

Kakao Corp. (035720.KS)

2Q26E preview; Core Platform resilient; AI launch catalyst remains intact; Buy

035720.KS 12m Price Target: **W49,000** Price: **W34,650** Upside: **41.4%**

We preview Kakao's 2Q26 results and expect a broadly solid quarter, supported by Platform revenue momentum. Talk Biz ads appear to have sustained YoY growth into 2Q, and Commerce should benefit from deferred revenue from the March Shopping Festa and Family Month promotions in May. That said, we would avoid being overly aggressive on margin despite positive Platform seasonality, given higher Piccoma marketing spend and the mechanical Portal Biz impact from AXZ deconsolidation.

The key near-term debate remains AI. Kakao's agentic AI service connection with vertical partners is still expected to launch before 2Q earnings, consistent with the official timeline. The important question is not whether Kakao has an AI roadmap, but whether the launch can demonstrate a tangible value proposition: connecting KakaoTalk conversation intent to high-frequency actions, partner services, and eventually transactions.

We maintain Buy with an unchanged 12m TP of W49k. The core earnings base is supported by Talk Biz, Commerce, Pay, Mobility, and restructuring, while AI expectations have already been reset. We think the upcoming agentic AI launch could be an important sentiment catalyst if it shows that Kakao can move beyond AI discovery and begin proving the connection-to-action thesis inside KakaoTalk.

Action: We revise our earnings estimates, reflecting: 1) the deconsolidation of Kakao's portal business with the completion of AXZ transaction in May, 2) solid growth momentum of core Talk Biz revenue, and 3) recent trends of Platform/Contents segment. As a result, our 2026E/27E/28E top line is revised down by -1%/-2%/-1% and our OP -5%/-6%/-3%. Our NP is revised down by -6%/-6%/-3%.

Catalyst: We expect Kakao's agentic AI service connection with vertical partners to launch before 2Q earnings (as guided by the management during 1Q earnings call) to be a key near-term catalyst.

That said, we believe investor focus should be less on the launch itself, and more on evidence of repeat usage, partner expansion, transaction completion and user engagement that could gradually validate Kakao's AI monetization framework.

Key numbers

- **We expect 2Q consolidated top line to come in at W2trn (+6% YoY and +5% QoQ) and OP W214bn (+5% YoY and +1% QoQ), broadly in-line with BBG consensus:** While top line growth momentum should be supported by Talk Biz ads (+20% YoY), Commerce (+16%), Mobility (+10%), and Pay (+26% YoY), we expect Portal Biz impact from AXZ deconsolidation from May to slightly offset revenue growth (expect Portal Biz revenue to decline -40% YoY). Meanwhile, on OP, we expect relatively high marketing spend on Piccoma to slightly pressure margins.
- **Key numbers to track (thesis pillars):**
 - **Core Platform recovery:** We continue to monitor Talk Biz growth, Biz Message expansion, advertising inventory improvement following the KakaoTalk revamp, and operating leverage. We believe these remain the primary near-term earnings drivers and now carry greater weight within our investment thesis.
 - **Portfolio restructuring and earnings quality improvement:** We will look for continued reduction in non-core subsidiary losses and improvements in consolidated earnings visibility. Successful execution should help to improve earnings quality and allow management to focus more clearly on core operations.
 - **AI ecosystem development:** Rather than headline product launches, we focus on measurable ecosystem progress including external partner onboarding, breadth of vertical integrations, and management commentary regarding commercial deployment. Broader ecosystem participation would increase our confidence in Kakao's LT AI monetization framework.
 - **User engagement and transaction conversion:** We believe the key proof point is whether users increasingly complete tasks directly within KakaoTalk, including search, reservations, commerce and payment-linked actions. Repeat user behavior is likely to matter more than initial download metrics.
 - **Early monetization evidence:** We will monitor disclosure around AI-assisted search advertising, CPS economics and transaction-linked revenue contribution. We believe meaningful valuation expansion requires evidence that AI usage can translate into sustainable economic value.

2Q26E earnings preview

We expect 2Q consolidated top line to come in at W2trn (+6% YoY and +5% QoQ) and OP W214bn (+5% YoY and +1% QoQ), broadly in-line with BBG consensus. While top line growth momentum should be supported by Talk Biz ads, Commerce, Mobility, and Pay, we expect Portal Biz impact from AXZ deconsolidation from May to slightly offset revenue growth. Meanwhile, on OP, we expect relatively high marketing spend on Piccoma to slightly pressure margins.

GS view

We view 2Q as a solid core Platform quarter, but the more important catalyst is the upcoming agentic AI launch before the earnings results, which should begin to test whether Kakao can convert its connection moat into high-frequency actions inside KakaoTalk.

