China Consumer Strategy

May retail sales down 0.6% YoY, a consecutive miss

China's May 2026 retail sales fell by 0.6% YoY (the first decline since Dec-22), a sequential deterioration from Apr (+0.2%) and Mar (+1.7%), missing Bloomberg consensus (down 0.2%). Durable goods continued to be the drag, including home durables (down 15% on a high base); gold & jewelry (down 9%) - reflecting recent volatility in gold prices (though narrowing from down 21% in Apr); and autos (down 16%). YTD weakening demand triggered further concerns among investors on topline growth for consumer companies, and we think there is a higher possibility that more companies may guide down during the 2Q26 result season. Investors agree that it's too early to call the bottom and hence need to stay selective and stick with quality names.

- **Stock views.** We advise investors to focus on two groups: (I) quality names with limited downside and earlier earnings stabilization - **Anta (OW)** for a well-executed multi-brand portfolio and overseas upside; **Nongfu (OW)** for strong brand momentum and a margin buffer; **Guming (OW)** for a continued runway for network growth and improving brand equity. (II) Turnaround stories – **Chagee (OW)** for China GMV stabilization in 2QTD and upside in shareholder return; **Luckin (OW)** for better-than-feared SSS decline and earnings release from 2Q/3Q26. Investors may want to avoid those highly exposed to raw material hikes (CR Beverage, etc).
- **May 2026 retail sales breakdown.** Online/offline: online retail sales grew by 3.4% YoY, outpacing offline's -1.8% YoY. Top 5 YoY performing categories: soft drinks (+6%), tobacco and alcohol (+5%), medicine (+4%), apparel & textile (+4%) and cosmetics (+3%). Bottom 5 YoY performing categories: autos (down 16% YoY), home appliance (down 16%), home furnishing (down 14%), gold & jewelry (down 9%) and furniture (down 9%).
- **CPI** was up 1.2% YoY in May (vs. 1.2% in Apr), with food CPI down 1.7% YoY and non-food CPI up 1.9% YoY. Core CPI was up 1.1% YoY (vs. 1.2% in Apr).
- **Unemployment rate** was 5.1% in May, up 0.1ppt YoY and down 0.1ppt MoM.
- **Sector share price/valuation.** China consumer staples/discretionary sector share prices are down 5.5%/2.7% over the past one month (vs MSCI China/HSI Index -3.7%/-4.3%). Their forward P/E has de-rated 9.6%/6.5% to 15.2x/12.1x (vs MSCI China/HSI Index de-rating of 3%/3.7% to 11.7x/11.2x).

Important Disclosures

Company-Specific Disclosures: J.P. Morgan does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Important disclosures, including price charts and credit opinion history tables (if applicable), are available for compendium reports and all J.P. Morgan-covered companies, and certain non-covered companies, by visiting <https://www.jpmm.com/research/disclosures>, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock’s expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts’ coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst’s coverage universe can be found on J.P. Morgan’s Research website, <https://www.jpmorganmarkets.com>.
