we revise up our 2026-28E earnings by 14-111% to Rmb11.7-16.4bn, and 2026-28E BVPS to Rmb36.1-37.8. Our 2027-28E earnings estimates are 7-23% above consensus.

BEKE ADS: raise PT from US\$18.00 to US\$23.00; upgrade from Neutral to Buy

BEKE H: raise PT from HK\$47.50 to HK\$60.00; upgrade from Neutral to Buy

Since the market recovery is led by the secondary market and by tier 1 cities, we believe BEKE will be the top beneficiary due to its agency business in both the primary and the secondary market and high exposure to tier 1 cities (~40% by secondary GTV). Therefore, we lift BEKE 2026-28E secondary GTV by 8-13% and primary GTV by 10-17%, and raise 2026-28E revenue by 7-11%. As a result, we revise up 2026-28E adjusted net profit (non-GAAP) by 23-30% to Rmb7.1-8.7bn. Our estimates are now 5-13% above Visible Alpha consensus of Rmb6.4-8.2bn.

We raise BEKE ADS price target by 28% from US\$18.00 to US\$23.00, in line with earnings revision. Our new PT for BEKE ADS of US\$23.00 is based on 23.5x 2026E P/E (unchanged) and BEKE H-share (2423.HK) PT of HK\$60.00 is derived from our ADS PT using a 3:1 conversion ratio and USD/HKD forex rate of 7.8.

Jinmao: raise PT from HK\$1.50 to HK\$2.30; upgrade from Neutral to Buy

We also like Jinmao on its high exposure to tier 1 cities. In 2025, Jinmao acquired Rmb16bn land in value, of which 59% is based in Beijing and Shanghai. We raise our 2026E contract sales growth from 10% YoY to 15% YoY. As we expect property prices to stabilize in 2026E in tier 1 cities, we also raise 2026-28E gross profit margin to 16.9-18.7%, vs previously 14.2-15.8%. Hence, we revise up our 2027-28E earnings by 42-77% to Rmb1.5-2.0bn, and 2026-28E BVPS to Rmb2.85-3.00. Our 2027-28E earnings estimates are 0-22% above consensus. Therefore, we raise our price target for Jinmao by 53% to HK\$2.30, based on 0.69x 2026E PB, close to its 10-year historical average of 0.65x.

CMSK: raise PT from Rmb9.80 to Rmb12.00; upgrade from Neutral to Buy

CMSK was the most active developer in land banking among our coverage, and its land acquisition in attributable value went up 62% in 2025. In addition, we estimate 46% of its Rmb340bn saleable resources in 2026 are located in tier 1 cities. We expect CMSK to ride on the recovery in tier 1 cities and forecast 10% YoY growth of 2026E contract sales, vs previously -10%. We also revise up gross margins to 13.9-16.3% in 2026-28E, translating to overall net income of Rmb1.2-3.5bn for 2026-28E. We cut earnings to reflect the large earnings decline in 2025 due to inventory impairment, but our 2026-28E earnings actually represent a growth of 22-62% YoY. Our 2027-28E earnings estimates are 21-29% above consensus. Hence, we raise our PT by 22% to Rmb12.00, based on 1.1x 2026E P/BV (unchanged), close to its 10-year historical average of 1.1x.

CR Land: raise PT from HK\$36.00 to HK\$45.00; Maintain Buy

We continue to like CR Land on its business transformation to asset manager and less drag from development business. In 2026, CR Land will launch saleable resources of over Rmb450bn, of which 57% located in tier 1 cities (incl. Hong Kong). As we expect property prices to stabilize in 2026E in tier 1 cities, we raise CR Land's 2026-28E development property gross margin to 15.5-17.5%, vs previously 14.0-15.0%. Hence, we revise up our 2026-28E earnings by 4-12% to Rmb23.1-26.0bn, and 2026-28E BVPS to Rmb42.6-47.1. Therefore, we raise our price target for CR Land by 25% to HK\$45.00, based on an SOTP NAV of HK\$67.00 and a 15-year average discount rate of 33%. This implies 0.92x 2026E PB, ~1SD above its historical average of 0.64x.

