Three key themes

Investor interest in China AI models has increased after the listing of Zhipu and MiniMax in early 2026, with market debates becoming more sophisticated across model iteration, monetisation and competition. We set out three key themes to watch in H226E: **1) while we expect continued improvement in model intelligence led by coding capability, we flag early signs that SOTA models may defend their leadership**, thanks to data flywheel and improving user stickiness due to better productisation and the rising adoption of AI in model R&D (e.g. recursive self-improvement); **2) we expect model-layer monetisation to continue to ramp**, as coding TAM expands beyond developers, while progress in multimodality may be overlooked; and **3) we expect an increasing focus on token ROI**, and the shift of enterprises and users from tokenmaxxing to token optimisation should drive tiered demand and widen divergence in the pricing power of state-of-the-art (SOTA) vs. other models, while Chinese models may benefit from this trend given their structural cost efficiency ([note](#)).

Coding remains the clearest path for model intelligence improvement

We reiterate our view that coding is the core capability underpinning model intelligence with a clear path to drive the capability frontier. We view AI coding as among the most **tractable domains for RL-based post-training**, given its relatively verifiable outcomes, scalable synthetic data and real-task feedback from AI coding agents. We note emerging Chinese AI labs are more proactive in **productisation** by building coding-agent products/harnesses, which should create a potential data flywheel and improve user stickiness via accumulated project context, skills and preferences. We note **rising adoption of AI in model R&D**, where stronger coding capability could accelerate model iterations (early progress in recursive self-improvement). This could allow models with SOTA coding capabilities to reinforce their leadership.

Vast monetisation potential, increasing ROI discipline

On monetisation, AI coding TAM continues to expand, shifting from developer tools into broader productivity tools for knowledge workers, with feature innovation (e.g. app plugins, Claude Tag) to integrate with more workflow and accelerate adoption. Progress in multimodality is also worth noting, with Chinese models demonstrating early leadership in video-generation capability and monetisation (e.g. US\$500m ARR for Kuaishou's Kling in May). **As enterprise adoption shifts from tokenmaxxing to ROI discipline**, we are more positive on Chinese models' global share-gain potential, supported by rising recognition (e.g. GLM-5.2) and visible ROI advantages, especially in high-volume, repetitive coding and agentic workflows. However, we acknowledge compute supply remains the key bottleneck for the pace of ARR ramp-up.

Diverging valuation among listed companies

The price performances of Zhipu and MiniMax post IPO has shown a widening divergence, reflecting Zhipu's strengthening leadership in SOTA coding models (e.g. GLM-5.2) and clearer monetisation potential in coding use cases. While we do not rule out the possibility of MiniMax catching up in model performance, underpinned by its advantages in compute power access and R&D efficiency, we expect its valuation discount to continue in the near term, while we will continue to monitor inflection in future model iterations. Amid rising token demand, we raise our 2026E revenue/ARR forecasts significantly for both companies. Our PTs for Zhipu/MiniMax is revised to HK \$2,200/HK\$500, from HK\$1,160/HK\$1,000, implying 85x/20x P/ARR based on December 2026E ARR of US\$1.5bn/US\$1.0bn.

COMMENTARY

Clear path for model capability improvement in AI coding

We believe AI coding is among the **most tractable domains for RL-based post-training**, given its relatively verifiable outcomes through code execution, unit tests and automated graders, while scalable synthetic data and real-task feedback from coding agents could further support continued model improvement.

We note early adoption of AI coding in frontier model R&D, with **stronger coding capabilities potentially helping accelerate future model iterations**, forming an early path toward **recursive self-improvement (RSI)**. This is illustrated by Anthropic's latest report, "[When AI builds itself](#)", which suggests that coding agents are increasingly being used in AI model R&D, including optimizing code for training small models and running experiments. OpenAI's Codex disclosures also points to a similar trend in internal adoption.

Productisation and early data flywheel

On top of further developing their base models, we note that **emerging Chinese AI labs are becoming more proactive in launching first-party coding agent products/harnesses**, including Zhipu's ZCode, MiniMax Code and DeepSeek's reported Code Harness team build-out ([news](#)). We believe this could create an **early data flywheel**, as user interactions and real-task workflows can feed back into model improvement. Meanwhile, accumulated project context, skills and user preferences could also improve user stickiness over time, in our view.

