

Coca-Cola Co. (KO)

Impressive volume-led Q2 beat & FY26 guidance raise, which could yet again prove conservative

KO	12m Price Target: \$86.00	Price: \$84.07	Upside: 2.3%
----	----------------------------------	-----------------------	---------------------

Our View - KO reported another impressive quarter - including organic revenue growth that outpaced our above-consensus estimates (+6%, vs our/cons ests of +5.0%/+3.5%). Importantly, it was a high-quality beat by KO, highlighted by strong concentrate sales/unit case volumes that were +4%/+5%, likely boosted from strong activations around the FIFA World Cup, which contributed to a portion of the company's volume growth in the quarter (+5%/+8% vol for Trademark Coca-Cola/Powerade) - and improved weather trends. Impressively, KO's 5% unit case volume growth in Q2 represented the strongest volume growth in 17 years (ex-Covid), per mgmt - as the company continued to gain value share. Also, we note concentrate sales were ~1pt behind unit case volumes (+4% for concentrate sales vs +5% for unit case vol) - which reflects some inventory unwind following six additional days in Q1, as broadly expected. Given topline leverage, gross margins were stronger than expected at 63.4% (~+120bps y/y, vs our/cons ests of 62.5%/62.3%) - which ultimately translated to an EPS beat at \$0.97 (+11% y/y, vs our/cons ests of \$0.94/\$0.93). All in, while we think investors broadly expected strong Q2 results - KO's ~2.5pt/4pt top/bottom line beat (vs cons) likely caught many by surprise, and the stock is being rewarded today (+5%, vs +2% for the XLP).

Looking ahead, KO raised its FY26 guidance, as we expected, and now expects organic revenue growth of ~+5% - vs prior of +4-5%, the company's +4-6% l.t. algo - and the company now expects to deliver f/x neutral EPS growth (ex acq/div) of +7-8% (vs prior of +6-7%, in line with their l.t. algo). Considering KO's 1H results, this implies just ~+2%/+4% top/bottom line growth for the rest of the year (vs ~+7.5%/+15% in 1H, respectively) - which we think should be doable, and potentially even conservative, especially considering the strong momentum in KO's business. Elsewhere, KO now expects reported FY26 dollar EPS growth of +9-10% (vs prior of +8-9%) to \$3.27-3.30 (vs prior of \$3.24-3.27) given a 3pt f/x tailwind (unchanged) - which we think should continue to be well received by

investors. While there's a lot to like about Q2, there are a few key considerations for 2H, including: **(1)** KO expects concentrate sales to lag unit case vols by ~1pt in Q3 (similar to Q2) - which reflects some inventory unwind following six additional days in Q1 - and the company expects FY26 concentrate sales to slightly lag unit cases following some inventory building late last year. Note, there are six fewer days in 4Q26 compared to 4Q25; **(2)** Comps become incrementally more difficult in 2H vs 1H - as KO is now lapping y/y concentrate sales growth of ~+2% (in 2H) vs ~flat in 1H - including challenging +4% concentrate growth in 4Q25 (coinciding with the aforementioned inventory build late last year); **(3)** Affordability initiatives in APAC, particularly in India & China, as KO remains focused on building a total beverage portfolio and driving incremental consumers into the KO ecosystem - which are likely to weigh on price/mix in the region near term. Further, there is also likely to be some negative geographic mix in APAC as India & China likely outgrow other developed markets - like Australia and Japan and Korea; **(4)** Slight underlying gross margin expansion going forward, albeit tempered in part by commodity pressures impacting tea and coffee (specifically in APAC); and **(5)** The pending sale of Coca-Cola Beverages Africa - which is expected to close towards the end of Q3 or in Q4 (per mgmt) - which should help drive some gross/op margin expansion. Ultimately, despite what remains a challenging/volatile operating environment - mgmt sounded confident in their ability to deliver on guidance this year - particularly given KO's strong share momentum (given broad-based share gains across KO's global beverage categories), additional pricing (albeit likely more moderate y/y and in line with inflation) and the many levers at the company's disposal (i.e., productivity) to offset other unforeseen headwinds. **Bottom Line** - We remain impressed by KO's top-line momentum and execution in a very challenging environment, as it further positions itself well for healthy, sustainable, l.t. growth. However, with the stock trading at a 31% premium to the market vs its 3-year avg historical premium of 9% and an ~8.5x premium relative to PEP on a forward P/E basis, above its l.t. historical average premium of ~1x, we continue to see a more favorable risk-reward elsewhere. Through this lens we maintain our Neutral rating.

