

China alt-data trackers chartpack (Series 58)

Pace up (narrowly) in exports & special LGB issuance

After the largely stable June manufacturing PMIs, all eyes are on the hard activity data due over the next two weeks to gauge near-term momentum and assess how the economy is positioned heading into 3Q. We have updated our alt-data trackers (vs. our [last update](#)) and our key takeaways are below.

- **Exports:** Port tracking shows departing container (+8.5%) and bulk (+10.1%) shipping deadweight tonnage both accelerated in m/m nsa terms in June. Annual growth may have picked up further. In aggregate, departing shipments deadweight tonnage (excluding tankers) rose 17.2%oya in June (vs. 7.7% in May), suggesting volume growth is picking up alongside recent price gains. Oil tanker arrivals remained subdued in June, down over 30%, similar to May.
- CCFI to USEC, USWC rose 14.3%, 20.6%, respectively, compared to two weeks ago; CCFI to the Persian Gulf/Red Sea route increased by another 8.6%.
- China's domestic and int'l **flight cancellation rate** fell back notably in the second half of June as energy prices started to normalize.
- **Production:** Processed crude oil production contraction may have deepened in June (vs -9.1%oya in May), though petroleum asphalt plants' operating rates began to recover in the second half of the month. Auto IP decline may have widened in June (vs -3.2%oya in May) while steel IP contraction may have narrowed in June (vs -2.8%oya in May). Coke oven plants stabilized in the second half of June.
- **Fiscal:** June government bond issuance reached 1138bn yuan, broadly matching May's 1140bn yuan issuance. Special LGB issuance rebounded strongly, signaling reactive acceleration, but the uncertainty remains around proceeds deployment to projects. Full-year 200bn yuan of funding for equipment upgrades has been fully deployed, per the NDRC. If recent weakness persists, we expect faster fiscal deployment in 3Q.
- **Monetary:** PBOC net injected 583bn yuan via pledged 7-day OMO and 200bn yuan via MLF in June, while withdrawing 300bn yuan via outright OMO.
- The PBOC also initiated **overnight reverse repos** at the end of June, in line with Governor Pan's announcement at the Lujiazui forum. But the operation's rate was not disclosed, signaling a near-term focus on 7-day reverse repo. A cut could become more likely in 2H if growth weakness persists and outweighs inflation risks.
- **Auto sales** remained a drag on retail sales. Passenger car retail sales fell 21%oya in June, partially on lower per-car trade-in subsidies and purchase tax exemptions, and higher fuel costs. NEV sales fell a narrower 7%.
- **Housing:** Secondary home sales continued to improve in June, while new home sales contraction widened.
- **Inflation:** With calmer energy conditions under the US-Iran peace deal, gasoline, diesel and LPG prices continued to moderate in the last ten days of June. Petrochemical products prices fell sharply to near pre-conflict levels, despite a continued upturn in sulfuric acid prices. Agricultural food prices fell 0.5%oya in while pork wholesale prices contraction remained elevated.

1. Mapping: High-frequency trackers --> official activity

Regarding the mapping efforts from high-frequency data to monthly official activity tracking:

- Operating rates for petroleum asphalt plants suggest **processed crude oil production** contraction may have deepened in June, (vs -9.1%oya in May).
- Operating rates for tire plants suggest **auto IP** decline may have widened in June (vs -3.2%oya in May).
- Operating rates for steel rebar suggest that **steel IP** contraction may have narrowed marginally in June (vs -2.8%oya in May).
- **Housing transactions** for 30 major cities fell 7.3%oya in June (vs -1.4% in May).
- **Port tracking** suggests that export volume growth may have picked up in June, as departing shipments deadweight tonnage (excluding tankers) rose 17.2%oya in June (vs. 7.7% in May).

Figure 1.4: China exports

Source: Elane Shipping, China Customs, J.P. Morgan; 1/ Latest for June 2026, excl. tankers

2. Trade

China's outbound container costs increased further across major routes, despite the signing of a 60-day US-Iran MoU. By destination, CCFI to USEC, USWC rose 14.3%, 20.6%, respectively, compared to two weeks ago; CCFI to the Persian Gulf/Red Sea route increased by another 13.6%. Baltic Dry Index ticked down further after several weeks of increases since April. US-bound shipping rose 6.9%oya or 15.8% m/m nsa in June (vs 25.9%oya or 1.5% m/m nsa in May).

- **Container ships** usually carry consumer goods, as well as some machinery equipment and electronics. Departing container ships' deadweight tonnage rose 4.6%oya or 8.5% m/m nsa in June. Arriving container ships' deadweight tonnage fell 0.4%oya or up 6.7% m/m nsa.
- **Bulk carriers** transport unpackaged bulk cargo for grain, coal, iron ore, steel, etc., in

their cargo holds. Departing bulk ships' deadweight tonnage rose 20.9%oya (or 10.1%/m/m nsa), while arriving bulk ships' deadweight tonnage rose 23.3%oya or 8.0%/m/m nsa.

- **Oil tanker** arrivals remained subdued in June, down over 30%, similar to May.

China's domestic and international flight cancellation rates fell back notably in the second half of June as energy prices started to normalize.