Figure 2: Chinese AI labs are increasingly launching first-party coding-agent products / harnesses

Company	Coding agent	Launch date	Coding agent progress
Emerging AI labs			
Zhipu	Zcode	1-Jul-26	Launched ZCode , a first-party coding-agent / harness product for GLM models. It is positioned as a desktop agent for coding workflows, supporting long-horizon tasks, SSH remote development and mobile control.
Moonshot AI(Kimi)	Kimi Code	May-26	Released Kimi Code CLI, a terminal-based coding agent that can read and edit code, run shell commands, search files, fetch web pages and choose next steps based on execution feedback.
MiniMax	MiniMax Code	29-May-26	Renamed its MiniMax Agent desktop app to MiniMax Code , adding a dedicated CLI shortcut and positioning it more clearly as a coding-agent product.
DeepSeek	Developing	20-May-26	Reportedly started building a native coding-agent product via a new Code Harness team, with the product informally referred to as DeepSeek Code.
Internet leaders			
Tencent	CodeBuddy	9-Sep-25	Launched CodeBuddy Code , an AI CLI coding agent, adding CLI format to CodeBuddy's existing plugin / IDE product suite.
Alibaba	Qwen Code	22-Jul-25	Open-sourced Qwen Code , a terminal coding agent adapted for Qwen models and agentic coding workflows.
ByteDance	TRAE	Jul-25	Released TRAE Agent , an LLM-based software engineering agent with CLI support for general-purpose coding tasks and repository-level workflows.
Baidu	Comate	Jun-25	Released Comate AI IDE, expanding Comate from AI coding assistant toward AI IDE / coding-agent workflows with multimodal capabilities and multi-agent collaboration.

AI coding TAM expansion continues

We observe that AI coding TAM continues to expand, as **coding agents shift from developer tools to broader productivity tools for knowledge workers**. OpenAI's latest Codex usage update provides clear evidence of this trend: Codex use started with developers, but as it expanded toward more general knowledge work, non-developer users became the fastest-growing user group. By early Jun-2026, non-developer individual users had increased 137x since Aug-2025, while non-developer organizational users increased 189x and OpenAI's non-developer internal users increased 12x.

Meanwhile, we believe **continued feature innovation could further accelerate adoption** beyond software engineers. For example, OpenAI's Codex plugins extend coding agents into role-specific workflows across data analytics, creative production, sales, product design, public equity investing and investment banking, while Anthropic's Claude Tag brings Claude into Slack as a team-based agent with access to selected channels, tools, data and codebases. We also observed similar features in China's coding agent products (e.g., Zhipu's Zcode and Kimi Code/Work).

As enterprise adoption shifts from tokenmaxxing to ROI discipline, we are more positive on Chinese models' global share-gain potential, with more visible ROI advantages in coding and agentic workflows, especially for high-volume, repetitive inference tasks, as evidenced by rising integrations across overseas apps and platforms (see our [APAC Focus report on China AI models' cost efficiency](#)).