Digging into the quarter, KO reported strong Q2 organic revenue growth of +6% y/y (above our/cons ests of +5.0%/+3.5%, and against a somewhat challenging +5.0% comp in 2Q25). The top-line beat was driven by concentrate sales/unit case volumes that were +4%/+5% (vs our +2.1%/+3.1% est) - while price/mix was up +2% y/y, below our/cons ests of +2.9%/+2.7%. By segment, North America organic revenue growth of +7% was a stand out (vs our/cons ests of +4.5%/+3.3%) - as KO benefited from easier comparisons and gained volume/value in the quarter - with concentrate sales of +3% and price/mix of +4%. Along these lines, we note that KO's duel approach with the FIFA World Cup and America's 250th anniversary gave the company a unique platform to leverage its growth flywheel in locally relevant ways across the country. With this, the company specifically called out strong volume growth for brands such as trademark Coca-Cola, fairlife, Powerade, Fresca, Gold Peak, Smartwater, and Simply. In EMEA, organic revenue growth was a bit softer than expected at +3% (vs our/cons ests of +5.0%/+3.9%) - dragged in part by geopolitical conflicts in the Middle East - while favorable weather supported healthy volume trends in many European markets. Latin America also performed well, with organic growth of +5% (vs our/cons ests of +7.0%/+5.0%) - driven by price/mix of +3% and concentrate sales +1% y/y - as improving trends in Brazil were partially offset by a difficult (albeit sequentially improved) environment in Mexico. Moving down the P&L, gross margins were stronger than expected at 63.4% (~+120bps y/y, vs our/cons

ests of 62.5%/62.3%) – while SG&A as a % of sales was up ~+30bps y/y to 27.8% (vs our/cons ests of 27.0%/27.1%), resulting in adj operating margins that were up ~+85bps y/y to 35.6% (vs our/cons ests of 35.5%/35.1%). All in, this drove a strong Q2 EPS beat at \$0.97 (+11% y/y – vs our/cons ests of \$0.94/\$0.93).

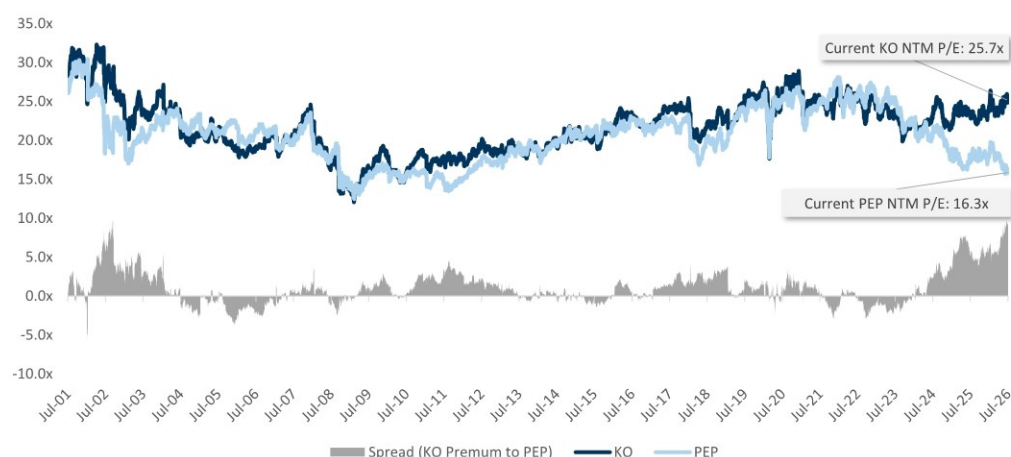

Looking ahead, we expect KO's organic topline growth this year to be fairly balanced between price/mix & volumes (we model concentrate sales/unit case volume growth this year +2.9%/+3.7%) – which continues to compare favorably vs PEP (where we model FY26 vols of +0.9%). From a profitability standpoint, mgmt expects the overall cost impact of volatility in certain commodities and evolving global trade dynamics to be manageable this year. Furthermore, we note that KO will continue to invest in its brands moving forward, including on innovation that prioritizes bigger and bolder strategies (many of which were on display at NACS last year), in an effort to engage new customers and retain existing consumers, maintaining the company's bias to invest in growth. Ultimately, we think this decision to invest behind their brands is the right one to help drive healthy, sustainable, l.t. growth. That said, we expect mgmt will quickly pivot to balance investment spend that coincides with optimized profitability levels (i.e., delivering attractive EPS growth) – highlighting KO's flexible and nimble approach to its reinvestment philosophy. Given the Q2 beat, we raise our FY26/FY27 estimates by \$0.03/\$0.01 to \$3.30/\$3.51 and our 12-month price target by \$4, to \$86.