China's soybean imports from the US decreased in May, after an uptick in April. The White House statement said China would purchase at least US\$17bn of US agricultural products annually from 2026 to 2028.

Figure 2.10: China flight cancellation rate

Figure 2.11: China imports of soybeans from world

Figure 2.12: China imports of soybeans from US

3. Sales and production

- **Auto sales:** According to CPCA, passenger car retail sales fell 21%oya in June, partially on lower per-car trade-in subsidies and purchase tax exemptions, and higher fuel costs. NEV sales fell a narrower 7%. This suggests that auto sales may have remained a drag on headline retail sales in June.
- **Operating rates** of petroleum asphalt plants rebounded in the second half of June, though still much lower than the pre-Middle East conflict levels. Operating rates for steel rebar held steady in June, while semi-steel and all-steel tires declined modestly. Coke oven plants' operation rates stabilized in the second half of June after the modest fall since mid-May.

Figure 3.1: Weekly auto retail sales

Figure 3.2: Operating rate for all-steel tire

Figure 3.3: Operating rate for semi-steel tire

Figure 3.4: Operating rate for petroleum asphalt plants

Figure 3.5: Operating rate for steel rebar at major steel plants

Figure 3.6: Operating rate for coke oven plants

4. Policy: Government bond issuance and liquidity operations

June's government bond issuance reached 1138bn yuan, broadly matching May's 1140bn yuan of issuance. Special LGB issuance rebounded strongly, signaling a reactive acceleration, but the uncertainty remains around proceeds deployment to projects. If recent weakness persists, we expect faster fiscal deployment in 3Q.

- **CGB issuance** nearly halved to 318bn yuan in June from 708bn yuan in May. Ytd issuance reached 40.2% of the annual issuance target, trailing last year's 50.8% pace. In terms of further breakdown, **special CGB issuance remained solid at 204bn yuan in June (vs. 249bn yuan in May), followed by 80bn yuan in July mtd.** According to the NRDC, full-year 200bn yuan funding for equipment upgrades has been fully deployed.
- **Special LGB issuance** rose strongly to 572bn yuan in June (vs. 161bn yuan in May), exceeding last June's level, signaling a reactive acceleration in utilizing the remaining fiscal resources approved at the March NPC. This has lifted year-to-date issuance to

47.0% of the annual target, now catching up with last year's pace.

- **General LGB** issuance ticked up to 41bn yuan; **refinancing LGB** reached 207bn yuan.
- PBOC net injected 582.6bn yuan via pledged 7-day OMO and 200bn yuan via MLF in June, while withdrawing 300bn yuan via outright OMO. **The PBOC also initiated overnight reverse repos at the end of June, with 300bn yuan on June 29 and 600bn yuan on June 30. This is in line with Governor Pan's announcement at the Lujiazui forum. But the operation's rate was not disclosed, signaling the PBOC's near-term focus on 7-day reverse repo.**
- The surprisingly soft April activity data and downside risks to 2Q GDP should keep a rate cut on the table. A more hawkish Fed may complicate the backdrop, but China's decision should remain domestically driven given a resilient CNY. A cut could become more likely in 2H if growth headwinds intensify and outweigh inflation risks. As usual, a 10bp move would likely be more of a policy signal than a meaningful easing impulse.

5. Housing

Secondary home sales continued to improve in June, albeit at a slower pace, while new home sales contraction widened.

- The contraction in 30 major cities' **new home sales** widened to -7.3% oya in June from -1.4% in May, after a brief growth of 2.8% in April. Major cities' **secondary home sales** rose a solid 12.3% in June (vs. 18.0% in May).
- Centaline's **sales manager confidence index** and the secondary home asking price index both edged down in June.

Land sales values were below last year's level from mid- to end-June, continuing to weigh on government fund account revenues. The sales premium rate moderated from its recent peak before a brief uptick, likely affected by a few auction cases.

6. Inflation

- With calmer energy conditions under the US-Iran peace deal, gasoline, diesel and LPG prices continued to moderate in the last ten days of June, while LNG prices also fell after an uptick in mid-June. Coal prices were relatively elevated around the recent peak, partially on summer seasonal demand.
- Most petrochemical products prices fell sharply in the last ten days of June, despite a continued upturn in sulfuric acid prices. Prices of polyethylene, polyethylene, rubber, petro benzene have declined to near pre-conflict levels. Polyester yarn and methanol prices have also eased, though they remain above pre-conflict levels.
- Agricultural food prices fell 0.5%oya in June (vs -0.9% in May), further narrowing the drag on headline CPI. Rice, wheat and corn prices were largely stable.
- Pork wholesale price deflation remained elevated at -28.3%oya in June (vs -

28.5%oya in May), as overcapacity in the industry prolongs.

- **Lithium** carbonate prices were volatile over the past month, ending June slightly lower than the month-start, while **polysilicon** prices were largely unchanged at a subdued level relative to early 2026. Copper prices remained elevated on AI-related demand, while aluminum prices trended lower. Cement prices were relatively steady, while steel rebar prices ticked down.
- Against the backdrop of lower global oil prices, the NDRC adjusted domestic gasoline and diesel prices down by RMB 950/ton and RMB 915/ton respectively on July 3, marking the largest cut so far this year.

Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market

conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