App / Platform	Product category	Key functions	Timing	Integration details
Fireworks AI	AI inference / model hosting platform	Open-model AI infrastructure for training / fine-tuning and high-throughput inference, with serverless, on-demand and reserved deployments plus OpenAI / Anthropic-compatible APIs	Kimi / MiniMax / Qwen: 10-12 Jun 2026; GLM-5.2: 16 Jun 2026	Fireworks announced day-zero GLM-5.2 availability. Its changelog / model library also lists Kimi K2.7 Code , MiniMax M3 , Qwen 3.7 Plus and other Chinese models on the platform.
Vercel AI	Developer tool / AI gateway	Developer AI gateway providing one API key for hundreds of models, unified billing / observability, provider routing / fallback, spend controls, BYOK and drop-in SDK compatibility	GLM-5.2: 16 Jun 2026; GLM-5.2 Fast via Wafer: 24 Jun 2026	Vercel added GLM-5.2 to AI Gateway on 16 Jun under model ID <code>zai/glm-5.2</code> . On 24 Jun, it added GLM-5.2 Fast via Wafer , a model inference / hosting platform offering serverless and dedicated inference.
Cloudflare Workers AI	Serverless AI / edge inference platform	Serverless GPU inference on Cloudflare's global network , with open-source model access through Workers / API, pay-as-you-use pricing and integrations with AI Gateway, Vectorize and Workers	16 Jun 2026	Cloudflare announced GLM-5.2 availability on Workers AI, highlighting agentic coding, function calling and reasoning. The initial context window was 262k, with plans to expand later.
OG Private Computer	Decentralised AI compute / verifiable inference	Decentralised AI compute network for router / direct inference , provider marketplace access, wallet-based settlement, TEE-backed verification and chatbot, image and speech service types	18 Jun 2026; Kimi added the following day	OG announced GLM-5.2 availability on Private Computer, highlighting end-to-end encryption for prompts, code and outputs, as well as verifiable compute. Qwen-3.7 Plus was also available, with Kimi 2.7 Code added shortly thereafter.
Notion	Notes / AI workspace	All-in-one workspace for docs, wikis / knowledge base, databases, project management, enterprise search, meeting notes and agents	Mid-Jun 2026	Notion announced GLM-5.2 availability, particularly for long-horizon tasks. The model is served through Baseten, which also confirmed that Notion is offering GLM-5.2 via its inference platform.
Perplexity	AI answer engine / Enterprise AI / APIs	AI answer engine and enterprise research platform spanning web research, internal-file / app search, agentic Computer workflows and developer APIs	Mid- to late Jun 2026	Perplexity's Agent API model list includes perplexity/glm-5.2 and perplexity/kimi-k2.7-code , making both models available through its Agent API.
Devin / Cognition	AI coding / software engineering agent	Autonomous AI software engineer for writing, running and testing code, resolving tickets / bugs, migrations / refactors, PR review, codebase Q&A and engineering support	24 Jun 2026	Devin announced that Kimi K2.7 and GLM-5.2 are available in Devin Desktop and CLI.
Coinbase	Crypto exchange / digital asset platform	Retail and institutional crypto / asset trading platform , with custody, staking, payments, wallets, developer infrastructure and onchain services	Late Jun 2026;	Coinbase co-founder and CEO Brian Armstrong said the company is experimenting with GLM-5.2 and Kimi 2.7 as default open-weight models through its internal LLM gateway, aiming to reduce AI spend without restricting engineers' token usage.
Fello AI	Multi-model AI assistant / consumer app	All-in-one AI chatbot app for Mac, iPhone and iPad, with multi-model chat, web search, file / PDF analysis, image generation / editing, multilingual chat and cross-device sync	25 Jun 2026	Fello AI 6.7.0 added GLM-5.2 , MiniMax M3 , DeepSeek V4 and Qwen 3.7 Max , alongside new Podcast and Travel Skills and broader file support.
Poe / Quora	Multi-model chatbot / bot platform	Consumer and developer AI aggregation platform for accessing multiple models / bots, generating text, images, video and audio, web search, multi-bot chat, bot / app creation, workflows and Poe API	Live on platform; no single announcement date found	Poe pages show access to GLM-5.2 , DeepSeek V4 Flash / Pro , Kimi K2.7 Code , MiniMax M3 and other Chinese models via providers such as Novita AI.

Knowledge Atlas Technology (Zhipu; 2513.HK)

We significantly raise our 2026E topline forecasts by 71%, mainly reflecting our more positive view on Zhipu's ARR ramp-up pace. We now estimate ARR to reach US\$1.5bn by December 2026 (vs. US\$250m in March 2026), higher than previous management internal target of US\$1bn. This is supported by its strengthening leadership in AI coding, expanding compute capacity through internal AI infrastructure optimisation and supply-sourcing efforts, as well as potential market share gains amid tighter access to global frontier models. We also raise our topline forecasts into the outer years, while conservatively modelling a more moderate growth trajectory beyond 2027E.

We edge down our GPM forecast by 1.2ppt in 2026, reflecting rising hardware-related costs, partially offset by the company's efforts to optimise AI inference costs. With improving operating leverage, we forecast a narrowing of the adjusted net margin to -100% in 2026 (-160% previously), although the absolute adjusted net loss increases by 7% to Rmb5.5bn due to the larger revenue base.

MiniMax (0100.HK)

We significantly raise our 2026 revenue forecast for MiniMax by 108%, reflecting its accelerating ARR ramp-up pace. (ARR in April 2026 was up >100% vs. February 2026, improving from >50% growth from December 2025 to February 2026, as per management). We now forecast 2026E revenue of US\$461mn, implying ARR of cUS \$1bn by December 2026E, broadly in line with management's internal target.