Solid core platform performance

- **Talk Biz:** Biz Message ads and DA both appear to have continued YoY growth in 2Q (GSe +25% YoY/+16% YoY for Biz Message/DA). In our view, core ad demand remains healthy and Talk Biz remains the key driver of Platform resilience.
- **Commerce:** 2Q should see improving YoY growth trend vs. 1Q due to revenue deferred from the March Shopping Festa and Family Month promotions in May. Additionally, self-purchase continues to expand into categories such as cosmetics and food, supporting GMV growth.
- **Portal Biz (AXZ):** The sale of AXZ to Upstage was completed in May ([link](#)), deconsolidating Daum portal from Kakao. This should impact two months of subsidiary ad revenue in 2Q, and we expect Portal Biz revenue to fall -40% YoY due to the impact.

Content segment remains stable but still not a major upside driver

- **Piccoma:** Piccoma held its 10th-year anniversary in Apr., driving some peak-season marketing spend. That said, user KPI response appears more measured, which suggests that Content is unlikely to drive meaningful upside in 2Q.
- **Music:** In 2Q, Music segment should remain stable (+4% YoY), helped by IP activity and SM-related contribution.

AI service launch catalyst remains intact

- **Kanana in KakaoTalk:** We expect Kakao's agentic AI service connection with vertical partners to launch before 2Q earnings, as guided by the management during 1Q earnings call. In our view, the upcoming launch before 2Q earnings is important as it can be the first proof point to show whether KakaoTalk's connection moat can translate into high-frequency actions or transactions.

Earnings revision

We revise our earnings estimates, reflecting: 1) the deconsolidation of Kakao's portal business with the completion of AXZ transaction in May, 2) solid growth momentum of core Talk Biz revenue, and 3) recent trends of Platform/Contents segment. As a result, our 2026E/27E/28E top line is revised down by -1%/-2%/-1% and our OP -5%/-6%/-3%. Our NP is revised down by -6%/-6%/-3%.

Valuation and risks

Applying an unchanged WACC of 10.6% (based on a beta of 1.25x and ERP 6.5%) and terminal growth of 2%, our 10-year DCF valuation yields W14.6trn (previously W14.5trn). To this, we add the NAV of key subsidiaries and affiliates (i.e., ex-core) after applying a 30% holdco discount, resulting in an additional W7trn (previously W6.9trn). Accordingly, we derive a total valuation of W21.6trn, or W49,000 per share (unchanged), with 41% implied upside.

Key downside risks: 1) core Platform recovery proving weaker than expected - Slower Talk Biz growth, softer advertising demand, lower-than-expected Biz Message expansion, or limited operating leverage following the KakaoTalk revamp could delay the earnings recovery that now represents the primary driver of our investment thesis; 2) slower execution of portfolio restructuring - Delays in announced asset disposals, weaker-than-expected reduction in subsidiary losses, or renewed investments in non-core businesses could reduce improvements in consolidated earnings visibility and delay the anticipated improvement in earnings quality; and 3) commercialization of agentic AI taking materially longer than expected due to slower ecosystem development, limited partner participation, weak user adoption, or lower transaction conversion -

Should Kakao fail to establish compelling AI-native use cases or monetize conversational traffic through search advertising or CPS economics, the long-term optionality embedded in our valuation may not materialize.

Price Target Risks and Methodology – Kakao Corp.

Valuation methodology: We are Buy-rated on Kakao with an SOTP-based 12-month target price of W49,000. We value the core business, including AI services, at W14.6trn (based on a 10-year DCF, using a 10.6% WACC and a 2% terminal growth rate). To this, we add the NAV of key subsidiaries and affiliates (i.e., ex-core) after applying a 30% holdco discount, resulting in an additional W7trn. Accordingly, we derive a total valuation of W21.6trn, or W49,000 per share.

Key downside risks: 1) core Platform recovery proving weaker than expected - Slower Talk Biz growth, softer advertising demand, lower-than-expected Biz Message expansion, or limited operating leverage following the KakaoTalk revamp could delay the earnings recovery that now represents the primary driver of our investment thesis; 2) slower execution of portfolio restructuring - Delays in announced asset disposals, weaker-than-expected reduction in subsidiary losses, or renewed investments in non-core businesses could reduce improvements in consolidated earnings visibility and delay the anticipated improvement in earnings quality; and 3) commercialization of agentic AI taking materially longer than expected due to slower ecosystem development, limited partner participation, weak user adoption, or lower transaction conversion - Should Kakao fail to establish compelling AI-native use cases or monetize conversational traffic through search advertising or CPS economics, the long-term optionality embedded in our valuation may not materialize.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research, unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to <https://research.gs.com>.