C&D International: raise PT from HK\$17.00 to HK\$21.00; Maintain Buy

We continue to like C&D on its active land replenishment and high exposure in tier 1 cities. In 2025, C&D replenished Rmb102bn new saleable resources (at 1.12x contract sales), of which 54% were located in tier 1 cities. As we expect property prices to stabilize in 2026E in tier 1 cities, we raise 2026-28E gross margin to 13.9-16.9%, vs previously 13.9-15.9%, translating to overall net income of Rmb3.6-4.8bn for 2026-28E. Our 2027-28E earnings estimates are now 11-12% above consensus. Our 2026-28E BVPS is Rmb13.8-14.1. Therefore, we raise our price target for C&D by 24% to HK \$21.00, based on 10.0x 2027E PE (unchanged). This implies a P/BV of 1.35x.

What is a Right Valuation Metric? P/BV

Still 30% upside potential from current level

We think investors would look at price-to-book valuation when we are close to the bottom of the cycle, as PE valuation is less relevant since near-term earnings (2026E) are still at trough cycle and backward looking. Looking at price-to-book valuation, we still see ~30% upside potential if the sector price to book is to re-rate to 15-year average level of 0.86x vs current trading P/BV of 0.66x.

UBS Research THESIS MAP a guide to our thinking and what's where in this report**PIVOTAL QUESTIONS****Q: Is this round of recovery different from previous false alarms?**

Yes. We think recent stabilization in physical market is due to 1) increased housing demand visibility from rising industrial profits, and positive PPI (the first time in four years); 2) positive wealth effect from rising stock market and outperforming listed companies are mostly located in Beijing and Shanghai; 3) falling vacancy rate in tier 1 cities' suburb districts, suggesting shadow inventory has been digested. We expect property price in tier 1 cities to stabilize in 2026 (previously -10%) and tier 2 cities to still decline by 5% in 2026 (previously -10%). In 2027, we expect tier 1 cities price to increase by 2% and tier 2 cities price to stabilise in 2027 (previously -5%).

Q: Can COLI benefit from recent recovery?

Yes. We think market recovery is lead by secondary market and by tier 1 cities. This is evidenced by strong secondary transaction in Beijing and Shanghai, up 18% and 14% YoY for the first four months. We believe COLI can also benefit due to its high exposure to tier 1 cities (incl. Hong Kong) at 50% by 2025 contract sales.

UBSVIEW

We upgrade COLI from Neutral to Buy on tier 1 cities property recovery. COLI has the one of the highest exposures to tier 1 cities in terms of 2026 saleable resources, due to 1) increased land acquisition intensity in 2025, and 2) the majority (74%) of its land acquisition in 2025 was in tier 1 cities. We revise up our 2026E contract sales forecast to 10% YoY growth, vs previously -10% decline. As we expect property prices to stabilize in 2026E in tier 1 cities, we also raise 2026-28E gross profit margins to 15.5-18.5%, vs previously 14.0%. Hence, we revise up 2026-28E earnings by 14-111% to Rmb11.7-16.4bn, and 2026-28E BVPS to Rmb36.1-37.8.

EVIDENCE

- 1) In 1Q26, industrial enterprise total profit grew by 15% YoY;
- 2) As of March 2026, PPI turned positive (+0.5% YoY) for the first time since September 2022;
- 3) COLI had 50% exposure to tier 1 cities (by contract sales) in 2025;
- 4) In 2026, COLI had more than 50% of saleable resources located in tier 1 cities.

WHAT'S PRICED IN?

The stock is trading at 0.38x 2026E P/BV based on UBSe. We do not think the market has fully priced in the property price stabilization and continued transaction pickup in tier 1 cities. Therefore, we raise our price target for COLI by 81% to HK\$25.00, based on 0.6x 2026E PB, close to its historical average of 0.6x.

Q: Can BEKE benefit from recent recovery?

Yes. We think market recovery is led by secondary markets and by tier 1 cities. This is evidenced by strong secondary transactions in Beijing and Shanghai, up 18% and 14% YoY for the first four months. We believe BEKE will be the top beneficiary due to its agency business in both primary and secondary markets and high exposure to tier 1 cities (~40% by secondary GTV).

UBSVIEW

We upgrade BEKE from Neutral to Buy on its high exposure to tier 1 cities. We believe BEKE will be the top beneficiary due to its agency business in both primary and secondary markets and high exposure to tier 1 cities (~40% by secondary GTV). Therefore, we lift BEKE 2026-28E secondary GTV by 8-13% and primary GTV by 10-17%, and raise 2026-28E revenue by 7-11%. As a result, we revise up 2026-28E adjusted net profit (non-GAAP) by 23-30% to Rmb7.1-8.7bn.