We also raise our 2026-28 R&D expense forecasts by 18-23%, reflecting a more proactive approach to pursuing model leadership through scaling up model parameters. With improved operating leverage from a larger revenue base, we forecast MiniMax's 2026 non-GAAP net margin to narrow to -119% from -229% previously, despite absolute non-GAAP net loss increasing by 9% to US\$550m.

Knowledge Atlas Technology (Zhipu; 2513.HK)

We apply 160x P/S (prior: 145x) to Zhipu's 2026E revenue of Rmb5.5bn (prior: Rmb3.2bn), deriving our valuation of HK\$1,010bn and price target of HK\$2,200 (prior: HK\$1,160), based on a higher 2025-27E revenue CAGR of 332% (prior: 231%) and 0.4x 2026E price/sales growth (PSG), comparable to domestic AI chip companies (0.6x PSG).

Cross checking with SOTP, valuation could reach HK\$2,258 if we assume 85x P/ARR for Zhipu's open platform business (prior: 100x), based on our forecast December 2026E ARR of US\$1.5bn, and a 40x 2026E P/S for the on-premise deployment business (prior: 60x), reflecting the latest valuation benchmark of Palantir at 40x 2026F P/S.

MiniMax (0100.HK)

We apply a 20x P/ARR multiple to MiniMax's Dec 2026E ARR of US\$1.0bn (prior: US \$318m), deriving our valuation of US\$20bn and our price target of HK\$500 per share. Our P/ARR multiple has been lowered to 20x (from 125x previously), reflecting both the significant increase in our ARR forecasts and our view that MiniMax's models still need time to catch up with frontier SOTA models. Even so, this valuation remains at the lower end of the current OpenAI/Anthropic valuation range of 20–34x P/ARR, despite MiniMax's greater liquidity as a listed company.

The P/ARR multiple is comparable to the current private-market valuation multiples of global AI leaders, but significantly lower than Zhipu's, reflecting the diverging valuation gap between SOTA and non-SOTA coding models perceived by the market. We think SOTA models are targeting premium use cases, which could capture a larger revenue share and enjoy better pricing power, while other models may serve mass-market token usage, where model intelligence could face a larger risk of commoditisation and intense competition longer term.

While we recognise the widening valuation gap, we do not rule out MiniMax's potential to catch up, supported by its advantages in computing power access and R&D efficiency, while continue to monitor inflection in future model iterations that could lead to positive share price momentum.

UBS Research THESIS MAP a guide to our thinking and what's where in this report**PIVOTAL QUESTIONS****Q: Can Zhipu stay at the forefront globally in terms of coding and agentic capability?**

Likely. We highlight the resemblance of Zhipu's model development and monetization strategy to that of global leader Anthropic, which is highly focused on coding and agentic capability and has had accelerating demand from enterprises and developers with proven monetization potential. While industry competition remains intense, we are constructive on Zhipu's early-mover advantage, strong R&D team and experience, and continued technological innovation to keep developing frontier models with improving capability and rapid iteration.

Q: What is Zhipu's commercialization potential in open platform and on-premise deployment?

We forecast a 332% revenue CAGR in 2025-27, with the open platform portion rising from 26% in 2025 to 87% in 2027. We see significant monetization potential for Zhipu's open platform business, driven by robust enterprise AI demand, while improving model capability supports token consumption and pricing power. We also expect on-premise deployment to continue growing, supported by penetration among government and enterprises, though likely a lower priority.

UBSVIEW

We reiterate our Buy on Zhipu, and increase our price target to HK\$2,200. We are more positive on Zhipu's model leadership domestically, encouraged by its proven track record, and recent successful launch of GLM-5.2 gaining global recognition. We also turn more positive on its revenue ramp-up trajectory over 2026-28E, given rising demand for AI coding with broadening use cases. Longer term, we believe Zhipu is a key beneficiary of the ongoing shift from tokenmaxxing to token optimisation, as enterprises and users become more ROI focused. We expect to see continued model iterations, strengthening Zhipu's leadership in China's AI coding market and narrowing the gap with global leaders, and sustained structural cost efficiency, while the downside risks to its long-term global share gain are mainly around compute availability and geopolitical/regulatory uncertainty.