FY26 Guidance – KO raised its FY26 guidance – which we had expected. With this, the company now expects organic top line growth of ~+5% (vs prior of +4-5%, and vs our updated +5.3% est) – and KO now expects f/x neutral EPS growth of +7-8% (vs prior of +6-7%, and vs. our updated +8.5% est). With respect to f/x, mgmt's expectations are for a 1pt tailwind from FX on topline growth (vs prior of 1-2pt), and a 3pt tailwind to EPS growth (unchanged). KO also continues to expect a full-year tax rate of ~19.9% – which does not include the impact of the ongoing tax litigation with the US IRS. This implies FY26 EPS of \$3.27-\$3.30 (vs prior of \$3.24-\$3.27, and vs our updated \$3.30 est), and comparable EPS growth of +9-10% (vs prior of +8-9%, and vs our updated +9.8% est). We note that mgmt now expects a ~2-3pt topline (vs prior of a ~4pt) headwind from acquisitions & divestitures – though continues to expect a ~1pt bottom line headwind from acquisitions & divestitures. Elsewhere, KO's expects operating cash and free cash of ~\$14.6bn/~\$12.4bn respectively (vs prior of ~\$14.4bn/~\$12.2), vs our updated \$14.7bn/\$12.6bn est. KO issued f/x guidance for Q3 and expects a ~1pt f/x tailwind on revenues and a ~3pt f/x tailwind on comparable EPS – in addition to a ~1pt topline headwind from acquisitions & divestitures (minimal bottom line impact from acquisitions & divestitures). It's also important to note that 4Q26 has six fewer days compared to 4Q25.

By geography – Unit case vol growth was up +5% y/y in Q2, led by India, China, the US and Brazil. North America segment organic rev growth was up +7%, driven by concentrate sales which were +3% y/y, while price/mix was +4%. With respect to KO's category clusters: unit case vol growth in sparkling soft drinks were up +4% y/y in Q2 (trademark KO grew +5%); sparkling flavors grew by +4% y/y in Q2, primarily driven by growth in Asia Pacific; juice, dairy and plant-based beverages grew by +2% in Q2, driven by growth in Asia Pacific and North America; and water, sports, coffee and tea was +6% y/y in Q2.

Valuation

Our 12-month price target of \$86 (vs prior of \$82) is based on an equal-weighted P/E of 23.8x (vs prior of 23.0x) and EV/EBITDA of 19.0x (vs prior of 18.4x), both based on our

updated Q5-Q8 estimates. We slightly raise our target multiples to reflect strong continued momentum, especially in the US. Upside risks to our estimates & price target include: an acceleration in U.S. CSD volumes, an abatement in FX headwinds & less pronounced competitive pressures. Downside risks to our estimates & price target include: headwinds from on-premise exposure, stepped up competitive pressures, a material slowdown in CSD volumes, stepped-up ESG pressures around packaging, sugar/soda taxes.

Forward EV/EBITDA (absolute & relative)

- KO is currently trading at an FY27E EV/EBITDA multiple of 21.3x, which is an 8% premium to the company's 1-year historical average multiple of 19.8x and an 11% premium to the company's 3-year historical average multiple of 19.2x
- Our price target implies a Q5-Q8E EV/EBITDA multiple of 19.0x, which is an 11% discount to the company's current FY27 EV/EBITDA multiple, a 4% discount to its 1-year historical average multiple and a 1% discount to its 3-year historical average multiple.
- KO is currently trading at a 59% premium relative to its Beverage peer group on a forward EV/EBITDA multiple basis. This compares to KO trading at a 52% premium to the Beverage group on a 1-year historical average forward EV/EBITDA basis and a 44% premium to the Beverage group on a 3-year historical average forward EV/EBITDA basis.

Forward P/E (absolute & relative)

- KO is currently trading at an FY27E P/E multiple of 24.1x, which is a 9% premium to the company's 1-year historical average multiple of 22.2x and an 11% premium to the company's 3-year historical average multiple of 21.7x.
- Our price target implies a Q5-Q8E P/E multiple of 23.8x, which is a 1% discount to the company's current FY27 P/E multiple, a 7% premium to its 1-year historical average multiple and a 10% premium to its 3-year historical average multiple.
- KO is currently trading at a 35% premium relative to its Beverage peer group on a forward P/E multiple basis. This also compares to a 29% premium to the Beverage group on a 1-year historical average forward P/E basis and a 23% premium to the Beverage group on a 3-year historical average forward P/E basis.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators.
