2Q/1H26 Preview: Growth fueled while margins mixed with online trending lower; Eyeing 2H new initiatives; Buy MGP/Giant/Forest Cabin/Jahwa

Despite a subdued 1Q26, we expect our cosmetics coverage to demonstrate accelerated topline momentum in 2Q26 ([Exhibit 1](#)): We estimate Mao Geping/Forest Cabin will spearhead growth at +28%/+39% yoy respectively for 1H26, followed by Shanghai Jahwa/Botanee/Proya at +14%/+10%/+1% in 2Q26; Giant's 1H26 sales will likely post -7% yoy primarily attributable to a challenging base but on track for the full-year outlook; Bloomage will remain under pressure at -18% yoy. Margins are divergent where we expect -9ppt/+1ppt OPM yoy where MGP/Forest Cabin/Botanee/Shanghai Jahwa are more resilient in our view.

Aside from key lines, we highlight key assumptions including: **1) Stronger online** ([see our monthly tracker](#)) **and offline counters remain solid**, as we expect Mao Geping/Forest Cabin continue to deliver 12%+ SSSg in offline, although OTC channel continues to weigh on Botanee/Giant; **2) Companies' core brands will start to show stabilization** as we expect Proya core/Comfy/Winona to register up to SD% yoy growth in 2Q26, from up to DD% yoy decline in 1Q26. **3) Emerging brands will likely remain the key growth engine**, with Off-relax & Flower Knows /Collagen /Winona Baby & AXOMED /Dr Yu & Herborist projected to deliver up to 50% yoy growth; **4) However we expect ROIs to remain mixed with online margin trending lower, mitigated by** the companies' improving offline counter productivity (Mao Geping/Forest Cabin), strategic pricing actions (Botanee), front-loaded first-quarter marketing expenditures and operational efficiency gains (Shanghai Jahwa). We believe Giant's NPM will be better than bearish expectation per GSe with implied online NPM at mid-20s%, sequentially improving from low-20s% in 2H25 though with yoy contraction to facilitate sound growth.

Focus into 1H26/2Q26 results: 1) Online growth sustainability will likely drive stronger sales in 1H/2Q26, where our high-frequency Douyin tracker ([Exhibit 5](#)) suggests volatile GMV yoy during non-peak season Jul-to-date, but Mao Geping/Shanghai Jahwa/Forest Cabin will likely maintain robust momentum; **2) Measures to mitigate online competition given softer macro backdrop and global brands' rising momentum compounded by a high base in 2H**, including classic product upgrade (Proya, Forest Cabin), new product/business line rollouts (Giant/Forest Cabin/Winona) and omni-channel expansion (Mao Geping, Forest Cabin). **3) Multi-brand strategies** that scale secondary brands to diversify sales streams and fuel Group growth.

We slightly tweak our 2026-2028E NI for covered cosmetics by -1+4%, but we cut TP by 10-27% mainly to reflect lower valuation PE. We maintain Buy on Mao Geping, Giant Biogene, Forest Cabin, Jahwa for solid brand momentum or recovery trajectory; Neutral on Proya while awaiting more color for new products/brands into 2H, and Botanee for fair valuation; Sell on Bloomage.

Proya: We cut our 2026E-28E NI by 4-5% to reflect softer 2Q26 preview on higher selling expenses. Our new target exit multiple of 17X (vs prior 19X) is derived at a 15% discount (vs prior 30%, revised due to improved growth profile) with our revised industry base multiple (20x), to reflect a potential dilution from its A-H dual listing and margin pressure. Given the changes to our target multiple and earnings estimates, our TP is reduced to Rmb62 (vs prior Rmb69) with 17X 2027E P/E discounted back to end-2026E using an 8.9% COE. Following our target multiple change, our TP is reduced to Rmb32.30 (vs prior Rmb42.20) with 20x 2027E P/E discounted back to end-2026E using an 8.9% COE. Maintain Neutral with TP upside at 4%.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