EVIDENCE

Model upgrades: 1) Zhipu launched GLM-5.1 High-Speed Version in May for selected enterprise clients, with output speed up to 400 TPS, c.8x faster than standard GLM-5.1 and above global peers' up to c.200 TPS. 2) Zhipu also launched its upgraded flagship model GLM-5.2 in mid June, featuring a 1mn-token context window and stronger long-horizon capabilities. GLM-5.2 further narrowed the gap with top-tier coding models globally while maintained competitive pricing. **AI infrastructure:** 1) Zhipu introduced LayerSplit, a hierarchical KV-cache storage solution, improving system throughput by 10-132%. 2) Through ZCube's new network architecture, Zhipu achieved 33% lower capex for switches and optical modules, 15% higher average GPU inference throughput and latency reduction. 3) GLM-5.2 enabled Day-0 inference adaptation across seven major domestic AI chip platforms.

WHAT'S PRICED IN?

We believe investors recognize Zhipu as a domestic leader, and assign a valuation premium vs. peers. Upcoming catalysts such as mid-year results, model upgrades, and A-share listing may sustain price momentum in the near term. Longer term, we believe the market still underappreciates the structural cost efficiency of Zhipu and other Chinese models, which position them well for global share gain, as well as their monetisation upside from surging token consumption driven by rising agent adoption.

UBS Research THESIS MAP a guide to our thinking and what's where in this report**PIVOTAL QUESTIONS****Q: Could MiniMax differentiate itself in AI model capability amid intense competition?**

Possibly. We think MiniMax adopts a differentiated strategy, committed to model development across multiple modalities from day one. Despite intense competition, we remain positive on its advantages in compute access and R&D efficiency. This could enable further scaling into larger-parameter text models (e.g., multi-trillion-parameter models), potentially driving stronger performance in future iterations. We continue to monitor upgrades of its video-generation models (i.e., Hailuo), which could further strengthen its differentiated positioning in multimodality.

Q: Can MiniMax scale up its commercialisation as its model capabilities improve?

Yes. We are constructive on MiniMax's revenue growth potential, supported by its comprehensive product lines across enterprise-facing (2B) and consumer-facing (2C) services and global-scale go-to-market strategy. We expect the company's continued model iterations and increasing focus on commercialisation to underpin its rapid revenue expansion, and forecast a 258% revenue CAGR for 2025-27, with increasing revenue mix from 2B services.

Q: Can MiniMax sustain its ongoing R&D investment?

Yes. We expect MiniMax to maintain persistently high R&D investment to support continuous model iterations, which is likely to weigh on near-term profitability and cash flow. That said, we believe its advantages in R&D efficiency, driven by better computing power utilisation and organisational efficiency, may enable it to pursue model performance leadership with its resources on hand.

UBSVIEW

We maintain our Buy rating on MiniMax with a lower price target of HK\$500. We view it as a key beneficiary of the ongoing shift in enterprise AI adoption from "tokenmaxxing" to more ROI-driven usage, and remain positive on its global share-gain potential long term. We are also constructive on its revenue/ARR ramp-up and believe the company is on track to achieve its US\$1bn ARR target by Dec 2026. While we acknowledge the widening valuation gap between the perceived SOTA and non-SOTA model providers, we do not rule out MiniMax's potential to catch up, supported by its advantages in compute access and R&D efficiency.

EVIDENCE

1) Management shared that ARR in April was up >100% vs. February 2026, accelerating from >50% growth in February 2026 vs. December 2025, driven by rapid growth in API and Token Plan revenue, while subscription revenue (e.g., Hailuo) remained solid. 2) MiniMax's text model M2.7's API gross margin exceeds 40%, above domestic peers (c20%). 3) MiniMax's compute expansion remains solid, with tokens per minute (TPM) sustaining at 10-20% WoW, supported by its long-established relationships with domestic vendors and better access to global compute supply. 4) MiniMax is [reportedly](#) developing a 2.7tn-parameter open-weight model, potentially launching as early as Q326.

WHAT'S PRICED IN?

With the recent price weakness, we believe the cautious investor feedback regarding M3 launch and lock-up expiry has been largely priced in, while upcoming catalysts include Southbound inclusion, mid-year results, and M series/Hailuo model launches. We also believe the market may have overlooked the monetisation potential of multimodality, as well as MiniMax's ARR and gross margin upside, supported by its advantages in computing power access and R&D efficiency.

Valuation Method and Risk Statement

We believe key sector risks include: 1) an evolving competitive landscape and intensifying competition; 2) fast-moving trends in technology, as well as internet users' needs and preferences; 3) uncertain monetisation; 4) the rising cost of traffic acquisition, content and brand promotions; 5) the upkeep of IT systems; 6) expansion into international markets; 7) adverse changes in market sentiment; and 8) regulatory risks.

