2Q26 preview: Cloud momentum to sustain with improving margin; Elevated AI investment in 2H; Not Rated

BIDU	Price Target: --	Price: \$113.39	Upside: --
9888.HK	Price Target: --	Price: HK\$106.00	Upside: --

We preview Baidu's 2Q26 results (likely to report in mid/late-Aug), with Baidu Core revenue declining **-4% yoy** to Rmb25.2bn, reflecting persistent pressure from traditional advertising, partially cushioned by continued robust growth in AI Cloud business. While topline growth remains challenged, we expect Baidu Core OP trend to largely stabilize at **-18% yoy** in 2Q26E (vs. -19% yoy in 1Q26) thanks to sequentially improving AI Cloud profitability and disciplined cost control. That said, we expect a milder-than-expected recovery of Baidu Core OP in 2H26E as company plans to accelerate its investment especially in AI model training this year vs. in 2025.

Into the print, we believe **investor focus** will be primarily on: **1)** sustainability and outlook of AI Cloud growth and margin trajectory; **2)** AI capex plan, cadence of investment in model training and management's thoughts on Baidu's positioning in AI model arms race; **3)** updates on dividends and dual-primary listing; **4)** progress on Baidu's announced spin-off of the Kunlunxin division; **5)** Group level profitability inflection and FCF/use of capital.

What's changed: We revise down our 2026E-28E revenue estimates by -4%~-6% on a combination of weaker-than-expected advertising recovery and other business, and cut our 2026E-28E net profit estimates by -5%~-14% to reflect enhanced AI investments and foreign exchange losses in 2026E. We are **Not Rated** on BIDU/9888.HK.

Key focus:**1. Cloud business to sustain solid momentum driven by AI Cloud Infra; margin expansion likely to continue**

We expect AI Cloud revenue growth to remain the key bright spot (**GSe: +41% yoy** in 2Q26E), driven by the solid AI Cloud Infra

business which we believe expected will continue outgrowing peers. Specifically, we estimate still fast growth for AI Cloud Infra at **+58% yoy** in 2Q26E. Within it, we forecast GPU Cloud will still deliver **triple-digit% yoy** growth in 2Q26E, propelled by the strong downstream demand across different industries and Baidu's full-stack capability.

Beyond revenue growth, we see AI Cloud margin as benefiting from a more favorable business mix as high-margin GPU Cloud services increasingly account for a greater portion of total AI Cloud revenue, together with improving profitability in legacy project-based business. We believe the combination of strong AI Cloud infrastructure demand and improving business mix should continue supporting the **sequential improvement of AI Cloud profitability** in the following quarters of 2026E.

2. Advertising remains under pressure with no signs of a near-term inflection

In contrast to the AI Cloud segment, we expect Baidu's advertising business (**GSe: -21% yoy** in 2Q26E) to continue facing structural headwinds, on a combination of 1) traditional search advertising, which is undergoing gradual erosion from changing user behavior among the proliferation of AI tools, 2) still no breakthroughs from Baidu's AI search transition initiatives, and 3) a still challenging macro.

That said, we note that advertising now accounts for a progressively smaller share of Baidu Core revenue mix (<50% in 2026E vs. 60%+ in 2025), and its drag on Baidu Core revenue trajectory should gradually decrease over time.

3. Core OP to stabilize at -18% yoy in 2Q, but accelerating AI investments likely to weigh on FY26 OP recovery

We expect Baidu Core OP trend to sequentially stabilize at **-18% yoy** in 2Q26E (vs. -19% yoy in 1Q26), supported by improving Cloud margin and ongoing operating-efficiency initiatives.

However, company is stepping up investments in AI model training to catch up with leading domestic peers, and we expect model-training investments in 2026 to be meaningfully elevated yoy, driven primarily by increased GPU procurement and additional computing resources. As a result, we expect its impact on earnings to gradually build through 2H26E as AI-related spending ramps up, and therefore forecast Baidu Core OP to decline **-3% yoy** in 2026E.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DAFCF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total

return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints.

As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.

Disclosure information is also available at <https://www.gs.com/research/hedge.html> or from Research Compliance, 200 West Street, New York, NY 10282.