EVIDENCE

471) In 1Q26, industrial enterprise total profit grew by 15% YoY;

Yes. We think market recovery is led by secondary markets and by tier 1 cities. This is evidenced by strong secondary transactions in Beijing and Shanghai, up 18% and 14% YoY for the first four months. We believe Jinmao can benefit from tier 1 cities' recovery as in 2025 Jinmao acquired Rmb16bn land in value, of which 59% based in Beijing and Shanghai.

UBSVIEW

We upgrade Jinmao from Neutral to Buy on its high exposure to tier 1 cities. In 2025, Jinmao acquired Rmb16bn land in value, of which 59% based in Beijing and Shanghai. We maintain our 2026-28E contract sales CAGR of 12%, and raise 2026-28E gross profit margin to 16.9-18.7%, vs previously 14.2-15.8%. Hence, we revise up our 2027-28E earnings by 42-77% to Rmb1.5-2.0bn.

Q: Can CMSK benefit from recent recovery?

Yes. We think market recovery is led by secondary market and by tier 1 cities. This is evidenced by strong secondary transactions in Beijing and Shanghai, up 18% and 14% YoY for the first four months. We believe CMSK could benefit from recent market recovery as 46% of its Rmb340bn saleable resources in 2026 are located in tier 1 cities.

UBSVIEW

We upgrade CMSK from Neutral to Buy on its high exposure to tier 1 cities, and active land banking in 2025. We believe CMSK could benefit from recent market recovery. Therefore, we revise up gross profit margin to 13.9-16.3% in 2026-28E, translating to overall net income of Rmb1.2-3.5bn for 2026-28E.

EVIDENCE

- 1) In 1Q26, industrial enterprise total profit grew by 15% YoY;
- 2) As of March 2026, PPI turned positive (+0.5% YoY) for the first time since September 2022;

UBS Research THESIS MAP a guide to our thinking and what's where in this report**PIVOTAL QUESTIONS****Q: Is this round of recovery different from previous false alarms?**

Yes. We think recent stabilization in physical market is due to 1) increased housing demand visibility from rising industrial profits, and positive PPI (the first time in four years); 2) positive wealth effect from rising stock market and outperforming listed companies are mostly located in Beijing and Shanghai; 3) falling vacancy rate in tier 1 cities' suburb districts, suggesting shadow inventory has been digested. We expect property price in tier 1 cities to stabilize in 2026 (previously -10%) and tier 2 cities to still decline by 5% in 2026 (previously -10%). In 2027, we expect tier 1 cities price to increase by 2% and tier 2 cities price to stabilise in 2027 (previously -5%).

Q: Can CR Land benefit from recent recovery?

Yes. We think market recovery is led by secondary market and by tier 1 cities. This is evidenced by strong secondary transactions in Beijing and Shanghai, up 18% and 14% YoY for the first four months. We continue to like CR Land on its business transformation to asset manager and less drag from development business. In 2026, CR Land will launch saleable resources of over Rmb450bn, of which 57% located in tier 1 cities (incl. Hong Kong).

UBSVIEW

We continue to like CR Land on its business transformation to asset manager and less drag from development business. In 2026, CR Land will launch saleable resources of over Rmb450bn, of which 57% located in tier 1 cities (incl. Hong Kong). As we expect property price to stabilize in 2026E in tier 1 cities, we raise CR Land's 2026-28E development property gross margin to 15.5-17.5%, vs previously 14.0-15.0%. Hence, we revise up our 2026-28E earnings by 4-12% to Rmb23.1-26.0bn, and 2026-28E BVPS to Rmb42.6-47.1.

EVIDENCE

- 1) In 1Q26, industrial enterprise total profit grew by 15% YoY;
- 2) As of March 2026, PPI turned positive (+0.5% YoY) for the first time since September 2022;
- 3) In 2026, CR Land will launch saleable resources of over Rmb450bn, of which 57% is located in tier 1 cities (incl. Hong Kong)

WHAT'S PRICED IN?

The stock is trading at 0.78x 2026E PB based on UBSe. We do not think the market has fully priced in the property price stabilization and continued transaction pickup in tier 1 cities. Therefore, we raise our price target for CR Land by 25% to HK\$45.00, based on an SOTP NAV of HK\$67.00 and a 15-year average discount rate of 33%. This implies 0.92x 2026E PB, ~1SD above its historical average of 0.64x.

Valuation Method and Risk Statement

We base our valuations of China's property developers on PE or P/BV multiples. We believe key downside risks related to the Chinese property market include: 1) government administrative policies that restrict demand and mortgage lending; 2) tight financing for China's developers; 3) lower-than-expected residential growth in China's economy. We believe key upside risks include: 1) material policy loosening that effectively boosts residential property sales, investments and prices to positive YoY growth; 2) large-scale asset disposals at fair prices by some developers to ease liquidity pressures.