MiniMax: We adopt Price/ARR as our valuation methodology for MiniMax. Key downside risks include: macro and geopolitical uncertainties that may constrain AI adoption; competitive and operational challenges delaying monetisation and pressuring margins; data-related model training risks; user-generated content governing risks; and disruption of key service providers.

Key upside risks include: easing geopolitical tensions and export restrictions that may improve access to advanced hardware and accelerate model upgrades; technological breakthroughs in AI training and infrastructure efficiency that could enhance model capability and margins; and faster user adoption and commercialisation driving stronger monetisation and profitability.

Knowledge Atlas Technology (Zhipu, or Z.ai) : We adopt price-to-sales (P/S) as our valuation methodology for Zhipu, cross checked with SOTP analysis.

Key downside risks include: macro and geopolitical uncertainty that may constrain AI adoption; competitive and operating challenges delaying commercialisation and pressuring margins; potential reduction in key account (KA) customers as their in-house model capability improves; data-related risks affecting model training and performance; regulatory risks related to data security and AI governance; and potential disruptions in access to key computing infrastructure and service providers.

Key upside risks include: easing geopolitical tension and export restrictions that may improve access to advanced hardware and accelerate model upgrades; faster-than-expected improvement in model capability, both in magnitude and iteration speed, supporting higher usage and pricing; technological breakthroughs in model training and inference efficiency that could enhance model capability and margins; stronger-than-expected enterprise adoption, particularly in the to-B/to-G segments, driving faster commercialisation; and the emergence of new AI use cases supporting higher monetisation and revenue growth.

Quantitative Research Review

UBS Global Research publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. The views for this month can be found below. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For previous responses please make reference to (i) previous UBS Global Research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at <https://neo.ubs.com/quantitative>, or contact your UBS sales representative for access to the report or the Quantitative Research Team on ubs-quant-answers@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research Team on the email above.

UBS Global Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage ¹	IB Services ²
Buy	FSR is > 6% above the MRA.	55%	24%
Neutral	FSR is between -6% and 6% of the MRA.	40%	21%
Sell	FSR is > 6% below the MRA.	6%	21%

Source: UBS. Rating allocations are as of 30 June 2026.

1:Percentage of companies under coverage globally within the 12-month rating category.

2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:**Forecast Stock Return (FSR)** is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:**UK and European Investment Fund ratings and definitions are:** **Buy:** Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Consultation (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at <https://www.theocc.com/publications/risks/riskchap1.jsp> or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

UBS notes that no globally accepted framework or definition (legal, regulatory or otherwise) currently exists, nor is there a market consensus as to what constitutes an "ESG" (Environmental, Social or Governance) or an equivalent-label, or as to what precise attributes are required for the Information (as defined below) to be defined as ESG or equivalently-labelled. Any information, data or other content including from a third party source contained, referred to herein or used for whatsoever purpose by UBS or a third party ("Information"), in relation to any actual or potential ESG objective, issue or consideration is not intended to be relied upon for ESG classification, regulatory regime or industry initiative purposes ("ESG Regimes"). Nothing in these materials is intended to convey, suggest or indicate that UBS considers or represents any product, service, person or body mentioned in these materials as meeting or qualifying for any ESG classification, labelling or similar standards that may exist under the ESG Regimes. UBS has not conducted any assessment of compliance with ESG Regimes. Parties are reminded to make their own assessments for these purposes.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For further information on the ways in which UBS Global Research manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS Global Research recommendations, please visit <https://www.ubs.com/disclosures>.

UBS Global Research will initiate, update and cease coverage solely at the discretion of UBS Global Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

UBS Global Research may utilise artificial intelligence tools ("AI Tools") in the preparation of this document. Notwithstanding any such use of AI Tools, this document has undergone human review.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by UBS Global Research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Please note that all transactions conducted by UBS are consistent with sanctions regulations imposed by Switzerland, the European Union, the United Nations, the United Kingdom and the United States, per UBS' global sanctions policy. UBS opinion as to future investment worthiness assumes no new sanctions are imposed.

US persons are prohibited from purchasing or selling securities of certain companies designated as being associated with the Chinese Military in accordance with the amended US Presidential Executive Order 13959.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit <https://www.ubs.com/research-methodology>.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at <https://www.theocc.com/about/publications/character-risks.jsp> or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio incorporating ESG factors or Sustainable Investing considerations may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ.