Quantitative Research Review

UBS Global Research publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS Global Research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at <https://neo.ubs.com/quantitative>, or contact your UBS sales representative for access to the report or the Quantitative Research Team on ubs-quant-answers@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

UBS Global Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage ¹	IB Services ²
Buy	FSR is > 6% above the MRA.	54%	24%
Neutral	FSR is between -6% and 6% of the MRA.	40%	21%
Sell	FSR is > 6% below the MRA.	6%	21%

Source: UBS. Rating allocations are as of 31 March 2026.

1:Percentage of companies under coverage globally within the 12-month rating category.

2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:**Forecast Stock Return (FSR)** is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:**UK and European Investment Fund ratings and definitions are:** **Buy:** Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Consultation (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

UBS Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing UBS Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All UBS Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where UBS Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by UBS Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS Global Research and UBS Evidence Lab and legal and regulatory constraints. UBS HOLT and UBS Pharma Values are offerings of UBS Global Research. HOLT Lens is a corporate performance platform offering that provides an objective accounting-led framework for comparing and valuing companies and is available to clients of UBS Global Research; for further details and pricing please contact your UBS Sales representative. In particular, HOLT has a variety of warranted prices based on the scenario chosen; please mail UBS Securities LLC, 11 Madison Avenue, New York, NY 10010, USA, Attention: Investment Research, if you are interested in the warranted price on a particular company, again subject to commercial considerations. UBS Pharma Values is an analytical tool that involves the creation of a number of individual product net present value calculations, based on published forecasts of sales for pharmaceuticals, and is available to clients of UBS Global Research; for further details and pricing please contact your UBS Sales representative. For all other specific disclaimers, please see <https://www.ubs.com/disclosures>.

When you receive UBS Global Research through a system, your access and/or use of such UBS Global Research is subject to this UBS Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive UBS Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this UBS Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (<https://www.ubs.com/global/en/investment-bank/regulatory.html>) and to UBS's Terms of Use/Disclaimer (<https://www.ubs.com/global/en/legalinfo2/disclaimer.html>). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (<https://www.ubs.com/global/en/legalinfo2/privacy.html>) and cookie notice (<https://www.ubs.com/global/en/legal/privacy/users.html>).

If you receive UBS Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via UBS Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via UBS Global Research or otherwise, without the prior written consent of UBS. You agree not to use UBS Global Research in any artificial intelligence system, without the prior written consent of UBS.

In certain circumstances you may receive UBS Global Research otherwise than in the capacity of a client of UBS and you understand and agree that under these circumstances (i) the UBS Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the UBS Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at <https://www.theocc.com/publications/risks/riskchap1.jsp> or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

UBS notes that no globally accepted framework or definition (legal, regulatory or otherwise) currently exists, nor is there a market consensus as to what constitutes an "ESG" (Environmental, Social or Governance) or an equivalent-label, or as to what precise attributes are required for the Information (as defined below) to be defined as ESG or equivalently-labelled. Any information, data or other content including from a third party source contained, referred to herein or used for whatsoever purpose by UBS or a third party ("Information"), in relation to any actual or potential ESG objective, issue or consideration is not intended to be relied upon for ESG classification, regulatory regime or industry initiative purposes ("ESG Regimes"). Nothing in these materials is intended to convey, suggest or indicate that UBS considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG classification, labelling or similar standards that may exist under the ESG Regimes. UBS has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

- (i) valuation or accounting purposes;
- (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or
- (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For further information on the ways in which UBS Global Research manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS Global Research recommendations, please visit <https://www.ubs.com/disclosures>.

UBS Global Research will initiate, update and cease coverage solely at the discretion of UBS Global Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

UBS Global Research may utilise artificial intelligence tools ("AI Tools") in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by UBS Global Research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Please note that all transactions conducted by UBS are consistent with sanctions regulations imposed by Switzerland, the European Union, the United Nations, the United Kingdom and the United States, per UBS' global sanctions policy. UBS opinion as to future investment worthiness assumes no new sanctions are imposed.

US persons are prohibited from purchasing or selling securities of certain companies designated as being associated with the Chinese Military in accordance with the amended US Presidential Executive Order 13959.

Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit <https://www.ubs.com/research-methodology>.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at <https://www.theocc.com/about/publications/character-risks.jsp> or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio incorporating ESG factors or Sustainable Investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ.
